A Vital Resource for Businesses that Conduct International Trade

On December 18, 2014, the U.S. Census Bureau is releasing the **2012 Manufacturing and International Trade Report (MITR)**. This

new annual report contains manufacturing data on the value of product shipments. The data are published on a North American Industry Classification System (NAICS) basis from the 2012 Economic Census Industry Series. The MITR also includes official U.S. export and import merchandise trade statistics.

The MITR will, for the first time, provide a comprehensive comparison between detailed manufacturing product class data and associated import and export data.

In August 2015, the Census Bureau plans to release the 2013 MITR. The report will present

manufacturing product data from the 2013 Annual Survey of Manufactures and 2012 Economic Census Summary Series, with new and revised official U.S. export and import merchandise trade statistics.
