NetSuite SuiteSolutions – PDF Generator

Description and Terms of Service

Overview of Functionality

SuiteSolutions – PDF Generator provides a more flexible style on printing and email functionality for entity, transaction and custom records.

This SuiteSolution supports the following features:

1. Enables generation of PDF files for transactions, custom records and entities using HTML templates.
2. A saved search can be used to source data for use by the template.
3. Supports printing of an individual record from the transaction/custom record using the 'Print PDF' button on the form.
4. Supports bulk printing and bulk emailing functionality only for transactions using a custom interface. The interface allows the user to export bulk transactions into one PDF file and email it to the current user.

Limitations:

1. Only one default template can be used per record.
2. Big Faceless Java PDF Library is used to generate PDF files. Only formatting supported within this library is supported within the HTML template.
3. Bulk printing/emailing functionality allows a maximum of fifty transactions to be selected at one time.
4. Only one saved search can be used per template and only one record type line data is supported within the saved search (i.e. Expense and Item lines can't be combined).
5. HTML template fields should not contain any JavaScript and it should be purely HTML.
6. Output will always be in a PDF file format.
7. The templates are included in the bundle only as a sample.
8. All standard NetSuite Service usage and governance limits including the file size limitations apply.

Terms of Service:

SuiteSolutions are pre-built offerings used to accelerate the delivery of custom functionality into Customer's account. Any custom configurations or code deployed with SuiteSolution is not locked and can be further customized in Customer's NetSuite Service account. It is Customer's sole responsibility to review the functionality and limitations enabled by this SuiteSolution item before procuring. Unless specifically agreed in writing in a separate Statement of Work, SuiteSolutions are not supported, maintained or upgraded by Oracle. In addition, unless otherwise agreed upon in writing pursuant to a Statement of Work between Oracle and Customer, Customer is responsible for all testing and configuration of all SuiteSolutions. SuiteSolutions can only be deployed to the account of the specific

Customer that has procured the SuiteSolution. SuiteSolutions are for Customer's internal use only for use with Customer's NetSuite Service account and cannot be re-bundled and/or shared. Customer may continue to use this SuiteSolution item during the term of their use of the NetSuite Service.

This item shall be considered a Deliverable (as such term is defined in the PS Terms) and is provided to you pursuant to and governed by (in order of preference, as applicable): (i) the Professional Services Addendum to the Oracle Subscription Services Agreement entered by and between the parties, (ii) the separate Oracle Professional Services Agreement entered by and between the parties; or (iii) if neither (i) nor (ii) are applicable, the Oracle Professional Services Agreement found at www.netsuite.com/termsofservice (the "PS Terms").

The SuiteSolution may include open source software programs licensed under different terms or licensed by a vendor other than Oracle. To the extent that Oracle includes open source software in or with the SuiteSolution ("Open Source Software"), the licenses governing such Open Source Software will apply to Customer's access and use of such Open Source Software. A list of certain Open Source Software notices applicable to the SuiteSolution is set forth below. Customer agrees to comply with all applicable provisions of the licenses and terms governing Open Source Software. Notwithstanding anything to the contrary set forth herein or in the PS Terms, Oracle is not responsible for, and makes no warranties, express or implied, related to Open Source Software and will have no liability for Customer's use of such Open Source Software.

Open Source Software:
