2014

**The Hon Denis Napthine
Premier of Victoria**

Dear Premier

Like the majority of Victorians, I support the state government taking action to reduce our contribution to climate change, and I urge you to:

- *Implement a permanent ban on any new coal and gas mining operations in key areas in Victoria, including productive agricultural areas and areas of high conservation value*
- *Rule out any further coal allocations*
- *Remove the blockages to further development of renewable energy in the state, especially Ted Baillieu's anti-wind laws.*
- *Establish a Victorian Renewable Energy Target (VRET) to compliment the national target and drive the creation of jobs and investment in the green economy that our state so desperately needs*

Yours sincerely
