

Acquia Cloud Site Factory

Digital Experiences as a Service

Today's marketplace couldn't be more competitive. Staying ahead of the competition means being able to respond to a changing market instantly. Launching a marketing campaign, a new brand, or even a new family of brands can mean the difference between success...or trailing the pack. Acquia Cloud Site Factory offers a turnkey solution for deploying one site—or hundreds of sites—quickly and inexpensively, and with rich content. Acquia manages the technology so that you can manage the content. Build sites rapidly with simple point-and-click configuration with Acquia Cloud Site Factory.

Websites Without Boundaries

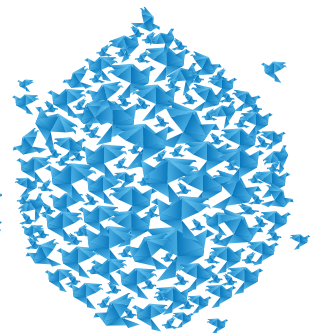

Acquia Cloud Site Factory lets site builders create content-rich web experiences with extraordinary designs, social capabilities, and support for video, image, and audio.

- Acquia Cloud Site Factory dramatically accelerates the website creation process, enabling organizations to build content-rich websites faster than ever before.
- **Websites in an instant**—Deploy a new site, or duplicate an existing site, with a single click. Launch sites fast with no hassles.
- **Powerful Drupal CMS capabilities**—Create dynamic content mashups, photo and video galleries, custom content, forms and surveys, and social web experiences.
- **Powerful, WYSIWYG design tools**—Simple point-and-click tools to style page elements and design themes, as well as advanced CSS tools including complete history of CSS changes.
- **Social login and sharing**—Log-in to sites with ID's from Facebook, Twitter, Google+, and twenty other social and business networks. Publish and share content easily across social networks.
- **Rich media support**—Embed video, images, RSS items, and article previews from more than 200 sources, simply by pasting a URL.
- **Advanced custom roles and permissions**—Define custom roles with content and field level access controls.
- **Custom Javascript libraries**—Quickly add Javascript libraries to extend site capabilities or connect with third-party applications and web services.

The Ultimate Enterprise Site Factory

- Deploy incredible web experiences faster and easier than ever before
- Reduce site management costs while improving operational efficiencies with OpenSaaS
- Control your destiny—create hundreds of websites with no fear of platform lock-in

DREAM IT. DRUPAL IT.

Enterprise Management Controls

Acquia Cloud Site Factory provides a centralized management dashboard to provide visibility and operational controls across a large collection of websites. Track key site statistics, manage user communities, and integrate with third-party systems.

Management dashboard—Quickly access and manage a large collection of websites, track individual site statistics and perform actions across sites from centralized management console.

- **Unified member management**—Manage roles and permissions for content contributors and site visitors from a dedicated, centralized repository. Roll out membership updates and changes quickly across many websites.
- **Web service support, API hooks**—Integrate third-party web analytics and reporting systems via web services integration with API hooks.
- **Feature-rich site templates**—Create new sites in a single click. Set brand guidelines, with information architecture, page layout, content types, navigation, roles, and permissions.

OpenSaaS Platform

Acquia Cloud Site Factory offers the best of both worlds. Organizations can accelerate new site deployment while reducing the cost of every website they operate. It offers the operational advantages of software-as-a-service (SaaS) with the freedom of open source to create websites without boundaries, and with no vendor lock-in.

- **No software to install, no servers to manage**—Acquia Cloud Site Factory is a fully-managed service so you never need to worry about the back-end, regardless of traffic volume.
- **No code to update**—We keep the service up-to-date at all times so your sites have the latest security updates and are taking advantage of the latest module versions, after rigorous QA review.
- **No need to manage multiple code bases**—Managing large Drupal multisite deployments can be very complex. Acquia Cloud Site Factory eliminates this burden on IT organizations, streamlining operations and reducing costs.
- **No lock-in**—Websites evolve, requirements change, and organizations need the freedom to manage their sites accordingly. OpenSaaS means that site owners can export their entire site—code, database, and designs—at any time, to add custom capabilities or integrate with external systems.
