

## How the Survey was Conducted

---

### **Nature of the Sample: NPR/PBS NewsHour/Marist Poll of 1,429 National Adults**

This survey of 1,429 adults was conducted November 6<sup>th</sup> through November 9<sup>th</sup>, 2023 by the Marist Poll sponsored in partnership with NPR and PBS NewsHour. Adults 18 years of age and older residing in the United States were contacted through a multi-mode design: By phone using live interviewers, by text, or online. The sampling frames include RDD plus listed landline, RDD cell phone sample plus cell phone sample based on billing address to account for inward and outward mobility, and aggregated online research panels. Survey questions were available in English or Spanish. Phone and online samples were selected to ensure that each region was represented in proportion to its adult population. The samples were then combined and balanced to reflect the 2020 American Community Survey 5-year estimates for age, gender, income, race, and region. Results are statistically significant within  $\pm 3.4$  percentage points. There are 1,293 registered voters. The results for this subset are statistically significant within  $\pm 3.6$  percentage points. Tables include results for subgroups to only display crosstabs with an acceptable sampling error. It should be noted that although you may not see results listed for a certain group, it does not mean interviews were not completed with those individuals. It simply means the sample size is too small to report. The error margin was adjusted for sample weights and increases for cross-tabulations.

\*Question wording: As you may know, if a budget agreement in Washington is not reached by the end of the month, the federal government could shut down. Who would you blame more if there is a shutdown of the federal government, the Republicans in Congress or Barack Obama and the Democrats in Congress?
