Note 1: Certificate year runs from 1 January to 31 December in North countries and from 1 June to 31 May in the following year in South countries.

1

Note 2: 2012 boat numbers are from January to August in North countries and from June to August in South countries.

Including both trial and amended certificates for these boats, the total number of certificates issued is significantly larger. Certificates are issued only to boats which re-apply each year.

The total number of IRC certificated boats at the end of 2012 was 6614 with 27 countries having fleets of 25 boats or more on 6 continents, thus continuing to satisfy the requirements of ISAF Regulation 12.2(e)(i). At the end of August 2013, 21 countries had fleets of 25 boats or more with the likelihood of at least a further 6 by the end of the year.

During 2013, the effects of the global economic situation have continued to be noticeable with a significant decline in the number of boats rated. Within this, it is apparent that the number of new boats is again significantly lower than historically.

While the world economic situation is clearly having an effect, we now consider that fundamental changes in both society and the sport of sailing are having an influence on the number of rated boats. Primary among these issues is a general shortage of crew, including younger crew members. Initiatives undertaken during 2013 include seminars at clubs and an experiment in GBR with 'Limited Validity IRC TCCs', ie ratings valid for a single event only.

We are however slightly encouraged by the growth during 2012 in generally newer IRC countries, CHN, JPN and URU. Very recently, and not shown by the data above, there has been significant interest shown in Brazil.

IRC continues to be used at a growing number of events around the world including the four original classic ocean races, the Fastnet, Sydney to Hobart, Newport to Bermuda, and Middle Sea Races. IRC was also again used for the RORC Caribbean 600 Race in February 2011.

### 2. IRC Congress

The annual meeting of the IRC Congress was held in Paris, FRA on Saturday 12<sup>th</sup> and Sunday 13<sup>th</sup> October 2013. Representatives of 15 IRC National fleets (AUS, BEL, BUL, BRA, CAN, FRA, GBR, GER, HKG, IRL, JPN, MLT, TUR, UAE, USA) were present. A representative of the International Maxi Association was also present.

Written reports were received from 12 countries and verbal reports were received from those present.

A report from the IRC Technical Committee was received and discussed.

The Congress considered 8 submissions from the IRC Technical Committee and a further 7 submissions from IRC Rule Authorities and National IRC Owners' Associations.

A lengthy discussion on the future of IRC was held with a number of issues emerging.

Full details of all of the above are included in the IRC Congress Minutes available from <a href="https://www.ircrating.org">www.ircrating.org</a>.

#### 3. IRC Rules

Rule changes resulting from submissions to the IRC Congress will be sent to ISAF shortly as required by ISAF Regulation 12.2 (d). A synopsis is included as an Appendix to this report.

#### 4. Measurement

No international measurer seminars have been held during 2013.

4 applications for IRC IM were submitted for consideration in 2012 with all 4 applicants being appointed. One further application will be made in November this year. Discussions continue with the IM Sub-Committee towards establishing a few more IMs for IRC worldwide.

Based on our experiences to date, work has also continued in co-operation with others towards the continued development of the Equipment Rules of Sailing.

### 5. IRC Technical Committee

The Technical Committee has been working this year on an agenda including many different subjects. Many of these are detail issues and will only result in minor changes to IRC Rules and/or rating calculations. Much of this work has been conducted by E-Mail with a formal 2 day meeting in London in July and a further meeting in Paris, GBR, in October.

# **Appendix**

# **Changes to IRC Rules For 2014**

The following Rule changes come into effect on 1st January 2014 (1st June 2014 for South certification year).

- Rule 8.2.1 is amended to clarify that short handed boats may be included in the overall results of a race.
- Rule 9.6 is amended to clarify from what point a rating protest is applicable.
- New Rule 11.3 is added to permit Rule Authority prescriptions to amend Rule 21.1.6 (b).
- Following a change to the RRS, a new IRC definition of Stored Power is added and referenced in Rule 15.
- Rules 13.1, 22,1 and 22.2 have been re-written to be clearer and more logical without changes in meaning.
- Rule 21.1.6 (b) is amended such that any boat carrying permanently installed systems to adjust either the mast foot or the forestay will now be permitted to use those systems while racing and will receive a rating tax.
- Rule 21.3.5 is deleted as redundant and potentially misleading in that it is repeated in other rules using different wording.
- The definition of LP is amended to formally incorporate IRC Notice 01/2013 clarifying the measurement of LP for boats that may set more than one headsail simultaneously.
