## MAP Earns Four Stars, Again Recognized as Wise Steward

For the second year running, the online charitable-giving guide Charity Navigator has given MAP a four-star rating “for its ability to efficiently manage and grow its finances” and because it “exceeds industry standards and outperforms most charities in its cause.” This ‘exceptional’ designation from Charity Navigator differentiates MAP International from its peers and demonstrates to the public it is worthy of their trust.

“MAP International has always been committed to making the wisest use of the funds and resources that our donors have so generously provided,” says MAP President Michael Nyenhuis. “We have a commitment to them to remain good stewards of their resources, and we take that commitment seriously. We always strive to act with integrity, honesty and openness while making financial decisions that best enable us to help save lives and alleviate the suffering of others.”

Since 1954, MAP has provided over \$2.4 billion in medicines and medical supplies saving millions of lives each year in over 100 countries.
