### **ISAF OFFSHORE SPECIAL REGULATIONS**

www.sailing.org/specialregs
Extract for Race Category 2 Multihulls

JANUARY 2012 - DECEMBER 2013 © ORC Ltd. 2002, all amendments from 2003 © International Sailing Federation, (IOM) Ltd. Version 1.2 - 2012

### Because this is an extract not all paragraph numbers will be present

#### Copyright

When reprinting these regulations National Authorities and Race Organizers should :-

• request copyright permission from ISAF and ORC Ltd (normally given free of charge)

• display a copyright acknowledgement with the reprint (similar to © ORC Ltd. 2002, all amendments from 2003 © International sailing Federation, (IOM) Ltd.)

• make any amendments by deleting contrary provisions and indicating that changes have been made

• supply a copy of the reprint to each of ISAF and ORC Ltd

Official interpretations shall take precedence over these Special Regulations and will be indexed, numbered, dated and displayed on the ISAF web site www.sailing.org/specialregs

#### Language & Abbreviations Used

- Mo Monohull
- Mu Multihull

" \*\* " means the item applies to all types of yacht in all Categories except

5 for which see Appendix J or 6 for which see Appendix L.

RED TYPE indicates a significant changes in 2012 *Guidance notes and recommendations are in italics* 

The use of the masculine gender shall be taken to mean either gender

### Administration

The Offshore Special Regulation are administered by the ISAF Special Regulation Sub-Committee whose terms of reference are as follows: (www.sailing.org/regulations)

ISAF Regulation 6.8.8.3 - The Special Regulations Sub-Committee shall: (a) be responsible for the maintenance, revision and changes to the ISAF Offshore Special Regulations governing offshore racing, under licence from ORC Ltd. Such changes shall be biennial with revised editions published in January of each even year, except that matters of an urgent nature affecting safety may be dealt with by changes to the Regulations on a shorter time scale;

(b) monitor developments in offshore racing relative to the standards of safety and seaworthiness.

Any queries please E-Mail: technical@isaf.co.uk

### **SECTION 1 - FUNDAMENTAL AND DEFINITIONS**

### 1.01 Purpose and Use

- 1.01.1 It is the purpose of these Special Regulations to establish uniform minimum equipment, accommodation and training standards for monohull and multihull yachts racing offshore. A Proa is excluded from these regulations.
- 1.01.2 These Special Regulations do not replace, but rather supplement, the requirements of governmental authority, the Racing Rules and the rules of Class Associations and Rating Systems. The attention of persons in charge is called to restrictions in the Rules on the location and movement of

|          | hull.  |                |
|----------|--|----------------|
| 3.13.2   | Any required watertight bulkhead shall be strongly built to take a full head   | Mo0Mu0,1,2,3,4 |
|          | of water pressure without allowing any leakage into the adjacent   |                |
|          | compartment.   |                |
| 3.14     | Pulpits, Stanchions, Lifelines   |                |
| 3.14.1   | When due to the particular design of a multihull it is impractical to precisely  | Mu0,1,2,3,4,   |
|          | follow Special Regulations regarding pulpits, stanchions, lifelines, the   |                |
|          | regulations for monohulls shall be followed as closely as possible with the  |                |
|          | aim of minimising the risk of people falling overboard.  |                |
| 3.14.2   | Lifelines required in Special Regulations shall be "taut".   | **             |
| a)       | As a guide, when a deflecting force of 50 N (5.1 kgf, 11.2 lbf) is applied to  | **             |
|          | a lifeline midway between supports, the lifeline should not deflect more   |                |
|          | than 50 mm.  |                |
| 3.14.3   | The following shall be provided:   | **             |
| c)       | lifelines (guardlines) supported on stanchions, which, with pulpits, shall   | **             |
|          | form an effectively continuous barrier around a working deck for man-  |                |
|          | overboard prevention. Lifelines shall be permanently supported at intervals  |                |
|          | of not more than 2.20m (86.6") and shall not pass outboard of supporting   |                |
| d)       | stanchions   | **             |
| d)       | upper rails of pulpits at no less height above the working deck than the   | -11-           |
| $\sim$   | upper lifelines as in Table 7.<br>Openable upper rails in bow pulpits shall be secured shut whilst racing  | **             |
| e)<br>f) | Pulpits and stanchions shall be permanently installed. When there are  | **             |
| 1)       | sockets or studs, these shall be through-bolted, bonded or welded. The   |                |
|          | pulpit(s) and/or stanchions fitted to these shall be mechanically retained   |                |
|          | without the help of the life-lines. Without sockets or studs, pulpits and/or   |                |
|          | stanchions shall be through-bolted, bonded or welded.  |                |
| g)       | The bases of pulpits and stanchions shall not be further inboard from the  | **             |
| 57       | edge of the appropriate working deck than 5% of maximum beam or 150  |                |
|          | mm (6 in), whichever is greater.   |                |
| h)       | Stanchion or pulpit or pushpit bases shall not be situated outboard of a   | **             |
|          | working deck. For the purpose of this rule the base shall be taken to  |                |
|          | include a sleeve or socket into which the tube is fitted but shall exclude a   |                |
|          | baseplate which carries fixings into the deck or hull.   |                |
| i)       | Provided the complete lifeline enclosure is supported by stanchions and  | **             |
|          | pulpit bases effectively within the working deck, lifeline terminals and   |                |
|          | support struts may be fixed to a hull aft of the working deck  |                |
| j)       | Lifelines need not be fixed to a bow pulpit if they terminate at, or pass  | **             |
|          | through, adequately braced stanchions set inside and overlapping the bow   |                |
|          | pulpit, provided that the gap between the upper lifeline and the bow pulpit  |                |
|          | does not exceed 150 mm (6 in).   | **             |
| k)       | Lifelines shall be continuous and fixed only at (or near) the bow and stern.<br>However a bona fide gate shall be permitted in the lifelines on each side of |                |
|          | a yacht. Except at its end fittings, the movement of a lifeline in a fore-and-   |                |
|          | aft direction shall not be constrained. Temporary sleeving in 3.14.6 (c)   |                |
|          | shall not modify tension in the lifeline.  |                |
| I)       | Stanchions shall be straight and vertical except that:-  | **             |
| i        | within the first 50 mm (2 in) from the deck, stanchions shall not be   | **             |
|          | displaced horizontally from the point at which they emerge from the deck   |                |
|          | or stanchion base by more than 10 mm (3/8 in), and   |                |
| ii       | stanchions may be angled to not more than 10 degrees from vertical at any  | **             |
|          | point above 50 mm (2 in) from the deck.  |                |
| m)       | It is strongly recommended that designs also comply to ISO 15085   | **             |
| 3.14.4   | Special Requirements for Pulpits, Stanchions, Lifelines on   | Mu0,1,2,3,4    |
|          | Multihulls   |                |
| ``       | The following shall be provided:-  | M 0 4 0 0 4    |
| a)       | on a trimaran - a bow pulpit on the main hull, with lifelines around the   | Mu0,1,2,3,4    |
|          | main hull supported on stanchions. The lifelines may be interrupted where  |                |
|          | there are nets or crossbeam wings outboard of the main hull  |                |

| b)           | on a trimaran - where a net joins the base of a bow pulpit on the main hull, Mu0,1,2,3,4 an additional lifeline from the top of the pulpit to the forward crossbeam at   |   |  |           |          |

| <b>4.13</b>           | Echo Sounder or Lead Line  |                               |
| 4.13.1<br><b>4.14</b> | An echo sounder or lead line shall be provided<br>Speedometer or Distance Measuring Instrument (log)   | MoMu1,2,3,4                   |
| 4.14                  | A speedometer or distance measuring instrument (log) shall be provided   | MoMu0,1,2,3                   |
| 4.15                  | Emergency Steering   | 101100,1,2,3                  |
| 4.15.1                | Emergency steering shall be provided as follows:   |                               |
| a)                    | except when the principal method of steering is by means of an   | MoMu0,1,2,3                   |
|                       | unbreakable metal tiller, an emergency tiller capable of being fitted to the   |                               |
|                       | rudder stock;  |                               |
| b)                    | crews must be aware of alternative methods of steering the yacht in any  | MoMu0,1,2,3                   |
|                       | sea condition in the event of rudder loss. At least one method must have   |                               |
|                       | been proven to work on board the yacht. An inspector may require that this method be demonstrated.   |                               |
| 4.16                  | Tools and Spare Parts  |                               |
| •                     | Tools and spare parts, including effective means to quickly disconnect or  | **                            |
|                       | sever the standing rigging from the hull shall be provided.  |                               |
| 4.17                  | Yacht's name   |                               |
|                       | Yacht's name shall be on miscellaneous buoyant equipment, such as  | **                            |
| 4.10                  | lifejackets, cushions, lifebuoys, lifeslings, grab bags etc.   |                               |
| 4.18                  | Marine grade retro-reflective material<br>Marine grade retro-reflective material shall be fitted to lifebuoys, lifeslings,                             | **                            |
|                       | liferafts and lifejackets. See OSRs 5.04, 5.08.  |                               |
| 4.19                  | EPIRBs   |                               |
| 4.19.1                | A 406 MHz EPIRB shall be provided  | MoMu1,2                       |
| <i>b)</i>             | It is recommended that a 406 MHz EPIRB should include an internal GPS,   | МоМи0,1,2                     |
|                       | and also a 121.5MHz transmitter for local homing.  |                               |
| c)                    | Every 406 MHz EPIRB shall be properly registered with the appropriate  | MoMu0,1,2                     |
| -1                    | authority.   | MaMuQ 1 2                     |
| d)                    | Every ship's 406 MHz EPIRB shall be water and manually activated.<br>EPIRBs should be tested in accordance with manufacturer's instructions            | MoMu0,1,2<br><i>MoMu0,1,2</i> |
| e)                    | when first commissioned and then at least annually.  | 1101100,1,2                   |
| f)                    | A list of registration numbers of 406 EPIRBs should be notified to event   | МоМи0,1,2                     |
| ,                     | organizers and kept available for immediate use.   | , ,                           |
| <i>g)</i>             | Consideration should be given to the provision of a locator device (e.g. an  | МоМи0,1,2                     |
|                       | "Argos" beacon) operating on non - SAR frequencies, to aid salvage if a  |                               |
|                       | yacht is abandoned.  |                               |
| h)                    | Beacons with only 121.5MHz are no longer recommended for distress  | МоМи0,1,2                     |
|                       | alerting. Satellite processing of 121.5 MHz is being phased out. 121.5MHz<br>will continue to be used for local homing by on-board D/F systems and for |                               |
|                       | local homing by SAR units. Type "E" EPIRBs are no longer supported and   |                               |
|                       | should be replaced immediately.  |                               |
| 4.20                  | Liferafts  | MoMu0,1,2                     |
| 4.20.1                | Liferaft Construction and Packed Equipment   |                               |
| 4.20.2                | Liferaft(s) shall be provided capable of carrying the whole crew when each   | MoMu1,2                       |
| -                     | liferaft shall comply with either:-  |                               |
| a)                    | Liferafts shall comply with SOLAS LSA code 1997 Chapter IV or later version except that they are acceptable with a capacity of 4 persons and           | Extract File MoMu1,2          |
|                       | may be packed in a valise. A SOLAS liferaft shall contain at least a SOLAS   |                               |
|                       | "A" pack or  |                               |

| b)         | for liferafts manufactured prior to January 2003, OSR Appendix A part I (ORC), or   | MoMu1,2     |
|------------|---|-------------|
| c)         | OSR Appendix A part II (ISAF) when, unless otherwise specified by a race  | MoMu1,2     |
| d)         | organizer, the floor shall include thermal insulation, or<br>ISO 9650 Part I Type I Group A (ISO) when each liferaft shall contain at                   | MoMu1,2     |
| i          | least a Pack 2 (<24h) and-<br>shall have a semi-rigid boarding ramp, and  | MoMu1,2     |
| ii         | shall be so arranged that any high-pressure hose shall not impede the   | MoMu1,2     |
|            | boarding process, and   |             |
| iii        | shall have a topping-up means provided for any inflatable boarding ramp, and  | MoMu1,2     |
| iv         | when the liferaft is designed with a single ballast pocket this shall be  | MoMu1,2     |
|            | accepted provided the liferaft otherwise complies with ISO 9650 and meets   |             |
| V          | a suitable test of ballast pocket strength devised by the manufacturer and compliance with OSR 4.20.2 (d) i-iv shall be indicated on the liferaft       | MoMu1,2     |
| v          | certificate.  | 1101111,2   |
| 4.20.3     | Liferaft Packing and Stowage  | MoMu0,1,2   |
|            | A Liferaft shall be either:-  | MoMu0,1,2   |
| a)         | packed in a transportable rigid container or canister and stowed on the   | MoMu0,1,2   |
| b)         | working deck or in the cockpit, or:-  | MoMu0,1,2   |
| b)         | packed in a transportable rigid container or canister or in a valise and<br>stowed in a purpose-built rigid compartment containing liferaft(s) only and | MOMU0,1,2   |
|            | opening into or adjacent to the cockpit or working deck, or through a   |             |
|            | transom, provided that:-  |             |
| i          | each compartment is watertight or self-draining (self-draining  | MoMu0,1,2   |
|            | compartments will be counted as part of the cockpit volume except when  |             |
|            | entirely above working deck level or when draining independently  |             |
| ii         | overboard from a transom stowage - see OSR 3.09) and-<br>the cover of each compartment is capable of being easily opened under                          | MoMu0,1,2   |
| 11         | water pressure, and-  | 100000,1,2  |
| iii        | the compartment is designed and built to allow a liferaft to be removed   | MoMu0,1,2   |
|            | and launched quickly and easily, or-  |             |
| iv         | in a yacht with age or series date before June 2001, a liferaft may be  | MoMu1,2     |
|            | packed in a valise not exceeding 40kg securely stowed below deck  |             |
| V          | adjacent to a companionway.<br>Liferaft stowage on a multihull shall be such that each liferaft may be  | Mu0,1,2     |
| V          | readily removed and launched whether or not the yacht is inverted.  | Mu0,1,2     |
| c)         | The end of each liferaft painter should be permanently made fast to a   | MoMu0,1,2   |
| ,          | strong point on board the yacht.  |             |
| 4.20.4     | Liferaft Launching  | MoMu0,1,2   |
| a)         | Each raft shall be capable of being got to the lifelines or launched within 15  | MoMu0,1,2   |
| b)         | seconds.<br><i>Each liferaft of more than 40kg weight should be stowed in such a way</i>  | МоМи0,1,2   |
| DJ         | that the liferaft can be dragged or slid into the sea without significant   | 1101100,1,2 |
|            | lifting   |             |
| 4.20.5     | Liferaft Servicing and Inspection   | MoMu0,1,2   |
|            | IMPORTANT NOTICE Recent evidence has shown that packaged liferafts  | МоМи0,1,2   |
|            | are vulnerable to serious damage when dropped (e.g. from a boat onto a  |             |
|            | marina pontoon) or when subjected to the weight of a crew member or   |             |
|            | heavy object (e.g. an anchor). Damage can be caused internally by the weight of the heavy steel CO2 bottle abrading or splitting neighbouring           |             |
|            | layers of buoyancy tube material. ISAF has instituted an investigation into   |             |
|            | this effect and as an interim measure requires that every valise-packed   |             |
|            | liferaft shall have an annual certificate of servicing. A liferaft should be  |             |
|            | taken for servicing if there is any sign of damage or deterioration (including  |             |
|            | on the underside of the pack). Persons in charge should insist on great   |             |
|            | care in handling liferafts and apply the rules NO STEP and DO NOT DROP  |             |
| <i>2</i> ) | UNLESS LAUNCHING INTO THE SEA.  |             |
| a)         | Certificates or copies, of servicing and/or inspection shall be kept on board   | MoMu0,1,2   |

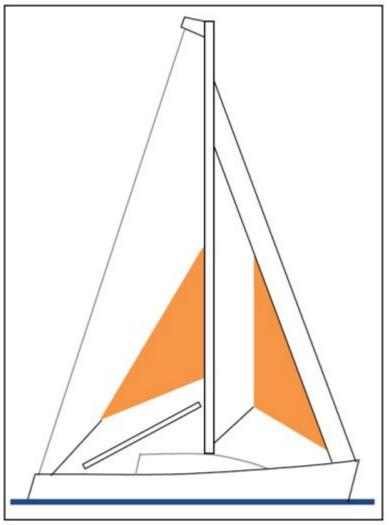

the yacht. Every SOLAS liferaft and every valise-packed liferaft shall have a valid annual certificate of new or serviced status from the manufacturer or his approved service station. A liferaft built to OSR Appendix A part I ("ORC") packed in a rigid container b) MoMu0,1,2 or canister shall either be serviced annually or may, when the manufacturer so specifies, be inspected annually (not necessarily unpacked) provided the yacht has on board written confirmation from the manufacturer's approved service station stating that the inspection was satisfactory. A liferaft built to OSR Appendix A part II ("ISAF") packed in a rigid c) MoMu1,2 container or canister shall either be serviced annually or may, when the manufacturer so specifies, have its first service no longer than 3 years after commissioning and its second service no longer than 2 years after the first. Subsequent services shall be at intervals of not more than 12 months. d) A liferaft built to ISO 9650 Part 1 Type Group A, packed in a rigid container MoMu1,2 or canister shall be serviced in accordance with the manufacturer's instructions but NOT less frequently than every three years e) A liferaft built to ISO 9650 Part 1 Type Group A packed in a valise shall be MoMu1,2 inspected annually by an approved manufacturer's agent and serviced in accordance with the manufacturer's instructions but NOT less frequently than every three years. Liferaft servicing certificates shall state the specification that the liferaft f) MoMu1,2 was built to. See OSR 4.20.2 4.21.2 **Grab Bags to Accompany Liferafts** A vacht is recommended to have for each liferaft, a grab bag with the a) MoMu0,1,2 following minimum contents. A grab bag should have inherent flotation, at least 0.1 m<sup>2</sup> area of fluorescent orange colour on the outside, should be marked with the name of the yacht, and should have a lanyard and clip. b) Note: it is not intended to duplicate in a grab bag items required by other MoMu0,1,2 OSRs to be on board the yacht - these recommendations cover only the stowage of those items 4.21.3 **Grab Bag Recommended Contents** 2 red parachute and 2 red hand flares and cyalume-type chemical light a) MoMu1,2 sticks (red flares compliant with SOLAS) watertight hand-held EPFS (Electronic Position-Fixing System) (eg GPS) in b) MoMu1,2 at least one of the grab bags carried by a yacht *c)* SART (Search and Rescue Transponder) in at least one of the grab bags MoMu1,2 carried by a yacht d) a combined 406MHz/121.5MHz or type "E" EPIRB (see OSR 4.19.1) in at MoMu1,2 least one of the grab bags carried by a yacht e) water in re-sealable containers or a hand-operated desalinator plus MoMu1,2 containers for water f) a watertight hand-held marine VHF transceiver plus a spare set of batteries MoMu0,1,2 g) a watertight flashlight with spare batteries and bulb MoMu0,1,2 h) dry suits or thermal protective aids or survival bags i) second sea anchor for the liferaft (not required if the liferaft has already a MoMu0,1,2 spare sea anchor in its pack) (recommended standard ISO 17339) with swivel and >30m line diameter >9.5 mm j) k) two safety tin openers (if appropriate) ΜοΜυθ,1,2 first-aid kit including at least 2 tubes of sunscreen. All dressings should be MoMu0,1,2 capable of being effectively used in wet conditions. The first-aid kit should be clearly marked and re-sealable. 1) signalling mirror MoMu0,1,2 m) high-energy food (min 10 000kJ per person recommended for Cat Zero) ΜοΜυθ.1.2 nylon string, polythene bags, seasickness tablets (min 6 per person n) MoMu0,1,2

- recommended)
   watertight hand-held aviation VHF transceiver (if race area warrants)
   4.22 Lifebuoys
  - 4.22.1 The following shall be provided within reach of the helmsman and ready for
    - or \*\*

| <i>b)</i>      | it is strongly recommended that a heavy-weather jib does not contain<br>aromatic polyamides, carbon and similar fibres other than<br>spectra/dyneema.   | **                |
|----------------|---|-------------------|
| 4.26.4         | The following shall be provided:-   |                   |
| _a)            | sheeting positions on deck for each storm and heavy-weather sail;   | **                |
| b)             | for each storm or heavy-weather jib, a means to attach the luff to the stay,<br>independent of any luff-groove device. A heavy weather jib shall have the<br>means of attachment readily available. A storm jib shall have the means of<br>attachment permanently attached;   | **                |
|                | Storm and heavy weather jib areas shall be calculated as:   |                   |
|                | (0.255  x luff length x (luff perpendicular + 2 x half width))* To apply to   |                   |
| $(\mathbf{r})$ | sails made in January 2012 and after.<br>a storm trysail which shall be capable of being sheeted independently of   | MoMu 0,1,2        |
| с)             | the boom with trysail area not greater than 17.5% mainsail hoist (P) x<br>mainsail foot length (E). The storm trysail area shall be measured as (0.5 x<br>leech length x shortest distance between tack point and leech). The storm<br>trysail shall have neither headboard nor battens, however a storm trysail is<br>not required in a yacht with a rotating wing mast which can adequately<br>substitute for a trysail. The method of calculating area applies to sails<br>made in January 2012 and after. | MOMU 0,1,2        |
| ∎d)            | the storm trysail as required by OSR 4.26.4 (c) shall have the yacht's sail   | Extract File Only |
| ,              | number and letter(s) shall be placed on both sides of the trysail (or on a rotating wing mast as substitute for a trysail) in as large a size as practicable;   | ,<br>МоМи 0,1,2   |
| e)             | a storm jib of area not greater than 5% height of the foretriangle squared,   | MoMu0,1,2         |
| C              | with luff maximum length 65% height of the foretriangle;  | 101100,1,2        |
| f)             | a heavy-weather jib (or heavy-weather sail in a yacht with no forestay) of  | **                |
|                | area not greater than 13.5% height of the foretriangle squared;   |                   |
| h)             | in the case of a yacht with an in-mast furling mainsail, the storm trysail must be capable of being set while the mainsail is furled.   | MoMu0,1,2         |
| i)             | A trysail track should allow for the trysail to be hoisted quickly when the mainsail is lowered whether or not the mainsail is stowed on the main boom.   | МоМи0,1,2         |
|                | It is strongly recommended that a boat has either a dedicated trysail track<br>permanently installed with the entry point accessible to a person standing<br>on the main deck or coachroof, or a permanently installed stay on which to<br>hank the trysail.  |                   |
| <i>k)</i>      | It is strongly recommended that an inner forestay is provided either permanently installed or readily set up, on which to set the storm jib.  | МоМи0,1,2         |

## Figure 3

### 4.28 Man Overboard Alarm

- 4.28.2 A yacht is recommended to be equipped with an EPFS (e.g. GPS) capable of immediately recording a man overboard position from each helm station
- 4.28.3 A yacht shall be equipped with an EPFS (e.g. GPS) capable of immediately recording a man overboard position from each helm station (From January 2012)

# SECTION 5 - PERSONAL EQUIPMENT

### 5.01 Lifejacket

| Each crew member shall have a lifejacket as follows:-   | **  |
|---|---|
|   | **  |
| In accordance with ISO 12402 – 3 (Level 150) or equivalent, including EN 396 or UL 1180   | **  |
| Lifejackets manufactured after 1 January 2012 shall be in accordance with ISO 12402–3 (Level 150) and shall be fitted with:-  | **  |
| • an emergency light in accordance with either ISO 12402-8 or SOLAS LSA code 2.2.3.   |   |
| <ul> <li>a sprayhood in accordance with ISO 12402-8.</li> </ul>   |   |
| • a full deck safety harness in accordance with ISO 12401 (ISO 1095)  |   |
| including a crotch or thigh strap (holding down device) as specified in ISO 12401 (ISO 1095).   |   |
| • If of an inflatable type either   |   |
| (a) automatic, manual and oral inflation or   |   |
| (b) manual and oral inflation   |   |
| Notes: ISO 12402 requires Level 150 lifejackets to be fitted with a mandatory whistle and retro-reflective material. Also, when fitted with a safety harness, ISO 12402 requires that this shall be the full safety harness in accordance with ISO 12401. Any equivalent lifejacket shall have equal requirements |   |
|   | <ul> <li>In accordance with ISO 12402 – 3 (Level 150) or equivalent, including EN 396 or UL 1180</li> <li>Lifejackets manufactured after 1 January 2012 shall be in accordance with ISO 12402–3 (Level 150) and shall be fitted with:-</li> <li>an emergency light in accordance with either ISO 12402-8 or SOLAS LSA code 2.2.3.</li> <li>a sprayhood in accordance with ISO 12402-8.</li> <li>a full deck safety harness in accordance with ISO 12401 (ISO 1095) including a crotch or thigh strap (holding down device) as specified in ISO 12401 (ISO 1095).</li> <li>If of an inflatable type either</li> <li>(a) automatic, manual and oral inflation or</li> <li>(b) manual and oral inflation</li> <li>Notes: ISO 12402 requires Level 150 lifejackets to be fitted with a mandatory whistle and retro-reflective material. - MoMu0
- МоМи 1, 2
- MoMu 1, 2

| b)   | Persons of larger than average build are generally more buoyant than<br>those of average build and so do not require a lifejacket with greater levels<br>of flotation. Wearing a Level 275 lifejacket may hamper entry into liferafts.<br>fitted with either a crotch strap(s) / thigh straps or a full safety harness in  | **   |
|--|--|--|
|  | accordance with ISO 12401,<br>Note: The function of lifejacket crotch/thigh straps is to hold the buoyancy<br>element down. A crew member before a race should adjust a lifejacket to<br>fit then retain that lifejacket for the duration of the race. Correct<br>adjustment is fundamental to the lifejacket functioning correctly.   |  |
| c)   | fitted with a lifejacket light in accordance with SOLAS LSA code 2.2.3 (white, >0.75 candelas, >8 hours),  | **   |
| d)   | if inflatable have a compressed gas inflation system,  | **   |
| e)   | if inflatable, regularly checked for gas retention,  | **   |
| f)   | compatible with the wearer's safety harness,   | **   |
| g)   | clearly marked with the yacht's or wearer's name,  | **   |
| 97   | It is strongly recommended that a lifejacket has:  |  |
| i)   | a splashquard / sprayhood See ISO 12402 – 8,   | MoMu1,2,3,4  |
| j)<br>()   |  |  |
| k)   | a PLB unit (as with other types of EPIRB, should be properly registered  | MoMu1,2,3,4  |
| Ŋ  | with the appropriate authority)<br>if of a gas inflatable type, a spare cylinder and if appropriate a spare  | MoMu1,2,3,4  |
|  | activation head  |  |
| 5.01.4   | The person in charge shall personally check each lifejacket at least once annually.  | **   |
| 5.02   | Safety Harness and Safety Lines (Tethers)  | MoMu0,1,2,3  |
| 5.02.1   | Each crew member shall have a harness and safety line that complies with   | MoMu0,1,2,3  |
|  | ISO 12401 or equivalent with a safety line not more than 2m in length.   |  |
|  | Harnesses and safety lines manufactured prior to Jan 2010 shall comply   |  |
|  | with either ISO 12401 or EN 1095.  |  |
|  | Harnesses and safety lines manufactured prior to Jan 2001 are not  |  |
|  | permitted.   |  |
| _  |  |  |
