Welcome to The Green Blue!

The Green Blue is the joint environment programme created by the [British Marine Federation](#) and [Royal Yachting Association](#) for anyone who enjoys getting out on the water or whose livelihood depends on it. We help boat users, boating businesses, sailing clubs and training centres to reduce their impact on coastal and inland waters.

We offer practical advice, help, guidance and even money saving tips for anyone who wishes to help keep our coasts and inland waters the pleasant places that we so enjoy.

What do we do?

The Green Blue raises awareness, conducts scientific research, identifies environmentally friendly products and offers easy best practice advice to anyone keen to make boating in the UK as sustainable as possible.
