CHAMPION

You are invited to join with Dialogue on Diversity, its friends, the city's policy aficionados, and a lineup of expert speakers, for a conversation on the effects of the growing force of hyper-powered information – on your economic viability, your health, and your privacy. A prospect that it at once exhilarating and terrifying. The world's economies are producers of cars and buildings, music and amusements, but also the sensors that are closer to you than you yourself – opening the door for the smiling principal or a prospective employer who knows the flaws in your soul.
