

NetSuite SuiteSolutions – Auto Charge Credit Card

Description and Terms of Service

Overview of Functionality

A sales order with a payment method of credit card has to go through fulfillment and then be billed as a cash sale. Each credit card charge has to be submitted and confirmed individually before moving to the next transaction. This can be a time consuming process.

This SuiteSolution provides a scheduled process that can automatically trigger the billing and charge the credit card to capture the payment. The billed amount is equal to the amount fulfilled, and the credit card is charged for the fulfilled amount.
