

Do You Recognize This Guy?

He's A Fucking Snitch

Between September 2007 and June 2009, John Jacob Towery II also known by the email "agent_orange@riseup.net" infiltrated anti-war groups around the Olympia and Tacoma areas (Port Militarization Resistance, Students for a Democratic Society, and others). He is on the Ft. Lewis payroll and works in 'force protection' but he certainly didn't protect the people he pretended were his friends, including the soldiers he betrayed by trying to disrupt anti-war organizing efforts. They'll be deploying and risking their lives..again.. and he tried to make sure nobody could stop it. He is a member of the Iron Butt Motorcycle Rider's, license plate number 947530, which confirms his identity. He is a professional informant and no good can come from talking to or associating with him. The information he gathered was sent to the WA State Patrol, Tacoma/Olympia PD, the FBI, and the Department of Homeland Security among other agencies.

People who care about their community, trust, and a better world are encouraged to immediately cease all contact with this snitch and publicize anything notable about him that is legal to publish (no addresses). If you need additional publishing security, go to Wikileaks. Let his dependence on the people he betrayed ruin him. Kick him out of your home and refuse him service at your business.
