

Everybody hates politicians. This shows that the real problem isn't particular ones, but government itself. The function of government is to centralize power and impose domination: to *enforce*, to *punish*, to *administer*. Politicians preside over an economy more oppressive and invasive than any dictatorship could be by itself.

Individual politicians only maintain our loyalty because we fear the ones who are *even* worse—but we need to get rid of the means by which they rule us in the first place.
