# **ISAF OFFSHORE SPECIAL REGULATIONS**

JANUARY 2014 - DECEMBER 2015 www.sailing.org/specialregs

# **Extract for Race Category 0 Multihulls**

© ORC Ltd. 2002,

## Version 1\_2 - 2014

## Because this is an extract not all paragraph numbers will be present

## Copyright

When reprinting these regulations National Authorities and Race Organizers should :-

• request copyright permission from ISAF and ORC Ltd (normally given free of charge)

• display a copyright acknowledgement with the reprint (similar to © ORC Ltd. 2002, all amendments from 2003 © International sailing Federation, (IOM) Ltd.)

• make any amendments by deleting contrary provisions and indicating that changes have been made

• supply a copy of the reprint to each of ISAF and ORC Ltd

Official interpretations shall take precedence over these Special Regulations and will be indexed, numbered, dated and displayed on the ISAF web site www.sailing.org/specialregs

## Language & Abbreviations Used

Mo - Monohull

Mu - Multihull

" \*\* " means the item applies to all types of yacht in all Categories except

5 for which see Appendix J or 6 for which see Appendix L.

RED TYPE indicates a significant changes in 2014 Guidance notes and recommendations are in italics

The use of the masculine gender shall be taken to mean either gender

## Administration

The Offshore Special Regulation are administered by the ISAF Special Regulation Sub-Committee whose terms of reference are as follows: (www.sailing.org/regulations)

ISAF Regulation 6.8.8.3 - The Special Regulations Sub-Committee shall: (a) be responsible for the maintenance, revision and changes to the ISAF Offshore Special Regulations governing offshore racing, under licence from ORC Ltd. Such changes shall be biennial with revised editions published in January of each even year, except that matters of an urgent nature affecting safety may be dealt with by changes to the Regulations on a shorter time scale;

(b) monitor developments in offshore racing relative to the standards of safety and seaworthiness.

Any queries please E-Mail: technical@isaf.co.uk

# SECTION 1 - FUNDAMENTAL AND DEFINITIONS

#### 1.01 **Purpose and Use**

- 1.01.1 It is the purpose of these Special Regulations to establish uniform minimum equipment, accommodation and training standards for monohull and multihull yachts racing offshore. A Proa is excluded from these regulations. 1.01.2 These Special Regulations do not replace, but rather supplement, the requirements of governmental authority, the Racing Rules and the rules of Class Associations and Rating Systems. The attention of persons in charge is called to restrictions in the Rules on the location and movement of
- equipment. 1.01.3 These Special Regulations, adopted internationally, are strongly recommended for use by all organizers of offshore races. Race Committees may select the category deemed most suitable for the type of race to be sailed.

#### 1.02 **Responsibility of Person in Charge**

- 1.02.1 The safety of a yacht and her crew is the sole and inescapable responsibility of the person in charge who must do his best to ensure that the yacht is fully found, thoroughly seaworthy and manned by an experienced crew who have undergone appropriate training and are physically fit to face bad weather. He must be satisfied as to the soundness of hull, spars, rigging, sails and all gear. He must ensure that all safety equipment is properly maintained and stowed and that the crew know where it is kept and how it is to be used. He shall also nominate a person to take over the responsibilities of the Person in Charge in the event of his incapacitation.
- 1.02.2 Neither the establishment of these Special Regulations, their use by race organizers, nor the inspection of a yacht under these Special Regulations in any way limits or reduces the complete and unlimited responsibility of the person in charge.
- 1.02.3 Decision to race -The responsibility for a yacht's decision to participate in a race or to continue racing is hers alone - RRS Fundamental Rule 4.

### 1.03 1.03.1

- **Definitions, Abbreviations, Word Usage** Definitions of Terms used in this document TABLE 1 Month/year of first launch Age Date AIS Automatic Identification Systems Comité Européen de Normalisation CEN CPR Cardio-Pulmonary Resuscitation Includes the transverse after limit of the cockpit over which Coaming water would run in the event that when the yacht is floating level the cockpit is flooded or filled to overflowing. DSC **Digital Selective Calling** ΕN European Norm EPFS **Electronic Position-Fixing System EPIRB Emergency Position-Indicating Radio Beacon** The transverse station at which the upper corner of the FA Station transom meets the sheerline. Foul-Weather A foul weather suit is clothing designed to keep the wearer dry and maybe either a jacket and trousers worn together, Suit or a single garment comprising jacket and trousers. Global Maritime Distress & Safety System GMDSS **Global Navigation Satellite System** GNSS
  - EPIRB, with integral GPS position-fixing **GPIRB** ITU International Telecommunications Union

1.03.3

# **SECTION 2 - APPLICATION & GENERAL REQUIREMENTS**

| 2.01   | Categories of Events  |        |
|--------|---|--------|
|        | In many types of race, ranging from trans-oceanic sailed under adverse conditions to short-course day races sailed in protected waters, seven | **     |
|        | categories are established, to provide for differences in the minimum   |        |
|        | standards of safety and accommodation required for such varying   |        |
|        | circumstances:  |        |
| 2.01.1 |   |        |
| 2.01.1 | Trans-oceanic races, including races which pass through areas in which air  | MoMu,0 |
|        | or sea temperatures are likely to be less than 5 degrees Celsius other than   | Momu,0 |
|        | temporarily, where yachts must be completely self-sufficient for very   |        |
|        | extended periods of time, capable of withstanding heavy storms and  |        |
|        | prepared to meet serious emergencies without the expectation of outside   |        |
|        | assistance.   |        |
| 2.02   | Inspection  |        |
| 2102   | A yacht may be inspected at any time. If she does not comply with these   | **     |
|        | Special Regulations her entry may be rejected, or she will be liable to   |        |
|        | disqualification or such other penalty as may be prescribed by the national   |        |
|        | authority or the race organizers.   |        |
| 2.03   | General Requirements  |        |
| 2.03.1 | All equipment required by Special Regulations shall:-   |        |
| a)     | function properly   | **     |
| b)     | be regularly checked, cleaned and serviced  | **     |
| c)     | when not in use be stowed in conditions in which deterioration is minimised   | **     |
| d)     | be readily accessible   | **     |
| e)     | be of a type, size and capacity suitable and adequate for the intended use  | **     |
|        | and size of the yacht.  |        |
| 2.03.2 | Heavy items:  |        |
| a)     | ballast, ballast tanks and associated equipment shall be permanently  | **     |
|        | installed   |        |
| b)     | heavy movable items including e.g. batteries, stoves, gas bottles, tanks,   | **     |
|        | toolboxes and anchors and chain shall be securely fastened  |        |
| c)     | heavy items for which fixing is not specified in Special Regulations shall be   | **     |
|        | permanently installed or securely fastened, as appropriate  |        |
| 2.03.3 | When to show navigation lights  | **     |
| a)     | navigation lights (OSR 3.27) shall be shown as required by the  | **     |
|        | International Regulations for Preventing Collision at Sea, (Part C and  |        |
|        | Technical Annex 1). All yachts shall exhibit sidelights and a sternlight at the   |        |
|        | required times.   |        |

# **SECTION 3 - STRUCTURAL FEATURES, STABILITY, FIXED EQUIPMENT**

- 3.01 Strength of Build, Ballast and Rig Yachts shall be strongly built, watertight and, particularly with regard to hulls, decks and cabin trunks capable of withstanding solid water and knockdowns. They must be properly rigged and ballasted, be fully seaworthy and must meet the standards set forth herein. Shrouds shall never be disconnected. 3.02 Watertight Integrity of a Hull A hull, including, deck, coach roof, windows, hatches and all other parts, 3.02.1 shall form an integral, essentially watertight unit and any openings in it
- shall be capable of being immediately secured to maintain this integrity. Centreboard and daggerboard trunks and the like shall not open into the 3.02.2 interior of a hull except via a watertight inspection/maintenance hatch of which the opening shall be entirely above the waterline of the yacht floating level in normal trim.

\*\*

\*\*

| 3.02.3 | A canting keel pivot shall be completely contained within a watertight<br>enclosure which shall comply with OSR 3.02.2. Access points in the<br>watertight enclosure for control and actuation systems or any other<br>purpose shall comply with OSR 3.02.1.   | **              |
|--------|--|-----------------|
| 3.02.4 | Moveable ballast systems shall be fitted with a manual control and<br>actuation secondary system which shall be capable of controlling the full<br>sailing load of the keel in the event of failure of the primary system. Such<br>failures would include electrical and hydraulic failure and mechanical failure<br>of the components and the structure to which it mounts. The system must<br>be capable of being operational quickly and shall be operable at any angle<br>of heel. It would be desirable if this system was capable of securing the<br>keel on the centreline. | **              |
| 3.03   | Hull Construction Standards (Scantlings)   | MoMu0,1,2       |
| 3.03.4 | A multihull shall comply with appendix M to these OSR.   | Extract Mo0,1,2 |
| 3.05   | Stability and Flotation - Multihulls   | Mu0,1,2,3,4     |
|        | Attention is drawn to ISO 12217-2.   | Mu0,1,2,3,4     |
| 3.05.1 | Adequate watertight bulkheads and compartments (which may include<br>permanently installed flotation material) in each hull shall be provided to<br>ensure that a multihull is effectively unsinkable and capable of floating in a<br>stable position with at least half the length of one hull flooded. (see OSR<br>3.13.2).  | Mu0,1,2,3,4     |
| 3.05.2 | Multihulls built on or after Jan 1999 shall in every hull without<br>accommodation be divided at intervals of not more than 4m (13ft 3") by<br>one or more transverse watertight bulkheads   | Mu0,1,2,3,4     |
| 3.05.3 | A yacht shall be designed and built to resist capsize.   | Mu0,1,2,3,4     |
| 3.07   | Exits and Escape Hatches - Multihulls  | Mu0,1,2,3,4     |
| 3.07.1 | Exits  |                 |
| a)     | In a multihull of 8m (26.2ft) LOA and greater, each hull which contains accommodation shall have at least two exits.   | Mu0,1,2,3,4     |
| b)     | In a multihull of less than 8m (26.2ft) LOA each hull which contains accommodation shall have at least two exits.  | Mu0,1,2,3       |
| 3.07.2 | Escape Hatches, Underside Clipping Points & Handholds  |                 |
| a)     | In a multihull of 12m (39.4ft) LOA and greater each hull which contains accommodation shall:-  | Mu0,1,2,3,4     |
| i      | have an escape hatch for access to and from the hull in the event of an inversion;   | Mu0,1,2,3,4     |
| ii     | when first launched on or after January 2003 have a minimum clearance<br>diameter through each escape hatch of 450mm or when an escape hatch is<br>not circular, sufficient clearance to allow a crew member to pass through<br>fully clothed;   | Mu0,1,2,3,4     |
| iii    | when first launched prior to January 2003, if possible have each escape<br>hatch in compliance with the dimensions in OSR 3.07.2(a)(ii);   | Mu0,1,2,3,4     |
| iv     | when the yacht is inverted have each escape hatch above the waterline;   | Mu0,1,2,3,4     |
| V      | when first launched on or after January 2001 have each escape hatch at or<br>near the midships station;  | Mu0,1,2,3,4     |
| vi     | in a catamaran first launched on or after January 2003 have each escape hatch on the side nearest the vessel's central axis.   | Mu0,1,2,3,4     |
| b)     | A trimaran of 12m (39.4ft) LOA and greater first launched on or after 1/03 shall have at least two escape hatches in compliance with the dimensions in OSR 3.07.2(a) (ii)  | Mu0,1,2,3,4     |
| c)     | Each escape hatch must have been opened both from inside and outside within 6 months prior to an intended race   | Mu0,1,2,3,4     |
| d)     | A multihull shall have on the underside appropriate handholds/clipping points sufficient for all crew (on a trimaran these shall be around the central hull).  | Mu0,1,2,3,4     |
| e)     | A catamaran first launched on or after 1/03 with a central nacelle shall have on the underside around the central nacelle, handholds of sufficient   | Mu0,1,2,3,4     |
| f)     | capacity to enable all persons on board to hold on and/or clip on securely<br>In a catamaran with a central nacelle, it is recommended that each hull has  | Mu0,1,2,3,4     |

an emergency refuge, accessible via a special hatch in the side of the hull nearest the vessel's central axis, which hatch may be opened and closed from the inside and outside

#### 3.08 **Hatches & Companionways** \*\* 3.08.1 No hatch forward of the maximum beam station, other than a hatch in the side of a coachroof, shall open in such a way that the lid or cover moves into the open position towards the interior of the hull (excepting ports having an area of less than 0.071m2 (110 sg in)). A hatch fitted forward of the maximum beam station, located on the side of \*\* 3.08.2 the coachroof, opening into the interior of the boat, and of area greater than 0.071m2 shall comply with ISO12216 design category A and be clearly labelled and used in accordance with the following instruction: "NOT TO BE OPENED AT SEA" Attention is drawn to SR 3.02.1 3.08.3 A hatch shall be: \*\* b) permanently attached c) capable of being firmly shut immediately and remaining firmly shut in a 180 \*\* degree capsize (inversion) 3.08.4 A companionway hatch shall: be fitted with a strong securing arrangement which shall be operable from \*\* a) the exterior and interior including when the yacht is inverted have any blocking devices: \*\* b) \*\* capable of being retained in position with the hatch open or shut i whether or not in position in the hatchway, secured to the yacht (e.g. by \*\* ii lanyard) for the duration of the race, to prevent their being lost overboard \*\* iii permit exit in the event of inversion 3.08.7 A companionway hatch extending below the local sheerline and shall Mu0,1,2,3,4 comply with either (a) or (b): a) be capable of being blocked off up to the level of the local sheerline, whilst Mu0,1,2,3,4 giving access to the interior with the blocking devices (e.g. washboards) in place with a minimum sill height of 300 mm. b) A companionway hatch shall be in compliance with ISO 11812 – Watertight i Mu0,1,2,3 cockpits and guick-draining cockpits to design category A 3.09 **Cockpits - Attention is Drawn to ISO 11812** \*\* 3.09.1 Cockpits shall be structurally strong, self-draining quickly by gravity at all angles of heel and permanently incorporated as an integral part of the hull. \*\* 3.09.2 Cockpits must be essentially watertight, that is, all openings to the hull must be capable of being strongly and rigidly secured 3.09.3 A bilge pump outlet pipe shall not be connected to a cockpit drain. See \*\* OSR 3.09.8 for cockpit drain minimum sizes \*\* 3.09.4 A cockpit sole shall be at least 2% LWL above LWL (or in IMS yachts first launched before 1/03, at least 2% L above LWL) 3.09.5 A bow, lateral, central or stern well shall be considered a cockpit for the \*\* purposes of OSR 3.09 3.09.6 In cockpits opening aft to the sea structural openings aft shall be not less \*\* in area than 50% maximum cockpit depth x maximum cockpit width. 3.09.7 **Cockpit Volume** i) earliest of age or series date before April 1992 the total volume of all cockpits below lowest coamings shall not exceed 6% Extract MoMu0,1 (LWL x maximum beam x freeboard abreast the cockpit). ii) earliest of age or series date April 1992 and after as above for the appropriate category except that "lowest coamings" shall Extract \*\* not include any aft of the FA station and no extension of a cockpit aft of the working deck shall be included in calculation of cockpit volume *IMS-rated boats may instead of the terms LWL, maximum beam, freeboard* Extract \*\* abreast the cockpit, use the IMS terms L, B and FA. **Cockpit Drains** 3.09.8

See OSR 3.09.1. Cockpit drain cross section area (after allowance for screens if fitted) shall be:-

| a)      | in yachts with earliest of age or series date before 1/72 or in any yacht<br>under 8.5m (28ft) LOA - at least that of 2 x 25mm diameter (one inch)   | **             |
|---------|--|----------------|
| b)      | unobstructed openings or equivalent<br>in yachts with earliest of age or series date 1/72 and later - at least that of<br>4 x 20mm diameter (3/4 inch) unobstructed openings or equivalent   | **             |
| 3.10    | Sea Cocks or Valves  |                |
| 5110    | Sea cocks or valves shall be permanently installed on all through-hull openings below the waterline except integral deck scuppers, speed indicators, depth finders and the like, however a means of closing such openings shall be provided. | **             |
| 3.11    | Sheet Winches  |                |
|         | Sheet winches shall be mounted in such a way that an operator is not required to be substantially below deck.  | **             |
| 3.12    | Mast Step  |                |
|         | The heel of a keel stepped mast shall be securely fastened to the mast   | **             |
|         | step or adjoining structure.   |                |
| 3.13    | Watertight Bulkheads   |                |
|         | multihulls also see OSR 3.05   | Mu0,1,2,3,4    |
| 3.13.1  | A hull shall have either a watertight "crash" bulkhead within 15% of LOA from the bow and abaft the forward end of LWL, or permanently installed closed-cell foam buoyancy effectively filling the forward 30% LOA of the                    | Mo0Mu0,1,2,3,4 |
| 2 1 2 2 | hull.  | M-0M-0 1 2 2 4 |
| 3.13.2  | Any required watertight bulkhead shall be strongly built to take a full head<br>of water pressure without allowing any leakage into the adjacent<br>compartment.   | Mo0Mu0,1,2,3,4 |
| 3.14    | Pulpits, Stanchions, Lifelines   |                |
| 3.14.1  | When due to the particular design of a multihull it is impractical to precisely  | Mu0,1,2,3,4,   |
| 511 111 | follow Special Regulations regarding pulpits, stanchions, lifelines, the regulations for monohulls shall be followed as closely as possible with the   |                |
| _       | aim of minimising the risk of people falling overboard.  |                |
| 3.14.2  | Lifeline deflection shall not exceed the following:  | **             |
| a)      | When a deflecting force of 4 kg/f (39.2 N) is applied to a lifeline midway between supports of an upper or single lifeline, the lifeline shall not deflect more than 50mm. This measurement shall be taken at the widest span                | **             |
|         | between supports that are aft of the mast.   |                |
| b)      | When a deflecting force of 4 kg/f (39.2 N) is applied midway between supports of an intermediate lifeline of all spans that are aft of the mast,   | **             |
|         | deflection shall not exceed 120mm from a straight line between the   |                |
|         | stanchions.  |                |
| 3.14.3  | The following shall be provided:   | **             |
| c)      | lifelines (guardlines) supported on stanchions, which, with pulpits, shall   | **             |
|         | form an effectively continuous barrier around a working deck for man-  |                |
|         | overboard prevention. Lifelines shall be permanently supported at intervals  |                |
|         | of not more than 2.20m (86.6") and shall not pass outboard of supporting   |                |
|         | stanchions   |                |
| d)      | upper rails of pulpits at no less height above the working deck than the   | **             |
|         | upper lifelines as in Table 7.   |                |
| e)      | Openable upper rails in bow pulpits shall be secured shut whilst racing  | **             |
| f)      | Pulpits and stanchions shall be permanently installed. When there are  | **             |
|         | sockets or studs, these shall be through-bolted, bonded or welded. The   |                |
|         | pulpit(s) and/or stanchions fitted to these shall be mechanically retained   |                |
|         | without the help of the life-lines. Without sockets or studs, pulpits and/or   |                |
|         | stanchions shall be through-bolted, bonded or welded.  |                |
| g)      | The bases of pulpits and stanchions shall not be further inboard from the edge of the appropriate working deck than 5% of maximum beam or 150  | **             |
|         | mm (6 in), whichever is greater.   | steste         |
| h)      | Stanchion or pulpit or pushpit bases shall not be situated outboard of a   | **             |
|         | working deck. For the purpose of this rule the base shall be taken to  |                |
|         | include a sleeve or socket into which the tube is fitted but shall exclude a   |                |
|         |  |                |

| i)      | baseplate which carries fixings into the deck or hull.<br>Provided the complete lifeline enclosure is supported by stanchions and<br>pulpit bases effectively within the working deck, lifeline terminals and  | **          |
|---------|--|-------------|
| j)      | support struts may be fixed to a hull aft of the working deck<br>Lifelines need not be fixed to a bow pulpit if they terminate at, or pass<br>through, adequately braced stanchions set inside and overlapping the bow<br>pulpit, provided that the gap between the upper lifeline and the bow pulpit  | **          |
| k)      | does not exceed 150 mm (6 in).<br>Lifelines shall be continuous and fixed only at (or near) the bow and stern.<br>However a bona fide gate shall be permitted in the lifelines on each side of<br>a yacht. Except at its end fittings, the movement of a lifeline in a fore-and-<br>aft direction shall not be constrained. Temporary sleeving in 3.14.6 (c)<br>shall not modify tension in the lifeline.    | **          |
| D       | Stanchions shall be straight and vertical except that:-  | **          |
| l)<br>i | within the first 50 mm (2 in) from the deck, stanchions shall not be   | **          |
| 1       | displaced horizontally from the point at which they emerge from the deck<br>or stanchion base by more than 10 mm (3/8 in), and   |             |
| ii      | stanchions may be angled to not more than 10 degrees from vertical at any point above 50 mm (2 in) from the deck.  | **          |
| m)      | It is strongly recommended that designs also comply to ISO 15085   | **          |
| 3.14.4  | Special Requirements for Pulpits, Stanchions, Lifelines on   | Mu0,1,2,3,4 |
|         | Multihulls   |             |
|         | The following shall be provided:-  |             |
| a)      | on a trimaran - a bow pulpit on the main hull, with lifelines around the<br>main hull supported on stanchions. The lifelines may be interrupted where<br>there are nets or crossbeam wings outboard of the main hull   | Mu0,1,2,3,4 |
| b)      | on a trimaran - where a net joins the base of a bow pulpit on the main hull,<br>an additional lifeline from the top of the pulpit to the forward crossbeam at<br>or outboard of the crossbeam mid-point.   | Mu0,1,2,3,4 |
| c)      | on a trimaran - at a main or emergency steering position on an outrigger<br>with or without a cockpit, lifelines protecting an arc of 3 meters diameter<br>centred on the steering position. (When measuring between lifelines their   | Mu0,1,2,3,4 |
| .0.     | taut, undeflected positions shall be taken for this purpose).  | M.0.1.2.2.4 |
| d)      | on a catamaran - lifelines from bow to stern on each hull and transverse<br>lifelines to form an effectively continuous barrier around the working area<br>for man-overboard prevention. The transverse lifelines shall be attached to<br>bow and stern pulpits or superstructure. A webbing, strop or rope<br>(minimum diameter 6mm) shall be rove zig-zag between the transverse<br>lifelines and the net. | Mu0,1,2,3,4 |

## 3.15 Multihull Nets or Trampolines

| 0.10       |   |              |
|------------|---|--------------|
| 3.15.1     | The word "net" is interchangeable with the word "trampoline"                    | Mu0,1,2,3,4  |
|            | A net shall be:-  | Mu0.1.2.3.4  |
| a)         | essentially horizontal  | Mu0,1,2,3,4  |
| b)         | made from durable woven webbing, water permeable fabric, or mesh with           | Mu0,1,2,3,4  |
|            | openings not larger than 5.08cm (2 inches) in any dimension. Attachment         |              |
|            | points shall be planned to avoid chafe. The junction between a net and a        |              |
|            | yacht shall present no risk of foot trapping                                    |              |
| c)         | solidly fixed at regular intervals on transverse and longitudinal support lines | Mu0,1,2,3,4  |
|            | and shall be fine-stitched to a bolt rope                                       |              |
| d)         | able to carry the full weight of the crew either in normal working conditions   | Mu0,1,2,3,4  |
|            | at sea or in case of capsize when the yacht is inverted.                        |              |
| e)         | It is recommended that lines used to tie the nets should be individually tied   | Mu0,1,2,3,4  |
|            | and not continuously connected to more than four attachment points per          |              |
|            | connecting line   |              |
| 3.15.2     | Trimarans with Double Crossbeams  |              |
| a)         | A trimaran with double crossbeams shall have nets on each side covering:-       |              |
| b)         | the rectangles formed by the crossbeams, central hull and outriggers            | Mu0,1,2,3,4  |
| c)         | the triangles formed by the aft end of the central pulpit, the mid-point of     | Mu0,1,2,3,4  |
|            | each forward crossbeam, and the intersection of the crossbeam and the           |              |
|            | central hull  |              |
| d)         | the triangles formed by the aftermost part of the cockpit or steering           | Mu0,1,2,3,4  |
|            | position (whichever is furthest aft), the mid-point of each after crossbeam,    |              |
| ``         | and the intersection of the crossbeam and the central hull; except that:-       |              |
| e)         | the requirement in OSR 3.15.2(d) shall not apply when cockpit coamings          | Mu0,1,2,3,4  |
|            | and/or lifelines are present which comply with the minimum height               |              |
| 2452       | requirements in Table 7   |              |
| 3.15.3     | Trimarans with Single Crossbeams  | M-01224      |
| a)         | A trimaran with a single crossbeam shall have nets between the central hull     | Mu0,1,2,3,4  |
| <b>L</b> ) | and each outrigger:-  | M.O. 1 2 2 4 |
| b)         | on each side between two straight lines from the intersection of the            | Mu0,1,2,3,4  |

crossbeam and the outrigger, respectively to the aft end of the pulpit on

|                                 | the central hull, and to the aftermost point of the cockpit or steering position on the central hull (whichever is furthest aft)   |                            |
|---------------------------------|--|----------------------------|
| 3.16                            | <b>Catamarans</b><br>On a catamaran the total net surface shall be limited:  |                            |
| a)                              | laterally by the hulls; and  | Mu0,1,2,3,4                |
| b)                              | longitudinally by transverse stations through the forestay base, and the aftermost point of the boom lying fore and aft. However, a catamaran with a central nacelle (non-immersed) may satisfy the regulations for a trimaran                                       | Mu0,1,2,3,4                |
| <b>3.18</b><br>3.18.1           | <b>Toilet</b><br>A toilet, permanently installed   | MoMu0,1,2                  |
| 3.19                            | Bunks  |                            |
| 3.19.1<br>3.19.2<br><b>3.20</b> | Bunks, permanently installed, one for each member of the declared crew<br>Bunks, permanently installed<br><b>Cooking Facilities</b>  | MoMu0<br>**                |
| 3.20.1                          | A cooking stove, permanently installed or securely fastened with safe accessible fuel shutoff control and capable of being safely operated in a  | MoMu0,1,2,3                |

| 3.28.4 |  |  | MoMu0,1,2,3  |  |  |
| a)     | When an electric starter is the only method for starting the engine, the |  |              |  |  |

a) When an electric starter is the only method for starting the engine, the MoMu0,1,2,3

yacht shall have a separate battery, the primary purpose of which is to start the engine

|         | start the engine   |                            |
|---------|--|----------------------------|
| b)      | All rechargeable batteries on board shall be of the sealed type from which liquid electrolyte cannot escape. Other types of battery installed on board at 1/12 may continue in use for the remainder of their service lives. | MoMu0,1,2,3                |
| 3.29    | Communications Equipment, EPFS (Electronic Position-Fixing   | **                         |
|         | System), Radar, AIS  |                            |
|         | Provision of GMDSS is unlikely to be mandatory for small craft during the  | МоМи0,1,2,3                |
| 2 20 1  | term of the present Special Regulations.   | **                         |
| 3.29.1  | The following shall be provided:   |                            |
| a)      | A marine radio transceiver (or if stated in the Notice of Race, an installed satcom terminal), and   | MoMu0,1,2,3                |
| i<br>LN | an emergency antenna when the regular antenna depends upon the mast.   | MoMu0,1,2,3                |
| b)      | When the marine radio transceiver is VHF:  | MoMu0,1,2,2                |
| i<br>ii | it shall have a rated output power of 25W it shall have a masthead antenna, and co-axial feeder cable with not more  | MoMu0,1,2,3<br>MoMu0,1,2,3 |
| 11      | than 40% power loss  | 1101100,1,2,5              |
| iii     | the following types and lengths of co-axial feeder cable will meet the requirements of OSR 3.29.1 (b)(ii): (a) up to 15m (50ft) - type RG8X ("mini   | МоМи0,1,2,3                |
|         | 8"); (b) 15-28m (50-90ft) - type RG8U; (c) 28-43m (90-140ft) - type<br>9913F (uses conventional connectors, available from US supplier Belden);  |                            |
|         | (d) 43-70m) 140-230ft - type LMR600 (uses special connectors, available  |                            |
|         | from US supplier Times Microwave).   |                            |
| iv      | it should include channel 72 (an international ship-ship channel which, by   | МоМи0,1,2,3                |
|         | common use, has become widely accepted as primary choice for ocean   |                            |
| _       | racing yachts anywhere in the world)   |                            |
| V       | VHF transceivers installed after 31 December 2015 shall be DSC capable   | MoMu1,2,3                  |
| vi      | DSC capable VHF transceivers shall be programmed with an assigned MMSI   | MoMu1,2,3                  |
|         | (unique to the boat), be connected to a GPS receiver and be capable of making distress alort calls as well as conding and receiving a DSC position   |                            |
|         | making distress alert calls as well as sending and receiving a DSC position<br>report with another DSC equipped station  |                            |
| vii     | Notwithstanding OSR 3.29.1 (b) a yacht in a Category Zero race shall have  | MoMu0                      |
|         | a marine VHF DSC radio in accordance with OSR 3.29.1 (b) (I) and (ii)  |                            |
|         | covering all international and US marine channels and meeting the class D  |                            |
|         | specification of the ITU.  |                            |
| c)      | At least two hand-held satellite telephones, watertight or with waterproof   | MoMu0                      |
|         | covers and internal batteries. When not in use each to be stowed in a grab   |                            |
| ط)      | bag (see OSR 4.21)   | MaMuO                      |
| d)      | At least two hand-held marine VHF transceivers each with min 5w output power, watertight or with waterproof covers. When not in use to be  | MoMu0                      |
|         | stowed in a grab bag (see OSR 4.21)  |                            |
| f)      | Independent of a main radio transceiver, a radio receiver capable of   | **                         |
| ,       | receiving weather bulletins  |                            |
| g)      | It is strongly recommended that a hand-held watertight transceiver   | ΜοΜυθ                      |
|         | operating on one or more aviation frequencies including 121.5MHz should  |                            |
|         | be provided. This will enable communications between the yacht and   |                            |
|         | aircraft on SAR duties, not all of which have maritime VHF. When not in  |                            |
| h)      | <i>use to be stowed in a grab bag (see OSR 4.21.2)</i><br>A D/F (direction-finding) radio receiver operating on 121.5MHz to take a   | MoMu0                      |
| 11)     | bearing on a PLB or EPIRB, or an alternative device for man-overboard  | Momuo                      |
|         | location when each crew member has an appropriate personal unit (see   |                            |
|         | OSR 5.07);   |                            |
| i)      | An EPFS (Electronic Position-Fixing System) (e.g. GPS)   | MoMu0,1,2,3                |
| j)      | A Standard-C satellite terminal (GMDSS) shall be permanently installed and   | MoMu0                      |
|         | permanently powered up for the duration of the race and for which the  |                            |
| LA      | race committee shall have polling authority.   | MaMaro                     |
| k)      | An MF/HF marine SSB transceiver (GMDSS/DSC) with at least 125 watts  | MoMu0                      |
|         | transmitter power and frequency range from at least 1.6 to 29.9 MHz with permanently installed antenna and earth.  |                            |
|         |  |                            |

| l)     | An active radar set permanently installed either:  | MoMu0     |
|--------|--|-----------|
| i      | A pulse (magnetron) unit with not less than 4kW PEP and an antenna unit  |           |
|        | with a maximum dimension not less than 533mm; Or   |           |
| ii     | A frequency modulated continuous wave (FMCW) Broadband Radar™ unit   |           |
|        | The radar antenna unit shall remain essentially horizontal when the yacht is   |           |
|        | heeled and at least 7 meters above the water. Installations in place before  |           |
| I (    | January 2006 shall comply as closely as possible with OSR 3.29(L).   |           |
| _m)    | A class A AIS  | MoMu0     |
| p)     | An AIS antenna shall be mounted on top of the main mast.   | MoMu0,1,2 |
| 3.29.2 | Yachts are reminded that no reflector, active or passive, is a guarantee of detection or tracking by a vessel using radar. | **        |
| a)     | The attention of persons in charge is drawn to legislation in force or   | **        |
|        | imminent affecting the territorial seas of some countries in which the   |           |
|        | carriage of an AIS set is or will be mandatory for certain vessels including relatively small craft.                       |           |
|        |  |           |
| SECT   | ION 4 - PORTABLE EQUIPMENT & SUPPLIES for  | the yacht |
|        | ter & fuel see OSR 3.21 and OSR 3.28)  |           |

| 4.01   | Sail Letters & Numbers   |                                 |
|--------|--|---------------------------------|
| 4.01.1 | Yachts which are not in an ISAF International Class or Recognized Class shall comply with RRS 77 and Appendix G as closely as possible, except | **                              |
|        | that sail numbers allotted by a State authority are acceptable.  |                                 |
| 4.01.2 | Sail numbers and letters of the size carried on the mainsail must be   | **                              |
| 7.01.2 | displayed by alternative means when none of the numbered sails is set.   |                                 |
| 4.02   | Hull marking (colour blaze)  | Mo0,1,Mu0,1,2,3,4               |
| 4.02.1 | To assist in SAR location:-  | 1100,1,1100,1,2,3, <del>1</del> |
| a)     | Each yacht shall show at least 4 m^2 of fluorescent pink or orange or  | MoMu0                           |
| aj     | yellow colour as far as possible in a single area on the coachroof and/or  | Monuo                           |
|        | deck where it can best be seen   |                                 |
| 4.02.2 | Multihulls shall show on the underside, where they can be seen when  | Mu0,1,2,3,4                     |
|        | inverted, an solid area of highly-visible colour (e.g. Day-Glo pink, orange, or yellow) of at least 1m^2                                       |                                 |
| 4.02.3 | Each yacht is recommended to show on each underwater appendage an  | ΜοΜυθ,1                         |
|        | area of highly-visible colour  |                                 |
| 4.03   | Soft Wood Plugs  |                                 |
|        | Soft wood plugs, tapered and of the appropriate size, shall be attached or   | **                              |
|        | stowed adjacent to the appropriate fitting for every through-hull opening.   |                                 |
| 4.04   | Jackstays, Clipping Points and Static Safety Lines   |                                 |
| 4.04.1 | Jackstays shall be provided-   | MoMu0,1,2,3                     |
| a)     | attached to through-bolted or welded deck plates or other suitable and   | MoMu0,1,2,3                     |
|        | strong anchorage fitted on deck, port and starboard of the yacht's centre  |                                 |
|        | line to provide secure attachments for safety harness:-  |                                 |
| b)     | comprising stainless steel $1 \times 19$ wire of minimum diameter 5 mm (3/16   | MoMu0,1,2,3                     |
|        | in), high modulus polyethylene (such as Dyneema/Spectra) rope or   |                                 |
|        | webbing of equivalent strength;  |                                 |
| c)     | which, when made from stainless steel wire shall be uncoated and used  | MoMu0,1,2,3                     |
|        | without any sleeving;  |                                 |
| d)     | 20kN (2,040 kgf or 4,500 lbf) min breaking strain webbing is   | МоМи0,1,2,3                     |
|        | recommended;   |                                 |
| e)     | at least two of which should be fitted on the underside of a multihull in  | Mu0,1,2,3                       |
|        | case of inversion.   |                                 |
| 4.04.2 | Clipping Points:-  |                                 |
|        | shall be provided-   |                                 |
| a)     | attached to through-bolted or welded deck plates or other suitable and   | MoMu0,1,2,3                     |
|        | strong anchorage points adjacent to stations such as the helm, sheet   |                                 |
|        | winches and masts, where crew members work for long periods:-  |                                 |
| b)     | which, together with jackstays and static safety lines shall enable a crew   | MoMu0,1,2,3                     |
|        | member-  |                                 |

| i<br>II                      | to clip on before coming on deck and unclip after going below;<br>whilst continuously clipped on, to move readily between the working areas<br>on deck and the cockpit(s) with the minimum of clipping and unclipping<br>operations.                    | MoMu0,1,2,3<br>MoMu0,1,2,3 |
|------------------------------|---|----------------------------|
| c)                           | The provision of clipping points shall enable two-thirds of the crew to be simultaneously clipped on without depending on jackstays   | MoMu0,1,2,3                |
| d)                           | In a trimaran with a rudder on the outrigger, adequate clipping points shall<br>be provided that are not part of the deck gear or the steering mechanism,<br>in order that the steering mechanism can be reached by a crew member<br>whilst clipped on. | Mu0,1,2,3                  |
| <i>e)</i><br>4.05            | <i>Warning - U-bolts as clipping points - see OSR 5.02.1(a)</i> <b>Fire Extinguishers</b>   | МоМи0,1,2,3                |
| 4.05.1                       | Shall be provided as follows:<br>Fire extinguishers, at least two, readily accessible in suitable and different<br>parts of the yacht   | **                         |
| 4.05.2                       | Fire Extinguishers, at least two, of minimum 2kgs each of dry powder or equivalent  | MoMu0,1,2,3                |
| 4.05.3                       | Fire extinguishers, at least three of minimum 2 kgs each of dry powder or<br>equivalent including at least one extinguisher or system suitable for dealing<br>with fire in a machinery space  | MoMu0                      |
| 4.05.4<br><b>4.06</b>        | A fire blanket adjacent to every cooking device with an open flame<br>Anchor(s)   | **                         |
| 4.06.1<br>a)                 | An anchor or anchors shall be carried according to the table below:<br>The specification of anchor, chain and rope shall be in accordance with<br>relevant class rules or the rules of a recognised Classification Society (eg<br>Lloyd's, DNV, etc.)   | **<br>MoMu0                |

| 4.20.3    | Liferaft Packing and Stowage<br>A Liferaft shall be either:-   | <b>MoMu0,1,2</b><br>MoMu0,1,2 |
|-----------|--|-------------------------------|
| a)        | packed in a transportable rigid container or canister and stowed on the working deck or in the cockpit, or:-   | MoMu0,1,2                     |
| b)        | packed in a transportable rigid container or canister or in a valise and<br>stowed in a purpose-built rigid compartment containing liferaft(s) only and<br>opening into or adjacent to the cockpit or working deck, or through a<br>transom, provided that:-   | MoMu0,1,2                     |
| i         | each compartment is watertight or self-draining (self-draining<br>compartments will be counted as part of the cockpit volume except when<br>entirely above working deck level or when draining independently<br>overboard from a transom stowage - see OSR 3.09) and-  | MoMu0,1,2                     |
| ii        | the cover of each compartment is capable of being easily opened under<br>water pressure, and-  | MoMu0,1,2                     |
| iii       | the compartment is designed and built to allow a liferaft to be removed<br>and launched quickly and easily, or-  | MoMu0,1,2                     |
| V         | Liferaft stowage on a multihull and a monohull with moveable ballast shall<br>be such that each liferaft may be readily removed and launched whether or<br>not the yacht is inverted.  | MoMu0,1,2                     |
| c)        | The end of each liferaft painter should be permanently made fast to a strong point on board the yacht.   | MoMu0,1,2                     |
| 4.20.4    | Liferaft Launching   | MoMu0,1,2                     |
| a)        | Each raft shall be capable of being got to the lifelines or launched within 15 seconds.  | MoMu0,1,2                     |
| <i>b)</i> | Each liferaft of more than 40kg weight should be stowed in such a way<br>that the liferaft can be dragged or slid into the sea without significant<br>lifting  | МоМи0,1,2                     |
| 4.20.5    | Liferaft Servicing and Inspection  | MoMu0,1,2                     |
|           | <i>IMPORTANT NOTICE Recent evidence has shown that packaged liferafts</i><br><i>are vulnerable to serious damage when dropped (e.g. from a boat onto a</i><br><i>marina pontoon) or when subjected to the weight of a crew member or</i><br><i>heavy object (e.g. an anchor). Damage can be caused internally by the</i><br><i>weight of the heavy steel CO2 bottle abrading or splitting neighbouring</i><br><i>layers of buoyancy tube material. ISAF has instituted an investigation into</i><br><i>this effect and as an interim measure requires that every valise-packed</i><br><i>liferaft shall have an annual certificate of servicing. A liferaft should be</i><br><i>taken for servicing if there is any sign of damage or deterioration (including</i><br><i>on the underside of the pack). Persons in charge should insist on great</i><br><i>care in handling liferafts and apply the rules NO STEP and DO NOT DROP</i><br><i>UNLESS LAUNCHING INTO THE SEA.</i> | МоМи0,1,2                     |
| a)        | Certificates or copies, of servicing and/or inspection shall be kept on board<br>the yacht. Every SOLAS liferaft and every valise-packed liferaft shall have<br>a valid annual certificate of new or serviced status from the manufacturer<br>or his approved service station.   | MoMu0,1,2                     |
| b)        | A liferaft built to OSR Appendix A part I ("ORC") packed in a rigid container<br>or canister shall either be serviced annually or may, when the<br>manufacturer so specifies, be inspected annually (not necessarily<br>unpacked) provided the yacht has on board written confirmation from the<br>manufacturer's approved service station stating that the inspection was<br>satisfactory.  | MoMu0,1,2                     |
| 4.21.2    | Grab Bags to Accompany Liferafts   |                               |
| a)        | A yacht is recommended to have for each liferaft, a grab bag with the following minimum contents. A grab bag should have inherent flotation, at least $0.1 \text{ m}^2$ area of fluorescent orange colour on the outside, should be marked with the name of the vacht, and should have a larvard and slip.   | МоМи0,1,2                     |
| <i>b)</i> | marked with the name of the yacht, and should have a lanyard and clip.<br>Note: it is not intended to duplicate in a grab bag items required by other<br>OSRs to be on board the yacht - these recommendations cover only the<br>stowage of those items  | МоМи0,1,2                     |

4.21.3 Grab Bag Recommended Contents

| g)          | a watertight flashlight with spare batteries and bulb   | МоМи0,1,2              |
|-------------|---|------------------------|
| h)          | dry suits or thermal protective aids or survival bags   |                        |
| i)          | second sea anchor for the liferaft (not required if the liferaft has already a  | МоМи0,1,2              |
|             | spare sea anchor in its pack) (recommended standard ISO 17339) with   |                        |
| -1)         | swivel and >30m line diameter >9.5 mm   | Manuel 1 7             |
| j)<br>k)    | two safety tin openers (if appropriate)<br>first-aid kit including at least 2 tubes of sunscreen. All dressings should be | МоМи0,1,2<br>МоМи0,1,2 |
| K)          | capable of being effectively used in wet conditions. The first-aid kit should be  | MOMU0,1,2              |
|             | be clearly marked and re-sealable.  |                        |
| 1)          | signalling mirror   | МоМи0,1,2              |
| <i>m</i> )  | high-energy food (min 10 000kJ per person recommended for Cat Zero)   | МоМи0,1,2              |
| n)          | nylon string, polythene bags, seasickness tablets (min 6 per person   | МоМи0,1,2              |
| ,           | recommended)  |                        |

|          | in accordance with ISO 12401. Any equivalent lifejacket shall have equal                  |             |
|          | requirements.   |             |
|          | Persons of larger than average build are generally more buoyant than                      |             |
|          | those of average build and so do not require a lifejacket with greater levels             |             |
|          | of flotation. Wearing a Level 275 lifejacket may hamper entry into liferafts.             |             |
| b)       | fitted with either a crotch strap(s) / thigh straps or a full safety harness in           | **          |
| D)       |   |             |
|          | accordance with ISO 12401,  |             |
|          | Note: The function of lifejacket crotch/thigh straps is to hold the buoyancy              |             |
|          | element down. A crew member before a race should adjust a lifejacket to                   |             |
|          | fit then retain that lifejacket for the duration of the race. Correct                     |             |
|          | adjustment is fundamental to the lifejacket functioning correctly.                        |             |
| c)       | fitted with a lifejacket light in accordance with SOLAS LSA code 2.2.3                    | **          |
| ,        | (white, >0.75 candelas, >8 hours),  |             |
| d)       | if inflatable have a compressed gas inflation system,                                     | **          |
| e)       | if inflatable, regularly checked for gas retention,                                       | **          |
| c)<br>f) | compatible with the wearer's safety harness,  | **          |
|          |   | **          |
| g)       | clearly marked with the yacht's or wearer's name,   |             |
| h)       | fitted with a splashguard / sprayhood in accordance with ISO 12402 – 8,                   | MoMu0       |
| i)       | Fitted with a PLB unit (as with other types of EPIRB, should be properly                  | MoMu0       |
|          | registered with the appropriate authority)  |             |
| 5.01.2   | For every gas inflatable lifejacket a spare cylinder and if appropriate a                 | MoMu0       |
|          | spare activation head shall be carried.   |             |
| 5.01.3   | Each yacht shall carry a spare lifejacket or lifejacket(s) as required in OSR             | MoMu0       |
| 0.010    | 5.01.1 sufficient for at least 10% of the total number of persons on board                |             |
|          | (minimum one spare lifejacket). At least one of the required spare                        |             |
|          |   |             |
|          | lifejacket(s) shall be a semi - automatic for use in man overboard recovery.              | **          |
| 5.01.4   | The person in charge shall personally check each lifejacket at least once                 | ት<br>ት      |
|          | annually.   |             |
| 5.02     | Safety Harness and Safety Lines (Tethers)   | MoMu0,1,2,3 |
| 5.02.1   | Each crew member shall have a harness and safety line that complies with                  | MoMu0,1,2,3 |
|          | ISO 12401 or equivalent with a safety line not more than 2m in length.                    |             |
|          | Harnesses and safety lines manufactured prior to Jan 2010 shall comply                    |             |
|          | with either ISO 12401 or EN 1095.   |             |
|          | Harnesses and safety lines manufactured prior to Jan 2001 are not                         |             |
|          |   |             |

|                 | permitted.   |                       |
|-----------------|--|-----------------------|
| a)              | Warning it is possible for a plain snaphook to disengage from a U<br>bolt if the hook is rotated under load at right-angles to the axis of<br>the U-bolt. For this reason the use of snaphooks with positive<br>locking devices is strongly recommended.   | MoMu0,1,2,3           |
| 5.02.2          | At least 30% of the crew shall each, in addition to the above be provided with either:-  | MoMu0,1,2,3           |
| a)              | a safety line not more than 1m long, or  | MoMu0,1,2,3           |
| b)              | a mid-point snaphook on a 2m safety line   | MoMu0,1,2,3           |
| c)              | Each yacht shall carry spare harness and safety line units as required in OSR 5.02.1 above sufficient for at least 10% of the total number of persons on board (minimum one unit).   | Mo0                   |
| 5.02.3          | A safety line purchased in January 2001 or later shall have a coloured flag<br>embedded in the stitching, to indicate an overload. A line which has been<br>overloaded shall be replaced as a matter of urgency.   | MoMu0,1,2,3           |
| 5.02.4          | A crew member's lifejacket and harness shall be compatible   | MoMu0,1,2,3           |
| 5.02.5          | It is strongly recommended that:-  | МоМи0,1,2,3           |
| a)              | static safety lines should be securely fastened at work stations;  | ΜοΜυθ,1,2,3           |
| <i>b</i> )      | A harness should be fitted with a crotch strap or thigh straps.  | МоМи0,1,2,3           |
| с)              | to draw attention to wear and damage, stitching on harness and safety<br>lines should be of a colour contrasting strongly with the surrounding<br>material;  | МоМи0,1,2,3           |
| d)              | snaphooks should be of a type which will not self-release from a U-bolt<br>(see OSR 5.02.1(a)) and which can be easily released under load (crew<br>members are reminded that a personal knife may free them from a safety<br>line in emergency);  | МоМи0,1,2,3           |
| <i>e)</i>       | a crew member before a race should adjust a harness to fit then retain that<br>harness for the duration of the race.   | MoMu0,1,2,3           |
| 5.02.6          | Warning - a safety line and safety harness are not designed to tow a<br>person in the water and it is important that the shortest safety line length<br>possible be used with a harness to minimise or eliminate the risk of a<br>person's torso becoming immersed in water outside the boat, especially<br>when working on the foredeck. 1m safety lines or the midpoint snaphook<br>on a 2m line should be used for this purpose. The diligent use of a<br>properly adjusted safety harness and the shortest safety line practicable is<br>regarded as by far the most effective way of preventing man overboard<br>incidents. | **                    |
| 5.03            | Personal Location Lights   | MoMu0                 |
| a)              | two packs of miniflares or two personal location lights (either SOLAS or<br>strobe) shall be provided for each crew member: one should be attached<br>to, or carried on, the person when on deck at night.   | MoMu0                 |
| 5.04            | Foul Weather Suits   |                       |
| a)<br><i>b)</i> | a foul weather suit with hood shall be supplied to each crew member .<br><i>it is recommended that a foul weather suit should be fitted with marine-</i><br><i>grade retro-reflective material, and should have high-visibility colours on its</i><br><i>upper parts and sleeve cuffs.See OSR 4.18</i>   | MoMu0<br>**           |
|                 |  | MaMuQ                 |
| 5.05            | Knife<br>A knife, one shall be supplied to each crew member to be worn on the  | <b>MoMu0</b><br>MoMu0 |
| 5.06            | person at all times<br>Watertight flashlight   | MoMu0                 |
|                 | A buoyant watertight flashlight, one shall be supplied to each crew member.  | MoMu0                 |
| 5.07            | Survival Equipment   | MoMu0                 |
| 5.07.1          | One set of Survival Equipment shall be supplied to each crew member to include:-   | MoMu0                 |
| a)              | an immersion suit (attention is drawn to EN ISO 15027-1 constant wear suits, and EN ISO 15027-2 abandonment suits and the LSA Code Chapter II, 2,3);   | MoMu0                 |

| b)  | a PLB (Personal Locator Beacon) equipped with 406MHz and 121.5Mhz;   | MoMu0   |
|---|--|---|
| c)  | a personal unit in addition to the PLB in OSR 4.07.1(b) if the location  | MoMu0   |
|   | device carried by the yacht in accordance with OSR 3.29.1(h) requires it;  |   |
| d)  | Attention is drawn to the value of keeping on the person a combined  | МоМи0,1,2   |
|   | 406MHz/121.5MHz PLB when on deck: this may aid location in a man   |   |
|   | overboard incident independent of the equipment carried by the parent vessel   |   |
| e)  | Where possible every PLB shall be registered with the appropriate authority  | MoMu0,1,2   |
|   | associated with the country code in the hexadecimal identification (15 Hex   |   |
|   | ID) of the beacon. A beacon can be registered online with the Cospas-  |   |
|   | Sarsat IBRD if the country does not provide a registration facility and the country has allowed direct registration in the IBRD.   |   |
| 5.08  | Diving Equipment   |   |
| 5.08.1  | A yacht shall carry at least two diving suits each to cover the entire body  | MoMu0   |
|   | and including gloves, fins and portable air supplies.  |   |
|   |  |   |
|   | ION 6 - TRAINING   |   |
| 6.01  | At least 30% but not fewer than two members of a crew,   | MoMu1,2   |
|   | including the skipper shall have undertaken training within the  |   |
|   | five years before the start of the race in both 6.02 topics for theoretical sessions, and 6.03 topics which include practical,   |   |
|   | hands-on sessions.   |   |
| 6.01.2  | Every member of a crew including the skipper shall have undertaken   | MoMu0   |
|   | training as in OSR 6.01  |   |
| 6.01.4  | Except as otherwise provided in the Notice of Race, an in-date certificate   | MoMu0,1,2   |
|   | gained at an ISAF Approved Offshore Personal Survival Training course<br>shall be accepted by a race organizing authority as evidence of compliance  |   |
|   | with Special Regulation 6.01. See Appendix G - Model Training Course, for  |   |
|   | further details.   |   |

## 6.06 Diving Training

6.06.1 At least 30% of the crew shall have received appropriate diving training to enable them to carry out basic repairs underwater and to provide assistance if necessary in recovery of a man overboard

## **APPENDICES TO SPECIAL REGULATIONS**

- Appendix A Minimum Specification for Yachtsmens Liferafts
- Appendix B A guide to ISO and other Standards
- Appendix C Standard Inspection Card
- Appendix D Quickstop & Lifesling
- Appendix E Hypothermia
- Appendix F Drogues and sea anchors
- Appendix G Model Training Course
- Appendix H ISAF Code for the organisation of Oceanic Races
- Appendix M Hull Construction Standards (Scantlings)
- Appendix N Model First Aid Training Course

# **APPENDIX M - Hull Construction Standards (Scantlings)**

## (Monohulls pre-2010 and Multihulls)

|        | nuns pre-zoito anu multinuns)  |  |               |
|--------|--|--|---------------|
