Option 1 - Buy eBooks within the 'RYA Books' App

Pros:

- Simple and instant

Cons:

- Limited to the 'platform' used to purchase
- No discounts

Option 2 – Buy eBooks in RYA webshop

www.rya.org.uk/shop

Pros:

- Access on any 3 devices on any platform
- Discounts available
- Sync notes and bookmarks across all platforms

Cons:

- Not quite as convenient as buying in app

Add the required book to your 'Basket' and then go to checkout. The email address you use in the shop will be used as your eBooks username and a password will be sent. Once you log-in to the RYA Books app with these details all eBooks purchases through the webshop will be available.

eBooks and other digital products

www.rya.org.uk/go/YM14

Connectivity – Into TV, Monitor or projector

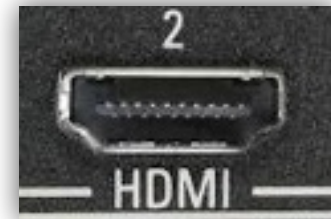

1. VGA

Connectivity – Into TV, Monitor or projector

2. HDMI

Connectivity – Into TV, Monitor or projector

3. Wireless

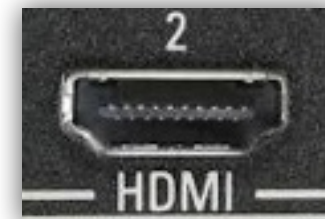

Connectivity- Devices

Apple (Mac/iPad/iPhone/iPod) devices have an apple display port of some kind. These are capable of exporting in both HDMI or VGA. Need to get the correct adapter for you projector. E.g. latest generation iPad/iPhone or iPod connecting to HDMI would be a Lightning to HDMI adapter, as 'lightening' is the current iOS device port. The cables that convert the Mac mini display ports to HDMI only produce video not video and audio.

Connectivity- Devices

Windows devices tends to be reasonably straight forward. They will have VGA or HDMI port that will look the same as the port on your device. Note: If your projector is VGA, you need to have VGA on your PC, HDMI on projector requires HDMI on PC. Quick note of caution. Your PC may have a mini HDMI port or possibly micro HDMI (particularly in small laptops).

Connectivity- Android, including Kindle Fire

**MHL cable
(Micro USB to HDMI cable)**

Apps

Apps tend to fall into two groups – apps for teaching and apps to make the instructors life easier (e.g. tidal data or planning apps).

Reviewed a few iOS apps

WindAlert – weather app that gives an impression of extreme accuracy, useful but be wary of perception of accuracy

Boatie – Good summary of Navigational data for planning purposes

Ubersence – coaching app that enables you to video and analyse 'skills'. Can compare to good examples of the same skill

SailSimXL – Sail setting simulator, which looks good but is unlikely to be better for the student than a good drawing or demo on a boat

Penultimate – a simple note app that can be used as a white board

Imray (particularly lights and shapes) – reference app

Chart apps such as Navionics – good for planning and a secondary form of monitoring. Can be useful to show track of passage during debrief

ShipFinderHD – AIS. Useful for getting the message cross about AIS, and perhaps for gaining MMSI numbers, but should not be seen as genuine AIS. It cannot be guaranteed to be accurate and there is a lag between the ships data and what you see. Require data connection

eBooks and other digital support for instructors

Have you got your ROM2 instructor slides?

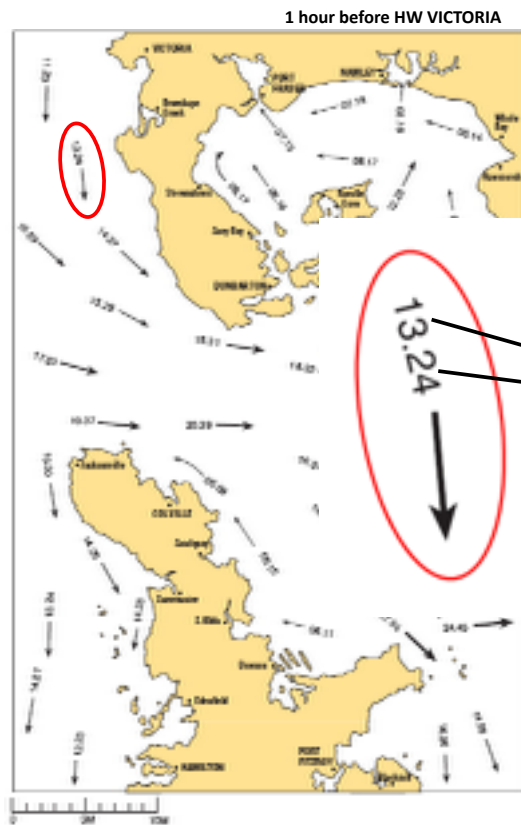

Not available online – phone our orders line 0844 556 9518

Rom 2 is a USB stick with over 400 slides cover the shore-based syllabi from Essential Navigation and Seamanship to Yachtmaster Offshore

1 hour before HW VICTORIA

What is the strength and direction of the tide off West Point one hour before HW Victoria?

spring rate 24 = 2.4kn

Example of how these can be used in instruction

You can get a local copy of a you tube video that you can use in presentation play without having internet access. Copy the weblink...
Paste it into the webpage on next slide

www.keepvid.com

The screenshot shows the KeepVid website interface. At the top, the logo 'KEEPVID' is displayed with the tagline 'download streaming videos'. Below the logo is a search bar containing the URL 'http://www.youtube.com/watch?v=K307yq01G0E' and a 'DOWNLOAD' button. A 'KEEPVID Bookmarklet' instruction is visible in the top right corner. The main content area features two large buttons: 'DOWNLOAD' and 'INSTALL'. Below these buttons, a video player area shows the video title 'Everybody' with a green checkmark and a 'Download Now' button. A list of download options is provided, including various resolutions and formats such as 344p, 240p, 144p, and 480p, as well as audio-only and subtitle options. At the bottom, a notification bar states 'The Everybody.mpd download has completed.' with buttons for 'Open', 'Open folder', and 'View downloads'. The Windows taskbar is visible at the very bottom of the screenshot.

Paste the link into this webpage and download mp4 file.
