Extract for Race Category 3 Multihulls JANUARY 2012 - DECEMBER 2013

© ORC Ltd. 2002, all amendments from 2003 © International Sailing Federation, (IOM) Ltd.

**Version 1.2 - 2012** 

### Because this is an extract not all paragraph numbers will be present

### Copyright

When reprinting these regulations National Authorities and Race Organizers should:-

- request copyright permission from ISAF and ORC Ltd (normally given free of charge)
- display a copyright acknowledgement with the reprint (similar to © ORC Ltd. 2002, all amendments from 2003 © International sailing Federation, (IOM) Ltd.)
- make any amendments by deleting contrary provisions and indicating that changes have been made
- supply a copy of the reprint to each of ISAF and ORC Ltd

Official interpretations shall take precedence over these Special Regulations and will be indexed, numbered, dated and displayed on the ISAF web site www.sailing.org/specialregs

## **Language & Abbreviations Used**

Mo - Monohull

Mu - Multihull

" \*\* " means the item applies to all types of yacht in all Categories except 5 for which see Appendix J or 6 for which see Appendix L.

RED TYPE indicates a significant changes in 2012

Guidance notes and recommendations are in italics

The use of the masculine gender shall be taken to mean either gender

### **Administration**

The Offshore Special Regulation are administered by the ISAF Special Regulation Sub-Committee whose terms of reference are as follows: (www.sailing.org/regulations)

ISAF Regulation 6.8.8.3 - The Special Regulations Sub-Committee shall: (a) be responsible for the maintenance, revision and changes to the ISAF Offshore Special Regulations governing offshore racing, under licence from ORC Ltd. Such changes shall be biennial with revised editions published in January of each even year, except that matters of an urgent nature affecting safety may be dealt with by changes to the Regulations on a shorter time scale;

(b) monitor developments in offshore racing relative to the standards of safety and seaworthiness.

Any queries please E-Mail: technical@isaf.co.uk

#### **SECTION 1 - FUNDAMENTAL AND DEFINITIONS**

#### 1.01 Purpose and Use

1.01.1 It is the purpose of these Special Regulations to establish uniform minimum equipment, accommodation and training standards for monohull and multihull yachts racing offshore. A Proa is excluded from these regulations.

1.01.2 These Special Regulations do not replace, but rather supplement, the requirements of governmental authority, the Racing Rules and the rules of Class Associations and Rating Systems. The attention of persons in charge is called to restrictions in the Rules on the location and movement of

\*\*

\*\*

equipment.

1.01.3 These Special Regulations, adopted internationally, are strongly recommended for use by all organizers of offshore races. Race Committees may select the category deemed most suitable for the type of race to be sailed.

1.02 Responsibility of Person in Charge

- 1.02.1 The safety of a yacht and her crew is the sole and inescapable responsibility of the person in charge who must do his best to ensure that the yacht is fully found, thoroughly seaworthy and manned by an experienced crew who have undergone appropriate training and are physically fit to face bad weather. He must be satisfied as to the soundness of hull, spars, rigging, sails and all gear. He must ensure that all safety equipment is properly maintained and stowed and that the crew know where it is kept and how it is to be used. He shall also nominate a person to take over the responsibilities of the Person in Charge in the event of his incapacitation.
- 1.02.2 Neither the establishment of these Special Regulations, their use by race organizers, nor the inspection of a yacht under these Special Regulations in any way limits or reduces the complete and unlimited responsibility of the person in charge.
- 1.02.3 Decision to race -The responsibility for a yacht's decision to participate in a race or to continue racing is hers alone RRS Fundamental Rule 4.
- 1.03 Definitions, Abbreviations, Word Usage
- 1.03.1 Definitions of Terms used in this document

TABLE 1

Age Date Month/year of first launch
AIS Automatic Identification Systems
CEN Comité Européen de Normalisation
CPR Cardio-Pulmonary Resuscitation

Coaming Includes the transverse after limit of the cockpit over which water would run in

the event that when the yacht is floating level the cockpit is flooded or filled to

\*\*

\*\*

overflowing.

DSC Digital Selective Calling

EN European Norm

EPFS Electronic Position-Fixing System

EPIRB Emergency Position-Indicating Radio Beacon

FA Station The transverse station at which the upper corner of the transom meets the

sheerline.

Foul-Weather A foul weather suit is clothing designed to keep the wearer dry and maybe

Suit either a jacket and trousers worn together, or a single garment comprising

jacket and trousers.

GMDSS Global Maritime Distress & Safety System

GNSS Global Navigation Satellite System
GPIRB EPIRB, with integral GPS position-fixing
ITU International Telecommunications Union

GPS Global Positioning System

Hatch The term hatch includes the entire hatch assembly and also the lid or cover as

part of that assembly (the part itself may be described as a hatch).

INMARSAT This is Inmarsat Global Limited, the private company that provides GMDSS

satellite distress and safety communications, plus general communications via

voice, fax and data

IMO International Maritime Organisation

IMSO The International Mobile Satellite Organisation, the independent,

intergovernmental organisation that oversees Inmarsat's performance of its

Public Service Obligations for the GMDSS and reports on these to IMO

ISAF International Sailing Federation.

ISO International Standard or International Organization for Standardization.

Lifeline Rope or wire line rigged as guardrail / guardline around the deck LOA Length overall not including pulpits, bowsprits, boomkins etc. LWL (Length of) loaded waterline Monohull Yacht in which the hull depth in any section does not decrease towards the centre-line. Moveable Lead or other material including water which has no practical function in the boat other than to increase weight and/or to influence stability and/or trim and **Ballast** which may be moved transversely but not varied in weight while a boat is racina. ORC Offshore Racing Congress (formerly Offshore Racing Council) Offshore Special Regulation(s) OSR Permanently Means the item is effectively built-in by e.g. bolting, welding, glassing etc. and may not be removed for or during racing. Installed PLB Personal Locator Beacon Proa Asymmetric Catamaran **RRS** ISAF - Racing Rules of Sailing SAR Search and Rescue Search and Rescue Transponder SART Series Date Month & Year of first launch of the first yacht of the production series **SOLAS** Safety of Life at Sea Convention Safety Line A tether used to connect a safety harness to a strong point Held strongly in place by a method (e.g. rope lashings, wing-nuts) which will Securely safely retain the fastened object in severe conditions including a 180 degree **Fastened** capsize and allows for the item to be removed and replaced during racing Static Ballast Lead or other material including water which has no practical function in the boat other than to increase weight and/or to influence stability and/or trim and which may not be moved or varied in weight while a boat is racing. Static Safety A safety line (usually shorter than a safety line carried with a harness) kept clipped on at a work-station Line Variable Water carried for the sole purpose of influencing stability and/or trim and **Ballast** which may be varied in weight and/or moved while a boat is racing. The words "shall" and "must" are mandatory, and "should" and "may" are permissive. The word "yacht" shall be taken as fully interchangeable with the word "boat". **SECTION 2 - APPLICATION & GENERAL REQUIREMENTS Categories of Events** \*\* In many types of race, ranging from trans-oceanic sailed under adverse conditions to short-course day races sailed in protected waters, seven categories are established, to provide for differences in the minimum standards of safety and accommodation required for such varying circumstances: Category 3 Races across open water, most of which is relatively protected or close to MoMu,3 shorelines. Inspection \*\* A yacht may be inspected at any time. If she does not comply with these Special Regulations her entry may be rejected, or she will be liable to disqualification or such other penalty as may be prescribed by the national authority or the race organizers. **General Requirements** All equipment required by Special Regulations shall:-\*\* function properly be regularly checked, cleaned and serviced \*\* \*\* when not in use be stowed in conditions in which deterioration is minimised be readily accessible \*\* \*\* be of a type, size and capacity suitable and adequate for the intended use and size of the yacht.

2.03.2 Heavy items:

1.03.2

1.03.3

2.01

2.01.4

2.02

2.03

2.03.1

a) b)

c)

d)

e)

a)	ballast, ballast tanks and associated equipment shall be permanently	**
L	installed	**
b)	heavy movable items including e.g. batteries, stoves, gas bottles, tanks, toolboxes and anchors and chain shall be securely fastened	7.7
c)	heavy items for which fixing is not specified in Special Regulations shall be	**
٠,	permanently installed or securely fastened, as appropriate	
2.03.3	When to show navigation lights	**
a)	navigation lights (OSR 3.27) shall be shown as required by the	**
	International Regulations for Preventing Collision at Sea, (Part C and	
	Technical Annex 1). All yachts shall exhibit sidelights and a sternlight at the	
CECTIC	required times.	
3.01	ON 3 - STRUCTURAL FEATURES, STABILITY, FIXED EQUIPMENT Strength of Build, Ballast and Rig	
3.01	Yachts shall be strongly built, watertight and, particularly with regard to	**
	hulls, decks and cabin trunks capable of withstanding solid water and	
	knockdowns. They must be properly rigged and ballasted, be fully	
	seaworthy and must meet the standards set forth herein. Shrouds shall	
	never be disconnected.	
3.02	Watertight Integrity of a Hull	**
3.02.1	A hull, including, deck, coach roof, windows, hatches and all other parts,	**
	shall form an integral, essentially watertight unit and any openings in it shall be capable of being immediately secured to maintain this integrity.	
3.02.2	Centreboard and daggerboard trunks and the like shall not open into the	**
0.02.2	interior of a hull except via a watertight inspection/maintenance hatch of	
	which the opening shall be entirely above the waterline of the yacht	
	floating level in normal trim.	
3.02.3	A canting keel pivot shall be completely contained within a watertight	**
	enclosure which shall comply with OSR 3.02.2. Access points in the	
	watertight enclosure for control and actuation systems or any other purpose shall comply with OSR 3.02.1.	
3.02.4	Moveable ballast systems shall be fitted with a manual control and	**
310211	actuation secondary system which shall be capable of controlling the full	
	sailing load of the keel in the event of failure of the primary system. Such	
	failures would include electrical and hydraulic failure and mechanical failure	
	of the components and the structure to which it mounts. The system must	
	be capable of being operational quickly and shall be operable at any angle	
	of heel. It would be desirable if this system was capable of securing the keel on the centreline.	
3.05	Stability and Flotation - Multihulls	Mu0,1,2,3,4
3.03	Attention is drawn to ISO 12217-2.	Mu0,1,2,3,4
3.05.1	Adequate watertight bulkheads and compartments (which may include	Mu0,1,2,3,4
	permanently installed flotation material) in each hull shall be provided to	
	ensure that a multihull is effectively unsinkable and capable of floating in a	
	stable position with at least half the length of one hull flooded. (see OSR	
2 05 2	3.13.2).	MuO 1 2 2 4
3.05.2	Multihulls built on or after Jan 1999 shall in every hull without accommodation be divided at intervals of not more than 4m (13ft 3") by	Mu0,1,2,3,4
	one or more transverse watertight bulkheads	
3.05.3	A yacht shall be designed and built to resist capsize.	Mu0,1,2,3,4
3.07	Exits and Escape Hatches - Multihulls	Mu0,1,2,3,4
3.07.1	Exits	
a)	In a multihull of 8m (26.2ft) LOA and greater, each hull which contains	Mu0,1,2,3,4
<b>L</b> )	accommodation shall have at least two exits.	M. O 1 2 2
b)	In a multihull of less than 8m (26.2ft) LOA each hull which contains accommodation shall have at least two exits.	Mu0,1,2,3
3.07.2		
a)	In a multihull of 12m (39.4ft) LOA and greater each hull which contains	Mu0,1,2,3,4
,	accommodation shall:-	, , ,-,
i	have an escape hatch for access to and from the hull in the event of an	Mu0,1,2,3,4

	inversion;	
ii	when first launched on or after January 2003 have a minimum clearance diameter through each escape hatch of 450mm or when an escape hatch is not circular, sufficient clearance to allow a crew member to pass through fully clothed;	Mu0,1,2,3,4
iii	when first launched prior to January 2003, if possible have each escape hatch in compliance with the dimensions in OSR 3.07.2(a)(ii);	Mu0,1,2,3,4
iv v	when the yacht is inverted have each escape hatch above the waterline; when first launched on or after January 2001 have each escape hatch at or near the midships station;	Mu0,1,2,3,4 Mu0,1,2,3,4
vi	in a catamaran first launched on or after January 2003 have each escape hatch on the side nearest the vessel's central axis.	Mu0,1,2,3,4
b)	A trimaran of 12m (39.4ft) LOA and greater first launched on or after 1/03 shall have at least two escape hatches in compliance with the dimensions in OSR 3.07.2(a) (ii)	Mu0,1,2,3,4
c)	Each escape hatch must have been opened both from inside and outside within 6 months prior to an intended race	Mu0,1,2,3,4
d)	A multihull shall have on the underside appropriate handholds/clipping points sufficient for all crew (on a trimaran these shall be around the central hull).	Mu0,1,2,3,4
e)	A catamaran first launched on or after 1/03 with a central nacelle shall have on the underside around the central nacelle, handholds of sufficient capacity to enable all persons on board to hold on and/or clip on securely	Mu0,1,2,3,4
f)	In a catamaran with a central nacelle, it is recommended that each hull has an emergency refuge, accessible via a special hatch in the side of the hull nearest the vessel's central axis, which hatch may be opened and closed from the inside and outside	Mu0,1,2,3,4
3.07.3	A multihull of less than 12m (39.4ft) LOA shall either have escape hatches in compliance with OSR 3.07.2 (a)(b) and (c)or shall comply with OSR 3.07.3 (a) and (b):	Mu2,3,4
a)	each hull which contains accommodation shall have, for the purpose of cutting an escape hatch, appropriate tools kept ready for instant use adjacent to the intended cutting site. Each tool shall be secured to the vessel by a line and a clip, and	Mu2,3,4
b)	in each hull at a station where an emergency hatch may be cut, the cutting line shall be clearly marked both inside and outside with an outline and the words ESCAPE CUT HERE	Mu2,3,4
<b>3.08</b> 3.08.1	Hatches & Companionways  No hatch forward of the maximum beam station, other than a hatch in the side of a coachroof, shall open in such a way that the lid or cover moves into the open position towards the interior of the hull (excepting ports basing an area of loss than 0.071m3 (110 sg in))	**
3.08.2	having an area of less than 0.071m2 (110 sq in)). A hatch fitted forward of the maximum beam station, located on the side of the coachroof, opening into the interior of the boat ,and of area greater than 0.071m2 shall comply with ISO12216 design category A and be clearly labelled and used in accordance with the following instruction: "NOT TO BE OPENED AT SEA" Attention is drawn to SR 3.02.1	**
3.08.3	A hatch shall be:	
b)	permanently attached	**
c)	capable of being firmly shut immediately and remaining firmly shut in a 180 degree capsize (inversion)	· ·
3.08.4 a)	A companionway hatch shall: be fitted with a strong securing arrangement which shall be operable from the exterior and interior including when the yacht is inverted	**
b)	have any blocking devices:	**
i	capable of being retained in position with the hatch open or shut	**
ii	whether or not in position in the hatchway, secured to the yacht (e.g. by lanyard) for the duration of the race, to prevent their being lost overboard	**
iii	permit exit in the event of inversion	**

3.08.7	A companionway hatch extending below the local sheerline and shall comply with either (a) or (b):	Mu0,1,2,3,4
a)	be capable of being blocked off up to the level of the local sheerline, whilst giving access to the interior with the blocking devices (e.g. washboards) in place with a minimum sill height of 300 mm.	Mu0,1,2,3,4
b)		
i 2.00	A companionway hatch shall be in compliance with ISO 11812 – Watertight cockpits and quick-draining cockpits to design category A	Mu0,1,2,3
<b>3.09</b> 3.09.1	Cockpits - Attention is Drawn to ISO 11812  Cockpits shall be structurally strong, self-draining quickly by gravity at all angles of heel and permanently incorporated as an integral part of the hull.	**
3.09.2	Cockpits must be essentially watertight, that is, all openings to the hull must be capable of being strongly and rigidly secured	**
3.09.3	A bilge pump outlet pipe shall not be connected to a cockpit drain. See OSR 3.09.8 for cockpit drain minimum sizes	**
3.09.4	A cockpit sole shall be at least 2% LWL above LWL (or in IMS yachts first launched before 1/03, at least 2% L above LWL)	**
3.09.5	A bow, lateral, central or stern well shall be considered a cockpit for the purposes of OSR 3.09	**
3.09.6 <b>3.09.7</b>	In cockpits opening aft to the sea structural openings aft shall be not less in area than 50% maximum cockpit depth x maximum cockpit width. <b>Cockpit Volume</b>	**
i)	earliest of age or series date before April 1992	
·	the total volume of all cockpits below lowest coamings shall not exceed 9% (LWL x maximum beam x freeboard abreast the cockpit).	Extract File Only MoMu2,3,4
ii)	earliest of age or series date April 1992 and after as above for the appropriate category except that "lowest coamings" shall not include any aft of the FA station and no extension of a cockpit aft of	Extract File Only **
	the working deck shall be included in calculation of cockpit volume IMS-rated boats may instead of the terms LWL, maximum beam, freeboard	Extract File Only **
2 22 2	abreast the cockpit, use the IMS terms L, B and FA.	
3.09.8	<b>Cockpit Drains</b> See OSR 3.09.1. Cockpit drain cross section area (after allowance for	
	screens if fitted) shall be:-	
a)	in yachts with earliest of age or series date before 1/72 or in any yacht under 8.5m (28ft) LOA - at least that of 2 x 25mm diameter (one inch) unobstructed openings or equivalent	**
b)	in yachts with earliest of age or series date 1/72 and later - at least that of 4 x 20mm diameter (3/4 inch) unobstructed openings or equivalent	**
3.10	Sea Cocks or Valves	
	Sea cocks or valves shall be permanently installed on all through-hull openings below the waterline except integral deck scuppers, speed indicators, depth finders and the like, however a means of closing such	**
	openings shall be provided.	
3.11	Sheet Winches	
	Sheet winches shall be mounted in such a way that an operator is not	**
	required to be substantially below deck.	
3.12	Mast Step	**
	The heel of a keel stepped mast shall be securely fastened to the mast	**
3.13	step or adjoining structure.  Watertight Bulkheads	
5.13	multihulls also see OSR 3.05	Mu0,1,2,3,4
3.13.1	A hull shall have either a watertight "crash" bulkhead within 15% of LOA from the bow and abaft the forward end of LWL, or permanently installed	Mo0Mu0,1,2,3,4
	closed-cell foam buoyancy effectively filling the forward 30% LOA of the	
3.13.2	hull.  Any required watertight bulkhead shall be strongly built to take a full head of water pressure without allowing any leakage into the adjacent	Mo0Mu0,1,2,3,4
	compartment.	

3.14	Pulpits, Stanchions, Lifelines	
3.14.1	When due to the particular design of a multihull it is impractical to precisely	Mu0,1,2,3,4,
	follow Special Regulations regarding pulpits, stanchions, lifelines, the	
	regulations for monohulls shall be followed as closely as possible with the	
	aim of minimising the risk of people falling overboard.	
3.14.2	Lifelines required in Special Regulations shall be "taut".	**
a)	As a guide, when a deflecting force of 50 N (5.1 kgf, 11.2 lbf) is applied to	**
	a lifeline midway between supports, the lifeline should not deflect more	
	than 50 mm.	
3.14.3	The following shall be provided:	**
c)	lifelines (guardlines) supported on stanchions, which, with pulpits, shall	**
-,	form an effectively continuous barrier around a working deck for man-	
	overboard prevention. Lifelines shall be permanently supported at intervals	
	of not more than 2.20m (86.6") and shall not pass outboard of supporting	
	stanchions	
d)	upper rails of pulpits at no less height above the working deck than the	**
u)	upper lifelines as in Table 7.	
e)	Openable upper rails in bow pulpits shall be secured shut whilst racing	**
f)	Pulpits and stanchions shall be permanently installed. When there are	**
')	sockets or studs, these shall be through-bolted, bonded or welded. The	
	pulpit(s) and/or stanchions fitted to these shall be mechanically retained	
	without the help of the life-lines. Without sockets or studs, pulpits and/or	
	stanchions shall be through-bolted, bonded or welded.	
a)	The bases of pulpits and stanchions shall not be further inboard from the	**
g)	edge of the appropriate working deck than 5% of maximum beam or 150	
h)	mm (6 in), whichever is greater.	**
h)	Stanchion or pulpit or pushpit bases shall not be situated outboard of a	
	working deck. For the purpose of this rule the base shall be taken to include a sleeve or socket into which the tube is fitted but shall exclude a	
	baseplate which carries fixings into the deck or hull.	
i١	Provided the complete lifeline enclosure is supported by stanchions and	**
i)	•	
	pulpit bases effectively within the working deck, lifeline terminals and	
<i>2</i> \	support struts may be fixed to a hull aft of the working deck	**
j)	Lifelines need not be fixed to a bow pulpit if they terminate at, or pass through, adequately braced stanchions set inside and overlapping the bow	-11-
	- UITOUGH, AGEGUATEN DIACEG STANCHIONS SECTISIGE AND OVERADDING THE DOW	
	pulpit, provided that the gap between the upper lifeline and the bow pulpit	
Is)	pulpit, provided that the gap between the upper lifeline and the bow pulpit does not exceed 150 mm (6 in).	**
k)	pulpit, provided that the gap between the upper lifeline and the bow pulpit does not exceed 150 mm (6 in).  Lifelines shall be continuous and fixed only at (or near) the bow and stern.	**

\*\*

\*\*

## 3.14.6 Lifeline Minimum Diameters, Required Materials, Specifications

\*\* a) Lifelines shall be of:

- stranded stainless steel wire or

- Single-braided High Modulus Polyethylene (HMPE)

(Dyneema®/Spectra® or equivalent) rope

- The minimum diameter is specified in table 8 below. \*\* b)
- Stainless steel lifelines shall be uncoated and used without close-fitting \*\* c) sleeving, however, temporary sleeving may be fitted provided it is regularly removed for inspection.
- d) When stainless wire is used, Grade 316 is recommended.
- When HMPE (Dyneema®/Spectra®) is used, it shall be spliced in \*\* e) accordance with the manufacturer's recommended procedures.
- A taut lanyard of synthetic rope may be used to secure lifelines provided f) the gap it closes does not exceed 100 mm (4 in). This lanyard shall be replaced annually at a minimum.
- All wire, fittings, anchorage points, fixtures and lanyards shall comprise a g) lifeline enclosure system which has at all points at least the breaking strength of the required lifeline wire.

TABLE 8 LOA minimum wire or rope diameter

under 8.5 m (28ft) 3 mm (1/8 in) 8.5m - 13 m 4 mm (5/32 in) over 13 m (43 ft) 5 mm (3/16 in)

## 3.14.7 Pulpits, Stanchions, Lifelines - Limitations on Materials

Earliest of Age or Series detail

Date

TABLE 9

before January 1987 carbon fibre is not recommended in stanchions pulpits and

lifelines.

stanchions, pulpits and lifelines shall not be made of carbon fibre. January 1987 and after

3.15	Multihull Nets or Trampolines	
3.15.1	The word "net" is interchangeable with the word "trampoline"	Mu0,1,2,3,4
	A net shall be:-	Mu0.1.2.3.4
a)	essentially horizontal	Mu0,1,2,3,4
b)	made from durable woven webbing, water permeable fabric, or mesh with	Mu0,1,2,3,4
	openings not larger than 5.08cm (2 inches) in any dimension. Attachment	
	points shall be planned to avoid chafe. The junction between a net and a	
- \	yacht shall present no risk of foot trapping	M-0 1 2 2 4
c)	solidly fixed at regular intervals on transverse and longitudinal support lines	Mu0,1,2,3,4
d)	and shall be fine-stitched to a bolt rope able to carry the full weight of the crew either in normal working conditions	Mu0,1,2,3,4
u)	at sea or in case of capsize when the yacht is inverted.	14u0,1,2,3,4
e)	It is recommended that lines used to tie the nets should be individually tied	Mu0,1,2,3,4
C)	and not continuously connected to more than four attachment points per	1140,1,2,3,1
	connecting line	
3.15.2	Trimarans with Double Crossbeams	
a)	A trimaran with double crossbeams shall have nets on each side covering:-	
b)	the rectangles formed by the crossbeams, central hull and outriggers	Mu0,1,2,3,4
c)	the triangles formed by the aft end of the central pulpit, the mid-point of	Mu0,1,2,3,4
	each forward crossbeam, and the intersection of the crossbeam and the	
-17	central hull	M-0 1 2 2 4
d)	the triangles formed by the aftermost part of the cockpit or steering	Mu0,1,2,3,4
	position (whichever is furthest aft), the mid-point of each after crossbeam, and the intersection of the crossbeam and the central hull; except that:-	
e)	the requirement in OSR 3.15.2(d) shall not apply when cockpit coamings	Mu0,1,2,3,4
C)	and/or lifelines are present which comply with the minimum height	1100,1,2,3,1
	requirements in Table 7	
3.15.3	Trimarans with Single Crossbeams	
a)	A trimaran with a single crossbeam shall have nets between the central hull	Mu0,1,2,3,4
	and each outrigger:-	
b)	on each side between two straight lines from the intersection of the	Mu0,1,2,3,4
	crossbeam and the outrigger, respectively to the aft end of the pulpit on	
	the central hull, and to the aftermost point of the cockpit or steering	
3.16	position on the central hull (whichever is furthest aft)  Catamarans	
3.10	On a catamaran the total net surface shall be limited:	
a)	laterally by the hulls; and	Mu0,1,2,3,4
b)	longitudinally by transverse stations through the forestay base, and the	Mu0,1,2,3,4
- /	aftermost point of the boom lying fore and aft. However, a catamaran with	, , ,-,
	a central nacelle (non-immersed) may satisfy the regulations for a trimaran	
3.18	Toilet	
3.18.2	A toilet, permanently installed or fitted bucket	MoMu3,4
3.19	Bunks	alada.
3.19.2	Bunks, permanently installed	**
<b>3.20</b> 3.20.1	Cooking Facilities  A socking stove permanently installed or securely factored with safe	MaMuO 1 2 2
3.20.1	A cooking stove, permanently installed or securely fastened with safe accessible fuel shutoff control and capable of being safely operated in a	MoMu0,1,2,3
	seaway.	
3.21	Drinking Water Tanks & Drinking Water	MoMu0,1,2,3
3.21.1	Drinking Water Tanks	MoMu0,1,2,3
a)	A yacht shall have a permanently installed delivery pump and water	MoMu0,1,2,3
•	tank(s):	
3.21.3	Emergency Drinking Water	MoMu0,1,2,3
a)	At least 9 litres (2 UK gallons, 2.4 US gallons) of drinking water for	MoMu1,2,3
	emergency use shall be provided in a dedicated and sealed container or	
2.22	container(s)	
3.22	Hand Holds	**
	Adequate hand holds shall be fitted below deck so that crew members may move about safely at sea.	-1440
	move about salely at sea.	

	A Harid Hold Should be capable of Withstanding Without rupture a side force	
	of 1500N - attention is drawn to ISO 15085.	
3.23	Bilge Pumps and Buckets	**
3.23.1	No bilge pump may discharge into a cockpit unless that cockpit opens aft to the sea.	
3.23.2	Bilge pumps shall not be connected to cockpit drains. (OSR 3.09)	**
3.23.3	Bilge pumps and strum boxes shall be readily accessible for maintenance and for clearing out debris	**
3.23.4	Unless permanently installed, each bilge pump handle shall be provided with a lanyard or catch or similar device to prevent accidental loss	**
3.23.5	The following shall be provided:	
c)	multihulls shall have provision to pump out all watertight compartments (except those filled with impermeable buoyancy).	Mu0,1,2,3,4
f)	two buckets of stout construction each with at least 9 litres (2 UK gallons, 2.4 US gallons) capacity. Each bucket to have a lanyard.	**
3.24	Compass	
3.24.1	The following shall be provided:-	dodo
a)	a marine magnetic compass, independent of any power supply, permanently installed and correctly adjusted with deviation card, and	**
b)	a magnetic compass independent of any power supply, capable of being used as a steering compass which may be hand-held	MoMu0,1,2,3
3.25	Halyards.	dede
	No mast shall have less than two halyards, each capable of hoisting a sail.	**
3.27	Navigation Lights (see OSR 2.03.3)	slasla
3.27.1	Navigation lights shall be mounted so that they will not be masked by sails or the heeling of the yacht.	**
3.27.2	Navigation lights shall not be mounted below deck level and should be at no less height than immediately under the upper lifeline.	**
3.27.3	Navigation light intensity TABLE 11	
	LOA Guide to required minimum power rating for an ele navigation light	ectric bulb in a
	under 12 m (39.4 ft) 10 W	
	12 m (39.4 ft) and 25 W above	
3.27.4	Reserve navigation lights shall be carried having the same minimum	MoMu0,1,2,3
	specifications as the navigation lights above, with a separable power	
	source, and wiring or supply system essentially separate from that used for	
	the normal navigation lights	
3.27.5	spare bulbs for navigation lights shall be carried, or for lights not	**
	dependent on bulbs, appropriate spares.	
3.28	Engines, Generators, Fuel	
3.28.1	Propulsion Engines	**
a)	Engines and associated systems shall be installed in accordance with their manufacturers' guidelines and shall be of a type, strength, capacity, and	**
	installation suitable for the size and intended use of the yacht.	slasla
b)	An inboard propulsion engine when fitted shall: be provided with a permanently installed exhaust, coolant, and fuel supply systems and fuel	**
	tank(s); be securely covered; and have adequate protection from the effects of heavy weather.	
c)	A propulsion engine required by Special Regulations shall provide a	MoMu0,1,2,3
	minimum speed in knots of $(1.8 \text{ x square root of LWL in metres})$ or (square root of LWL in feet)	
f)	Boats of less than 12.0 m hull length may be provided with an inboard propulsion engine, or an outboard engine together with permanently installed fuel supply systems and fuel tank(s) may be used as an	Mu1,2,3
	alternative.	
3 28 2	Generator	

A separate generator for electricity is optional. However, when a separate

generator is carried it shall be permanently installed, securely covered, and shall have permanently installed exhaust, cooling and fuel supply systems and fuel tank(s), and have adequate protection from the effects of heavy weather

	and fuel tank(s), and have adequate protection from the effects of heavy	
2 20 2	weather.	
3.28.3	Fuel Systems	M-M-0 1 2 2
a)	Each fuel tank provided with a shutoff valve. Except for permanently installed linings or liners, a flexible tank is not permitted as a fuel tank.	MoMu0,1,2,3
b)	The propulsion engine shall have a minimum amount of fuel which may be	MoMu0,1,2,3
-,	specified in the Notice of Race but if not, shall be sufficient to be able to	
	meet charging requirements for the duration of the race and to motor at	
	the above minimum speed for at least 8 hours	
3.28.4	Battery Systems	
a)	When an electric starter is the only method for starting the engine, the	MoMu0,1,2,3
,	yacht shall have a separate battery, the primary purpose of which is to	
	start the engine	
b)	All rechargeable batteries on board shall be of the sealed type from which	MoMu0,1,2,3
	liquid electrolyte cannot escape. Other types of battery installed on board	
	at 1/12 may continue in use for the remainder of their service lives.	
3.29	Communications Equipment, EPFS (Electronic Position-Fixing	**
	System), Radar, AIS	
	Provision of GMDSS and DSC is unlikely to be mandatory for small craft	MoMu0,1,2,3
	during the term of the present Special Regulations However it is	
	recommended that persons in charge include these facilities when installing	
2 22 4	new equipment.	**
3.29.1	The following shall be provided:	
a)	A marine radio transceiver (or if stated in the Notice of Race, an installed	MoMu0,1,2,3
i	satcom terminal), and an emergency antenna when the regular antenna depends upon the mast.	MoMu0,1,2,3
b)	When the marine radio transceiver is VHF:	MoMu0,1,2,3
i	it shall have a rated output power of 25W	MoMu0,1,2,3
i ii	it shall have a masthead antenna, and co-axial feeder cable with not more	MoMu0,1,2,3
	than 40% power loss	1.0.100/2/2/2
iii	the following types and lengths of co-axial feeder cable will meet the	MoMu0,1,2,3
	requirements of OSR 3.29.1 (b)(ii): (a) up to 15m (50ft) - type RG8X ("mini	
	8"); (b) 15-28m (50-90ft) - type RG8U; (c) 28-43m (90-140ft) - type	
	9913F (uses conventional connectors, available from US supplier Belden);	
	(d) 43-70m) 140-230ft - type LMR600 (uses special connectors, available	
	from US supplier Times Microwave).	
İV	it should include channel 72 (an international ship-ship channel which, by	MoMu0,1,2,3
	common use, has become widely accepted as primary choice for ocean	
- \	racing yachts anywhere in the world)	M-M-1 2 2 4
e)	A hand-held marine VHF transceiver, watertight or with a waterproof cover.	MoMu1,2,3,4
	When not in use to be stowed in a grab bag or emergency container (see OSR 4.21)	
f)	,	**
f)	Independent of a main radio transceiver, a radio receiver capable of receiving weather bulletins	
i)	An EPFS (Electronic Position-Fixing System) (e.g. GPS)	MoMu0,1,2,3
o)	An AIS Transponder is recommended	<i>MoMu3</i>
3.29.2	Yachts are reminded that no reflector, active or passive, is a guarantee of	**
J. L J. L	detection or tracking by a vessel using radar.	
a)	The attention of persons in charge is drawn to legislation in force or	**
/	imminent affecting the territorial seas of some countries in which the	
	carriage of an AIS set is or will be mandatory for certain vessels including	

# SECTION 4 - PORTABLE EQUIPMENT & SUPPLIES for the yacht (for water & fuel see OSR 3.21 and OSR 3.28)

## 4.01 Sail Letters & Numbers

relatively small craft.

4.01.1 Yachts which are not in an ISAF International Class or Recognized Class shall comply with RRS 77 and Appendix G as closely as possible, except

4.01.2 <b>4.02</b>	that sail numbers allotted by a State authority are acceptable.  Sail numbers and letters of the size carried on the mainsail must be displayed by alternative means when none of the numbered sails is set.	** Mo0 1 Mu0 1 2 2 4
4.02.1	Hull marking (colour blaze) To assist in SAR location:-	Mo0,1,Mu0,1,2,3,4
4.02.2	Multihulls shall show on the underside, where they can be seen when inverted, an solid area of highly-visible colour (e.g. Day-Glo pink, orange, or yellow) of at least 1m^2	Mu0,1,2,3,4
4.04 4.04	Soft Wood Plugs Soft wood plugs, tapered and of the appropriate size, shall be attached or stowed adjacent to the appropriate fitting for every through-hull opening.  Jackstays, Clipping Points and Static Safety Lines	**
4.04.1	The following shall be provided:	
a)	Jackstays:-	MoMu0,1,2,3
i	shall be provided- attached to through-bolted or welded deck plates or other suitable and strong anchorage fitted on deck, port and starboard of the yacht's centre line to provide secure attachments for safety harness:-	MoMu0,1,2,3
ii	comprising stainless steel 1 x 19 wire of minimum diameter 5 mm (3/16 in), high modulus polyethylene (such as Dyneema/Spectra) rope or webbing of equivalent strength;	MoMu0,1,2,3
iii	which, when made from stainless steel wire shall be uncoated and used without any sleeving;	MoMu0,1,2,3
İV	20kN (2,040 kgf or 4,500 lbf) min breaking strain webbing is recommended;	MoMu0,1,2,3
V	at least two of which should be fitted on the underside of a multihull in case of inversion.	Mu0,1,2,3
4.04.2	Clipping Points:-	
	shall be provided-	
a)	attached to through-bolted or welded deck plates or other suitable and strong anchorage points adjacent to stations such as the helm, sheet winches and masts, where crew members work for long periods:-	MoMu0,1,2,3
b)	which, together with jackstays and static safety lines shall enable a crew member-	MoMu0,1,2,3
i	to clip on before coming on deck and unclip after going below;	MoMu0,1,2,3
ii	whilst continuously clipped on, to move readily between the working areas on deck and the cockpit(s) with the minimum of clipping and unclipping operations.	MoMu0,1,2,3
c)	The provision of clipping points shall enable two-thirds of the crew to be simultaneously clipped on without depending on jackstays	MoMu0,1,2,3
d)	In a trimaran with a rudder on the outrigger, adequate clipping points shall be provided that are not part of the deck gear or the steering mechanism, in order that the steering mechanism can be reached by a crew member whilst clipped on.	Mu0,1,2,3
<i>e)</i>	Warning - U-bolts as clipping points - see OSR 5.02.1(a)	
4.05	Fire Extinguishers	
4.05.1	Shall be provided as follows: Fire extinguishers, at least two, readily accessible in suitable and different parts of the yacht	**
4.05.2	Fire Extinguishers, at least two, of minimum 2kgs each of dry powder or equivalent	MoMu0,1,2,3
4.05.4 <b>4.06</b>	A fire blanket adjacent to every cooking device with an open flame  Anchor(s)	**
4.06.1 a)	An anchor or anchors shall be carried according to the table below: The following anchors shall be provided	**
i	For yachts of 8.5 m LOA (28 ft) and over there shall be 2 anchors together with a suitable combination of chain and rope, all ready for immediate use	MoMu1,2,3
ii	For yachts under 8.5 m LOA (28 ft) there shall be 1 anchor together with a suitable combination of chain and rope, all ready for immediate use	MoMu1,2,3

4.07	Flashlight(s) and Searchlight(s)	
4.07.1	The following shall be provided:-	dede
a)	A watertight, high-powered searchlight, suitable for searching for a person	**
	overboard at night and for collision avoidance with spare batteries and bulbs, and	
<b>b</b> )	a watertight flashlight with spare batteries and bulb	**
c)	for Mu3,4 the watertight flashlight in OSR 4.07.1 (b) shall be stowed in the	Mu3,4
•	grab bag or emergency container	•
4.08	First Aid Manual and First Aid Kit	**
4.08.1	A suitable First Aid Manual shall be provided	**
	In the absence of a National Authority's requirement, the latest edition of one of the following is recommended:-	**
<i>b)</i>	First Aid at Sea, by Douglas Justins and Colin Berry, published by Adlard Coles Nautical, London	MoMu2,3,4
<i>c)</i>	Le Guide de la medecine a distance, by Docteur J Y Chauve, published by	**
<b>.</b>	Distance Assistance BP33 F-La Baule, cedex, France.	14-14-2-2-4
<i>d)</i>	'PAN-PAN medico a bordo' in Italian edited by Umberto Verna.	MoMu2,3,4
<i>e)</i>	www.panpan.it Skipper's Medical Emergency Handbook by Dr Spike Briggs and Dr	**
	Campbell Mackenzie www.msos.org.uk	
4.08.2	A First Aid Kit shall be provided	**
4.08.3	The contents and storage of the First Aid Kit should reflect the guidelines	**
	of the Manual carried, the likely conditions and duration of the passage,	
	and the number of people aboard the yacht.	
4.09	Foghorn	**
4.10	A foghorn shall be provided  Radar Reflector	ጥጥ
4.10 4.10.1	A passive Radar Reflector (that is, a Radar Reflector without any power)	**
	shall be provided	
a)	If a radar reflector is :	**
i	octahedral with triangular plates making up each pocket it must have a	**
	minimum diagonal measurement of 456 mm (18in).	**
ii	octahederal with circular sector plates making up each pocket it must have a minimum diameter of 304mm (12in).	<b>*</b> *
iii	not octahedral it must have a documented RCS (radar cross-section) of not	**
	less than 10 m2 at 0° elevation and be capable of performance around	
	360° in azimuth.	
_	The minimum effective height above water is 4.0 m (13 ft).	**
b)	The passive and active devices referred to in these notes and in 4.10.1 and	**
• 4400	4.10.2 above are primarily intended for use in the X (9GHz) band	
4.10.2	The most effective radar response from a yacht may be provided by an	MoMu1,2,3,4
	RTE (Radar Target Enhancer) which may be on board in addition to the required passive reflector. An RTE should conform to ISO 8729-2:2009. An	
	RTE is strongly recommended.	
<i>b)</i>	The display of a passive reflector or the operation of an RTE is for the	**
-/	person in charge to decide according to prevailing conditions.	
4.10.3	When available, a passive radar reflector in compliance with ISO8729-	**
	1:2010 will offer improved performance over earlier models and has a size	
	typified by a cylinder of not more than weight 5kg, height 750mm and	
1 10 1	diameter 300mm.	**
4.10.4	S (3GHz) band radar is often used by ships in bad weather to complement X (9GHz) band radar. On S (3GHz) band a passive reflector offers about	7-7-
	1/10 the response obtained on the X (9GHz) band. Unless specifically	
	designed to operate in the S(3GHz) band, an RTE will provide no response	
	at all.	
4.11	Navigation Equipment	
4.11.1	Charts	
	Navigational charts (not solely electronic), light list and chart plotting	**
	equipment shall be provided	

4.12	Safety Equipment Location Chart	
7.12	A safety equipment location chart in durable waterproof material shall be	**
	displayed in the main accommodation where it can best be seen, clearly	
	marked with the location of principal items of safety equipment.	
4.13	Echo Sounder or Lead Line	MaMul 2.2.4
4.13.1 <b>4.14</b>	An echo sounder or lead line shall be provided  Speedometer or Distance Measuring Instrument (log)	MoMu1,2,3,4
7.17	A speedometer or distance measuring instrument (log) shall be provided	MoMu0,1,2,3
4.15	Emergency Steering	
4.15.1	Emergency steering shall be provided as follows:	
a)	except when the principal method of steering is by means of an	MoMu0,1,2,3
	unbreakable metal tiller, an emergency tiller capable of being fitted to the rudder stock;	
b)	crews must be aware of alternative methods of steering the yacht in any	MoMu0,1,2,3
,	sea condition in the event of rudder loss. At least one method must have	, , ,
	been proven to work on board the yacht. An inspector may require that	
4 16	this method be demonstrated.	
4.16	<b>Tools and Spare Parts</b> Tools and spare parts, including effective means to quickly disconnect or	**
	sever the standing rigging from the hull shall be provided.	
4.17	Yacht's name	
	Yacht's name shall be on miscellaneous buoyant equipment, such as	**
4 10	lifejackets, cushions, lifebuoys, lifeslings, grab bags etc.	
4.18	Marine grade retro-reflective material  Marine grade retro-reflective material shall be fitted to lifebuoys, lifeslings,	**
	liferafts and lifejackets. See OSRs 5.04, 5.08.	
4.21	Grab Bags	
4.21.1	Grab Bag or Emergency Container for Multihulls Without Liferafts	Mu3,4
a)	A multihull without a liferaft shall have, readily accessible whether or not the yacht is inverted, either a watertight compartment or a grab bag with	Mu3,4

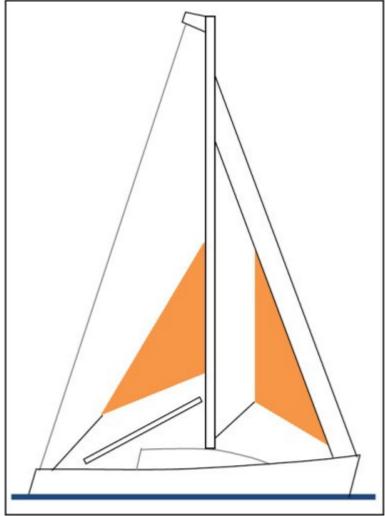

Figure 3 **SECTION 5 - PERSONAL EQUIPMENT** 5.01 Lifejacket

5.01.1 Each crew member shall have a lifejacket as follows:-

a)

In accordance with ISO 12402 – 3 (Level 150) or equivalent, including EN 396 or UL 1180

Lifejackets manufactured after 1 January 2012 shall be in accordance with ISO 12402-3 (Level 150) and shall be fitted with:-

- an emergency light in accordance with either ISO 12402-8 or SOLAS LSA code 2.2.3.
- a sprayhood in accordance with ISO 12402-8.
- a full deck safety harness in accordance with ISO 12401 (ISO 1095) including a crotch or thigh strap (holding down device) as specified in ISO 12401 (ISO 1095).
- If of an inflatable type either
- automatic, manual and oral inflation or (a)
- manual and oral inflation (b)

Notes: ISO 12402 requires Level 150 lifejackets to be fitted with a mandatory whistle and retro-reflective material. Also, when fitted with a safety harness, ISO 12402 requires that this shall be the full safety harness in accordance with ISO 12401. Any equivalent lifejacket shall have equal requirements.

Persons of larger than average build are generally more buoyant than those of average build and so do not require a lifejacket with greater levels of flotation. Wearing a Level 275 lifejacket may hamper entry into liferafts.

b) fitted with either a crotch strap(s) / thigh straps or a full safety harness in accordance with ISO 12401,

ii

	Note: The function of lifejacket crotch/thigh straps is to hold the buoyancy	
	element down. A crew member before a race should adjust a lifejacket to	
	fit then retain that lifejacket for the duration of the race. Correct	
	adjustment is fundamental to the lifejacket functioning correctly.	
c)	fitted with a lifejacket light in accordance with SOLAS LSA code 2.2.3	**
٠,	(white, >0.75 candelas, >8 hours),	
d)	if inflatable have a compressed gas inflation system,	**
e)	if inflatable, regularly checked for gas retention,	**
f)	compatible with the wearer's safety harness,	**
-	clearly marked with the yacht's or wearer's name,	**
g)	· · · · · · · · · · · · · · · · · · ·	
<i>2</i> )	It is strongly recommended that a lifejacket has:	14-14-1 2 2 4
<i>j)</i>	a splashguard / sprayhood See ISO 12402 – 8,	MoMu1,2,3,4
<i>k)</i>	a PLB unit (as with other types of EPIRB, should be properly registered	MoMu1,2,3,4
Δ.	with the appropriate authority)	
<i>1)</i>	if of a gas inflatable type, a spare cylinder and if appropriate a spare	MoMu1,2,3,4
	activation head	
5.01.4	The person in charge shall personally check each lifejacket at least once	**
	annually.	
5.02	Safety Harness and Safety Lines (Tethers)	MoMu0,1,2,3
5.02.1	Each crew member shall have a harness and safety line that complies with	MoMu0,1,2,3
	ISO 12401 or equivalent with a safety line not more than 2m in length.	<del>-</del>
	Harnesses and safety lines manufactured prior to Jan 2010 shall comply	
	with either ISO 12401 or EN 1095.	
	Harnesses and safety lines manufactured prior to Jan 2001 are not	
	permitted.	
a)	Warning it is possible for a plain snaphook to disengage from a U	MoMu0,1,2,3
α,	bolt if the hook is rotated under load at right-angles to the axis of	. 101 140/2/2/0
	the U-bolt. For this reason the use of snaphooks with positive	
	locking devices is strongly recommended.	
5.02.2	At least 30% of the crew shall each, in addition to the above be provided	MoMu0,1,2,3
3.02.2	with either:-	11011110,1,2,3
2)		MaMun 1 2 2
a)	a safety line not more than 1m long, or	MoMu0,1,2,3
b)	a mid-point snaphook on a 2m safety line	MoMu0,1,2,3
5.02.3	A safety line purchased in January 2001 or later shall have a coloured flag	MoMu0,1,2,3
	embedded in the stitching, to indicate an overload. A line which has been	
E 00 4	overloaded shall be replaced as a matter of urgency.	
5.02.4	A crew member's lifejacket and harness shall be compatible	MoMu0,1,2,3
5.02.5	It is strongly recommended that:-	MoMu0,1,2,3
a)	static safety lines should be securely fastened at work stations;	MoMu0,1,2,3
<i>b)</i>	A harness should be fitted with a crotch strap or thigh straps.	MoMu0,1,2,3
<i>c)</i>	to draw attention to wear and damage, stitching on harness and safety	MoMu0,1,2,3
	lines should be of a colour contrasting strongly with the surrounding	
	material;	
d)	snaphooks should be of a type which will not self-release from a U-bolt	MoMu0,1,2,3
,	(see OSR 5.02.1(a)) and which can be easily released under load (crew	, , ,
	members are reminded that a personal knife may free them from a safety	
	line in emergency);	
e)	a crew member before a race should adjust a harness to fit then retain that	MoMu0.1.2.3
<i>-</i> /	harness for the duration of the race.	. 10. 100/1/2/3
5.02.6	Warning - a safety line and safety harness are not designed to tow a	**
5.02.0	person in the water and it is important that the shortest safety line length	
	possible be used with a harness to minimise or eliminate the risk of a	
	person's torso becoming immersed in water outside the boat, especially	
	when working on the foredeck. 1m safety lines or the midpoint snaphook	
	on a 2m line should be used for this purpose. The diligent use of a	
	properly adjusted safety harness and the shortest safety line practicable is	
	regarded as by far the most effective way of preventing man overboard	
ĺ	incidents.	

5.04	roul weather Suits	
<i>b)</i>	it is recommended that a foul weather suit should be fitted with marine-	**
	grade retro-reflective material, and should have high-visibility colours on its	
	upper parts and sleeve cuffs. See OSR 4.18	
	A buoyant watertight flashlight, one shall be supplied to each crew member.	MoMu0
5.07	Survival Equipment	MoMu0
5.07.2	It is strongly recommended that an immersion suit should be supplied to each crew member in a multihull in conditions where there is a potential	Mu1,2,3,4
	for hypothermia	
SECTIO	ON 6 - TRAINING	
6.04	Routine Training On-Board	**
6.04.1	It is recommended that crews should practice safety routines at reasonable intervals including the drill for man-overboard recovery	**
6.05.3	At least one member of the crew shall be familiar with First Aid procedures, hypothermia, drowning, cardio-pulmonary resuscitation and relevant	MoMu3,4
	communications systems (see OSR 6.02.7 and 6.03.3).	
6.05.4	An example model first aid training course is included in Appendix N.	**
