

Thomas W. Hilgers, M.D., is an obstetrician-gynaecologist and specialist in reproductive medicine and surgery. He is an associate Clinical Professor to the Creighton University school of Medicine.

Dr. Hilgers and his research team have developed the Creighton Model Fertility*Care* System. This System is as reliable as the oral contraceptive pill for Family Planning and is effectively used to monitor, maintain and evaluate the reproductive and gynecologic health of women.

The Creighton Model Fertility Care System is the essential component to NaProTechnology, the new reproductive science developed by Dr. Hilgers and his team for the evaluation and treatment of reproductive dysfunction.
