Make Your Own Easter Bonnet

Instructions:
To make your Easter Bonnet all you have to do is colour in the pictures and then cut along the dotted lines. On the second page are two shapes that will join together to make a circle for your head. Cut along the dotted lines and then measure the pieces to fit around your head. Use a pencil to mark where to cut to size and then staple the two pieces together to form a circular crown. Then you can glue on your decorated picture eggs.
