U.S.-based CFACT, along with its Australian partners, is hosting a showing of its new ground-breaking documentary, *Climate Hustle*, and you're invited! Following each event, join film director CFACT Executive Director, Craig Rucker and film host and publisher of ClimateDepot.com Marc Morano, for a question and answer session. Get the behind the scenes scoop on both the film and the US decision to withdraw from the Paris Climate Accord.

We are pleased to be working with the following Australian organizations:

## **We hope to see you at one of these great events!**

### **FILM DESCRIPTION:**

Scorching temperatures, melting ice caps, killer hurricanes and tornadoes and disappearing polar bears. The end of civilization as we know it!

Are emissions from our cars, factories, and farms causing catastrophic climate change? Is there a genuine scientific consensus? Or is man-made “global warming” an overheated environmental myth being used to push for drastic government control and a radical “Green” energy agenda?

This film, hosted by award-winning journalist Marc Morano of CFACT’s ClimateDepot.com, features interviews and comments from no fewer than 30 renowned and well-regarded scientists and experts.

These include a number of individuals who were former global warming believers or came from the political Left but were compelled to speak out after re-examining the evidence or watching the debate about global warming degenerate into absurd political demagoguery.

These are people like:

Dr Judith Curry, former chair of the School of Earth and Atmospheric Sciences at the Georgia Institute of Technology;

Ivy League geologist Dr Robert Giegengack of the University of Pennsylvania;

Former Greenpeace co-founder and ecologist Patrick Moore;

UN IPCC lead author and economist Dr Richard Tol of the Netherlands;

And the late Dr Bob Carter of James Cook University.

Viewers of Climate Hustle will get an informative and entertaining look at the media hype stoking the climate fires, along with the science refuting the outlandish claims of activists and alarmists who want to blame every strange weather event – and bizarre societal evil – on man-made global warming.
