Military & Professional

MILITARY CATALOGUE

WHEN GETTING THERE IS HALF THE BATTLE, our customers count on Aqua Lung products to deliver performance and reliability when it matters most. Our customers know they will face life support threats on every mission. That is why they choose Aqua Lung for our product integration experience for both the aviator and the diver.

INTRODUCTION

THE AQUA LUNG GROUP

The Aqua Lung Group is a 100% subsidiary of the Air Liquide Group comprising a family of companies spread throughout the world.

All of these companies are individual specialists in the manufacturing and/or distribution of diving equipment for sport, leisure or military and professional use. Each of the manufacturing companies is focused on the design and assembly of a family of products.

Aqua Lung France – La Spirotechnique continues to specialize in underwater breathing apparatus such as regulators, rebreathers, cylinder valves, oxygen and mixed gas military diving equipment.

Aqua Lung America specializes in the development of aviation life support equipment, emergency breathing and flotation systems.

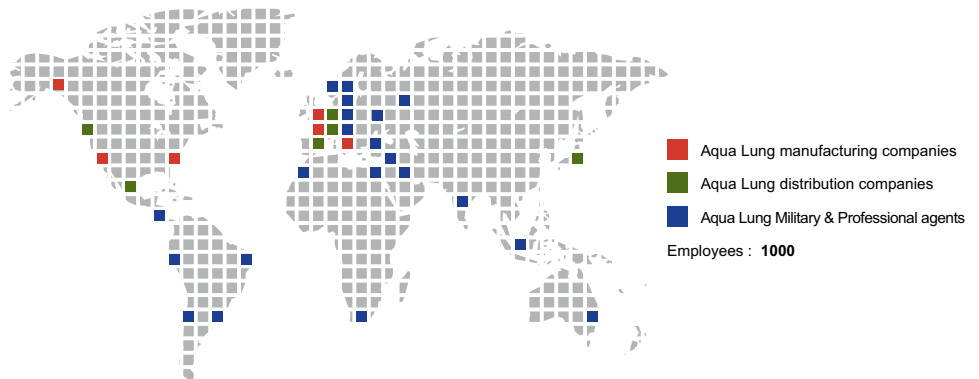

Aerial's core business is related to the design, manufacture and sales of life support and safety equipment with key expertise in military specifications compliance.

Apeks Marine specializes in the design, development and engineering craftsmanship needed to produce equipment for diving and emergency breathing systems.

Whites, manufactures and designs drysuits.

Gorski, recently acquired by the Aqua Lung Group, manufactures and designs diving helmets.

The Air Liquide Group is the worldwide leader in industrial and medical gases, bringing to the group strong technical and financial support.

THE AQUA LUNG INTERNATIONAL MILITARY AND PROFESSIONAL DEPARTMENT

The Aqua Lung International Military Department was created in April 2000 to provide a unique level of expertise in military diving, breathing equipment and in Aviation Life Support Equipment. This has been achieved by drawing upon the wealth of knowledge and experience in diving from the R&D departments of Aqua Lung America, Aqua Lung France, Apeks and Aerial.

Internationally, Aqua Lung is represented by its affiliates and by an effective network of technically proficient local companies. These are currently providing services to major military departments throughout the world.

Our goal is to listen to the customer and to offer the best service with simple, safe and robust products.

Design, development and assembly of diving breathing apparatus, Sales and After Sales services for the military & professional sector, are certified ISO 9001:2008.

MILITARY REBREATHERS

F.R.O.G.S.

Full Range Oxygen Gas System

AQUALUNG'S CLOSED CIRCUIT DIVING APPARATUS FOR SHALLOW WATER & SPECIAL FORCES OPERATIONS

The F.R.O.G.S. is a self-contained, chest-mounted, closed circuit apparatus, using 100% Oxygen. It was created for intensive work using a high performance, simple and sturdy mechanism. No tools required for periodic maintenance.

Oxygen closed circuit apparatus (0-7m or 0-10m depending on the regulations).

- Canister endurance:

4 hours (water Temp.: 04°C, CO2 injection: 1,6l/mn, RMV 40l/mn)

6 hours (water Temp.: 04°C, CO2 injection: 0,9l/mn, RMV 22,5l/mn)

- SAFETY

Multiple water traps

By-pass system injecting oxygen in the inhale hose allows the diver to breathe even in the case of second stage failure or flooding.

- MAINTENANCE

Modular Concept : easy to maintain and low maintenance cost.

Easy to maintain after each dive : no tools required, easy to clean.

Quick assembly system for the counterlung.

- PERFORMANCE

Optimal breathing loop : 1.07 J/litre at 7 metres (23 ft), Respiratory Minute Volume of 62.5 lpm.

The best Work Of Breathing on the market.

Also available in a magnetic version for professional use.

C.O.D.E.

Compact Oxygen Diving Equipment

The C.O.D.E. is the smallest of our rebreathers; it gives approximately 60 minutes of diving time. Ideal for covert & counter terrorism operations.

It is well suited for operational or training missions that require minimal logistics. Its reduced size renders it easy to transport. The small number of parts and its modular design make it easy to maintain and quick to set up.

Very low Wob.

A high pressure gauge is fitted in this set.

- Canister endurance:
1 hour (water Temp.: 04°C, CO2 injection: 1,6l/mn, RMV 40l/mn).

PART #	DESCRIPTION
487505	C.O.D.E. Rebreather

AMPHORA

UNDERWATER O2 and MIXED GAS BREATHING SET

AMPHORA is a rebreather using different oxygen/nitrogen mixtures in a semi-closed circuit. AMPHORA is a closed circuit apparatus in the oxygen dive configuration and a constant mass flow apparatus (CMI) in the mixed gas dive configuration.

During the dive a simple operation of the gas switch allows the user to switch immediately between breathing pure oxygen on closed circuit and mixture on semi-closed circuit.

Oxygen and mixed gas apparatus (0-7m and 0-30m).

The constant mass flow is injected directly into the inhalation hose. The CO2 laden gas is exhaled from an overpressure relief valve, located at the top of the apparatus.

- Canister endurance:
4 hours (water Temp.: 04°C, CO2 injection: 1,6l/mn, RMV 40l/mn).
6 hours (water Temp.: 04°C, CO2 injection: 0,9l/mn, RMV 22,5l/mn).

Also available in a magnetic version for professional use.

496001	AMPHORA with Mix Front Pack
496002	AMPHORA with Mix Back/Leg Pack

MILITARY REBREATHERS

C.R.A.B.E.

Complete Range Autonomous Breathing Equipment

The CRABE is a back-mounted breathing apparatus for diving use in depths down to 80 metres.

The CRABE is an entirely mechanical rebreather operating in semi-closed circuit with NITROX or TRIMIX following the proportional leak principle and with pure oxygen for deco stops.

Designed for intensive use, the CRABE offers high performance, reliability and robustness.

Daily maintenance and most servicing operations can be carried out without the use of tools.

The CRABE is non-magnetic to STANAG 2897 EOD standards and has a very weak acoustic signature which meets the AMP15 standard.

The CRABE is suitable for anti-mine warfare.

The CRABE is designed for use with predetermined gases such as: pure oxygen, nitrox 60%, nitrox 50%, nitrox 40%, nitrox 30%, or trimix 23%O₂ / 36%N₂ / 41%He.

Decompression stages are carried out using either the mixture used during the dive (the bottom mix), or pure oxygen, depending on the dive profile.

The CRABE has a harness with an integral weight system and a buoyancy adjustment jacket.

The CRABE has an open circuit safety system.

- Canister endurance:

4 hours (water T°: 04°C, CO₂ injection: 1,6l/mn, RMV 40l/mn)

BLACK CLASSIC BAG

- PVC coated 1200 Decitex Nylon
- Measurements : 78 x 40 x 35 cm.
- Volume : 95 litres
- Two carrying handles and shoulder strap
- One exterior and one fin pocket
- Available in black or yellow colour

PART #	DESCRIPTION
--------	-------------

580121	Black Classic Bag
--------	-------------------

BACKPACK BAG DRY

Waterproof Rucksack: equipped with padded shoulder straps, waist belt, carrying handle and an inflation/depressurising device.

Watertight Shoot-through Weapon Bag:

- An interior latex glove equipped to allow the weapon to be fired while inside the bag
- A nose cone attached to the front end is replaceable if shot through
- Designed for Rifles such as M16, SAR80, AK47, M4, MP5, etc.

REBREATHER & BC ACCESSORIES : BELTS AND WEIGHTS

PRO WEIGHT BELT

The Pro pouch weight belt allows the diver to easily adjust his weight without removing the belt. Weight can be altered quickly and without risk. The belt is fitted with a Spiro quick-release buckle which has a hook for the attachment of a harness crotch strap.

Belt in black nylon, width 45 mm. Quick-release buckle is in stainless steel for the standard model, and in Zycral for the non magnetic version.

T-shaped lead weights with protective vinyl coating.

The weights are lodged in pouches attached to the belt. They are held securely in place by a large velcro tab fastener.

REBREATHER & BC ACCESSORIES : MILITARY BCs

ODYSSEA VEST

Designed for combat swimmers to use with a chest worn apparatus

- Black colour for clandestine operations
- Non magnetic
- Double-bag construction (bladder volume: 20L / 44lbs)
- Outer bag made of heavy duty 840 Denier Nylon
- Can be inflated by 1 cylinder (200Bars - 0.43L) or orally
- Breathable inflator allows diver to breathe the air in the inner bag in case of emergency
- Several accessory attachment points (D-rings, Strobe holder, Snorkel holder)
- 1 large pocket to store a navigation board
- 2 Drain caps
- 2 overpressure relief/dump valves

PART #	DESCRIPTION
394059	Odyssey (Vest w/o cylinder)
840970	Cylinder (200Bars - 0.43L)

MDB JACKET

Designed for professional use with all types of front-mounted or back-mounted diving equipment

- Black colour for clandestine operations
- Single-bag construction (bag volume: 14L / 31lbs), made of extra durable 1000 Denier Cordura
- Can be inflated by 1 cylinder (200Bars - 0.43L)
- Breathable inflator allows diver to breathe the air in the bag in case of emergency
- Several D-rings for attaching accessories
- 1 large and 1 small pocket
- 2 Drain caps
- 1 overpressure relief/dump valve

PART #	DESCRIPTION
841345	MDB (Jacket w/o cylinder)
840970	Cylinder (200Bars - 0.43L)

ATLANTIS LIFEJACKET

Designed for professional use with all types of front-mounted or back-mounted diving equipment

- Black colour for clandestine operations
- Single-bag construction (bag volume: 14L / 31lbs), made of extra durable 1000 Denier Cordura
- Can be inflated by 2 cylinders (3,000psi - 0.21L / 1.5cu.ft) or orally
- Breathable inflator allows diver to breathe the air in the bag in case of emergency
- Optional direct feed inflator
- Non magnetic
- Authorized for U.S. Navy Use (ANU listed) as a Life Preserver
- Several D-rings for attaching accessories
- 1 large and 1 small pocket
- 2 Drain caps
- 1 overpressure relief/dump valve

PART #	DESCRIPTION
762970	Atlantis Jacket
101271	Cylinder (3,000psi - 0.21L / 1.5 cu.ft)

POLYVALENTE LIFEJACKET

Combined buoyancy compensator and lifejacket that accommodates front or back mounted rebreathers, or open circuit.

- Orange colour and reflective bands for high visibility
- Single-bag construction (bag volume: 20L / 44lbs), made of heavy duty 420 and 1000 Denier Cordura
- Can be inflated by 1 cylinder (200Bars - 0.43L or 0.6L), direct feed inflator or orally
- Breathable inflator allows diver to breathe the air in the bag in case of emergency
- CE approved as a lifejacket (EN 12628)
- Several D-rings for attaching accessories
- 1 large and 1 small pocket
- 1 Drain cap
- 2 overpressure relief/dump valves

PART #	DESCRIPTION
--------	-------------

840510	Polyvalente / Lifejacket w/o cylinder
840502	Cylinder (200Bars - 0.43L)
840501	Cylinder (200Bars - 0.6L)

FENZY X 4 LIFEJACKET

Combined buoyancy compensator and lifejacket designed for use with a back worn apparatus.

- Black or orange colour
- Double-bag construction (bladder volume: 17.2L / 38lbs), outer bag made of extra durable 1000 Denier Cordura
- Can be inflated by 1 cylinder (200Bars - 0.43L), direct feed inflator or orally
- Breathable inflator allows diver to breathe the air in the bag in case of emergency
- Authorized for U.S. Navy Use (ANU listed) as a Life Preserver
- 1 large pocket
- 1 Drain cap
- 1 overpressure relief/dump valve

PART #	DESCRIPTION
--------	-------------

854710	FENZY X 4 Lifejacket, Orange color, w/o cylinder
854420	FENZY X 4 Lifejacket, Black color, w/o cylinder
840950	0.43L Aluminium Cylinder

CALYPSO

Combined buoyancy compensator and lifejacket designed for use with a back worn apparatus.

- Black colour
- Double-bag construction (bladder volume: 21L / 48lbs) outer bag made of heavy duty 840 Denier Nylon
- Can be inflated by 2 CO2 cartridges (38gr), direct feed inflator or orally
- Authorized for U.S. Navy Use (ANU listed) as a Life Preserver
- 1 large pocket
- 1 overpressure relief/dump valve
- 2 dump valves

PART #	DESCRIPTION
--------	-------------

394050	BC CALYPSO, military, black, revA
13220	Cartridge, CO2, 38 gr

REBREATHER & BC ACCESSORIES : MILITARY BCs

SCOUT SWIMMER VEST (SSV MOD1)

Lifejacket designed for tactical surface swimming

- Black colour for clandestine operations
- Single bag construction, made of heavy duty 1000 Denier Nylon (bladder volume: 9 L / 21lbs)
- Neck opening is oval and padded for ease of ingress/egress
- "H" straps harness with D-rings
- 2 independent 38-gram CO2 inflators
- 1 oral inflation tube with locking ring
- 1 overpressure relief/dump valve
- 1 large front pocket with Velcro closure

PART #	DESCRIPTION
--------	-------------

769031	SSV Mod1
13220	Cartridge, CO2, 38 gr

PARA SWIMMER VEST (PSV MOD1)

Lifejacket designed for parachute and/or surface swimming operations

- Black colour for clandestine operations
- Single bag construction made of heavy duty 420 Denier Nylon (bladder volume: 9L / 21lbs)
- "H" straps harness with D-rings
- 2 independent 38-gram CO2 inflators with beaded handles
- 1 oral inflation tube with locking ring
- 1 overpressure relief/dump valve
- 1 large front pocket with Velcro closure

PART #	DESCRIPTION

COMBAT SWIMMER ASSAULT VEST (CSAV)

Multi-use Buoyancy Compensator that adapts to front and back mounts rebreathers, and to open circuit SCUBA.

- Doubles as a lifejacket
- Black colour for clandestine operations
- Double-bag construction (bladder volume: 15.8L / 35lbs), outer bag made of extra durable 1000 Denier Cordura.
- Can be inflated by 2 cylinders (3,000psi - 0.21L / 1.5cu.ft), direct feed inflator or orally
- Authorized for U.S. Navy Use (ANU listed) as a Life Preserver
- Molle straps for accessories attachment
- 2 Drain caps
- 1 overpressure relief/dump valve

PART #	DESCRIPTION
769116	CSAV complete w/ cylinder

PRO QD M

Jacket style buoyancy compensator designed for open circuit use. Time proven, and used by many military and professional units worldwide.

- Single bag construction, made of extra durable 1000 Denier Cordura
- Now all black for clandestine operations
- Comes in 5 different sizes
- Buoyancy from 13L (30lbs) to 24L (54lbs)
- 6 stainless steel 2" D-rings
- 2 large zipper pockets with pull cord
- SureLock I mechanical weight release system (safe, dependable and reliable)
- Knife grommets and instrument retractor attachment point on left pocket
- 2 overpressure relief/dump valves
- CE approved (EN1809)

PART #	DESCRIPTION	SIZE

BLACK DIAMOND

Back inflation style buoyancy compensator designed for open circuit use. Time proven, and used by many military and professional units worldwide.

- Authorized for U.S. Navy Use (ANU listed)
- Single bag construction, made of heavy duty 840 Denier Nylon
- All black for clandestine operations
- Comes in 5 different sizes
- Buoyancy 22L (50lbs)
- 5 stainless steel 2" D-rings
- 3 pockets
- SureLock I mechanical weight release system (safe, dependable and reliable)
- Knife grommets on left pocket
- 3 overpressure relief/dump valves
- CE approved (EN1809)

BC ACCESSORIES

OXYGEN GAS SUPPLY

This decompression stage apparatus supplies two divers with pure oxygen in order to allow them to carry out decompression stops.

A high pressure oxygen source located at the surface supplies the diver with oxygen via a HP/MP regulator and 20 meter hose.

At the outlet of this hose the diver breathes oxygen in open circuit using the fitted 2nd stage regulator directly from his rebreather using a quick connection device.

PART #	DESCRIPTION
--------	-------------

CR 718705	O2 HOOKAH deco stops gas supply
CR 718780	O2 MP Hose Complete 20 m.
CR 718590	HOOKAH 2nd Stage + Flexible

HIGH PRESSURE OXYGEN BOOSTER PUMP

The oxygen booster pump is designed to fill small capacity cylinders from industrial type cylinders. This offers a major advantage: autonomy.

With a stock of small cylinders it is therefore possible to meet emergencies and, in addition to autonomy, the transfer pump is also a significant source of economy.

PART #	DESCRIPTION
--------	-------------

370201	High Pressure Oxygen Booster Pump
--------	-----------------------------------

FILL ADAPTERS

The P/N 840817 is an air charging connector for 0,4 L. cylinders.

The P/N A01215 is an air charging connector for 1,5 cuft cylinders.

PART #	DESCRIPTION
--------	-------------

A01215	Fill Adapter for Atlantis
840817	Fill Adapter for Odyssey / MDB / Méditerranée

CHARGING CONNECTOR

Charging connector with purge for use when filling the oxygen cylinder.
Fitted between the charging hose of a booster pump and the oxygen cylinder.

PART #	DESCRIPTION
CR 840877	Charging Connector
CR 555100	Nitrox Charging Connector 300 Bar
CR 555110	Nitrox Charging Connector 200 Bar

SURFACE HIGH PRESSURE GAUGE 0-250 BAR

This pressure gauge is used for measuring the pressure of oxygen in the cylinder.

PART #	DESCRIPTION
CR 718660	Surface High Pressure Gauge

NITROX SURFACE PRESSURE TEST GAUGE

To check the pressure in the cylinder.
Supplied with a screw purge.

PART #	DESCRIPTION
CR 523220	Surface Nitrox Pressure Gauge

MP TEST KIT 0-16 BAR

Allows regular checking of the first stage outlet pressure. Dismantling and cleaning of the pressure gauge can be carried out by the users.

PART #	DESCRIPTION
CR 434750	MP Test Kit

OXYGEN ANALYSER

This unit is specially designed to analyze O2 from the HP cylinder.

PART #	DESCRIPTION
750110	Oxygen Analyser

REBREATHER ACCESSORIES & TOOL KITS

STANDARD AND SPECIAL TOOL KITS

Tools needed for the complete disassembly and re-assembly of Aqua Lung rebreathers.

PART #	DESCRIPTION
495366	F.R.O.G.S. Standard Tool Kit
496510	AMPHORA Standard Tool Kit

490950	C.R.A.B.E. Special Tool Kit

C.R.A.B.E. TEST BENCH

Compact unit allowing, regular checking of the C.R.A.B.E. regulator, valve and injector.

PART #	DESCRIPTION
490800	C.R.A.B.E. Test Bench

SIEVE

This sieve (filter diameter: 1mm) is used to eliminate powder from the sodalime and to simplify refilling the cartridge.

Diameter: 200mm
Height: 50mm

PART #	DESCRIPTION
370254	Sieve

FUNNEL

The Funnel simplifies the canister re-filling for apparatus types DC55 and Oxygers 57.

PART #	DESCRIPTION
455720	Funnel

SODALIME

SODASORB is a CO2 absorbent for closed and semi closed circuit apparatus.
Type WISL 16 % 4/8 M

PART #	DESCRIPTION	
370001	Sodalime	4.5 kg Pack
370002	Sodalime	20 kg Pack

CHRISTOLUBE GREASE

Grease compatible with oxygen use.
Especially designed for O2/Nitrox rebreathers.

PART #	DESCRIPTION	
480025	Christolube Grease	57 gr.

A.R.P. NET

Cleaning product for diving set components

PART #	DESCRIPTION	
455001	ARP Net	

STERANIOS 2%

Disinfectant for diving set components.

PART #	DESCRIPTION	
382062	Steranios 2%	2 litres packing
382031	Steranios 2%	4x5 litres packing

SCUBA DIVING EQUIPMENT: REGULATORS

CONSHOLF XIV / SUPREME

- World's most popular military and professional regulator
- Durable, time-proven design
- Chrome-plated, marine brass 1st and 2nd stage
- Available in cold water "Supreme" version
- ANU Listed +38°F to 190' sections 1.5.9 & 1.5.10
- Convertable to DIN 300 use with DIN Conversion Kit
- Convertable to Dry Environment 1st stage

ANU Listed

PART #	DESCRIPTION
108100	Conshelf XIV
108800	Conshelf XIV Supreme
108110	Conshelf XIV Tool Kit

TX 50 REGULATOR

This is the regulator of choice for technical divers around the world. This time-proven performer gets taken to the extreme and never disappoints.

- 1 high pressure port and 4 medium pressure ports are ideally located for use on a twin manifold or a single valve
- First stage comes standard with a 300 bar DIN connector
- The first stage is dry sealed keeping all internal components protected from the environment
- The TX50 second stage uses a pneumatically balanced valve system and is the most advanced diver adjustable breathing system available
- Because of the TX50's high efficiency heat exchanger system, it can cope with even the coldest conditions without freezing, making it the perfect all round regulator
- The large swept back exhaust tee is excellent for bubble dispersion
- Compatible to EAN 40, new, out of the box
- Authorized for U.S. Navy use in water as low 29 degree F°

ANU Listed

PART #	DESCRIPTION
AP0500-1	TX 50 Din Regulator
AP0500	TX 50 Yoke Regulator

NON-MAGNETIC REGULATOR

Non-Magnetic Regulator composed of a non-magnetic TX40 2nd stage and a non-magnetic DS4 first stage.

The TX40 is a high performance 2nd stage with a heat exchanger system that virtually eliminates the possibility of 2nd stage freezing.

The DS4 is a dry sealed system for cold water use.

PART #	DESCRIPTION
NM 0526	Non-magnetic regulator

LEGEND NITROX WITH STRAP

Legend adjustable second stage pneumatically balanced. It is matched with the over-balanced Legend LX diaphragm first stage. It delivers superior breathing performance even at increased depths.

PART #	DESCRIPTION
129450	Legend Nitrox with Strap (Yoke)

SCUBA DIVING EQUIPMENT: DRY SUIT INFLATION SYSTEM & SCUBA CYLINDERS

DRY SUIT INFLATION SYSTEM

Apeks Inflation system is designed as a fully redundant suit inflation system.
 Available as an M18 & M25 system.
 Pouches are available for easy fitting to suit.
 Can be used with cylinders of up to 300 bar.
 Supplied with a 232 bar, 'A' clamp charging adaptor.
 Decanting and Din adaptors are available as accessories.
 Incorporates pressure relief safety valve.
 Available in Non-Magnetic materials

PART #	DESCRIPTION
A08600	Dry Suit Inflation System

TWIN CYLINDERS SET

Material: Chrome molybdenum steel 34CRMO4.
 Protection: Zinc coated
 Capacities available: 2 x 9 litres.
 Working Pressure: 200 bar (2900psi)
 Capacity: 18 litres 200 bar 3.6 m3 (127,13cu.ft)
 Dimensions:
 Height: 555 mm (22")
 Diameter: 168 mm (6,6")
 Weight: 26 kg

*Warning: Certain working pressures require special types of tanks and valve connectors.
 **Warning: Diving in cold waters requires special training given by a qualified body.

ACCESSORIES : MASKS

ATLANTIS FACE MASK

A long time favourite of U.S military divers.
The oval design offers an excellent field of vision.
Weight: 358 g

PART #	DESCRIPTION
--------	-------------

E07710	Atlantis Face Mask
--------	--------------------

MOANA MASK BLACK

A long time favourite of FR military divers.
The MOANA is an oval, non-magnetic, monocular, lightweight diving mask offering a wide field of view.
Weight: 242 g

PART #	DESCRIPTION
--------	-------------

SO1022	Moana Mask Black
--------	------------------

VENTURA BLACK

Lightweight single lens mask.

- Wide field of vision
- Fast and simple strap adjustment system
- Hypoallergenic silicone skirt
- Tempered glass
- Weight : 185 g

PART #	DESCRIPTION
--------	-------------

502561	Ventura Mask
--------	--------------

MICROMASK

The smallest and the lightest diving mask. Less than 100 cm³ and 150 g

- 2 lens mask
- Tempered glasses
- Hypoallergenic silicone skirt fits with doubles lips
- Cardanic joint buckles rotate both up-and-down and in-and-out.
- New push button buckle system to reduce or release the straps
- Large head strap for a perfect fit and greater comfort

PART #	DESCRIPTION
--------	-------------

508500	Micromask black/black silicone
--------	--------------------------------

LOOK 2 BLACK

The inclined-to-the-cheeks frame design produces a mask with an excellent view upwards and downwards.

- Double lens, 3mm tempered glass
- New twin button seeger release system, makes glass locking rings' removal quick, safe and easy
- Pure silicon mask skirt
- Cardanic joint buckles (double joint buckles) rotate both up-and-down and in-and-out
- Quick counterposed push button activation is easy to use even when wearing gloves
- Weight : 185 g

PART #	DESCRIPTION
--------	-------------

110060	Look 2 Mask
--------	-------------

ACCESSORIES : FACIAL MASK & SNORKELS

FULL-FACE MASK

- Removable 2nd stage for easy cleaning and storage (cannot be used w/o mask)
- Made of a one-piece, pliable silicone skirt combined with injection-molded, high-impact, glass-filled nylon frame and regulator housing
- Double face seal and slightly smaller/low volume oral nasal cavity to fit most faces
- Customizable nose block for equalization
- Air flow is directed up the visor face to eliminate fogging and through one-way valves in the oral nasal pocket to reduce CO2 retention
- Second stage comes off the right shoulder and uses a standard LP hose
- Communications port for easy installation of a Buddy Phone or ear/microphone assembly to connect to OTS' Diver Communications Unit such as the Aquacom® SSB-2010
- OTS Ambient Breathing Valve® (ABV®) allows the diver to breathe ambient air at surface, thus conserving scuba air
- Includes Mask Bag and 32" LP hose
- CE CERTIFIED

SHREDDER SAR

- Special fin for water rescue, SAR swimming, and Helo OPS
- Patented split blade reduces drag and increases lift
- Heavy duty adjustable buckle with padded heel and leash
- Large foot pocket receives large wetsuit boots and new Amphib boot

PART #	DESCRIPTION	SIZE
621150	Shredder SAR, Yellow	Large
621155	Shredder SAR, Black	Large

BLACK SLINGSHOT

• Power Bands :

Pure silicone Power Bands are loaded with energy on the power stroke. They release their energy prior to the upstroke to provide an added boost of power. Power bands lessen fatigue and add thrust.

• Gear Shift :

3-speed Gear Shift customizes your speed-to-effort ratio to fit the specific conditions of your dive . Easy to shift during the dive, even with gloves.

• Mid-foot Flex Joint :

The blade is attached to the foot pocket using two Mid-foot Flex Joints. This takes the strain off the toes and the top of the ankle. The result is a dramatic improvement in comfort. You can now use the entire foot to power the fin rather than just the front half of the foot.

WRIST COMPASS

Wrist compass in rubber housing.

BEN type compass, used world wide by both professional and amateur scuba divers.

Perfect waterproofness and legibility.

This type of compass is a model of reliability and precision.

- Card with fluoresent graduations every 15°
- Fluorescent lubber line
- Card mounted on a shock absorber
- Liquid : white spirit
- Maximum inclination 15°

Main Features :

- Overall diameter 70 mm.
- Card diameter 56 mm.
- Weight 200 gr.
- Maximum depth 100 m.
- Compensatory bubble for liquid expansion

PART #	DESCRIPTION
757410	Wrist Compass

DIRECTIONAL COMPASS WITH ALIDADE POINTER

Produced by BEN for both civilian and military uses, this compass is suited for submarine vehicles such as SDV's and diver tugs, or for underwater swimmers using a navigation board.

Extremely accurate and easy to read.

- Rotating alidade pointer
- Compensatory bubble for liquid expansion
- Fluorescent lubbers and graduations
- Overall diameter : 120mm - Card diameter : 70mm
- Weight : 400gr
- Maximum depth : 100m
- Maximum inclination : 25°
- Liquid : White spirit

PART #	DESCRIPTION
757450	Compass

PRO GENTS 500M WATCH

- Stainless steel cases
- Seiko VX series quartz movement, with date indicator
- Scratch resistant mineral glass lens
- Double o-ring screw down crown for positive water-tight seal
- One-direction stainless ratchet action rotating bezel, to indicate elapsed time
- Black dial with luminous markings and hands, the minute hand is fluo-red
- Extra long PU strap has robust corrugated sections to take up wetsuit compression at depth
- Water resistant rating of 500 metres
- Supplied in presentation case

PART #	DESCRIPTION
310110	Pro Gents 500 metres Watch

MISCELLANEOUS PRODUCTS

ECHOTEST II

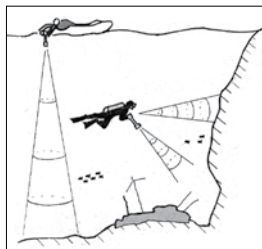

Hand Depth Sounder

Compact Echo Sounder for hand use. Ideally suited for use in small boats. It is also particularly useful for divers. This unit transmits high frequency pulses (200 KHz) that are converted from electrical energy by the transducer.

- View : LCD 7 segments
- Frequency : 200 Khz
- Emission angle : 24° (-6 dB)
- Depth : 0,6 m. - 79 m.
- Feature : Auto start and stop

Waterproof up to 50 m.

- Dimension : Diam 42 mm. x (L) 198 mm.
- Power : DC 9V. (dry batteries S-0069)
- Life of batteries : near 500x
- Weight : near 200 gr. (batteries included)

MAGNETIC ANOMALY TRACKER - MATRACK

The MATRACK DETECTOR is a simple tool to use, according to the standard STANAG 2897, whose performances are used to verify the magnetic cleanliness of the equipment controlled.

Class A and Class B equipment can be monitored.

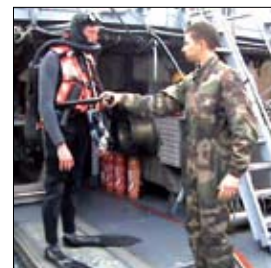

The MATRACK DETECTOR is by definition a tool which must be checked before each measurement.

Therefore, the MATRACK SIMULATOR should be used to monitor standard compliance of the detector.

MATRACK can be used by clearance divers, ground forces, the manufacturers of equipment for the army, metrology control agencies....

PREMIUM PACK contains

- 1 x PELICASE PC1495
- 2 x MATRACK Detectors
- 1 x MATRACK Simulator
- 1 x User guide
- 1 x Calibration certificate
- 1 x Pocket book

PART #	DESCRIPTION

INTEGRATED INFLATING AND TOWING WIRE FOR MINE-LIFTING BAGS

Allows inflation and towing of mine-lifting bags at a safe distance.

Can be carried on a dinghy.

Description:

Spool with a crank, fitted with easy lift handles.

First stage regulator

Medium-pressure hose (11 bars). Several lengths available (200 metres, 100 metres)

Towing cable integrated in the medium pressure hose (patented)

Connector

Towing hook

Characteristics:

Very low magnetic field.

Size: 700 x 900 x 950 mm

Weight: 85 kg (fitted with a 100 metres wire), 145 kg (fitted with a 200 metres wire)

Maximum length on the spool: 200 metres

DRY GLOVE WITH POLYTEX SEALS

Any diver that has been concerned with the size of the wrist and glove rings in traditional dry glove system can rest easy knowing there is an alternative. These dry gloves with polytex seals allow the user to have warm dry hands without worrying about o-ring seals or excess bulk.

Features:

- Our fully lined dry glove's polytex seal is sewn AND welded in place - not glued!
- Heavy-duty and UV-resistant polytex seal keeps water out
- Abrasion-resistant fingers and palm protect the hand
- Inner Glove Liner provides exceptional warmth with increased dexterity
- Designed to work with drysuits
