Overview

American FactFinder provides website developers the ability to create URLs that Deep Link to the following:

- FactFinder Tables
- A set of FactFinder Search Results
- A Community Facts page with a selected subject and geography
- A FactFinder Reference Map centered on a specific geographic entity
- The FactFinder Geography Overlays (List, Name, Address, or Map tabs)

The easiest way to create a deep link is to use the bookmark function from a table, map, or a Community Facts page in American FactFinder.

Representative values for the parameters needed to build deep links are described at the end of this document.

NOTE: All parameter values must be URL encoded. The browser automatically does this upon a form submission. However, when adding a link manually to a web page, you should encode the special characters (delimiters) yourself, as in the table below.

For readability, example URLs shown in this document show unencoded characters (e.g., “:” rather than “%3A”).

Special Character	Description	URL Encoded Value
#	hash	%23
\$	dollar sign	%24
%	percent sign	%25
+	plus sign	%2B
-	minus sign	%2D
.	period	%2E
/	slash	%2F
:	colon	%3A
;	semi-colon	%3B
	pipe	%7C

Create a Deep Link Using a Bookmark

The easiest way to create a deep link to a table in American FactFinder is to create a bookmark to the table, then copy that URL for use as a deep link. The following example creates a deep link to the ACS Subject Table S1901 (Income in the Past 12 Months) from the 2011 ACS 1-Year Estimates.

- 1) From the American FactFinder Advanced Search Page, enter “2011 S1901” and “Cincinnati, Ohio” into the Advanced Search text boxes. Click ‘GO’.

The screenshot shows the American FactFinder Advanced Search interface. At the top, there is a navigation bar with tabs for MAIN, COMMUNITY FACTS, GUIDED SEARCH, ADVANCED SEARCH (highlighted), and DOWNLOAD OPTIONS. Below the navigation bar, a search instruction reads: "Search - Use the options on the left (topics, geographies, ...) to narrow your search results". On the left side, there is a "Your Selections" box that says "'Your Selections' is empty". Below that, a section titled "Search using the options below:" includes a "Topics" dropdown menu with the text "(age, income, year, dataset, ...)". The main search area contains the instruction: "To search for tables and other files in American FactFinder:". A numbered box "1" points to the search input area. This area has two text boxes: the first is labeled "topic or table name" and contains "2011 S1901"; the second is labeled "state, county or place (optional)" and contains "Cincinnati city, Ohio". To the right of these boxes is a "GO" button and a help icon. Below the text boxes are radio buttons for "topics" (selected), "race/ancestry", "industries", and "occupations".

2) Click the search result for "S1901 - Income in the past 12 months..." from the 2011 ACS 1-year estimates.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

	Households		Families		Married-couple families		Nonfamily households	
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error

Geographic Identifiers

Use the About icons () on the Geography Overlay in American FactFinder to find Geographic Identifiers, or create a bookmark in American FactFinder after selecting a table and the geography(ies) you are interested in and examine the bookmark link. Geographic Identifiers used in FactFinder are constructed as follows:

0100000US	- United States
0100001US	- United States - Urban
0400000US39	- Ohio
0500000US39023	- Clark County, Ohio
1600000US3974118	- Springfield City, Ohio
5000600US0602	- Congressional District 2 (106th Congress), California

The diagram below illustrates the structure of the geographic identifiers. Brackets connect the following labels to their corresponding parts in the identifiers above:

- Geographic summary level: 0100000 (from 0100000US)
- Geographic variant (Congressional District vintage): 0602 (from 5000600US0602)
- Geographic component: 39 (from 0400000US39)
- FIPS code(s) or other geographic codes (varies with summary level): 39023 (from 0500000US39023)

The format for identifiers for a group of geographies is:

parent-geo-id.target-geographic-summary-level-code00 [P] [. variant]

Where:

parent-geo-id

Described in the section above

target-geographic-summary-level-code

The 3-digit summary level code

P

Optional 'P' indicates that target geographies are fully or partially contained in the parent geography

variant

Indicates the vintage or variant for geographies such as Congressional Districts. For example, for All Congressional Districts for the 110th Congress would be indicated by "<parent-geo-id>.50000.110"

Examples:

All States within United States: **0100000US.04000**

All Counties within Florida: **0400000US12.05000**

All Places fully within/partially within Brevard County, Florida: **0500000US12009.16000P**

All Congressional Districts (113th Congress) within Florida: **0400000US12.50000.113**

All Census Tracts (or parts) within Merritt Island CCD, Brevard County, Florida: **0600000US1200992132.08000**
