

## Modelo is a web-based presentation and communication platform for architects.

Present, markup and share interactive 3D models in a simple interface, while knowing all of your project data is secure and archived for future use.

Founded by an architect fed up with the digital tools available for 3D designers. Modelo's mission from the start has been to bring joy and efficiency to the presentation, communication and project management functions of 3D design teams.

# More Efficient. More Productive. All Together.

## Key capabilities

- 3D models are now accessible on any device with an internet connection, no software required.
- Proprietary rendering engine makes Modelo the fastest model visualization tool on the market - Up to **45x** faster vs native applications.
- Proprietary compression engine enables 3D models to be compressed down to at least 1/3 of original size without loss of any visual quality.

## Modelo supports

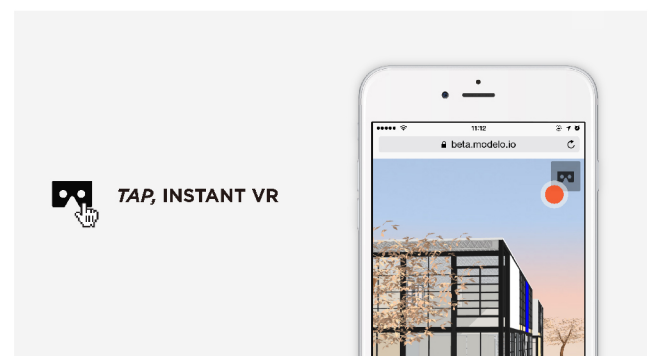

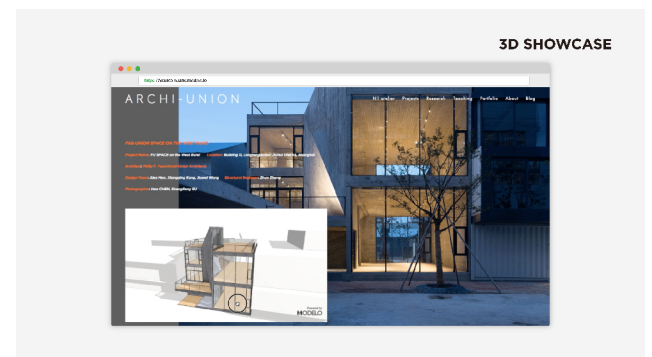

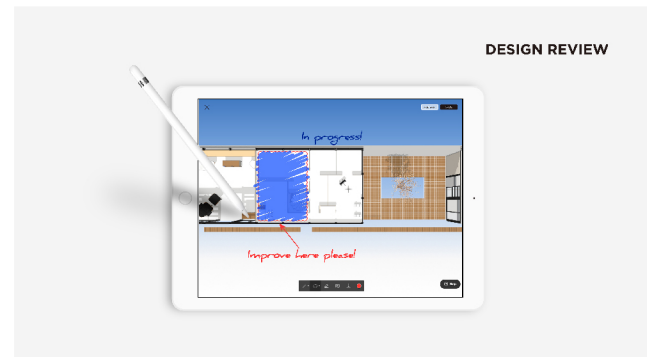

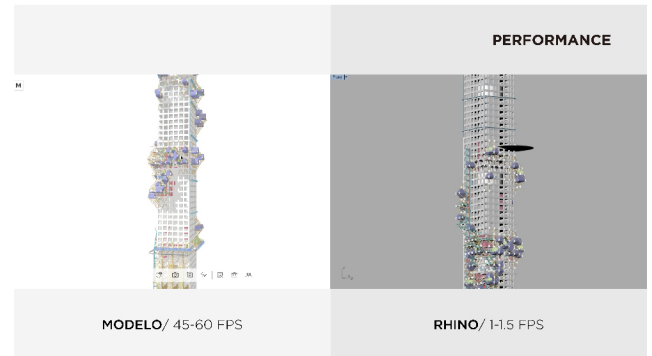

- **.SKP, .3DM, .RVT, .OBJ, .STL, .ZIP, .VWX.**
- .JPEG, .TIFF, .PNG, .MP4, .PDF, .DWG (Coming soon).
- Browsers: Google Chrome, Safari, Firefox (works on mobile too).

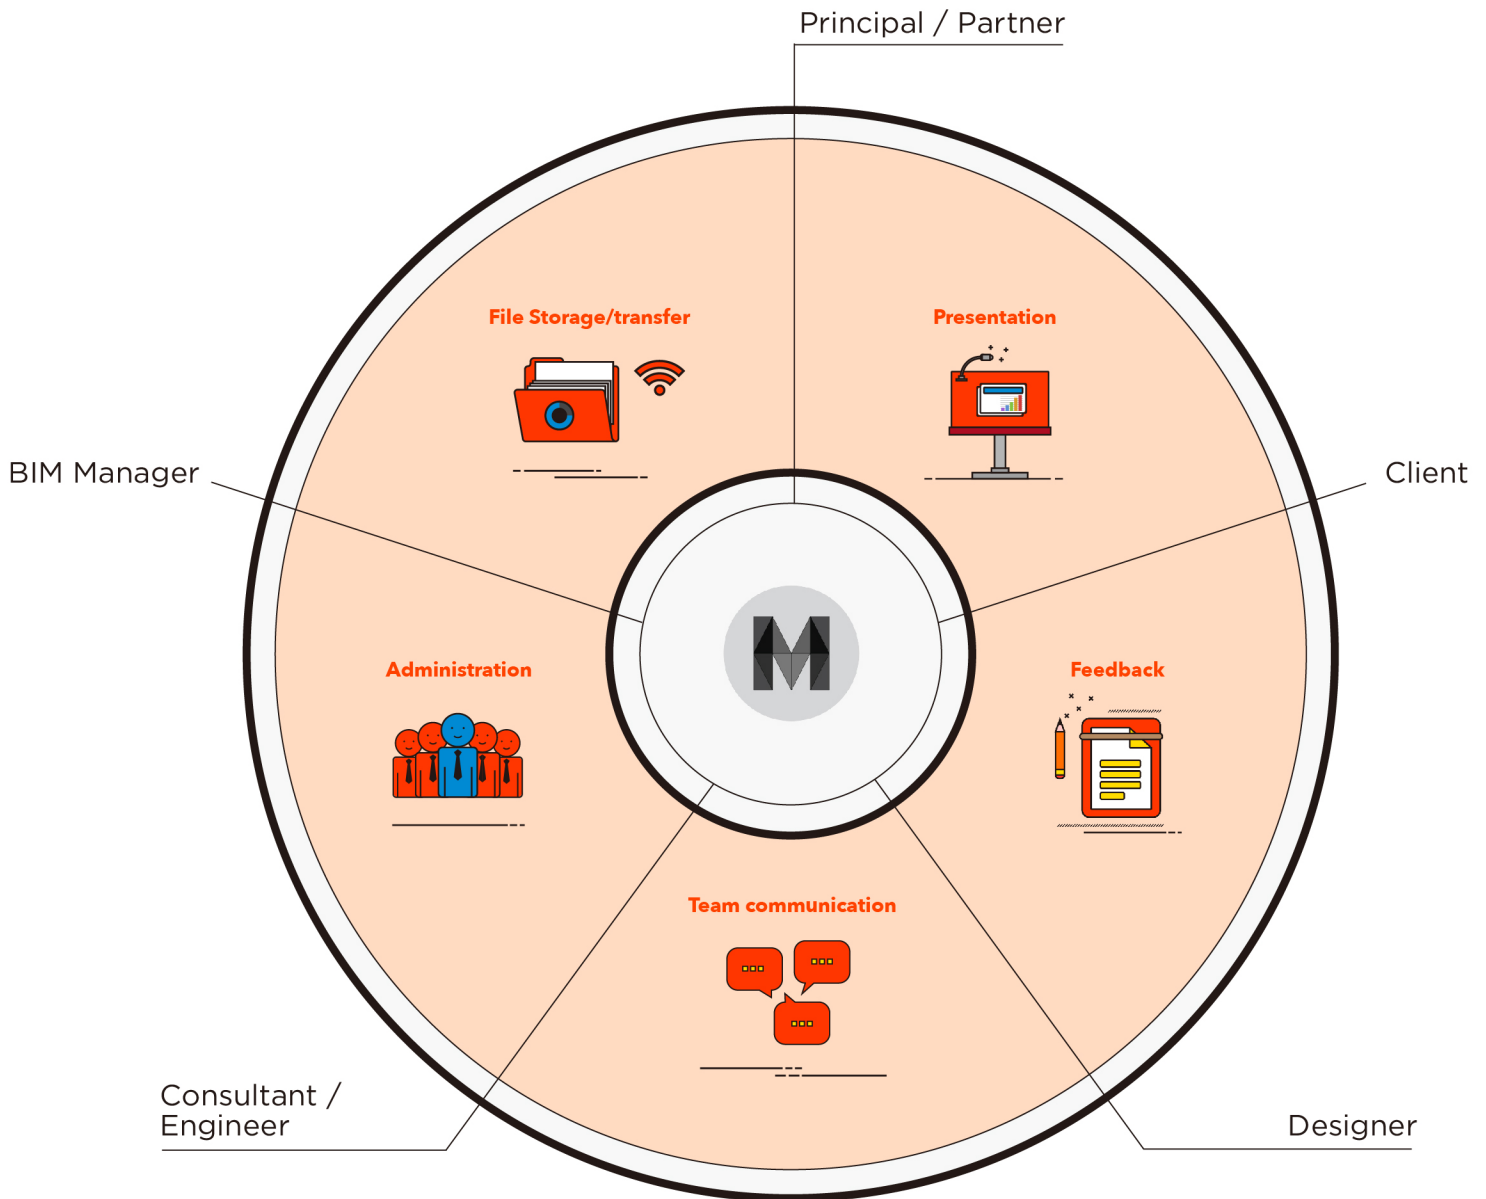

## Ready for Enterprise

- Role-based permissions settings.
- Seat-based pricing for scalability to fit your firm.
- Unlimited file upload size and unlimited account storage capacity.
- Company-branded interfaces for clients and external consultants.
- Telephone/ Email/ Chat Support; 12 hour guaranteed response time.

## Security

- Data secured with permission-based project access.
- Back-end communications HTTPS encrypted **SSL Encryption AES\_128\_GCM.**
- All project data remains sole property of the user or user's organization.

## Principal / Partner

- Present in 3D to clients in a smooth, intuitive interface.
- Stay connected to your design teams and in control of projects as they evolve.
- Give feedback and assign tasks directly on 3D files and 2D assets.
- Keep all of your project data archived in a single, secure location.
- Get notified as soon as a new model is uploaded.

## Consultant / Engineer

- A fast and simple way to coordinate between architects and engineers.
- Give access to entire projects, individual files, or specific views.
- Spend less time waiting for models to load and solve problems faster.

## Designer

- Models ready for visualization in seconds. Stay organized and keep all of your project files in one place.
- Communicate with your team and highlight every detail.
- Create smooth model flythroughs without all the effort.

## BIM Manager

- Modelo supports the file formats your teams work with.
- Admin settings to ensure everyone has the right permissions.
- One new tool to replace many - say goodbye to FTP, wetransfer, dropbox.

## Client

- Engage with clients directly by making select 3D models accessible through an intuitive interface for controlled viewing (no login required).
- Create locked, client-ready views to show only what is ready in your models.
- Transform your 3D models into a value-add experience for clients.
