

The study was conducted for CNN via telephone by SSRS, an independent research company. Interviews were conducted from **March 14 to March 17, 2019** among a sample of **1,003** respondents. The landline total respondents were **348** and there were **655** cell phone respondents. The margin of sampling error for total respondents is +/- **3.8** at the 95% confidence level. The design effect is **1.48**. More information about SSRS can be obtained by visiting www.ssrs.com. Unless otherwise noted, results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from surveys conducted by ORC International. Results before March 31, 2006 are from surveys conducted by Gallup.

**EMBARGOED FOR RELEASE:
 Monday, March 18 at 4:00 p.m.**

Q1. (A1) Do you approve or disapprove of the way Donald Trump is handling his job as president?

*QUESTION WORDING: Overall, how much do you trust Wall Street bankers and brokers to do what is best for the economy -- a great deal, somewhat, a little, or not at all?

Q9b. Overall, how much do you trust big technology companies such as Google, Facebook or Amazon to do what is best for their users -- a great deal, somewhat, a little, or not at all?

	A great deal	Somewhat	A little	Not at all	No opinion
March 14-17, 2019	8%	33%	29%	29%	2%

Q10. Thinking again about big technology companies, do you think that government regulation of those companies should go farther, is about right as it is, or goes too far?

	Should go farther	Is about right as it is	Goes too far	No opinion
March 14-17, 2019	42%	35%	17%	6%

(Respondents who think that government regulation of big technology companies should go farther, N=450)

Q10a. And which comes closer to your view of how the government should handle big technology companies?

	In addition to increased regulation, those companies should also be forced to sell off some parts of their businesses	There should be increased regulation, but those companies should not be forced to sell off any parts of their businesses	No opinion
March 14-17, 2019	25%	64%	11%

Q10. Thinking again about big technology companies, do you think that government regulation of those companies should go farther, is about right as it is, or goes too far?

Q10a. And which comes closer to your view of how the government should handle big technology companies?

Q10/Q10a COMBO TABLE

	NET Should go farther	In addition to increased regulation, those companies should also be forced to sell off some parts of their businesses	There should be increased regulation, but those companies should not be forced to sell off any parts of their businesses	No opinion	Is about right as it is	Goes too far	No opinion
March 14-17, 2019	42%	11%	27%	5%	35%	17%	6%

MORE ON METHODOLOGY

A total of **1,003** adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Among the entire sample, **32%** described themselves as Democrats, **25%** described themselves as Republicans, and **44%** described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Results for the full sample have a margin of sampling error of +/- 3.8 percentage points. For the sample of 914 registered voters it is +/- 4.0 percentage points. For the subset of 456 Democrats and Democratic-leaning independents, it is +/-5.7 percentage points, and for the 448 Republicans and Republican-leaning independents, it is +/-5.5 percentage points.

Crosstabs on the following pages only include results for subgroups with a minimum n=125 unweighted cases. While interviews were conducted among a representative sample of the adult population of the United States, results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "N/A" because they are too small to be projectable to their true values in the population.
