SOLIMAR

Flush Deck Hatches

Many of the large prestigious boats 30 – 150' built around the world are fitted with Solimar flush hatches and fitting.

The main structure of the frame and 'lid' are made of Composite material so that after installation, the hatches become an integral part of the boat. The use of composite materials assures a resilient, lightweight and corrosion free product.

All the fittings used are of the highest quality stainless steel, mirror polished and anodized aluminium.

The hatches are CE approved and they can have other class approval if required.

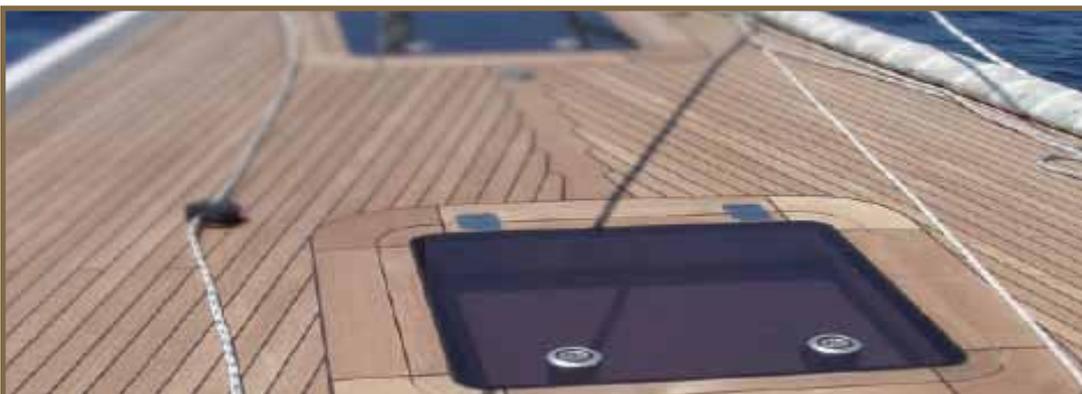

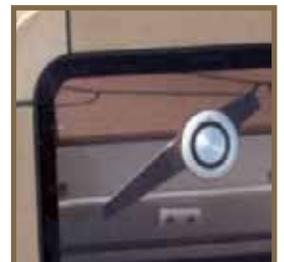

Due to RTM technology, the standard hatches are competitively priced and have a low profile.

The custom hatches are made of vacuum 'E' glass for carbon fibre epoxy lamination using CNC moulds. They are available flat or cambered, with options for hidden hinges, mosquito nets and blinds.

The various options manufactured are for teak or painted decks, solid or with Perspex glass.
