Version 1.2 - 2012

Because this is an extract not all paragraph numbers will be present

Copyright

When reprinting these regulations National Authorities and Race Organizers should:-

- request copyright permission from ISAF and ORC Ltd (normally given free of charge)
- display a copyright acknowledgement with the reprint (similar to © ORC Ltd. 2002, all amendments from 2003 © International sailing Federation, (IOM) Ltd.)
- make any amendments by deleting contrary provisions and indicating that changes have been made
- supply a copy of the reprint to each of ISAF and ORC Ltd

Official interpretations shall take precedence over these Special Regulations and will be indexed, numbered, dated and displayed on the ISAF web site www.sailing.org/specialregs

Language & Abbreviations Used

Mo - Monohull

Mu - Multihull

" ** " means the item applies to all types of yacht in all Categories except 5 for which see Appendix J or 6 for which see Appendix L.

RED TYPE indicates a significant changes in 2012

Guidance notes and recommendations are in italics

The use of the masculine gender shall be taken to mean either gender

Administration

The Offshore Special Regulation are administered by the ISAF Special Regulation Sub-Committee whose terms of reference are as follows: (www.sailing.org/regulations)

ISAF Regulation 6.8.8.3 - The Special Regulations Sub-Committee shall: (a) be responsible for the maintenance, revision and changes to the ISAF Offshore Special Regulations governing offshore racing, under licence from ORC Ltd. Such changes shall be biennial with revised editions published in January of each even year, except that matters of an urgent nature affecting safety may be dealt with by changes to the Regulations on a shorter time scale;

(b) monitor developments in offshore racing relative to the standards of safety and seaworthiness.

Any queries please E-Mail: technical@isaf.co.uk

SECTION 1 - FUNDAMENTAL AND DEFINITIONS

1.01 Purpose and Use

1.01.1 It is the purpose of these Special Regulations to establish uniform minimum equipment, accommodation and training standards for monohull and multihull yachts racing offshore. A Proa is excluded from these regulations.

1.01.2 These Special Regulations do not replace, but rather supplement, the requirements of governmental authority, the Racing Rules and the rules of Class Associations and Rating Systems. The attention of persons in charge is called to restrictions in the Rules on the location and movement of

**

**

equipment.

1.01.3 These Special Regulations, adopted internationally, are strongly recommended for use by all organizers of offshore races. Race Committees may select the category deemed most suitable for the type of race to be sailed.

1.02 Responsibility of Person in Charge

- 1.02.1 The safety of a yacht and her crew is the sole and inescapable responsibility of the person in charge who must do his best to ensure that the yacht is fully found, thoroughly seaworthy and manned by an experienced crew who have undergone appropriate training and are physically fit to face bad weather. He must be satisfied as to the soundness of hull, spars, rigging, sails and all gear. He must ensure that all safety equipment is properly maintained and stowed and that the crew know where it is kept and how it is to be used. He shall also nominate a person to take over the responsibilities of the Person in Charge in the event of his incapacitation.
- 1.02.2 Neither the establishment of these Special Regulations, their use by race organizers, nor the inspection of a yacht under these Special Regulations in any way limits or reduces the complete and unlimited responsibility of the person in charge.
- 1.02.3 Decision to race -The responsibility for a yacht's decision to participate in a race or to continue racing is hers alone RRS Fundamental Rule 4.

GPIRB EPIRB, with integral GPS position-fixing
ITU International Telecommunications Union

GPS Global Positioning System

Hatch The term hatch includes the entire hatch assembly and also the lid or cover as

part of that assembly (the part itself may be described as a hatch).

INMARSAT This is Inmarsat Global Limited, the private company that provides GMDSS

satellite distress and safety communications, plus general communications via

voice, fax and data

IMO International Maritime Organisation

IMSO The International Mobile Satellite Organisation, the independent,

intergovernmental organisation that oversees Inmarsat's performance of its

Public Service Obligations for the GMDSS and reports on these to IMO

ISAF International Sailing Federation.

ISO International Standard or International Organization for Standardization.

Lifeline Rope or wire line rigged as guardrail / guardline around the deck LOA Length overall not including pulpits, bowsprits, boomkins etc. LWL (Length of) loaded waterline Monohull Yacht in which the hull depth in any section does not decrease towards the centre-line. Moveable Lead or other material including water which has no practical function in the boat other than to increase weight and/or to influence stability and/or trim and **Ballast** which may be moved transversely but not varied in weight while a boat is racina. ORC Offshore Racing Congress (formerly Offshore Racing Council) Offshore Special Regulation(s) OSR Permanently Means the item is effectively built-in by e.g. bolting, welding, glassing etc. and Installed may not be removed for or during racing. PLB Personal Locator Beacon Proa Asymmetric Catamaran **RRS** ISAF - Racing Rules of Sailing SAR Search and Rescue Search and Rescue Transponder SART Series Date Month & Year of first launch of the first yacht of the production series **SOLAS** Safety of Life at Sea Convention Safety Line A tether used to connect a safety harness to a strong point Held strongly in place by a method (e.g. rope lashings, wing-nuts) which will Securely safely retain the fastened object in severe conditions including a 180 degree **Fastened** capsize and allows for the item to be removed and replaced during racing Static Ballast Lead or other material including water which has no practical function in the boat other than to increase weight and/or to influence stability and/or trim and which may not be moved or varied in weight while a boat is racing. Static Safety A safety line (usually shorter than a safety line carried with a harness) kept clipped on at a work-station Line Variable Water carried for the sole purpose of influencing stability and/or trim and Ballast which may be varied in weight and/or moved while a boat is racing. The words "shall" and "must" are mandatory, and "should" and "may" are permissive. The word "yacht" shall be taken as fully interchangeable with the word "boat". **SECTION 2 - APPLICATION & GENERAL REQUIREMENTS Categories of Events** ** In many types of race, ranging from trans-oceanic sailed under adverse conditions to short-course day races sailed in protected waters, seven categories are established, to provide for differences in the minimum standards of safety and accommodation required for such varying circumstances: 2.01.2 Category 1 Races of long distance and well offshore, where yachts must be completely MoMu,1 self-sufficient for extended periods of time, capable of withstanding heavy storms and prepared to meet serious emergencies without the expectation of outside assistance. Inspection ** A yacht may be inspected at any time. If she does not comply with these Special Regulations her entry may be rejected, or she will be liable to disqualification or such other penalty as may be prescribed by the national authority or the race organizers. **General Requirements** All equipment required by Special Regulations shall:-** function properly be regularly checked, cleaned and serviced ** ** when not in use be stowed in conditions in which deterioration is minimised ** be readily accessible ** be of a type, size and capacity suitable and adequate for the intended use

	and size of the yacht.	
2.03.2	Heavy items:	
a)	ballast, ballast tanks and associated equipment shall be permanently	**
	installed	
b)	heavy movable items including e.g. batteries, stoves, gas bottles, tanks,	**
	toolboxes and anchors and chain shall be securely fastened	
c)	heavy items for which fixing is not specified in Special Regulations shall be	**
	permanently installed or securely fastened, as appropriate	
2.03.3	When to show navigation lights	**
a)	navigation lights (OSR 3.27) shall be shown as required by the	**
	International Regulations for Preventing Collision at Sea, (Part C and	
	Technical Annex 1). All yachts shall exhibit sidelights and a sternlight at the	
	required times.	
SECTIO	N 3 - STRUCTURAL FEATURES, STABILITY, FIXED EQUIPMENT	
3.01	Strength of Build, Ballast and Rig	
	Yachts shall be strongly built, watertight and, particularly with regard to	**
	hulls, decks and cabin trunks capable of withstanding solid water and	
	knockdowns. They must be properly rigged and ballasted, be fully	
	seaworthy and must meet the standards set forth herein. Shrouds shall	
	never be disconnected.	
3.02	Watertight Integrity of a Hull	
3.02.1	A hull, including, deck, coach roof, windows, hatches and all other parts,	**
310211	shall form an integral, essentially watertight unit and any openings in it	
	shall be capable of being immediately secured to maintain this integrity.	
3.02.2	Centreboard and daggerboard trunks and the like shall not open into the	**
3.02.2	interior of a hull except via a watertight inspection/maintenance hatch of	
	which the opening shall be entirely above the waterline of the yacht	
	floating level in normal trim.	
3.02.3	A canting keel pivot shall be completely contained within a watertight	**
3.02.3	enclosure which shall comply with OSR 3.02.2. Access points in the	
	• •	
	watertight enclosure for control and actuation systems or any other	
2 02 4	purpose shall comply with OSR 3.02.1.	**
3.02.4	Moveable ballast systems shall be fitted with a manual control and	ጥጥ
	actuation secondary system which shall be capable of controlling the full	
	sailing load of the keel in the event of failure of the primary system. Such	
	failures would include electrical and hydraulic failure and mechanical failure	
	of the components and the structure to which it mounts. The system must	
	be capable of being operational quickly and shall be operable at any angle	
	of heel. It would be desirable if this system was capable of securing the	
	keel on the centreline.	
3.03	Hull Construction Standards (Scantlings)	MoMu0,1,2
3.03.4	A multihull shall comply with appendix M to these OSR.	Extract File Only
		Mu0,1,2
3.05	Stability and Flotation - Multihulls	Mu0,1,2,3,4
2.05.4	Attention is drawn to ISO 12217-2.	Mu0,1,2,3,4
3.05.1	Adequate watertight bulkheads and compartments (which may include	Mu0,1,2,3,4
	permanently installed flotation material) in each hull shall be provided to	
	ensure that a multihull is effectively unsinkable and capable of floating in a	
	stable position with at least half the length of one hull flooded. (see OSR	
	3.13.2).	
3.05.2	Multihulls built on or after Jan 1999 shall in every hull without	Mu0,1,2,3,4
	accommodation be divided at intervals of not more than 4m (13ft 3") by	
	one or more transverse watertight bulkheads	
3.05.3	A yacht shall be designed and built to resist capsize.	Mu0,1,2,3,4
3.07	Exits and Escape Hatches - Multihulls	Mu0,1,2,3,4
3.07.1	Exits	
a)	In a multihull of 8m (26.2ft) LOA and greater, each hull which contains	Mu0,1,2,3,4
	accommodation shall have at least two exits.	
b)	In a multihull of less than 8m (26.2ft) LOA each hull which contains	Mu0,1,2,3

accommodation shall have at least two exits.

3.07.2	Escape Hatches, Underside Clipping Points & Handholds	
a)	In a multihull of 12m (39.4ft) LOA and greater each hull which contains	Mu0,1,2,3,4
u)	accommodation shall:-	1100,1,2,5,1
i	have an escape hatch for access to and from the hull in the event of an	Mu0,1,2,3,4
ı	inversion;	Mu0,1,2,3,7
ii	when first launched on or after January 2003 have a minimum clearance	Mu0,1,2,3,4
11	diameter through each escape hatch of 450mm or when an escape hatch is	1410,1,2,3,7
	· · · · · · · · · · · · · · · · · · ·	
	not circular, sufficient clearance to allow a crew member to pass through	
***	fully clothed;	M.O 1 2 2 4
iii	when first launched prior to January 2003, if possible have each escape	Mu0,1,2,3,4
	hatch in compliance with the dimensions in OSR 3.07.2(a)(ii);	
iv	when the yacht is inverted have each escape hatch above the waterline;	Mu0,1,2,3,4
V	when first launched on or after January 2001 have each escape hatch at or	Mu0,1,2,3,4
_	near the midships station;	
vi	in a catamaran first launched on or after January 2003 have each escape	Mu0,1,2,3,4
	hatch on the side nearest the vessel's central axis.	
b)	A trimaran of 12m (39.4ft) LOA and greater first launched on or after 1/03	Mu0,1,2,3,4
	shall have at least two escape hatches in compliance with the dimensions	
	in OSR 3.07.2(a) (ii)	
c)	Each escape hatch must have been opened both from inside and outside	Mu0,1,2,3,4
	within 6 months prior to an intended race	
d)	A multihull shall have on the underside appropriate handholds/clipping	Mu0,1,2,3,4
	points sufficient for all crew (on a trimaran these shall be around the	
	central hull).	
e)	A catamaran first launched on or after 1/03 with a central nacelle shall	Mu0,1,2,3,4
	have on the underside around the central nacelle, handholds of sufficient	
0	capacity to enable all persons on board to hold on and/or clip on securely	14-0-1-2-2-4
f)	In a catamaran with a central nacelle, it is recommended that each hull has	Mu0,1,2,3,4
	an emergency refuge, accessible via a special hatch in the side of the hull	
	nearest the vessel's central axis, which hatch may be opened and closed	
2.00	from the inside and outside	
3.08	Hatches & Companionways	
3.08.1	No hatch forward of the maximum beam station, other than a hatch in the	**
	side of a coachroof, shall open in such a way that the lid or cover moves	
	into the open position towards the interior of the hull (excepting ports	
2 22 2	having an area of less than 0.071m2 (110 sq in)).	slesle
3.08.2	A hatch fitted forward of the maximum beam station, located on the side of	**
	the coachroof, opening into the interior of the boat ,and of area greater	
	than 0.071m2 shall comply with ISO12216 design category A and be clearly	
	labelled and used in accordance with the following instruction: "NOT TO BE	
2 22 2	OPENED AT SEA" Attention is drawn to SR 3.02.1	
3.08.3	A hatch shall be:	slesle
b)	permanently attached	**
c)	capable of being firmly shut immediately and remaining firmly shut in a 180	**
2 22 4	degree capsize (inversion)	
3.08.4	A companionway hatch shall:	**
a)	be fitted with a strong securing arrangement which shall be operable from	<i>ተ</i> ተ
1- 3	the exterior and interior including when the yacht is inverted	**
b)	have any blocking devices:	**
I ::	capable of being retained in position with the hatch open or shut	**
ii	whether or not in position in the hatchway, secured to the yacht (e.g. by	· I · · I · · · ·
:::	lanyard) for the duration of the race, to prevent their being lost overboard	**
iii 2 00 7	permit exit in the event of inversion	
3.08.7	A companionway hatch extending below the local sheerline and shall	Mu0,1,2,3,4
2)	comply with either (a) or (b):	Mu() 1 2 2 4
a)	be capable of being blocked off up to the level of the local sheerline, whilst	Mu0,1,2,3,4
	giving access to the interior with the blocking devices (e.g. washboards) in	
	place with a minimum sill height of 300 mm.	

b)	A companionway batch chall be in compliance with ICO 11912 Watertight	ΜυΩ 1 2 2
1	A companionway hatch shall be in compliance with ISO 11812 – Watertight cockpits and quick-draining cockpits to design category A	Mu0,1,2,3
3.09	Cockpits - Attention is Drawn to ISO 11812	
3.09.1	Cockpits shall be structurally strong, self-draining quickly by gravity at all	**
	angles of heel and permanently incorporated as an integral part of the hull.	
3.09.2	Cockpits must be essentially watertight, that is, all openings to the hull	**
2 00 2	must be capable of being strongly and rigidly secured	**
3.09.3	A bilge pump outlet pipe shall not be connected to a cockpit drain. See	**
3.09.4	OSR 3.09.8 for cockpit drain minimum sizes A cockpit sole shall be at least 2% LWL above LWL (or in IMS yachts first	**
3.03.1	launched before 1/03, at least 2% L above LWL)	
3.09.5	A bow, lateral, central or stern well shall be considered a cockpit for the	**
	purposes of OSR 3.09	
3.09.6	In cockpits opening aft to the sea structural openings aft shall be not less	**
2 00 7	in area than 50% maximum cockpit depth x maximum cockpit width.	
3.09.7	Cockpit Volume	
i)	earliest of age or series date before April 1992 the total volume of all cockpits below lowest coamings shall not exceed 6%	Extract File Only
	(LWL x maximum beam x freeboard abreast the cockpit).	MoMu0,1
ii)	earliest of age or series date April 1992 and after	
-	as above for the appropriate category except that "lowest coamings" shall	Extract File Only **
	not include any aft of the FA station and no extension of a cockpit aft of	
	the working deck shall be included in calculation of cockpit volume	Fitting of File Only **
	IMS-rated boats may instead of the terms LWL, maximum beam, freeboard abreast the cockpit, use the IMS terms L, B and FA.	Extract File Uniy **
3.09.8	Cockpit Drains	
3.03.0	See OSR 3.09.1. Cockpit drain cross section area (after allowance for	
	screens if fitted) shall be:-	
a)	in yachts with earliest of age or series date before 1/72 or in any yacht	**
	under 8.5m (28ft) LOA - at least that of 2 x 25mm diameter (one inch)	
h)	unobstructed openings or equivalent	**
b)	in yachts with earliest of age or series date 1/72 and later - at least that of 4 x 20mm diameter (3/4 inch) unobstructed openings or equivalent	
3.10	Sea Cocks or Valves	
0.1_0	Sea cocks or valves shall be permanently installed on all through-hull	**
	openings below the waterline except integral deck scuppers, speed	
	indicators, depth finders and the like, however a means of closing such	
	openings shall be provided.	
3.11	Sheet Winches Sheet winches shall be mounted in such a way that an operator is not	**
	required to be substantially below deck.	
3.12	Mast Step	
	The heel of a keel stepped mast shall be securely fastened to the mast	**
	step or adjoining structure.	
3.13	Watertight Bulkheads	
2 12 1	multihulls also see OSR 3.05	Mu0,1,2,3,4
3.13.1	A hull shall have either a watertight "crash" bulkhead within 15% of LOA from the bow and abaft the forward end of LWL, or permanently installed	Mo0Mu0,1,2,3,4
	closed-cell foam buoyancy effectively filling the forward 30% LOA of the	
	hull.	
3.13.2	Any required watertight bulkhead shall be strongly built to take a full head	Mo0Mu0,1,2,3,4
	of water pressure without allowing any leakage into the adjacent	
	compartment.	
3.14	Pulpits, Stanchions, Lifelines	
3.14.1	When due to the particular design of a multihull it is impractical to precisely	Mu0,1,2,3,4,
	follow Special Regulations regarding pulpits, stanchions, lifelines, the regulations for monohulls shall be followed as closely as possible with the	
	aim of minimising the risk of people falling overboard.	
	a o. minimoning the risk of people family overboard.	

3.14.2	Lifelines required in Special Regulations shall be "taut".	**
a)	As a guide, when a deflecting force of 50 N (5.1 kgf, 11.2 lbf) is applied to	**
/	a lifeline midway between supports, the lifeline should not deflect more	
	than 50 mm.	
3.14.3	The following shall be provided:	**
		**
c)	lifelines (guardlines) supported on stanchions, which, with pulpits, shall	101
	form an effectively continuous barrier around a working deck for man-	
	overboard prevention. Lifelines shall be permanently supported at intervals	
	of not more than 2.20m (86.6") and shall not pass outboard of supporting	
	stanchions	
d)	upper rails of pulpits at no less height above the working deck than the	**
	upper lifelines as in Table 7.	
e)	Openable upper rails in bow pulpits shall be secured shut whilst racing	**
f)	Pulpits and stanchions shall be permanently installed. When there are	**
	sockets or studs, these shall be through-bolted, bonded or welded. The	
	pulpit(s) and/or stanchions fitted to these shall be mechanically retained	
	without the help of the life-lines. Without sockets or studs, pulpits and/or	
	stanchions shall be through-bolted, bonded or welded.	
g)	The bases of pulpits and stanchions shall not be further inboard from the	**
37	edge of the appropriate working deck than 5% of maximum beam or 150	
	mm (6 in), whichever is greater.	
h)	Stanchion or pulpit or pushpit bases shall not be situated outboard of a	**
11)	working deck. For the purpose of this rule the base shall be taken to	
	include a sleeve or socket into which the tube is fitted but shall exclude a	
:\	baseplate which carries fixings into the deck or hull.	**
i)	Provided the complete lifeline enclosure is supported by stanchions and	11-11-
	pulpit bases effectively within the working deck, lifeline terminals and	
	support struts may be fixed to a hull aft of the working deck	slasla
j)	Lifelines need not be fixed to a bow pulpit if they terminate at, or pass	**
	through, adequately braced stanchions set inside and overlapping the bow	
	pulpit, provided that the gap between the upper lifeline and the bow pulpit	
	does not exceed 150 mm (6 in).	
k)	Lifelines shall be continuous and fixed only at (or near) the bow and stern.	**
	However a bona fide gate shall be permitted in the lifelines on each side of	
	a yacht. Except at its end fittings, the movement of a lifeline in a fore-and-	
	aft direction shall not be constrained. Temporary sleeving in 3.14.6 (c)	
	shall not modify tension in the lifeline.	
l)	Stanchions shall be straight and vertical except that:-	**
í	within the first 50 mm (2 in) from the deck, stanchions shall not be	**
•	displaced horizontally from the point at which they emerge from the deck	
	or stanchion base by more than 10 mm (3/8 in), and	
ii	stanchions may be angled to not more than 10 degrees from vertical at any	**
"	point above 50 mm (2 in) from the deck.	
m)	It is strongly recommended that designs also comply to ISO 15085	**
3.14.4	Special Requirements for Pulpits, Stanchions, Lifelines on	M::0 1 2 2 4
J.17.7	Multihulls	Mu0,1,2,3,4
2)	The following shall be provided:-	MuO 1 2 2 4
a)	on a trimaran - a bow pulpit on the main hull, with lifelines around the	Mu0,1,2,3,4
	main hull supported on stanchions. The lifelines may be interrupted where	
	there are nets or crossbeam wings outboard of the main hull	
b)	on a trimaran - where a net joins the base of a bow pulpit on the main hull,	Mu0,1,2,3,4
	an additional lifeline from the top of the pulpit to the forward crossbeam at	
	or outboard of the crossbeam mid-point.	
c)	on a trimaran - at a main or emergency steering position on an outrigger	Mu0,1,2,3,4
	with or without a cockpit, lifelines protecting an arc of 3 meters diameter	
	centred on the steering position. (When measuring between lifelines their	
	taut, undeflected positions shall be taken for this purpose).	
d)	on a catamaran - lifelines from bow to stern on each hull and transverse	Mu0,1,2,3,4
	lifelines to form an effectively continuous barrier around the working area	-

for man-overboard prevention. The transverse lifelines shall be attached to bow and stern pulpits or superstructure. A webbing, strop or rope (minimum diameter 6mm) shall be rove zig-zag between the transverse lifelines and the net.

3.14.6 Lifeline Minimum Diameters, Required Materials, Specifications

a)	Lifelines shall be of :			:	**

- stranded stainless steel wire or

- Single-braided High Modulus Polyethylene (HMPE)

(Dyneema®/Spectra® or equivalent) rope

b) The minimum diameter is specified in table 8 below.

c) Stainless steel lifelines shall be uncoated and used without close-fitting **
sleeving, however, temporary sleeving may be fitted provided it is regularly removed for inspection.

d) When stainless wire is used, Grade 316 is recommended.

e) When HMPE (Dyneema®/Spectra®) is used, it shall be spliced in **

accordance with the manufacturer's recommended procedures.

f) A taut lanyard of synthetic rope may be used to secure lifelines provided the gap it closes does not exceed 100 mm (4 in). This lanyard shall be replaced annually at a minimum.

All wire fittings anchorage points fixtures and lanyards shall comprise a **

g) All wire, fittings, anchorage points, fixtures and lanyards shall comprise a lifeline enclosure system which has at all points at least the breaking strength of the required lifeline wire.

TABLE 8 **

before January 1987 carbon fibre is not recommended in stanchions pulpits and

lifelines.

January 1987 and after stanchions, pulpits and lifelines shall not be made of carbon fibre.

3.15 Multihull Nets or Trampolines

3.15.1	The word "net" is interchangeable with the word "trampoline"	Mu0,1,2,3,4
	A net shall be:-	Mu0.1.2.3.4
a)	essentially horizontal	Mu0,1,2,3,4
b)	made from durable woven webbing, water permeable fabric, or mesh with	Mu0,1,2,3,4

	openings not larger than 5.08cm (2 inches) in any dimension. Attachment	
	points shall be planned to avoid chafe. The junction between a net and a	
	yacht shall present no risk of foot trapping	
c)	solidly fixed at regular intervals on transverse and longitudinal support lines	Mu0,1,2,3,4
	and shall be fine-stitched to a bolt rope	
d)	able to carry the full weight of the crew either in normal working conditions	Mu0,1,2,3,4
/	at sea or in case of capsize when the yacht is inverted.	
e)	It is recommended that lines used to tie the nets should be individually tied	Mu0,1,2,3,4
<i>C)</i>	and not continuously connected to more than four attachment points per	1140,1,2,3,1
	connecting line	
2152		
3.15.2	Trimarans with Double Crossbeams	
a)	A trimaran with double crossbeams shall have nets on each side covering:-	
b)	the rectangles formed by the crossbeams, central hull and outriggers	Mu0,1,2,3,4
c)	the triangles formed by the aft end of the central pulpit, the mid-point of	Mu0,1,2,3,4
	each forward crossbeam, and the intersection of the crossbeam and the	
	central hull	
d)	the triangles formed by the aftermost part of the cockpit or steering	Mu0,1,2,3,4
-	position (whichever is furthest aft), the mid-point of each after crossbeam,	
	and the intersection of the crossbeam and the central hull; except that:-	
e)	the requirement in OSR 3.15.2(d) shall not apply when cockpit coamings	Mu0,1,2,3,4
•,	and/or lifelines are present which comply with the minimum height	
	requirements in Table 7	
3.15.3	Trimarans with Single Crossbeams	
		ΜυΩ 1 2 2 4
a)	A trimaran with a single crossbeam shall have nets between the central hull	Mu0,1,2,3,4
L	and each outrigger:-	M. O 1 2 2 4
b)	on each side between two straight lines from the intersection of the	Mu0,1,2,3,4
	crossbeam and the outrigger, respectively to the aft end of the pulpit on	
	the central hull, and to the aftermost point of the cockpit or steering	
	position on the central hull (whichever is furthest aft)	
3.16	Catamarans	
	On a catamaran the total net surface shall be limited:	
a)	laterally by the hulls; and	Mu0,1,2,3,4
		1 140,1,2,5,1
b)	longitudinally by transverse stations through the forestay base, and the	
b)	longitudinally by transverse stations through the forestay base, and the aftermost point of the boom lying fore and aft. However, a catamaran with	Mu0,1,2,3,4
b)	aftermost point of the boom lying fore and aft. However, a catamaran with	
•	aftermost point of the boom lying fore and aft. However, a catamaran with a central nacelle (non-immersed) may satisfy the regulations for a trimaran	
3.18	aftermost point of the boom lying fore and aft. However, a catamaran with a central nacelle (non-immersed) may satisfy the regulations for a trimaran Toilet	Mu0,1,2,3,4

	than 40% power loss	
iii	the following types and lengths of co-axial feeder cable will meet the	MoMu0,1,2,3
	requirements of OSR 3.29.1 (b)(ii): (a) up to 15m (50ft) - type RG8X ("mini	
	8"); (b) 15-28m (50-90ft) - type RG8U; (c) 28-43m (90-140ft) - type	
	9913F (uses conventional connectors, available from US supplier Belden); (d) 43-70m) 140-230ft - type LMR600 (uses special connectors, available	
	from US supplier Times Microwave).	
iv	it should include channel 72 (an international ship-ship channel which, by	MoMu0,1,2,3
	common use, has become widely accepted as primary choice for ocean	, , ,
	racing yachts anywhere in the world)	
e)	A hand-held marine VHF transceiver, watertight or with a waterproof cover.	MoMu1,2,3,4
	When not in use to be stowed in a grab bag or emergency container (see	
£)	OSR 4.21)	**
f)	Independent of a main radio transceiver, a radio receiver capable of receiving weather bulletins	44
i)	An EPFS (Electronic Position-Fixing System) (e.g. GPS)	MoMu0,1,2,3
n)	An AIS Transponder	MoMu1,2
3.29.2	Yachts are reminded that no reflector, active or passive, is a guarantee of	**
	detection or tracking by a vessel using radar.	
a)	The attention of persons in charge is drawn to legislation in force or	**
	imminent affecting the territorial seas of some countries in which the	
	carriage of an AIS set is or will be mandatory for certain vessels including	
	rolativaly small craft	

SECTION 4 - PORTABLE EQUIPMENT & SUPPLIES for the yacht (for water & fuel see OSR 3.21 and OSR 3.28)

4.01 Sail Letters & Numbers

relatively small craft.

4.01.1 Yachts which are not in an ISAF International Class or Recognized Class shall comply with RRS 77 and Appendix G as closely as possible, except

4.01.2	that sail numbers allotted by a State authority are acceptable. Sail numbers and letters of the size carried on the mainsail must be	**
4.02 4.02.1	displayed by alternative means when none of the numbered sails is set. Hull marking (colour blaze) To assist in SAR location:-	Mo0,1,Mu0,1,2,3,4
b)	Each yacht is recommended to show at least 1 m^2 of fluorescent pink or orange or yellow colour as far as possible in a single area on the coachroof and/or deck where it can best be seen	MoMu1
4.02.2	Multihulls shall show on the underside, where they can be seen when inverted, an solid area of highly-visible colour (e.g. Day-Glo pink, orange, or yellow) of at least 1m^2	Mu0,1,2,3,4
4.02.3	Each yacht is recommended to show on each underwater appendage an area of highly-visible colour	MoMu0,1
4.03	Soft Wood Plugs	**
4.04	Soft wood plugs, tapered and of the appropriate size, shall be attached or stowed adjacent to the appropriate fitting for every through-hull opening. Jackstays, Clipping Points and Static Safety Lines	1
4.04.1 a)	The following shall be provided: Jackstays:-	MoMu0,1,2,3
a)	shall be provided-	1101100,1,2,3
İ	attached to through-bolted or welded deck plates or other suitable and strong anchorage fitted on deck, port and starboard of the yacht's centre line to provide secure attachments for safety harness:-	MoMu0,1,2,3
ii	comprising stainless steel 1 x 19 wire of minimum diameter 5 mm (3/16 in), high modulus polyethylene (such as Dyneema/Spectra) rope or webbing of equivalent strength;	MoMu0,1,2,3
iii	which, when made from stainless steel wire shall be uncoated and used	MoMu0,1,2,3
iv	without any sleeving; 20kN (2,040 kgf or 4,500 lbf) min breaking strain webbing is recommended;	MoMu0,1,2,3
V	at least two of which should be fitted on the underside of a multihull in case of inversion.	Mu0,1,2,3
4.04.2	Clipping Points:-	
a)	shall be provided- attached to through-bolted or welded deck plates or other suitable and	MoMu0,1,2,3
a)	strong anchorage points adjacent to stations such as the helm, sheet winches and masts, where crew members work for long periods:-	1101100,1,2,3
b)	which, together with jackstays and static safety lines shall enable a crew member-	MoMu0,1,2,3
i 	to clip on before coming on deck and unclip after going below;	MoMu0,1,2,3
ii	whilst continuously clipped on, to move readily between the working areas on deck and the cockpit(s) with the minimum of clipping and unclipping operations.	MoMu0,1,2,3
c)	The provision of clipping points shall enable two-thirds of the crew to be simultaneously clipped on without depending on jackstays	MoMu0,1,2,3
d)	In a trimaran with a rudder on the outrigger, adequate clipping points shall be provided that are not part of the deck gear or the steering mechanism, in order that the steering mechanism can be reached by a crew member whilst clipped on.	Mu0,1,2,3
e)	Warning - U-bolts as clipping points - see OSR 5.02.1(a)	
4.05	Fire Extinguishers Shall be provided as follows:	
4.05.1	Fire extinguishers, at least two, readily accessible in suitable and different parts of the yacht	**
4.05.2	Fire Extinguishers, at least two, of minimum 2kgs each of dry powder or equivalent	MoMu0,1,2,3
4.05.4 4.06	A fire blanket adjacent to every cooking device with an open flame Anchor(s)	**
4.06.1	An anchor or anchors shall be carried according to the table below:	**

a) i	The following anchors shall be provided For yachts of 8.5 m LOA (28 ft) and over there shall be 2 anchors together	MoMu1,2,3
ii	with a suitable combination of chain and rope, all ready for immediate use For yachts under 8.5 m LOA (28 ft) there shall be 1 anchor together with a suitable combination of chain and rope, all ready for immediate use	MoMu1,2,3
4.07 4.07.1	Flashlight(s) and Searchlight(s) The following shall be provided:-	
a)	A watertight, high-powered searchlight, suitable for searching for a person overboard at night and for collision avoidance with spare batteries and bulbs, and	**
b)	a watertight flashlight with spare batteries and bulb	**
4.08	First Aid Manual and First Aid Kit	**
4.08.1	A suitable First Aid Manual shall be provided	**
	In the absence of a National Authority's requirement, the latest edition of one of the following is recommended:-	**
a)	International Medical Guide for Ships, World Health Organisation, Geneva	MoMu0,1
<i>c)</i>	Le Guide de la medecine a distance, by Docteur J Y Chauve, published by Distance Assistance BP33 F-La Baule, cedex, France.	**
<i>e)</i>	Skipper's Medical Emergency Handbook by Dr Spike Briggs and Dr	**
4.00.2	Campbell Mackenzie www.msos.org.uk	**
4.08.2 <i>4.08.3</i>	A First Aid Kit shall be provided The contents and storage of the First Aid Kit should reflect the guidelines	**
4.00.3	of the Manual carried, the likely conditions and duration of the passage, and the number of people aboard the yacht.	
4.09	Foghorn	
	A foghorn shall be provided	**
4.10	Radar Reflector	
4.10.1	A passive Radar Reflector (that is, a Radar Reflector without any power) shall be provided	**
a)	If a radar reflector is :	**
i 	octahedral with triangular plates making up each pocket it must have a minimum diagonal measurement of 456 mm (18in).	**
ii 	octahederal with circular sector plates making up each pocket it must have a minimum diameter of 304mm (12in).	**
iii	not octahedral it must have a documented RCS (radar cross-section) of not less than 10 m2 at 0° elevation and be capable of performance around 360° in azimuth.	**
	The minimum effective height above water is 4.0 m (13 ft).	**
b)	The passive and active devices referred to in these notes and in 4.10.1 and 4.10.2 above are primarily intended for use in the X (9GHz) band	**
4.10.2	The most effective radar response from a yacht may be provided by an	MoMu1,2,3,4
	RTE (Radar Target Enhancer) which may be on board in addition to the required passive reflector. An RTE should conform to ISO 8729-2:2009. An RTE is strongly recommended.	
b)	The display of a passive reflector or the operation of an RTE is for the person in charge to decide according to prevailing conditions.	**
4.10.3	When available, a passive radar reflector in compliance with ISO8729-	**
	1:2010 will offer improved performance over earlier models and has a size	
	typified by a cylinder of not more than weight 5kg, height 750mm and diameter 300mm.	
4.10.4	S (3GHz) band radar is often used by ships in bad weather to complement	**
	X (9GHz) band radar. On S (3GHz) band a passive reflector offers about	
	1/10 the response obtained on the X (9GHz) band. Unless specifically	
	designed to operate in the S(3GHz) band, an RTE will provide no response	
١	at all.	
4.11	Navigation Equipment	
4.11.1	Charts Navigational shorts (not colohy electronic), light list and short pletting	**
	Navigational charts (not solely electronic), light list and chart plotting equipment shall be provided	

4442		
4.11.2	Reserve Navigation System	Manage 1
	Navigators are recommended to carry a sextant with suitable tables and a	MoMu0,1
	timepiece or an adequate reserve navigation system so that total reliance is	
	not placed on dead-reckoning and a single form of EPFS (Electronic Position-Fixing System) (see Volpe Report at	
	www.navcen.uscg.gov/archive/2001/Oct/FinalReport-v4.6.pdf)	
4.12	Safety Equipment Location Chart	
7.12	A safety equipment location chart in durable waterproof material shall be	**
	displayed in the main accommodation where it can best be seen, clearly	
	marked with the location of principal items of safety equipment.	
4.13	Echo Sounder or Lead Line	
4.13.1	An echo sounder or lead line shall be provided	MoMu1,2,3,4
4.14	Speedometer or Distance Measuring Instrument (log)	, , - ,
	A speedometer or distance measuring instrument (log) shall be provided	MoMu0,1,2,3
4.15	Emergency Steering	
4.15.1	Emergency steering shall be provided as follows:	
a)	except when the principal method of steering is by means of an	MoMu0,1,2,3
	unbreakable metal tiller, an emergency tiller capable of being fitted to the	
	rudder stock;	
b)	crews must be aware of alternative methods of steering the yacht in any	MoMu0,1,2,3
	sea condition in the event of rudder loss. At least one method must have	
	been proven to work on board the yacht. An inspector may require that	
4.16	this method be demonstrated.	
4.10	Tools and Spare Parts Tools and spare parts, including effective means to quickly disconnect or	**
	sever the standing rigging from the hull shall be provided.	
4.17	Yacht's name	
1127	Yacht's name shall be on miscellaneous buoyant equipment, such as	**
	lifejackets, cushions, lifebuoys, lifeslings, grab bags etc.	
4.18	Marine grade retro-reflective material	
	Marine grade retro-reflective material shall be fitted to lifebuoys, lifeslings,	**
	liferafts and lifejackets. See OSRs 5.04, 5.08.	
4.19	EPIRBs	
4.19.1	A 406 MHz EPIRB shall be provided	MoMu1,2
b)	It is recommended that a 406 MHz EPIRB should include an internal GPS,	MoMu0,1,2
6)	and also a 121.5MHz transmitter for local homing.	MaMuO 1 2
c)	Every 406 MHz EPIRB shall be properly registered with the appropriate authority.	MoMu0,1,2
d)	Every ship's 406 MHz EPIRB shall be water and manually activated.	MoMu0,1,2
e)	EPIRBs should be tested in accordance with manufacturer's instructions	MoMu0,1,2
Cy	when first commissioned and then at least annually.	11011407172
f)	A list of registration numbers of 406 EPIRBs should be notified to event	MoMu0,1,2
,	organizers and kept available for immediate use.	, ,
g)	Consideration should be given to the provision of a locator device (e.g. an	MoMu0,1,2
	"Argos" beacon) operating on non - SAR frequencies, to aid salvage if a	
	yacht is abandoned.	
h)	Beacons with only 121.5MHz are no longer recommended for distress	MoMu0,1,2
	alerting. Satellite processing of 121.5 MHz is being phased out. 121.5MHz	
	will continue to be used for local homing by on-board D/F systems and for	
	local homing by SAR units. Type "E" EPIRBs are no longer supported and	
a)	should be replaced immediately.	MaMuo
i)	See OSR 3.29.1(e) for on-board D/F and OSR 5.07.1(b) for personal	MoMu0
4.20	EPIRBs (PLBs) Liferafts	MoMu0,1,2
4.20.1	Liferaft Construction and Packed Equipment	1-101-140 ₁ 1 ₁ 2
4.20.2	Liferaft(s) shall be provided capable of carrying the whole crew when each	MoMu1,2
0.2	liferaft shall comply with either:-	
a)	Liferafts shall comply with SOLAS LSA code 1997 Chapter IV or later	Extract File MoMu1,2
•	version except that they are acceptable with a capacity of 4 persons and	,

	may be packed in a valise. A SOLAS liferaft shall contain at least a SOLAS	
b)	"A" pack or for liferafts manufactured prior to January 2003, OSR Appendix A part I	MoMu1,2
-	(ORC), or	MaMul 2
c)	OSR Appendix A part II (ISAF) when, unless otherwise specified by a race organizer, the floor shall include thermal insulation, or	MoMu1,2
d)	ISO 9650 Part I Type I Group A (ISO) when each liferaft shall contain at	MoMu1,2
i	least a Pack 2 (<24h) and- shall have a semi-rigid boarding ramp, and	MoMu1,2
ii	shall be so arranged that any high-pressure hose shall not impede the	MoMu1,2
iii	boarding process, and shall have a topping-up means provided for any inflatable boarding ramp,	MoMu1,2
	and	•
iv	when the liferaft is designed with a single ballast pocket this shall be accepted provided the liferaft otherwise complies with ISO 9650 and meets	MoMu1,2
	a suitable test of ballast pocket strength devised by the manufacturer and	
V	compliance with OSR 4.20.2 (d) i-iv shall be indicated on the liferaft	MoMu1,2
4.20.3	certificate. Liferaft Packing and Stowage	MoMu0,1,2
0.0	A Liferaft shall be either:-	MoMu0,1,2
a)	packed in a transportable rigid container or canister and stowed on the	MoMu0,1,2
b)	working deck or in the cockpit, or:- packed in a transportable rigid container or canister or in a valise and	MoMu0,1,2
D)	stowed in a purpose-built rigid compartment containing liferaft(s) only and	1101140,1,2
	opening into or adjacent to the cockpit or working deck, or through a	
i	transom, provided that:- each compartment is watertight or self-draining (self-draining	MoMu0,1,2
•	compartments will be counted as part of the cockpit volume except when	1101100,1,2
	entirely above working deck level or when draining independently	
::	overboard from a transom stowage - see OSR 3.09) and-	MaMiiO 1 2
ii	the cover of each compartment is capable of being easily opened under water pressure, and-	MoMu0,1,2
iii	the compartment is designed and built to allow a liferaft to be removed	MoMu0,1,2
iv	and launched quickly and easily, or- in a yacht with age or series date before June 2001, a liferaft may be	MoMu1,2
IV	packed in a valise not exceeding 40kg securely stowed below deck	141014u1,2
	adjacent to a companionway.	
V	Liferaft stowage on a multihull shall be such that each liferaft may be	Mu0,1,2
c)	readily removed and launched whether or not the yacht is inverted. The end of each liferaft painter should be permanently made fast to a	MoMu0,1,2
-7	strong point on board the yacht.	, ,
4.20.4	Liferaft Launching	MoMu0,1,2
a)	Each raft shall be capable of being got to the lifelines or launched within 15 seconds.	MoMu0,1,2
b)	Each liferaft of more than 40kg weight should be stowed in such a way	MoMu0,1,2
	that the liferaft can be dragged or slid into the sea without significant	
4.20.5	lifting Liferaft Servicing and Inspection	MoMu0,1,2
7.20.3	IMPORTANT NOTICE Recent evidence has shown that packaged liferafts	MoMu0,1,2
	are vulnerable to serious damage when dropped (e.g. from a boat onto a	, ,
	marina pontoon) or when subjected to the weight of a crew member or	
	heavy object (e.g. an anchor). Damage can be caused internally by the weight of the heavy steel CO2 bottle abrading or splitting neighbouring	
	layers of buoyancy tube material. ISAF has instituted an investigation into	
	this effect and as an interim measure requires that every valise-packed	
	liferaft shall have an annual certificate of servicing. A liferaft should be	
	taken for servicing if there is any sign of damage or deterioration (including	
	on the underside of the pack). Persons in charge should insist on great care in handling liferafts and apply the rules NO STEP and DO NOT DROP	
	cand and managemental and apply the raise free of the and be free blot	

	UNLESS LAUNCHING INTO THE SEA.	
a)	Certificates or copies, of servicing and/or inspection shall be kept on board	MoMu0,1,2
	the yacht. Every SOLAS liferaft and every valise-packed liferaft shall have	
	a valid annual certificate of new or serviced status from the manufacturer	
	or his approved service station.	
b)	A liferaft built to OSR Appendix A part I ("ORC") packed in a rigid container	MoMu0,1,2
-,	or canister shall either be serviced annually or may, when the	
	manufacturer so specifies, be inspected annually (not necessarily	
	unpacked) provided the yacht has on board written confirmation from the	
	manufacturer's approved service station stating that the inspection was	
	· · · · · · · · · · · · · · · · · · ·	
۵)	satisfactory.	MaNut 2
c)	A liferaft built to OSR Appendix A part II ("ISAF") packed in a rigid	MoMu1,2
	container or canister shall either be serviced annually or may, when the	
	manufacturer so specifies, have its first service no longer than 3 years after	
	commissioning and its second service no longer than 2 years after the first.	
_	Subsequent services shall be at intervals of not more than 12 months.	
d)	A liferaft built to ISO 9650 Part 1 Type Group A, packed in a rigid container	MoMu1,2
	or canister shall be serviced in accordance with the manufacturer's	
	instructions but NOT less frequently than every three years	
e)	A liferaft built to ISO 9650 Part 1 Type Group A packed in a valise shall be	MoMu1,2
	inspected annually by an approved manufacturer's agent and serviced in	•
	accordance with the manufacturer's instructions but NOT less frequently	
	than every three years.	
f)	Liferaft servicing certificates shall state the specification that the liferaft	MoMu1,2
• /	was built to. See OSR 4.20.2	
4.21.2	Grab Bags to Accompany Liferafts	
a)	A yacht is recommended to have for each liferaft, a grab bag with the	MoMu0,1,2
a)	following minimum contents. A grab bag should have inherent flotation, at	11011110,1,2
	least 0.1 m^2 area of fluorescent orange colour on the outside, should be	
	marked with the name of the yacht, and should have a lanyard and clip.	
6)	, , ,	$M_0M_{\odot}O$ 1 2
<i>b)</i>	Note: it is not intended to duplicate in a grab bag items required by other	MoMu0,1,2
	OSRs to be on board the yacht - these recommendations cover only the	
	stowage of those items	
4.21.3	Grab Bag Recommended Contents	
a)	2 red parachute and 2 red hand flares and cyalume-type chemical light	MoMu1,2
	sticks (red flares compliant with SOLAS)	
<i>b)</i>	watertight hand-held EPFS (Electronic Position-Fixing System) (eg GPS) in	MoMu1,2
	at least one of the grab bags carried by a yacht	
c)	SART (Search and Rescue Transponder) in at least one of the grab bags	MoMu1,2
	carried by a yacht	
<i>d)</i>	a combined 406MHz/121.5MHz or type "E" EPIRB (see OSR 4.19.1) in at	MoMu1,2
	least one of the grab bags carried by a yacht	
e)	water in re-sealable containers or a hand-operated desalinator plus	MoMu1,2
•	containers for water	•
f)	a watertight hand-held marine VHF transceiver plus a spare set of batteries	MoMu0,1,2
<i>g</i>)	a watertight flashlight with spare batteries and bulb	MoMu0,1,2
h)	dry suits or thermal protective aids or survival bags	
i)	second sea anchor for the liferaft (not required if the liferaft has already a	MoMu0,1,2
′/	spare sea anchor in its pack) (recommended standard ISO 17339) with	1101100,1,2
	swivel and >30m line diameter >9.5 mm	
<i>i</i>)		$M_0M_{11}O$ 1 2
<i>j)</i>	two safety tin openers (if appropriate)	MoMu0,1,2
<i>k)</i>	first-aid kit including at least 2 tubes of sunscreen. All dressings should be	MoMu0,1,2
	capable of being effectively used in wet conditions. The first-aid kit should	
0	be clearly marked and re-sealable.	
<i>I)</i>	signalling mirror	MoMu0,1,2
m)	high-energy food (min 10 000kJ per person recommended for Cat Zero)	MoMu0,1,2
n)	nylon string, polythene bags, seasickness tablets (min 6 per person	MoMu0,1,2
	recommended)	
0)	watertight hand-held aviation VHF transceiver (if race area warrants)	MoMu0,1,2

4.22	Lifebuoys				
4.22.1	The following shall be pro	ovided within reach of the	helmsman and ready for	**	
	instant use:				
a)		ting light and a drogue or	a Lifesling with a self-	**	
	igniting light and without				
b)		one lifebuoy within reach o	of the helmsman and	ΜοΜι	u0,1,2
	ready for instant use, equ	Jipped with:

a)		aromatic polyamides, carbon and similar fibres shall not be used in a trysail or storm jib but spectra/dyneema and similar materials are permitted.	**
b)		it is strongly recommended that a heavy-weather jib does not contain aromatic polyamides, carbon and similar fibres other than spectra/dyneema.	**
4.3	26.4	The following shall be provided:-	
_ a)		sheeting positions on deck for each storm and heavy-weather sail;	**
b)		for each storm or heavy-weather jib, a means to attach the luff to the stay, independent of any luff-groove device. A heavy weather jib shall have the means of attachment readily available. A storm jib shall have the means of attachment permanently attached; Storm and heavy weather jib areas shall be calculated as:	**
		(0.255 x luff length x (luff perpendicular + 2 x half width))* To apply to sails made in January 2012 and after.	
c)		a storm trysail which shall be capable of being sheeted independently of the boom with trysail area not greater than 17.5% mainsail hoist (P) x mainsail foot length (E). The storm trysail area shall be measured as (0.5 x leech length x shortest distance between tack point and leech). The storm trysail shall have neither headboard nor battens, however a storm trysail is not required in a yacht with a rotating wing mast which can adequately substitute for a trysail. The method of calculating area applies to sails made in January 2012 and after.	MoMu 0,1,2
d)		the storm trysail as required by OSR 4.26.4 (c) shall have the yacht's sail number and letter(s) shall be placed on both sides of the trysail (or on a rotating wing mast as substitute for a trysail) in as large a size as practicable;	Extract File Only MoMu 0,1,2
e)		a storm jib of area not greater than 5% height of the foretriangle squared, with luff maximum length 65% height of the foretriangle;	MoMu0,1,2
f)		a heavy-weather jib (or heavy-weather sail in a yacht with no forestay) of area not greater than 13.5% height of the foretriangle squared;	**
h) -		in the case of a yacht with an in-mast furling mainsail, the storm trysail must be capable of being set while the mainsail is furled.	MoMu0,1,2
<i>i)</i>		A trysail track should allow for the trysail to be hoisted quickly when the mainsail is lowered whether or not the mainsail is stowed on the main boom. It is strongly recommended that a boat has either a dedicated trysail track permanently installed with the entry point accessible to a person standing on the main deck or coachroof, or a permanently installed stay on which to	<i>MoMu0,1,2</i>
<i>k)</i>		It is strongly recommended that an inner forestay is provided either	MoMu0,1,2
		permanently installed or readily set up, on which to set the storm jib.	, ,

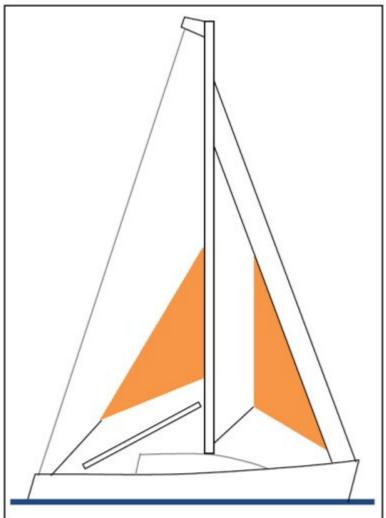

Figure 3 4.27 **Drogue, Sea Anchor** MoMu0,1 МоМи1 4.27.1 A droque for deployment over the stern, or alternatively a sea anchor or parachute anchor for deployment over the bow, complete with all gear needed to rig and deploy the sea anchor or drogue, is strongly recommended to withstand long periods in rough conditions (see Appendix 4.28 **Man Overboard Alarm** MoMu0 4.28.2 A yacht is recommended to be equipped with an EPFS (e.g. GPS) capable MoMu 1, 2 of immediately recording a man overboard position from each helm station 4.28.3 A yacht shall be equipped with an EPFS (e.g. GPS) capable of immediately MoMu 1, 2 recording a man overboard position from each helm station (From January 2012) **SECTION 5 - PERSONAL EQUIPMENT** 5.01 Lifejacket ** 5.01.1 Each crew member shall have a lifejacket as follows:-** a) In accordance with ISO 12402 – 3 (Level 150) or equivalent, including EN 396 or UL 1180 ii Lifejackets manufactured after 1 January 2012 shall be in accordance with ISO 12402-3 (Level 150) and shall be fitted with:-• an emergency light in accordance with either ISO 12402-8 or SOLAS LSA code 2.2.3. a sprayhood in accordance with ISO 12402-8. a full deck safety harness in accordance with ISO 12401 (ISO 1095) including a crotch or thigh strap (holding down device) as specified in ISO 12401 (ISO 1095).

If of an inflatable type either

(a)

automatic, manual and oral inflation or

	(h) manual and oral inflation	
	(b) manual and oral inflation Notes: ISO 13403 requires Level 150 lifeiackets to be fitted with a	
	Notes: ISO 12402 requires Level 150 lifejackets to be fitted with a	
	mandatory whistle and retro-reflective material. Also, when fitted with a safety harness, ISO 12402 requires that this shall be the full safety harness	
	in accordance with ISO 12401. Any equivalent lifejacket shall have equal	
	, , , , , , , , , , , , , , , , , , , ,	
	requirements. Persons of larger than average build are generally more buoyant than	
	those of average build and so do not require a lifejacket with greater levels	
L)	of flotation. Wearing a Level 275 lifejacket may hamper entry into liferafts.	**
b)	fitted with either a crotch strap(s) / thigh straps or a full safety harness in	11-11-
	accordance with ISO 12401,	
	Note: The function of lifejacket crotch/thigh straps is to hold the buoyancy	
	element down. A crew member before a race should adjust a lifejacket to	
	fit then retain that lifejacket for the duration of the race. Correct	
- \	adjustment is fundamental to the lifejacket functioning correctly.	**
c)	fitted with a lifejacket light in accordance with SOLAS LSA code 2.2.3	ተ
15	(white, >0.75 candelas, >8 hours),	slasla
d)	if inflatable have a compressed gas inflation system,	**
e)	if inflatable, regularly checked for gas retention,	**
f)	compatible with the wearer's safety harness,	**
g)	clearly marked with the yacht's or wearer's name,	**
	It is strongly recommended that a lifejacket has:	
<i>j)</i>	a splashguard / sprayhood See ISO 12402 – 8,	MoMu1,2,3,4
<i>k)</i>	a PLB unit (as with other types of EPIRB, should be properly registered	MoMu1,2,3,4
	with the appropriate authority)	
<i>1)</i>	if of a gas inflatable type, a spare cylinder and if appropriate a spare	MoMu1,2,3,4

At least 30% of the crew shall each, in addition to the above be provided with either:- a safety line not more than 1m long, or a mid-point snaphook on a 2m safety line A safety line purchased in January 2001 or later shall have a coloured flag embedded in the stitching, to indicate an overload. A line which has been overloaded shall be replaced as a matter of urgency. A crew member's lifejacket and harness shall be compatible It is strongly recommended that:- static safety lines should be securely fastened at work stations; A harness should be fitted with a crotch strap or thigh straps. to draw attention to wear and damage, stitching on harness and safety lines should be of a colour contrasting strongly with the surrounding material; snaphooks should be of a type which will not self-release from a U-bolt (see OSR 5.02.1(a)) and which can be easily released under load (crew	MoMu0,1,2,3
5.02.1 5.02.2 a) b) 5.02.3 5.02.4 5.02.5 a) b)	Each crew member shall have a harness and safety line that complies with ISO 12401 or equivalent with a safety line not more than 2m in length. Harnesses and safety lines manufactured prior to Jan 2010 shall comply with either ISO 12401 or EN 1095. Harnesses and safety lines manufactured prior to Jan 2001 are not permitted. Warning it is possible for a plain snaphook to disengage from a U bolt if the hook is rotated under load at right-angles to the axis of the U-bolt. For this reason the use of snaphooks with positive locking devices is strongly recommended. At least 30% of the crew shall each, in addition to the above be provided with either:- a safety line not more than 1m long, or a mid-point snaphook on a 2m safety line A safety line purchased in January 2001 or later shall have a coloured flag embedded in the stitching, to indicate an overload. A line which has been overloaded shall be replaced as a matter of urgency. A crew member's lifejacket and harness shall be compatible It is strongly recommended that:- static safety lines should be securely fastened at work stations; A harness should be fitted with a crotch strap or thigh straps. to draw attention to wear and damage, stitching on harness and safety lines should be of a colour contrasting strongly with the surrounding material; snaphooks should be of a type which will not self-release from a U-bolt	MoMu0,1,2,3

<i>e)</i>	harness for the duration of the race.	MOMUU,1,2,3
5.02.6	Warning - a safety line and safety harness are not designed to tow a	**
	person in the water and it is important that the shortest safety line length	
	possible be used with a harness to minimise or eliminate the risk of a	
	person's torso becoming immersed in water outside the boat, especially	
	when working on the foredeck. 1m safety lines or the midpoint snaphook	
	on a 2m line should be used for this purpose. The diligent use of a	
	properly adjusted safety harness and the shortest safety line practicable is	
	regarded as by far the most effective way of preventing man overboard	
	incidents.	
5.04	Foul Weather Suits	
<i>b)</i>	it is recommended that a foul weather suit should be fitted with marine-	**
	grade retro-reflective material, and should have high-visibility colours on its	
	upper parts and sleeve cuffs. See OSR 4.18	
	A buoyant watertight flashlight, one shall be supplied to each crew	MoMu0
- 0-	member.	
5.07	Survival Equipment	MoMu0
d)	Attention is drawn to the value of keeping on the person a combined	MoMu0,1,2
	406MHz/121.5MHz PLB when on deck: this may aid location in a man	
	overboard incident independent of the equipment carried by the parent	
-1	Vessel	MaM0 1 2
e)	All PLB units, as with other types of EPIRB, should be properly registered	MoMu0,1,2
E 07 2	with the appropriate authority It is strongly recommended that an immersion suit should be supplied to	Mul 221
5.07.2	It is strongly recommended that an immersion suit should be supplied to each crew member in a multihull in conditions where there is a potential	Mu1,2,3,4
	for hypothermia	
SECTIO	ON 6 - TRAINING	
6.01	At least 30% but not fewer than two members of a crew,	MoMu1,2
0.01	including the skipper shall have undertaken training within the	1-101-141,2
	five years before the start of the race in both 6.02 topics for	
	theoretical sessions, and 6.03 topics which include practical,	
	hands-on sessions.	
6.01.3	It is strongly recommended that all crew members should undertake	MoMu1,2
	training as in OSR 6.01 at least once every five years	,
6.01.4	Except as otherwise provided in the Notice of Race, an in-date certificate	MoMu0,1,2
	gained at an ISAF Approved Offshore Personal Survival Training course	
	shall be accepted by a race organizing authority as evidence of compliance	
	with Special Regulation 6.01. See Appendix G - Model Training Course, for	
	further details.	
6.02	Training Topics for Theoretical Sessions	
6.02.1	care and maintenance of safety equipment	MoMu0,1,2
6.02.2	storm sails	MoMu0,1,2
6.02.3	damage control and repair	MoMu0,1,2
6.02.4	heavy weather - crew routines, boat handling, drogues	MoMu0,1,2
6.02.5	man overboard prevention and recovery	MoMu0,1,2
6.02.6	giving assistance to other craft	MoMu0,1,2
6.02.7	hypothermia	MoMu0,1,2
6.02.8	SAR organisation and methods	MoMu0,1,2
6.02.9	weather forecasting	MoMu0,1,2
6.03	Training Topics for Practical, Hands-On Sessions	MoMu0,1,2
6.03.1	liferafts and lifejackets	MoMu0,1,2
6.03.2	fire precautions and use of fire extinguishers	MoMu0,1,2
6.03.3	communications equipment (VHF, GMDSS, satcomms, etc.)	MoMu0,1,2
6.03.4	pyrotechnics and EPIRBs	MoMu0,1,2 **
6.04	Routine Training On-Board	** **
6.04.1	It is recommended that crews should practice safety routines at reasonable	<i>~~</i>
	intervals including the drill for man-overboard recovery At least two members of the crew	MoMu1

shall have a first aid certificate completed within the last five years meeting any of the following requirements:

i A certificate listed on the ISAF website www.sailing.org/specialregs of MNA

recognised courses STCW 95 First Aid Training complying with A-VI/1-3 – Elementary First Aid or higher STCW level

6.05.4 An example model first aid training course is included in Appendix N.

APPENDICES TO SPECIAL REGULATIONS

Appendix A - Minimum Specification for Yachtsmens Liferafts

Appendix B - A guide to ISO and other Standards

Appendix C - Standard Inspection Card

Appendix D - Quickstop & Lifesling

Appendix E - Hypothermia

Appendix F - Drogues and sea anchors

Appendix G - Model Training Course

Appendix H - ISAF Code for the organisation of Oceanic Races

Appendix M - Hull Construction Standards (Scantlings)

Appendix N - Model First Aid Training Course

APPENDIX M - Hull Construction Standards (Scantlings) (Monohulls pre-2010 and Multihulls)

(MO	ononuiis pre-2010 and Multinuiis)	
m1	A monohull with the earliest of Age or Series Date before the 1 January 2010 shall comply with OSR 3.03.1, 3.03.2 and 3.03.3 or with this	MoMu0,1,2
	appendix. A multihull shall comply with this appendix.	
	TABLE 2	MoMu0,1,2
	LOA earliest of age or series date	race category
	all January 1986 and after	MoMu0,1
	12m (39.4 feet) and over January 1987 and after	MoMu2
	under 12m (39.4 feet) January 1988 and after	MoMu2
m2	A yacht defined in the table above shall have been designed built,	MoMu0,1,2
	maintained, modified and repaired in accordance with the requirements of either:	
a)	the EC Recreational Craft Directive for Category A (having obtained the CE	MoMu0,1,2
•	mark), or	
b)	the ABS Guide for Building and Classing Offshore Yachts in which case the yacht shall have on board either a certificate of plan approval issued by ABS, or written statements signed by the designer and builder which confirm that they have respectively designed and built the yacht in accordance with the ABS Guide,	MoMu0,1,2
c)	ISO 12215 Category A, with written statements signed by the designer and builder which confirm that they have respectively designed and built the yacht in accordance with the ISO standard,	MoMu0,1,2
d)	except that a race organizer or class rules may accept when that described in (a), (b), or (c) above is not available, the signed statement by a naval architect or other person familiar with the standards listed above that the yacht fulfills the requirements of (a), (b), or (c).	MoMu0,1,2
m3	Any significant repairs or modifications to the hull, deck, coachroof, keel or appendages, on a yacht defined in table 2 shall be certified by one of the	MoMu0,1,2

methods above and an appropriate written statement or statements shall

end of file

be on board.
