

## Kids' Footwear Sizing Guide

Please print this chart on 8.5" x 11" paper at full size (100%) to ensure correct shoe sizing. Double check the chart's accuracy by placing a credit card on the marker below.

### Determine Your Size

- Place one heel along the line at the base of the chart.
- Put your weight on the foot you are measuring and relax your toes.
- The line that touches your longest toe indicates your size. The shorter lines in between indicate half sizes.
- We recommend measuring both feet and purchasing shoes to fit your larger foot.

### Wiggle Room™

With the removable Ariat® Booster Bed™ featured in all Ariat's kids' boots, a child can keep their favorite boots even longer. As a child's feet continue to grow, just remove the Ariat® Booster Bed™ from beneath the footbed to give their feet some extra wiggle room.

**\* Please note that this print out, like any two-dimensional measuring tool is meant as a guide, and can only approximate your size. For best results, please stand when measuring your feet and wear the socks/stockings you will wear with your new footwear.**

### Size Check
