# ISAF OFFSHORE SPECIAL REGULATIONS

JANUARY 2014 - DECEMBER 2015 (Incorporating Amendments Effective 1<sup>st</sup> January 2015) www.sailing.org/specialregs

### **Extract for Race Category 1 Multihulls**

© ORC Ltd. 2002, all amendments from 2003 © International Sailing Federation, (IOM) Ltd. **Version 2 - 2015** 

# Because this is an extract not all paragraph numbers will be present

# Copyright

When reprinting these regulations National Authorities and Race Organizers should:-

- request copyright permission from ISAF and ORC Ltd (normally given free of charge)
- display a copyright acknowledgement with the reprint (similar to © ORC Ltd. 2002, all amendments from 2003 © International sailing Federation, (IOM) Ltd.)
- make any amendments by deleting contrary provisions and indicating that changes have been made
- supply a copy of the reprint to each of ISAF and ORC Ltd

Official interpretations shall take precedence over these Special Regulations and will be indexed, numbered, dated and displayed on the ISAF web site www.sailing.org/specialregs

# **Language & Abbreviations Used**

Mo - Monohull

Mu - Multihull

" \*\* " means the item applies to all types of yacht in all Categories except 5 for which see Appendix J or 6 for which see Appendix L.

RED TYPE indicates a significant changes in 2015

Guidance notes and recommendations are in italics

The use of the masculine gender shall be taken to mean either gender

#### Administration

The Offshore Special Regulation are administered by the ISAF Special Regulation Sub-Committee whose terms of reference are as follows: (www.sailing.org/regulations)

ISAF Regulation 6.8.8.3 - The Special Regulations Sub-Committee shall: (a) be responsible for the maintenance, revision and changes to the ISAF Offshore Special Regulations governing offshore racing, under licence from ORC Ltd. Such changes shall be biennial with revised editions published in January of each even year, except that matters of an urgent nature affecting safety may be dealt with by changes to the Regulations on a shorter time scale;

(b) monitor developments in offshore racing relative to the standards of safety and seaworthiness.

Any queries please E-Mail: technical@isaf.co.uk

## **SECTION 1 - FUNDAMENTAL AND DEFINITIONS**

#### 1.01 Purpose and Use

1.01.1 It is the purpose of these Special Regulations to establish uniform minimum equipment, accommodation and training standards for monohull and multihull yachts racing offshore. A Proa is excluded from these

\*\*

regulations.

- 1.01.2 These Special Regulations do not replace, but rather supplement, the requirements of governmental authority, the Racing Rules and the rules of Class Associations and Rating Systems. The attention of persons in charge is called to restrictions in the Rules on the location and movement of equipment.
- \*\* 1.01.3 These Special Regulations, adopted internationally, are strongly recommended for use by all organizers of offshore races. Race Committees may select the category deemed most suitable for the type of race to be sailed.

#### **Responsibility of Person in Charge** 1.02

- The safety of a yacht and her crew is the sole and inescapable 1.02.1 responsibility of the person in charge who must do his best to ensure that the yacht is fully found, thoroughly seaworthy and manned by an experienced crew who have undergone appropriate training and are physically fit to face bad weather. He must be satisfied as to the soundness of hull, spars, rigging, sails and all gear. He must ensure that all safety equipment is properly maintained and stowed and that the crew know where it is kept and how it is to be used. He shall also nominate a person to take over the responsibilities of the Person in Charge in the event of his incapacitation.
- Neither the establishment of these Special Regulations, their use by race 1.02.2 organizers, nor the inspection of a yacht under these Special Regulations in any way limits or reduces the complete and unlimited responsibility of the person in charge.
- Decision to race -The responsibility for a yacht's decision to 1.02.3 participate in a race or to continue racing is hers alone - RRS **Fundamental Rule 4.**

#### 1.03 **Definitions, Abbreviations, Word Usage**

1.03.1 Definitions of Terms used in this document

IABLE	<u> </u>
ΔαΔ	Dat

I ADLE I	
Age Date	Month/year of first launch
AIS	Automatic Identification Systems
CEN	Comité Européen de Normalisation
CPR	Cardio-Pulmonary Resuscitation
Coaming	Includes the transverse after limit of the cockpit over which water
	would run in the event that when the yacht is floating level the
	cockpit is flooded or filled to overflowing.
DSC	Digital Selective Calling
EN	European Norm
EPFS	Electronic Position-Fixing System
EPIRB	Emergency Position-Indicating Radio Beacon
FA Station	The transverse station at which the upper corner of the transom
	meets the sheerline.
Foul-Weather	A foul weather suit is clothing designed to keep the wearer dry and
Suit	maybe either a jacket and trousers worn together, or a single
	garment comprising jacket and trousers.
GMDSS	Global Maritime Distress & Safety System
GNSS	Global Navigation Satellite System
GPIRB	EPIRB, with integral GPS position-fixing
ITU	International Telecommunications Union
GPS	Global Positioning System
Hatch	The term hatch includes the entire hatch assembly and also the lid
	or cover as part of that assembly (the part itself may be described
	as a hatch).
INMARSAT	This is Inmarsat Global Limited, the private company that provides
	GMDSS satellite distress and safety communications, plus general

\*\*

\*\*

\*\*

\*\*

	communications via voice, fax and data
IMO	International Maritime Organisation
IMSO	The International Mobile Satellite Organisation, the independent,
	intergovernmental organisation that oversees Inmarsat's
	performance of its Public Service Obligations for the GMDSS and
	reports on these to IMO
ISAF	International Sailing Federation.
ISO	International Standard or International Organization for
	Standardization.
Lifeline	Rope or wire line rigged as guardrail / guardline around the deck
LOA	Length overall not including pulpits, bowsprits, boomkins etc.
LWL	(Length of) loaded waterline
Monohull	Yacht in which the hull depth in any section does not decrease
	towards the centre-line.
Moveable	Lead or other material including water which has no practical
Ballast	function in the boat other than to increase weight and/or to
	influence stability and/or trim and which may be moved
	transversely but not varied in weight while a boat is racing.
ORC	Offshore Racing Congress (formerly Offshore Racing Council)
OSR	Offshore Special Regulation(s)
Permanently	Means the item is effectively built-in by e.g. bolting, welding,
Installed	glassing etc. and may not be removed for or during racing.
PLB	Personal Locator Beacon
Proa	Asymmetric Catamaran
RRS	ISAF - Racing Rules of Sailing
SAR	Search and Rescue
SART	Search and Rescue Transponder
Series Date	Month & Year of first launch of the first yacht of the production
	series
SOLAS	Safety of Life at Sea Convention
Safety Line	A tether used to connect a safety harness to a strong point
Securely	Held strongly in place by a method (e.g. rope lashings, wing-nuts)
Fastened	which will safely retain the fastened object in severe conditions
	including a 180 degree capsize and allows for the item to be
	removed and replaced during racing
Static Ballast	Lead or other material including water which has no practical
	function in the boat other than to increase weight and/or to
	influence stability and/or trim and which may not be moved or
0 6 6 :	varied in weight while a boat is racing.
Static Safety	A safety line (usually shorter than a safety line carried with a
Line	harness) kept clipped on at a work-station
Variable	Water carried for the sole purpose of influencing stability and/or
Ballast	trim and which may be varied in weight and/or moved while a boat
	is racing.

- The words "shall" and "must" are mandatory, and "should" and "may" are \*\* 1.03.2 permissive.
- \*\* 1.03.3 The word "yacht" shall be taken as fully interchangeable with the word "boat".

# **SECTION 2 - APPLICATION & GENERAL REQUIREMENTS**

2.01 **Categories of Events** 

In many types of race, ranging from trans-oceanic sailed under adverse conditions to short-course day races sailed in protected waters, seven categories are established, to provide for differences in the minimum standards of safety and accommodation required for such varying circumstances:

# 2.01.2 Category 1

Races of long distance and well offshore, where yachts must be completely self-sufficient for extended periods of time, capable of

	withstanding heavy storms and prepared to meet serious emergencies	
	without the expectation of outside assistance.	
2.02	Inspection	
2.02	A yacht may be inspected at any time. If she does not comply with these Special Regulations her entry may be rejected, or she will be liable to disqualification or such other penalty as may be prescribed by the national authority or the race organizers.	**
2.03	General Requirements	
2.03.1	All equipment required by Special Regulations shall:-	alada.
a)	function properly	**
b)	be regularly checked, cleaned and serviced	**
c)	when not in use be stowed in conditions in which deterioration is minimised	**
d)	be readily accessible	**
e)	be of a type, size and capacity suitable and adequate for the intended use and size of the yacht.	**
2.03.2	Heavy items:	
a)	ballast, ballast tanks and associated equipment shall be permanently installed	**
b)	heavy movable items including e.g. batteries, stoves, gas bottles, tanks, toolboxes and anchors and chain shall be securely fastened	**
c)	heavy items for which fixing is not specified in Special Regulations shall be permanently installed or securely fastened, as appropriate	**
2.03.3	When to show navigation lights	**
a)	navigation lights (OSR 3.27) shall be shown as required by the	**
•	International Regulations for Preventing Collision at Sea, (Part C and	
	Technical Annex 1). All yachts shall exhibit sidelights and a sternlight at	
	the required times.	
<b>SECTIO</b>	N 3 - STRUCTURAL FEATURES, STABILITY, FIXED EQUIPMENT	
3.01	Strength of Build, Ballast and Rig	
	Yachts shall be strongly built, watertight and, particularly with regard to	**
	hulls, decks and cabin trunks capable of withstanding solid water and	
	knockdowns. They must be properly rigged and ballasted, be fully	
	seaworthy and must meet the standards set forth herein. Shrouds shall	
	never be disconnected.	
3.02	Watertight Integrity of a Hull	
3.02.1	A hull, including, deck, coach roof, windows, hatches and all other parts,	**
	shall form an integral, essentially watertight unit and any openings in it	
	shall be capable of being immediately secured to maintain this integrity.	
3.02.2	Centreboard and daggerboard trunks and the like shall not open into the	**
	interior of a hull except via a watertight inspection/maintenance hatch of	
	which the opening shall be entirely above the waterline of the yacht	
	floating level in normal trim.	
3.02.3	A canting keel pivot shall be completely contained within a watertight	**
	enclosure which shall comply with OSR 3.02.2. Access points in the	
	watertight enclosure for control and actuation systems or any other	
	purpose shall comply with OSR 3.02.1.	
3.02.4	Moveable ballast systems shall be fitted with a manual control and	**
	actuation secondary system which shall be capable of controlling the full	
	sailing load of the keel in the event of failure of the primary system. Such	
	failures would include electrical and hydraulic failure and mechanical	
	failure of the components and the structure to which it mounts. The	
	system must be capable of being operational quickly and shall be	
	operable at any angle of heel. It would be desirable if this system was	
	capable of securing the keel on the centreline.	
3.03	Hull Construction Standards (Scantlings)	MoMu0,1,2
3.03.4	A multihull shall comply with appendix M to these OSR.	Extract Mo0,1,2
3.05	Stability and Flotation - Multihulls	Mu0,1,2,3,4
	Attention is drawn to ISO 12217-2.	Mu0,1,2,3,4
	· ····································	, _,_,,,

3.05.1	Adequate watertight bulkheads and compartments (which may include permanently installed flotation material) in each hull shall be provided to ensure that a multihull is effectively unsinkable and capable of floating in a stable position with at least half the length of one hull flooded. (see OSR 3.13.2).	Mu0,1,2,3,4
3.05.2	Multihulls built on or after Jan 1999 shall in every hull without accommodation be divided at intervals of not more than 4m (13ft 3") by one or more transverse watertight bulkheads	Mu0,1,2,3,4
3.05.3 <b>3.07</b>	A yacht shall be designed and built to resist capsize.  Exits and Escape Hatches - Multihulls	Mu0,1,2,3,4 <b>Mu0,1,2,3,4</b>
3.07.1 a)	Exits In a multihull of 8m (26.2ft) LOA and greater, each hull which contains accommodation shall have at least two exits.	Mu0,1,2,3,4
b)	In a multihull of less than 8m (26.2ft) LOA each hull which contains accommodation shall have at least two exits.	Mu0,1,2,3
3.07.2	Escape Hatches, Underside Clipping Points & Handholds	
a)	In a multihull of 12m (39.4ft) LOA and greater each hull which contains accommodation shall:-	Mu0,1,2,3,4
İ	have an escape hatch for access to and from the hull in the event of an inversion;	Mu0,1,2,3,4
ii	when first launched on or after January 2003 have a minimum clearance diameter through each escape hatch of 450mm or when an escape hatch is not circular, sufficient clearance to allow a crew member to pass through fully clothed;	Mu0,1,2,3,4
iii	when first launched prior to January 2003, if possible have each escape hatch in compliance with the dimensions in OSR 3.07.2(a)(ii);	Mu0,1,2,3,4
iv	when the yacht is inverted have each escape hatch above the waterline;	Mu0,1,2,3,4
V	when first launched on or after January 2001 have each escape hatch at or near the midships station;	Mu0,1,2,3,4
Vİ	in a catamaran first launched on or after January 2003 have each escape hatch on the side nearest the vessel's central axis.	Mu0,1,2,3,4
b)	A trimaran of 12m (39.4ft) LOA and greater first launched on or after 1/03 shall have at least two escape hatches in compliance with the dimensions in OSR 3.07.2(a) (ii)	Mu0,1,2,3,4
c)	Each escape hatch must have been opened both from inside and outside within 6 months prior to an intended race	Mu0,1,2,3,4
d)	A multihull shall have on the underside appropriate handholds/clipping points sufficient for all crew (on a trimaran these shall be around the central hull).	Mu0,1,2,3,4
e)	A catamaran first launched on or after 1/03 with a central nacelle shall have on the underside around the central nacelle, handholds of sufficient capacity to enable all persons on board to hold on and/or clip on securely	Mu0,1,2,3,4
f)	In a catamaran with a central nacelle, it is recommended that each hull has an emergency refuge, accessible via a special hatch in the side of the hull nearest the vessel's central axis, which hatch may be opened and closed from the inside and outside	Mu0,1,2,3,4
3.08	Hatches & Companionways	**
3.08.1	No hatch forward of the maximum beam station, other than a hatch in the side of a coachroof, shall open in such a way that the lid or cover moves into the open position towards the interior of the hull (excepting ports having an area of less than 0.071m2 (110 sq in)).	<b>*</b> **
3.08.2	A hatch fitted forward of the maximum beam station, located on the side of the coachroof, opening into the interior of the boat ,and of area greater than 0.071m2 shall comply with ISO12216 design category A and be clearly labelled and used in accordance with the following instruction: "NOT TO BE OPENED AT SEA" Attention is drawn to SR 3.02.1 A hatch shall be:	**
b)	permanently attached	**
c)	capable of being firmly shut immediately and remaining firmly shut in a	**

2 00 4	180 degree capsize (inversion)	
3.08.4 a)	A companionway hatch shall:  be fitted with a strong securing arrangement which shall be operable  from the outprior and interior including when the yearth is inverted.	**
b)	from the exterior and interior including when the yacht is inverted have any blocking devices:	**
i	capable of being retained in position with the hatch open or shut	**
ii	whether or not in position in the hatchway, secured to the yacht (e.g. by lanyard) for the duration of the race, to prevent their being lost overboard	**
iii	permit exit in the event of inversion	**
3.08.7	A companionway hatch extending below the local sheerline and shall comply with either (a) or (b):	Mu0,1,2,3,4
a)	be capable of being blocked off up to the level of the local sheerline, whilst giving access to the interior with the blocking devices (e.g. washboards) in place with a minimum sill height of 300 mm.	Mu0,1,2,3,4
b)		
3.09	A companionway hatch shall be in compliance with ISO 11812 – Watertight cockpits and quick-draining cockpits to design category A <b>Cockpits - Attention is Drawn to ISO 11812</b>	Mu0,1,2,3
3.09.1	Cockpits shall be structurally strong, self-draining quickly by gravity at all angles of heel and permanently incorporated as an integral part of the hull.	**
3.09.2	Cockpits must be essentially watertight, that is, all openings to the hull must be capable of being strongly and rigidly secured	**
3.09.3	A bilge pump outlet pipe shall not be connected to a cockpit drain. See OSR 3.09.8 for cockpit drain minimum sizes	**
3.09.4	A cockpit sole shall be at least 2% LWL above LWL (or in IMS yachts first launched before 1/03, at least 2% L above LWL)	**
3.09.5	A bow, lateral, central or stern well shall be considered a cockpit for the purposes of OSR 3.09	**
3.09.6	In cockpits opening aft to the sea structural openings aft shall be not less in area than 50% maximum cockpit depth x maximum cockpit width.	**
3.09.7	Cockpit Volume	
i)	earliest of age or series date before April 1992 the total volume of all cockpits below lowest coamings shall not exceed	Extract MoMu0,1
	6% (LWL x maximum beam x freeboard abreast the cockpit).	Extract MoMuo,1
ii)	earliest of age or series date April 1992 and after	
•	as above for the appropriate category except that "lowest coamings" shall not include any aft of the FA station and no extension of a cockpit aft of	Extract **
	the working deck shall be included in calculation of cockpit volume IMS-rated boats may instead of the terms LWL, maximum beam, freeboard abreast the cockpit, use the IMS terms L, B and FA.	Extract **
3.09.8		
	See OSR 3.09.1. Cockpit drain cross section area (after allowance for	
,	screens if fitted) shall be:-	**
a)	in yachts with earliest of age or series date before 1/72 or in any yacht under 8.5m (28ft) LOA - at least that of 2 x 25mm diameter (one inch)	**
b)	unobstructed openings or equivalent in yachts with earliest of age or series date 1/72 and later - at least that	**
5)	of 4 x 20mm diameter (3/4 inch) unobstructed openings or equivalent	
3.10	Sea Cocks or Valves	
	Sea cocks or valves shall be permanently installed on all through-hull	**
	openings below the waterline except integral deck scuppers, speed indicators, depth finders and the like, however a means of closing such	
	openings shall be provided.	
3.11	Sheet Winches	
	Sheet winches shall be mounted in such a way that an operator is not	**
3.12	required to be substantially below deck.  Mast Step	
J.12	riast step	

	The heel of a keel stepped mast shall be securely fastened to the mast	**
	step or adjoining structure.	
3.13	Watertight Bulkheads	
2424	multihulls also see OSR 3.05	Mu0,1,2,3,4
3.13.1	A hull shall have either a watertight "crash" bulkhead within 15% of LOA	Mo0Mu0,1,2,3,4
	from the bow and abaft the forward end of LWL, or permanently installed	
	closed-cell foam buoyancy effectively filling the forward 30% LOA of the hull.	
3.13.2	Any required watertight bulkhead shall be strongly built to take a full	Mo0Mu0,1,2,3,4
3.13.2	head of water pressure without allowing any leakage into the adjacent	11001100,1,2,3,7
	compartment.	
3.14	Pulpits, Stanchions, Lifelines	
3.14.1	When due to the particular design of a multihull it is impractical to	Mu0,1,2,3,4,
	precisely follow Special Regulations regarding pulpits, stanchions, lifelines,	, _ , _ , _ , ,
	the regulations for monohulls shall be followed as closely as possible with	
	the aim of minimising the risk of people falling overboard.	
3.14.2	Lifeline deflection shall not exceed the following:	**
a)	When a deflecting force of 4 kg/f (39.2 N) is applied to a lifeline midway	**
	between supports of an upper or single lifeline, the lifeline shall not	
	deflect more than 50mm. This measurement shall be taken at the widest	
	span between supports that are aft of the mast.	
b)	When a deflecting force of 4 kg/f (39.2 N) is applied midway between	**
	supports of an intermediate lifeline of all spans that are aft of the mast,	
	deflection shall not exceed 120mm from a straight line between the	
2 1 4 2	stanchions.	**
3.14.3	The following shall be provided:	**
c)	lifelines (guardlines) supported on stanchions, which, with pulpits, shall form an effectively continuous barrier around a working deck for man-	11-11-
	overboard prevention. Lifelines shall be permanently supported at	
	intervals of not more than 2.20m (86.6") and shall not pass outboard of	
	supporting stanchions	
d)	upper rails of pulpits at no less height above the working deck than the	**
/	upper lifelines as in Table 7.	
e)	Openable upper rails in bow pulpits shall be secured shut whilst racing	**
f)	Pulpits and stanchions shall be permanently installed. When there are	**
	sockets or studs, these shall be through-bolted, bonded or welded. The	
	pulpit(s) and/or stanchions fitted to these shall be mechanically retained	
	without the help of the life-lines. Without sockets or studs, pulpits and/or	
	stanchions shall be through-bolted, bonded or welded.	
g)	The bases of pulpits and stanchions shall not be further inboard from the	**
	edge of the appropriate working deck than 5% of maximum beam or 150	
LX	mm (6 in), whichever is greater.	**
h)	Stanchion or pulpit or pushpit bases shall not be situated outboard of a	<u>ተ</u>
	working deck. For the purpose of this rule the base shall be taken to	
	include a sleeve or socket into which the tube is fitted but shall exclude a	
i)	baseplate which carries fixings into the deck or hull.  Provided the complete lifeline enclosure is supported by stanchions and	**
1)	pulpit bases effectively within the working deck, lifeline terminals and	
	support struts may be fixed to a hull aft of the working deck	
j)	Lifelines need not be fixed to a bow pulpit if they terminate at, or pass	**
J/	through, adequately braced stanchions set inside and overlapping the	
	bow pulpit, provided that the gap between the upper lifeline and the bow	
	pulpit does not exceed 150 mm (6 in).	
k)	Lifelines shall be continuous and fixed only at (or near) the bow and	**
•	stern. However a bona fide gate shall be permitted in the lifelines on	
	each side of a yacht. Except at its end fittings, the movement of a lifeline	
	in a fore-and-aft direction shall not be constrained. Temporary sleeving in	
	3.14.6 (c) shall not modify tension in the lifeline.	
l)	Stanchions shall be straight and vertical except that:-	**

i	within the first 50 mm (2 in) from the deck, stanchions shall not be displaced horizontally from the point at which they emerge from the deck	**
ii	or stanchion base by more than 10 mm (3/8 in), and stanchions may be angled to not more than 10 degrees from vertical at any point above 50 mm (2 in) from the deck.	**
m)	It is strongly recommended that designs also comply to ISO 15085	**
3.14.4	Special Requirements for Pulpits, Stanchions, Lifelines on	Mu0,1,2,3,4
	Multihulls	
	The following shall be provided:-	
a)	on a trimaran - a bow pulpit on the main hull, with lifelines around the main hull supported on stanchions. The lifelines may be interrupted where there are nets or crossbeam wings outboard of the main hull	Mu0,1,2,3,4
b)	on a trimaran - where a net joins the base of a bow pulpit on the main hull, an additional lifeline from the top of the pulpit to the forward crossbeam at or outboard of the crossbeam mid-point.	Mu0,1,2,3,4
c)	on a trimaran - at a main or emergency steering position on an outrigger with or without a cockpit, lifelines protecting an arc of 3 meters diameter centred on the steering position. (When measuring between lifelines their taut, undeflected positions shall be taken for this purpose).	Mu0,1,2,3,4
d)	on a catamaran - lifelines from bow to stern on each hull and transverse lifelines to form an effectively continuous barrier around the working area for man-overboard prevention. The transverse lifelines shall be attached to bow and stern pulpits or superstructure. A webbing, strop or	Mu0,1,2,3,4

under 8.5 m(28 ft)	before January 1992	single lifeline at a height of no less than 450 mm (18 in) above the working deck. No vertical opening shall exceed 560 mm (22 in).	**
under 8.5 m(28 ft)	January 1992 and after	as for under 8.5 m(28 ft) in table 7 above, except that when an intermediate lifeline is fitted no vertical opening shall exceed 380 mm (15 in).	**
8.5 m (28 ft) and over	before January 1993	double lifeline with upper lifeline at a height of no less than 600 mm (24 in) above the working deck. No vertical opening shall exceed 560 mm (22 in)	**
8.5 m (28 ft)and over	January 1993 and after	as 8.5 m (28 ft) and over in Table 7 above, except that no vertical opening shall exceed 380 mm (15 in).	**
all	all	on yachts with intermediate lifelines the intermediate line shall be not less than 230 mm (9 in) above the working deck.	**

# 3.14.6 Lifeline Minimum Diameters, Required Materials, Specifications

- High Modulus Polyethylene (HMPE) (Dyneema®/Spectra® or Mo4,Mu\*\* equivalent) rope (Braid on braid is recommended)

\*\*

b) The minimum diameter is specified in table 8 below.

c) Stainless steel lifelines shall be uncoated and used without close-fitting sleeving, however, temporary sleeving may be fitted provided it is regularly removed for inspection.

d) When stainless wire is used, Grade 316 is recommended. \*\*

e)	When HMPE (Dyneema®/Spectra®) is used, it shall be protected from chafe and shall be spliced in accordance with the manufacturer's				Mo4,Mu**
f)	recommended procedures.  A taut lanyard of synthetic rope may be used to secure lifelines provided **				
	the gap it closes does not exceed 100 mm (4 in). This lanyard shall be				
,	replaced annually at a minimum.				
g)			ures and lanyards shall comp		**

3.28	Engines, Generators, Fuel	ale ale
3.28.1	Propulsion Engines	** **
a)	Engines and associated systems shall be installed in accordance with their manufacturers' guidelines and shall be of a type, strength, capacity, and installation suitable for the size and intended use of the yacht.	**
b)	An inboard propulsion engine when fitted shall: be provided with a permanently installed exhaust, coolant, and fuel supply systems and fuel tank(s); be securely covered; and have adequate protection from the effects of heavy weather.	**
c)	A propulsion engine required by Special Regulations shall provide a minimum speed in knots of (1.8 x square root of LWL in metres) or (square root of LWL in feet)	MoMu0,1,2,3
f)	Boats of less than 12.0 m hull length may be provided with an inboard propulsion engine, or an outboard engine together with permanently installed fuel supply systems and fuel tank(s) may be used as an alternative.	Mu1,2,3
3.28.2	Generator	
	A separate generator for electricity is optional. However, when a separate generator is carried it shall be permanently installed, securely covered, and shall have permanently installed exhaust, cooling and fuel supply systems and fuel tank(s), and have adequate protection from the effects	**
2 20 2	of heavy weather.	
3.28.3	Fuel Systems	MaMuO 1 2 2
a)	Each fuel tank provided with a shutoff valve. Except for permanently installed linings or liners, a flexible tank is not permitted as a fuel tank.	MoMu0,1,2,3
b) <b>3.28.4</b>	The propulsion engine shall have a minimum amount of fuel which may be specified in the Notice of Race but if not, shall be sufficient to be able to meet charging requirements for the duration of the race and to motor at the above minimum speed for at least 8 hours	MoMu0,1,2,3
	Battery Systems  When an electric starter is the only method for starting the engine the	MaMuO 1 2 2
a)	When an electric starter is the only method for starting the engine, the yacht shall have a separate battery, the primary purpose of which is to start the engine	MoMu0,1,2,3
b)	All rechargeable batteries on board shall be of the sealed type from which liquid electrolyte cannot escape. Other types of battery installed on board at 1/12 may continue in use for the remainder of their service lives.	MoMu0,1,2,3
3.29	Communications Equipment, EPFS (Electronic Position-Fixing System), Radar, AIS	**
	Provision of GMDSS is unlikely to be mandatory for small craft during the term of the present Special Regulations.	MoMu0,1,2,3
3.29.1	The following shall be provided:	**
a)	A marine radio transceiver (or if stated in the Notice of Race, an installed satcom terminal), and	MoMu0,1,2,3
İ	an emergency antenna when the regular antenna depends upon the mast.	MoMu0,1,2,3
b)	When the marine radio transceiver is VHF:	MoMu0,1,2,2
i	it shall have a rated output power of 25W	MoMu0,1,2,2
ii	it shall have a masthead antenna, and co-axial feeder cable with not more than 40% power loss	MoMu0,1,2,3
iii	the following types and lengths of co-axial feeder cable will meet the requirements of OSR 3.29.1 (b)(ii): (a) up to 15m (50ft) - type RG8X ("mini 8"); (b) 15-28m (50-90ft) - type RG8U; (c) 28-43m (90-140ft) - type 9913F (uses conventional connectors, available from US supplier	MoMu0,1,2,3

	Belden); (d) 43-70m) 140-230ft - type LMR600 (uses special connectors,	
	available from US supplier Times Microwave).	
iv	it should include channel 72 (an international ship-ship channel which, by	MoMu0,1,2,3
	common use, has become widely accepted as primary choice for ocean	/ / /-
	racing yachts anywhere in the world)	
e)	A hand-held marine VHF transceiver, watertight or with a waterproof	MoMu1,2,3,4
	cover. When not in use to be stowed in a grab bag or emergency	
	container (see OSR 4.21) The handheld receiver should have Digital	
_	Selective Calling (DSC) and be equipped with GPS.	
f)	Independent of a main radio transceiver, a radio receiver capable of	**
	receiving weather bulletins	
i)	An EPFS (Electronic Position-Fixing System) (e.g. GPS)	MoMu0,1,2,3
n)	An AIS Transponder	MoMu1,2
p)	The AIS Transponder shall share the masthead VHF antenna via a low	MoMu0,1,2
	loss AIS antenna splitter. An acceptable alternative is a dedicated AIS antenna that is a minimum of 381mm long, mounted with its base at	
	least 3 meters above the water, and fed with coax cable that has a	
	maximum 40% power loss.	
3.29.2	Yachts are reminded that no reflector, active or passive, is a guarantee of	**
3.23.2	detection or tracking by a vessel using radar.	
a)	The attention of persons in charge is drawn to legislation in force or	**
/	imminent affecting the territorial seas of some countries in which the	
	carriage of an AIS set is or will be mandatory for certain vessels including	
	relatively small craft.

4.04.2	Clipping Points:-	
a)	shall be provided- attached to through-bolted or welded deck plates or other suitable and strong anchorage points adjacent to stations such as the helm, sheet winches and masts, where crew members work for long periods:-	MoMu0,1,2,3
b)	which, together with jackstays and static safety lines shall enable a crew member-	MoMu0,1,2,3
i ii	to clip on before coming on deck and unclip after going below; whilst continuously clipped on, to move readily between the working areas on deck and the cockpit(s) with the minimum of clipping and unclipping operations.	MoMu0,1,2,3 MoMu0,1,2,3
c)	The provision of clipping points shall enable two-thirds of the crew to be simultaneously clipped on without depending on jackstays	MoMu0,1,2,3
d)	In a trimaran with a rudder on the outrigger, adequate clipping points shall be provided that are not part of the deck gear or the steering mechanism, in order that the steering mechanism can be reached by a crew member whilst clipped on.	Mu0,1,2,3
<i>e)</i> <b>4.05</b>	Warning - U-bolts as clipping points - see OSR 5.02.1(a)  Fire Extinguishers	MoMu0,1,2,3
4.05.1	Shall be provided as follows: Fire extinguishers, at least two, readily accessible in suitable and different parts of the yacht	**
4.05.2	Fire Extinguishers, at least two, of minimum 2kgs each of dry powder or equivalent	MoMu0,1,2,3
4.05.4 <b>4.06</b>	A fire blanket adjacent to every cooking device with an open flame <b>Anchor(s)</b>	**
4.06.1	An anchor or anchors shall be carried according to the table below:	**
a) i	The following anchors shall be provided For yachts of 8.5 m LOA (28 ft) and over there shall be 2 anchors together with a suitable combination of chain and rope, all ready for immediate use	MoMu1,2,3
ii <b>4.07</b>	For yachts under 8.5 m LOA (28 ft) there shall be 1 anchor together with a suitable combination of chain and rope, all ready for immediate use <b>Flashlight(s)</b> and <b>Searchlight(s)</b>	MoMu1,2,3
4.07.1	The following shall be provided:-	
a)	A watertight, high-powered searchlight, suitable for searching for a person overboard at night and for collision avoidance with spare batteries and bulbs, and	**
b)	a watertight flashlight with spare batteries and bulb	**
<b>4.08</b> 4.08.1	First Aid Manual and First Aid Kit A suitable First Aid Manual shall be provided	** **
4.00.1	In the absence of a National Authority's requirement, the latest edition of one of the following is recommended:-	**
a) c)	International Medical Guide for Ships, World Health Organisation, Geneva Le Guide de la medecine a distance, by Docteur J Y Chauve, published by Distance Assistance BP33 F-La Baule, cedex, France.	MoMu0,1 **
e)	Skipper's Medical Emergency Handbook by Dr Spike Briggs and Dr Campbell Mackenzie www.msos.org.uk	**
4.08.2	A First Aid Kit shall be provided	**
4.08.3	The contents and storage of the First Aid Kit should reflect the guidelines of the Manual carried, the likely conditions and duration of the passage, and the number of people aboard the yacht.	**
4.09	Foghorn A foghorn shall be provided	**
4.10	Radar Reflector	
4.10.1	A passive radar reflector shall be carried with:  Octahederal circular sector plates of minimum diameter 300 mm (12") or  Octahederal rectangular plates of minimum diagonal dimension 405 mm (16") or	**

	a non-Octahederal reflector with a documented Root Mean Square minimum Radar Cross Section (RCS) area of 2 m2 from 0-360 degrees in azimuth and +/- 20 degrees in heel.	
4.11	Navigation Equipment	
4.11.1	Charts Navigational charts (not solely electronic), light list and chart plotting	**
4.11.2	equipment shall be provided  Reserve Navigation System	
	Navigators are recommended to carry a sextant with suitable tables and a timepiece or an adequate reserve navigation system so that total reliance is not placed on dead-reckoning and a single form of EPFS (Electronic	MoMu0,1
4.40	Position-Fixing System) (see Volpe Report at www.navcen.uscg.gov/archive/2001/Oct/FinalReport-v4.6.pdf)	
4.12	Safety Equipment Location Chart	**
	A safety equipment location chart in durable waterproof material shall be displayed in the main accommodation where it can best be seen, clearly marked with the location of principal items of safety equipment.	1
4.13	Echo Sounder or Lead Line	
4.13.1	An echo sounder or lead line shall be provided	MoMu1,2,3,4
4.14	Speedometer or Distance Measuring Instrument (log)	
4 4 5	A speedometer or distance measuring instrument (log) shall be provided	MoMu0,1,2,3
<b>4.15</b> 4.15.1	Emergency Steering Emergency steering shall be provided as follows:	
a)	except when the principal method of steering is by means of an	MoMu0,1,2,3
aj	unbreakable metal tiller, an emergency tiller capable of being fitted to the rudder stock;	1101100,1,2,3
b)	crews must be aware of alternative methods of steering the yacht in any sea condition in the event of rudder loss. At least one method must have been proven to work on board the yacht. An inspector may require that	MoMu0,1,2,3
	this method be demonstrated.	
4.16	Tools and Spare Parts	ded
4.45	Tools and spare parts, including effective means to quickly disconnect or sever the standing rigging from the hull shall be provided.	**
4.17	Yacht's name Yacht's name shall be on miscellaneous buoyant equipment, such as lifejackets, cushions, lifebuoys, lifeslings, grab bags etc.	**
4.18	Marine grade retro-reflective material  Marine grade retro-reflective material shall be fitted to lifebuoys,	**
4.40	lifeslings, liferafts and lifejackets. See OSRs 5.04, 5.08.	
<b>4.19</b> 4.19.1	EPIRBS	MaMul 2
<i>b)</i>	A 406 MHz EPIRB shall be provided  It is recommended that a 406 MHz EPIRB should include an internal GPS,	MoMu1,2 <i>MoMu0,1,2</i>
,	and also a 121.5MHz transmitter for local homing.	
c)	Every EPIRB shall be registered with the appropriate authority associated with the country code in the boundaries lidentification (15 Hey ID) of the	MoMu0,1,2
	with the country code in the hexadecimal identification (15 Hex ID) of the beacon. A beacon can be registered online with the Cospas-Sarsat IBRD	
	if the country does not provide a registration facility and the country has	
	allowed direct registration in the IBRD	
d)	Every ship's 406 MHz EPIRB shall be water and manually activated.	MoMu0,1,2
e)	A list of registration numbers of 406 EPIRBs should be notified to event	MoMu0,1,2
_	organizers and kept available for immediate use.	
f)	Consideration should be given to the provision of a locator device (e.g. an "Argos" beacon) operating on non - SAR frequencies, to aid salvage if a	MoMu0,1,2
g)	yacht is abandoned.  See OSR 3.29.1(e) for on-board D/F and OSR 5.07.1(b) for personal	МоМиО
4.20	EPIRBs (PLBs) Liferafts	MoMu0,1,2
4.20.1	Liferaft Construction and Packed Equipment	···oi··iuu <sub>/</sub> ±,∠

One or more inflatable liferafts shall be provided with a total capacity to MoMu1,2

a)

accommodate at least the total number of people on board.

b) Each liferaft provided shall comply with either:i SOLAS LSA code 1997 Chapter IV or later version, or MoMu1,2
ii ISO 9650-1:2005, Part I, Type I, Group A or MoMu1,2
iii ISAF liferaft manufactured before 01/16 until replacement is due at end MoMu1,2
of serviceable life, or
iv ORC liferaft manufactured before the end 01/03 until replacement is due MoMu1,2
at end of serviceable life.

# 4.20.2 Minimum Liferaft Equipment

a) A SOLAS liferaft shall contain as a minimum a SOLAS A pack; MuMo0,1,2
 b) An ISO 9650 liferaft shall contain as a minimum Pack 1 (greater than 24 MuMo1 hour pack);

d) The minimum contents of the ISO liferaft equipment packs are listed below. Not all items are necessarily packed within the liferaft. Some items are permitted to be carried within an accompanying waterproof grab bag which shall be in a readily accessible location:

TABLE 14

Equipment	Pack 1 > 24h	Pack 2 < 24h	In liferaft	In liferaft or in grab bag
Portable buoyant baler easily operable by hand	1	1	Χ	
Sponge	2	2	Х	
Pair of buoyant paddles with handles (not mitts) tied into raft adjacent to an entrance	1	1	Х	
First-Aid Kit including at least 2 tubes of sunscreen. All dressings must be capable of being effectively used in wet conditions. The first aid kit shall be clearly marked and shall be re-sealable.	1	0		Х
Whistle	1	1	Χ	
Waterproof torch with 6 h duration and separate battery and bulb or complementary torch	2	1	Х	
Signalling mirror	1	1	Χ	
Anti-seasickness pills, per person	6	6		X
Seasickness bag with simple effective closure system, per person	1	1		Х
Red hand flares in accordance with SOLAS LSA Code Chapter III, 3.2	6	3	3 min	Х
Red parachute flares in accordance with SOLAS LSA Code Chapter III, 3.1	2	2	1 min	Х
Thermal protective aids in accordance with SOLAS LSA Code Chapter III, 2.5	2	0		Х
Repair outfit to enable survivors to repair leaks in any or all of the inflatable compartments. Repair systems must work when wet and be capable of being applied during violent motion.	1	1	Х	
Air pump or bellows which shall be simple, robust and complete, with all necessary connections (loose parts shall be captive to the main apparatus) ready for instant use to enable air to be pumped into any or all of the inflatable compartments. The air pump or bellows shall be designed and built specifically for easy operation by hand	1	1	Х	
Drinking water per person, in containers of each not more than 500mL	1.5 L	0	0.5 L	Xa
Food per person	10	0		Χ

		000 kJ			
	* Drinking water in the grab bag (if any) may be	K)

4.26	Storm & Heavy Wea		vpit.		
4.26.1	=	aici Jalis			
a)	.1 Design it is strongly recommended that persons in charge consult their designer and sailmaker to decide the most effective size for storm and heavy weather sails. The purpose of these sails is to				**
	_				

provide safe propulsion for the yacht in severe weather -they are not intended as part of the racing inventory. The areas below are maxima. Smaller areas are likely to suit some yachts according to their stability and other characteristics.

### 4.26.2 High Visibility

- a) Every storm jib shall either be of highly-visible coloured material (e.g. dayglo pink, orange or yellow) or have a highly-visible coloured patch at least 50% of the area of the sail (up to a maximum diameter of 3m) added on each side; and also that a rotating wing mast should have a highly-visible coloured patch on each side. A storm sail purchased after January 2014 shall have the material of the body of the sail a highly-visible colour.
- b) it is strongly recommended that the storm trysail should either be made \*\*
  of or have a patch of highly visible colour.

## 4.26.3 Materials

- a) aromatic polyamides, carbon and similar fibres shall not be used in a trysail or storm jib but spectra/dyneema and similar materials are
- b) it is strongly recommended that a heavy-weather jib does not contain aromatic polyamides, carbon and similar fibres other than spectra/dyneema.

## 4.26.4 The following shall be provided:-

- a) sheeting positions on deck for each storm and heavy-weather sail;
- b) for each storm or heavy-weather jib, a means to attach the luff to the stay, independent of any luff-groove device. A heavy weather jib shall have the means of attachment readily available. A storm jib shall have the means of attachment permanently attached;

  Storm and heavy weather jib areas shall be calculated as:

  (0.255 x luff length x (luff perpendicular + 2 x half width))\* To apply to sails made in January 2012 and after.
- a storm trysail which shall be capable of being sheeted independently of the boom with trysail area not greater than 17.5% mainsail hoist (P) x mainsail foot length (E). The storm trysail area shall be measured as (0.5 x leech length x shortest distance between tack point and leech). The storm trysail shall have neither headboard nor battens, however a storm trysail is not required in a yacht with a rotating wing mast which can adequately substitute for a trysail. The method of calculating area applies to sails made in January 2012 and after.
- d) the storm trysail as required by OSR 4.26.4 (c) shall have the yacht's sail number and letter(s) shall be placed on both sides of the trysail (or on a rotating wing mast as substitute for a trysail) in as large a size as practicable;
- e) a storm jib of area not greater than 5% height of the foretriangle squared, with luff maximum length 65% height of the foretriangle;
- f) a heavy-weather jib (or heavy-weather sail in a yacht with no forestay) of area not greater than 13.5% height of the foretriangle squared;
- h) in the case of a yacht with an in-mast furling mainsail, the storm trysail must be capable of being set while the mainsail is furled.
- i) A trysail track should allow for the trysail to be hoisted quickly when the mainsail is lowered whether or not the mainsail is stowed on the main boom.

It is strongly recommended that a boat has either a dedicated trysail track permanently installed with the entry point accessible to a person standing on the main deck or coachroof, or a permanently installed stay on which to hank the trysail.

k) It is strongly recommended that an inner forestay is provided either permanently installed or readily set up, on which to set the storm jib.

At least 30% of the crew shall each, in addition to the above be provided with either:- a safety line not more than 1m long, or a mid-point snaphook on a 2m safety line A safety line purchased in January 2001 or later shall have a coloured flag embedded in the stitching, to indicate an overload. A line which has been overloaded shall be replaced as a matter of urgency. A crew member's lifejacket and harness shall be compatible It is strongly recommended that:- static safety lines should be securely fastened at work stations; A harness should be fitted with a crotch strap or thigh straps.  to draw attention to wear and damage, stitching on harness and safety lines should be of a colour contrasting strongly with the surrounding material; snaphooks should be of a type which will not self-release from a U-bolt (see OSR 5.02.1(a)) and which can be easily released under load (crew members are reminded that a personal knife may free them from a safety line in emergency); a crew member before a race should adjust a harness to fit then retain that harness for the duration of the race. Warning - a safety line and safety harness are not designed to tow a	MoMu0,1,2,3 MoMu0,1,2,3 MoMu0,1,2,3 MoMu0,1,2,3 MoMu0,1,2,3 MoMu0,1,2,3 MoMu0,1,2,3 MoMu0,1,2,3

safety harness, ISO 12402 requires that this shall be the full safety harness in accordance with ISO 12401. Any equivalent lifejacket shall

person's torso becoming immersed in water outside the boat, especially when working on the foredeck. 1m safety lines or the midpoint snaphook on a 2m line should be used for this purpose. The diligent use of a properly adjusted safety harness and the shortest safety line practicable is regarded as by far the most effective way of preventing man overboard incidents.

#### is regarded as by far the most effective way of preventing man overboard incidents. 5.04 **Foul Weather Suits** it is recommended that a foul weather suit should be fitted with marineb) grade retro-reflective material, and should have high-visibility colours on its upper parts and sleeve cuffs. See OSR 4.18 **Survival Equipment** Mo0,1,2Mu0,1,2,3,4 5.07 Attention is drawn to the value of keeping on the person a combined d) *MoMu0,1,2* 406MHz/121.5MHz PLB when on deck: this may aid location in a man overboard incident independent of the equipment carried by the parent e) Where possible every PLB shall be registered with the appropriate MoMu0,1,2 authority associated with the country code in the hexadecimal identification (15 Hex ID) of the beacon. A beacon can be registered online with the Cospas-Sarsat IBRD if the country does not provide a registration facility and the country has allowed direct registration in the IBRD. It is strongly recommended that an immersion suit should be supplied to 5.07.2 Mu1,2,3,4 each crew member in a multihull in conditions where there is a potential for hypothermia **SECTION 6 - TRAINING** 6.01 At least 30% but not fewer than two members of a crew. MoMu<sub>1,2</sub> including the skipper shall have undertaken training within the five years before the start of the race in both 6.02 topics for theoretical sessions, and 6.03 topics which include practical, hands-on sessions. 6.01.3 It is strongly recommended that all crew members should undertake MoMu1,2 training as in OSR 6.01 at least once every five years 6.01.4 Except as otherwise provided in the Notice of Race, an in-date certificate MoMu0,1,2 gained at an ISAF Approved Offshore Personal Survival Training course shall be accepted by a race organizing authority as evidence of compliance with Special Regulation 6.01. See Appendix G - Model Training Course, for further details. 6.02 **Training Topics for Theoretical Sessions** 6.02.1 care and maintenance of safety equipment MoMu0,1,2 6.02.2 storm sails MoMu0,1,2 6.02.3 damage control and repair MoMu0,1,2 6.02.4 heavy weather - crew routines, boat handling, drogues MoMu0,1,2 6.02.5 man overboard prevention and recovery MoMu0,1,2 6.02.6 giving assistance to other craft MoMu0,1,2 hypothermia MoMu0,1,2 6.02.7 6.02.8 SAR organisation and methods MoMu0,1,2 6.02.9 weather forecasting MoMu0,1,2 6.03 **Training Topics for Practical, Hands-On Sessions** MoMu0,1,2 liferafts and lifejackets 6.03.1 MoMu0,1,2 fire precautions and use of fire extinguishers 6.03.2 MoMu0,1,2 6.03.3 communications equipment (VHF, GMDSS, satcomms, etc.) MoMu0,1,2 6.03.4 pyrotechnics and EPIRBs MoMu0,1,2 \*\* 6.04 **Routine Training On-Board** 6.04.1 It is recommended that crews should practice safety routines at \*\* reasonable intervals including the drill for man-overboard recovery At least two members of the crew MoMu1

shall have a first aid certificate completed within the last five years

A certificate listed on the ISAF website www.sailing.org/specialregs of

meeting any of the following requirements:

i

MNA recognised courses

ii STCW 95 First Aid Training complying with A-VI/1-3 – Elementary First Aid or higher STCW level

6.05.4 An example model first aid training course is included in Appendix N.

MoMu0.1.2

., ., .,		
LOA	earliest of age or series date	race category
all	January 1986 and after	MoMu0,1
12m (39.4 feet) and over	January 1987 and after	MoMu2
under 12m (39.4 feet)	January 1988 and after	MoMu2

m2 A yacht defined in the table above shall have been designed built, Mo maintained, modified and repaired in accordance with the requirements of either:

MoMu0,1,2

- a) the EC Recreational Craft Directive for Category A (having obtained the CE mark), or
- MoMu0,1,2
- b) the ABS Guide for Building and Classing Offshore Yachts in which case the yacht shall have on board either a certificate of plan approval issued by ABS, or written statements signed by the designer and builder which confirm that they have respectively designed and built the yacht in accordance with the ABS Guide,

MoMu0,1,2

c) ISO 12215 Category A, with written statements signed by the designer and builder which confirm that they have respectively designed and built the yacht in accordance with the ISO standard,

MoMu0,1,2

d) except that a race organizer or class rules may accept when that described in (a), (b), or (c) above is not available, the signed statement by a naval architect or other person familiar with the standards listed above that the yacht fulfills the requirements of (a), (b), or (c).

MoMu0,1,2

m3 Any significant repairs or modifications to the hull, deck, coachroof, keel or appendages, on a yacht defined in table 2 shall be certified by one of the methods above and an appropriate written statement or statements shall be on board.
