Monthly Harvard CAPS-Harris Poll: December 2017

This survey was conducted online within the United States between November 08-11, 2017 among 1,989 registered voters by The Harris Poll.

The results reflect a nationally representative sample. Results were weighted for age within gender, region, race/ethnicity, marital status, household size, income, employment, political party, political ideology, and education where necessary to align them with their actual proportions in the population. Propensity score weighting was also used to adjust for respondents' propensity to be online.

TAX16 Other experts have pointed out that in the next 10 years the federal government will spend $43 trillion dollars,
and that even if these expert calculations are right, $1 trillion is actually a small difference.
They say that with slow growth, the deficit ballooned $10 trillion in the last decade and
that this tax bill is needed to jumpstart economic growth, which is the best way to
reduce the deficit.
