Managed Services with acquia™ Cloud-Based Hosting

Acquia Hosting is a managed Drupal cloud service platform optimized for high traffic websites. Our fully managed Drupal infrastructure enables custom Drupal sites to perform well in response to a wide range of traffic conditions. Acquia Hosting includes database failover, traffic load balancing, page caching, automated monitoring, SVN access, memcache, and more out-of-the box. Together with Acquia Network Enterprise subscriptions, Acquia provides an enterprise-class Drupal application infrastructure for business critical sites.

Support & Remote Administration

With Acquia's Remote Administration, updates and maintenance of your Drupal server can be worry-free. Our Drupal support experts spearhead the task of maintaining your Drupal website and keep it up to date with the latest security updates and bug fixes. Let Acquia manage your website's maintenance details, enabling your scarce IT resources to stay focused on achieving your business goals - reducing costs at the same time.
