

Ramsay MacDonald 2.0: Labour's EU 'Deal' With the Tories!

The Labour Party leadership's betrayal of the British people's vote represents the most treacherous act since Ramsay MacDonald sold out the Party and headed a National Government in 1931.

The British people and Socialists voted to leave this bastion of Capitalism which is based on a Customs Union, a Single Market and Free Movement of Workers and Capital.

So far Britain's membership of the EU has cost British workers jobs, an annual deficit in trade with the EU of over £85billion, an annual membership fee of £25billion plus being ruled by unelected bureaucrats in Brussels.

In the name of all those who fought for freedom, I call for a 'No Deal' exit from the evil European Union.
