## Public Elementary-Secondary Education Finance Data

### Technical Documentation (2012)

The files described below contain financial information (revenue, expenditure, debt, and assets) for public elementary-secondary school systems collected as a part of the 2012 Census of Governments, authorized by law under Title 13, United States Code, Section 161.

### Data File Formats

Files containing all data items surveyed, data item flags, and summary variables displayed in the report tables are available in Excel and comma-delimited formats. Beginning with 2006, files in SAS format are no longer available. However, please use the following code to read the comma-delimited files into SAS.

Note: This code uses the 'elsec12.txt' file as an example. You may change the library and file storage paths, as needed.

```
libname elsec12 'C:\temp';

proc import datafile='C:\temp\elsec12.txt'
    out=elsec12.elsec12
    dbms=dlm
    replace;
    delimiter=';';
    getnames=yes;
run;
```

The files may be downloaded from the Census Bureau's website under [Public Elementary-Secondary Education Finance Data](#).

**State-level Tables.** Users may download the state totals data presented in tables 1 through 14, and tables 19 and 20 in the Public Education Finances report. Data are available in an Excel spreadsheet that contains a tab for each table.

<b><u>File Type</u></b>	<b><u>File Name</u></b>
Excel	elsec12_sttables.xls

**Individual Unit Tables.** These files contain data for all units for the variables presented in tables 15 through 18 of the Public Education Finances report. Files in Excel and comma-delimited formats are available.

<b><u>File Type</u></b>	<b><u>File Name</u></b>
Excel	elsec12t.xls
Comma-delimited	elsec12t.txt

**All Data Items.** These files contain data for non-exhibit items on the F-33 survey form, as well as unit identifiers, descriptive variables, and summary data items. An Excel spreadsheet and a comma-delimited text file are available for download. Each file contains data for all school systems.

The comma-delimited file allows users to import data into a database application. When importing the comma-delimited file into a database, data users should specify the format of the following fields as 'text' (rather than 'general' or 'numeric'): STATE, IDCENSUS, CONUM, CSA, CBSA, SCHLEV, NCESID, and YRDATA. The file names are as follows:

<b><u>File Type</u></b>	<b><u>File Name</u></b>
Excel	elsec12.xls
Comma-delimited	elsec12.txt

**Data Item Flags.** Beginning with FY 1999, the F-33 school system finance files include data item flags to indicate whether a data item was reported by the state education agency or adjusted by the Census Bureau. The data item flag files are presented in the same formats - Excel and comma-delimited - as the data item files described above. There are no flags for the summary data items, such as TOTALREV and TOTALEXP.

<b><u>File Type</u></b>	<b><u>File Name</u></b>
Excel	elsec12f.xls
Comma-delimited	elsec12f.txt

## Record Layouts and Item Descriptions

All data items are presented in the order in which they appear on the files. An asterisk (\*) next to an item indicates an alphanumeric character string; all other items are numeric. All amounts, except for fall membership and personal income, are expressed in thousands of dollars. Fall membership data are presented in whole amounts. Personal income totals are expressed in millions of dollars.

## **Additional Information on Data Items**

### **Census Bureau unit identification code (IDCENSUS)**

Identification Number (IDCENSUS field) Schema and Type of Government Code:

The first 2 characters of the IDCENSUS field stand for the state code. The 3rd character represents the "type of government" code, described below. Characters 4 through 6 represent the county code. Characters 7 through 14 uniquely identify the government unit. For an independent school system, this government unit is the system itself. For dependent school systems, characters 1 through 9 of the IDCENSUS field match that of the parent government on which the system is dependent. Characters 10 through 14 uniquely identify the dependent school system where more than one system is dependent on the parent government.

<b><u>Description (3rd Character)</u></b>	<b><u>Value</u></b>
State Dependent School System	0
County Dependent School System	1
City Dependent School System	2
Township Dependent School System	3
Independent School System	5

### **NCESID**

In addition to the Census Bureau identifier (IDCENSUS) these files contain the unit identification code used by the National Center for Education Statistics (NCES).

### **School Level Codes (SCHLEV)**

- Elementary School System Only: a public school system that typically serves grades pre-kindergarten through 8.

- Secondary School System Only: a public school system that typically serves grades 7 through 12.
- Elementary/Secondary School System: a public school system that serves grades pre-kindergarten through 12.
- Vocational Education: a locally operated public school system that provides education and training in one or more semiskilled or technical operations.
- Special Education: a locally operated public school system that focuses primarily on special education.
- Nonoperating School System: a system that only exists to collect tax revenue that it then transfers to other school systems that actually provide the education services.
- Educational Service Agency: a dependent agency of the school system or systems that it serves. It typically provides regional special education programs, vocational education programs, or administrative assistance.

<b><u>Description</u></b>	<b><u>Value</u></b>
Elementary School System Only	01
Secondary School System Only	02
Elementary-Secondary School System	03
Vocational or Special Education School System	05
Nonoperating School System	06
Educational Service Agency	07

### **ANSI and Statistical Area codes**

Three codes allow data users to identify units with specific geographic areas. The codes included are:

<b><u>Code</u></b>	<b><u>Description</u></b>
CONUM	American National Standards Institute (ANSI) state code and county number (5-digit)
CSA	Consolidated Statistical Area Code (3-digit)
CBSA	Core-Based Statistical Area Code (5-digit)

Information on the ANSI state and county codes is available at <http://www.census.gov/geo/reference/ansi.html>.

The Core-Based Statistical Area Code (CBSA) indicates that an agency is associated with a recognized population nucleus and adjacent communities that have a high degree of integration with that nucleus, designated by the U.S. Government as a metropolitan or micropolitan statistical area. The Consolidated Statistical Area code (CSA) indicates whether a school district's location is associated with a combined statistical area. A CSA may comprise two or more metropolitan or micropolitan statistical areas.

## **Data Item Flags**

For each data item shown on the F-33 survey form there is a companion flag. These flag variables are identified by the name of the data item preceded by an "FL\_"; e.g. FL\_T06, FL\_E13. The guide to these flags is displayed below:

<b><u>Flag</u></b>	<b><u>Description</u></b>
R	As reported by the state
A	Adjustment made by analyst
I	Imputed value
M	Missing value
N	Not applicable - A value was not expected. (For example, a dependent school system would report no taxes. An independent school district would report no parent government contributions.)

## **Per Pupil Expenditure Amounts**

The per pupil expenditure amounts included in the state totals and individual unit files from the published report are derived from current spending totals and the fall membership data. Per pupil expenditure does not include spending for nonelementary-secondary programs (community service, adult education), or spending by a school system for students not included in its fall membership counts.
