

Google Meet hardware kit

Fast, effective video meetings with seamless Google Workspace integration.

Video conferencing for everyone

Affordable and easy to deploy in just minutes, the Google Meet hardware kit is perfect for every meeting room, not just a select few.

In every room

Choose a wide FOV camera perfect for a huddle space or a mechanical PTZ camera built for the largest rooms. Daisychain multiple speakermics together to get clear audio in any size room.

On every call

With the new dial a phone feature, and interoperability solution, the Google Meet hardware kit is perfect for any call, whether to a co-worker in another room, a customer on the phone, or a partner connecting to Meet from another platform.

With one tap

Joining a meeting is as simple as a tap on the touchscreen. Register the room with Google Calendar, and your organization's Google Meet events will automatically appear on the touchscreen with all of the details.

Seamlessly integrated with Google Workspace

For most customers, there's no easier way to have video meetings, whether it's integration with Google Calendar, Drive, Jamboard, or easy management for admins.

Always ready to use

Built with a focus on reliability, the conference room is up and ready for your meeting. Plus, it's always improving with automatic updates.

Starting at \$1,499 per kit, Google Meet hardware marries top quality components and support with incredible value. Affordable and easy to deploy, the new kit reduces installation overhead, minimizes maintenance costs, and simplifies the meeting room reducing the total cost of ownership. The kit comprises four components: an ASUS Chromebox, camera, controller, and speakermic. For full details about the kit and its components, see meetingdevices.withgoogle.com

Starter Kit

With remote control

Small / Medium Kit

Large Kit

The Touchscreen Control Panel

- In a single tap effortlessly join, pin, record, or mute with a simple, easy-to-use UI
- Integrated HDMI-in capabilities allow for seamless sharing of content from any device
- 10.1", 1280x800 screen with an ultra-wide viewing angle and 10-point projected capacitive touch panel

The Speakermic

- Designed by Google and specifically tailored for distraction free meetings
- Directional microphones ensure clear 360° pickup
- World class speech preservation and noise suppression
- Daisy chain several devices with a single cable per speakermic to cover large rooms

The Cameras

- Capture everyone around the table with 4k capable, extra wide 120° FOV camera (starter and small/medium kits)
- Or, expand to larger rooms with the optical zoom of a mechanical PTZ camera (large kit)
- Easily pan, tilt, and zoom the camera to highlight your meeting room's most important content

The Meet Compute System

- Powerful Chromebox with Intel Core i7 processor and a dedicated hardware video accelerator
- Easy to set-up, and automatically installs the latest updates so the Google Meet hardware kit is always up-to-date and secure
- Single sided ports, a slim design, and magnetic mounting options help simplify installation
