

Hiroshima Day

Stop the Nuclear Cycle

Hiroshima Day Rally

2pm Sunday

August 5

State Library

(cnr Swanston and La Trobe, city)

Since the election of the Howard Coalition Government in 1996, there has been a massive expansion of the nuclear industry in Australia. 2001 saw the opening of Beverley, the first new uranium mine in Australia for over a decade.

The WA or SA outback is the proposed site for an international toxic waste dump. A \$500M upgrade/new nuclear reactor is planned for Sydney. *The entire nuclear industry is about putting profits before the interests and lives of the worlds' peoples.*

On this day we remember the devastation caused by the atomic bomb used against the people of Hiroshima. 56 years on and the world still lives with the threat of nuclear war.

We can play an important part in stopping the global nuclear madness by stopping all uranium mining and reactors in Australia.

NO uranium mines
NO radioactive dumps
NO new nuclear reactor
NO nuclear weapons
NO to the USA's National Missile Defence system
NO nuclear ships in our ports
NO transport of nuclear waste through our cities
No food irradiation

YES to indigenous rights, alternative energy, and a sustainable future

Rally for a Nuclear Free Australia

Organised by the Coalition for a Nuclear Free Australia
