## SETTING UP YOUR SCHOOL GARDEN

CERES has a holistic approach to garden design which incorporates Permaculture principles and methods.

This catalogue has been designed to provide schools with information about garden beds, compost systems and chook sheds, and a service for designing and installing school gardens.

To set up a productive, sustainable and engaging school garden, CERES provides a site consultation, garden design service, and installation of any of the products included in this catalogue, including custom designs.

A **site consultation is required** as this provides details about your school site including garden requirements and accurate information to install the garden beds. Generally, a site consultation will take between 1.5 – 2 hours.

### Site Consultation

- **Client Brief:** Considerations include your expectations and goals, budget, and existing resources
- **Site Assessment:** Considerations include topography, aspect, water source, location, and accessibility. A site assessment helps to inform any constraints that may affect your desired outcome
- **Site Report:** Recommendations and garden plan

*The cost of a Site Consultation is \$150 per hour ex GST (plus travel)*

### Quotation

From the site consultation, we will provide an accurate quotation for the installation of your selected garden beds, including detail for plant selection, irrigation, and soil.

---

### Custom Garden Design *(optional)*

The catalogue includes an option for custom garden designs to suit you. We can work from your own pre-existing design or, alternatively, CERES can develop a concept sketch and final design to suit your school needs. Design work from concept to final design is charged at \$50 per hour.

---

### Involving students in Garden Design

We offer opportunities for students and teachers to be involved in the design and construction process.

- **CERES Incursion - Hands on Gardening.** Students will participate in hands-on activities and investigate how food is produced in managed environments. Students will focus on ecology, soil quality, natural pest control, crop rotation and plant selection for their own school garden.
- **CERES Excursions – Earth Discovery.** Visit CERES Community Environment Park. Students will learn about different types of gardens, food production, compost systems and energy efficiency which can influence the design of their own school garden.

## PRODUCTS FOR YOUR SCHOOL GARDEN

Prices are for the constructed garden beds only; soil, irrigation and plants are provided at an additional cost.

*\*Site preparation and vehicle access restrictions may incur extra labor costs.*

Prices provided are the RRP as of November 2017.

## CHOOK PENS

There are a variety of chook pens available. Visit the Coops and Cages and the Chicken Coop websites for examples of what is available out there - <https://www.coopsandcages.com.au/chicken-coops-melbourne/> or <http://www.mychickencoop.com.au/chicken-coops/>. Prices are subject to change and will include a set up cost.

CERES can also provide consultation and the supply of suitable chickens.

Custom builds also available, contact us for further details.
