The Journal encompasses many core domains that have defined clinical psychology, but also boundary-crossing advances that integrate and make contact with diverse disciplines and that may not easily be found in traditional clinical psychology journals. The Association for Psychological Science (APS), founded in 1988, is a non-profit international organization dedicated to scientific psychology. The Association's mission is to promote, protect, and advance the interests of scientifically oriented psychology in research, application, teaching, and the improvement of human welfare.
