

"I've always struggled to find a peer group.
ASA has been a life saver for me."

– Judith Toronchuk, Associated Professor Emeritus of Psychology,
Trinity Western University

Member Benefits

- Fellowship and networking with hundreds of Christians in the sciences and other disciplines at the intersection of science and faith
- Cross-disciplinary learning through in-person and online events, the academic journal *Perspectives on Science and Christian Faith (PSCF)*, and the e-zine *God and Nature*
- Opportunities to present and publish your research within a supportive Christian community
- Participation and service in local chapters and field-specific affiliate groups
- Discounted registration at the ASA Annual Meeting and invitations to special events
- Complimentary online subscription to *PSCF* (3 issues per year)
- Access to thousands of resources in the ASA archives dating back to 1941
- Pastoral care from ASA team and volunteers, in the form of prayer and visits

Connecting Christians in the Sciences since 1941

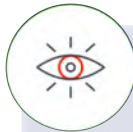

Scholarship | Professional Development | Fellowship

American Scientific Affiliation

Mission

The mission of the ASA is interpreting, integrating, and communicating the discoveries of science with insights of Scripture and Christian theology.

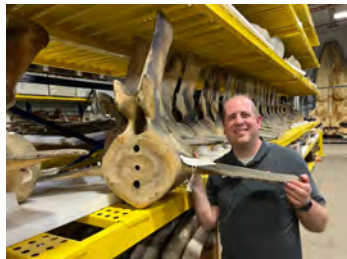

Vision

Serving our members in expressing their vocational gifting and call from God in service to society, science, the church, and one another.

Values

Excellence in scholarship.
A professional identity informed by the historic creeds of the Church.
Growing as a generative, redemptive community.

"What I appreciate most about the ASA is that it provides a space for Christians in the sciences to come together and discuss difficult issues in a spirit of gracious dialogue."

-Ryan Bebej, ASA Fellow & Associate Professor of Biology, Calvin University

Statement of Faith

We accept the divine inspiration, trustworthiness and authority of the Bible in matters of faith and conduct.

We confess the Triune God affirmed in the Nicene and Apostles' Creeds, which we accept as brief, faithful statements of Christian doctrine based upon Scripture.

We believe that in creating and preserving the universe God has endowed it with contingent order and intelligibility, the basis of scientific investigation.

We recognize our responsibility, as stewards of God's creation, to use science and technology for the good of humanity and the whole world.

"Finding a local community where I can ask my questions and share my thoughts, especially on topics related to science and faith, has been difficult. I am very thankful to the ASA for creating a safe and caring culture for these discussions and for growing friendships."

-Kristine Johnson, Senior Advanced Systems Engineer, Honeywell Aerospace

"The ASA has become a home for me, and a center point for my development as a Christian and a scientist. The ASA has given me access to incredible, influential people from various fields who have inspired me, encouraged me, and opened many doors for my career. It has also given me a platform to give back to the ASA community through leadership and service."

-Veronica Frans, PhD Candidate in Fisheries & Wildlife, Michigan State University

ASA Core Values Intellectual Humility and Radical Hospitality

ASA provides a fellowship of those committed to Christ and to excellence in scholarship, based on peer review, empirical evidence, and respectful dialogue as we together seek to integrate faith and science. In order to enable this search for understanding, the ASA holds to a "big tent" posture and takes no official positions on issues.

The ASA seeks to work from a posture of intellectual humility, radical hospitality and courageous curiosity. Members openly express ideas and disagree while showing a deep respect for one another and praying for one another. The ASA strives to create a safe environment in which dialogue can flourish and contrasting ideas can be discussed with courtesy and respect.
