ISAF OFFSHORE SPECIAL REGULATIONS

JANUARY 2014 - DECEMBER 2015 (Incorporating Amendments Effective 1st January 2015) www.sailing.org/specialregs

Extract for Race Category 2 Multihulls

© ORC Ltd. 2002, all amendments from 2003 © International Sailing Federation, (IOM) Ltd. **Version 2 - 2015**

Because this is an extract not all paragraph numbers will be present

Copyright

When reprinting these regulations National Authorities and Race Organizers should:-

- request copyright permission from ISAF and ORC Ltd (normally given free of charge)
- display a copyright acknowledgement with the reprint (similar to © ORC Ltd. 2002, all amendments from 2003 © International sailing Federation, (IOM) Ltd.)
- make any amendments by deleting contrary provisions and indicating that changes have been made
- supply a copy of the reprint to each of ISAF and ORC Ltd

Official interpretations shall take precedence over these Special Regulations and will be indexed, numbered, dated and displayed on the ISAF web site www.sailing.org/specialregs

Language & Abbreviations Used

Mo - Monohull

Mu - Multihull

" ** " means the item applies to all types of yacht in all Categories except 5 for which see Appendix J or 6 for which see Appendix L.

RED TYPE indicates a significant changes in 2015

Guidance notes and recommendations are in italics

The use of the masculine gender shall be taken to mean either gender

Administration

The Offshore Special Regulation are administered by the ISAF Special Regulation Sub-Committee whose terms of reference are as follows: (www.sailing.org/regulations)

ISAF Regulation 6.8.8.3 - The Special Regulations Sub-Committee shall: (a) be responsible for the maintenance, revision and changes to the ISAF Offshore Special Regulations governing offshore racing, under licence from ORC Ltd. Such changes shall be biennial with revised editions published in January of each even year, except that matters of an urgent nature affecting safety may be dealt with by changes to the Regulations on a shorter time scale;

(b) monitor developments in offshore racing relative to the standards of safety and seaworthiness.

Any queries please E-Mail: technical@isaf.co.uk

SECTION 1 - FUNDAMENTAL AND DEFINITIONS

1.01 Purpose and Use

1.01.1 It is the purpose of these Special Regulations to establish uniform minimum equipment, accommodation and training standards for monohull and multihull yachts racing offshore. A Proa is excluded from these

regulations. 1.01.2 These Special Regulations do not replace, but rather supplement, the ** requirements of governmental authority, the Racing Rules and the rules of Class Associations and Rating Systems. The attention of persons in charge is called to restrictions in the Rules on the location and movement of equipment. ** 1.01.3 These Special Regulations, adopted internationally, are strongly recommended for use by all organizers of offshore races. Race Committees may select the category deemed most suitable for the type of race to be sailed. 1.02 **Responsibility of Person in Charge** The safety of a yacht and her crew is the sole and inescapable ** 1.02.1

- 1.02.1 The safety of a yacht and her crew is the sole and inescapable responsibility of the person in charge who must do his best to ensure that the yacht is fully found, thoroughly seaworthy and manned by an experienced crew who have undergone appropriate training and are physically fit to face bad weather. He must be satisfied as to the soundness of hull, spars, rigging, sails and all gear. He must ensure that all safety equipment is properly maintained and stowed and that the crew know where
- in the event of his incapacitation.

 1.02.2 Neither the establishment of these Special Regulations, their use by race organizers, nor the inspection of a yacht under these Special Regulations in any way limits or reduces the complete and unlimited responsibility of the person in charge.

it is kept and how it is to be used. He shall also nominate a person to take over the responsibilities of the Person in Charge

- 1.02.3 Decision to race -The responsibility for a yacht's decision to participate in a race or to continue racing is hers alone RRS Fundamental Rule 4.

- 1.03.1 Definitions of Terms used in this document

TABLE 1

Age Date Month/year of first launch

AIS Automatic Identification Systems
CEN Comité Européen de Normalisation
CPR Cardio-Pulmonary Resuscitation

Coaming Includes the transverse after limit of the cockpit over which water would run in

the event that when the yacht is floating level the cockpit is flooded or filled to

**

overflowing.

DSC Digital Selective Calling

EN European Norm

EPFS Electronic Position-Fixing System

EPIRB Emergency Position-Indicating Radio Beacon

FA Station The transverse station at which the upper corner of the transom meets the

sheerline.

Foul-Weather A foul weather suit is clothing designed to keep the wearer dry and maybe

Suit either a jacket and trousers worn together, or a single garment comprising

jacket and trousers.

GMDSS Global Maritime Distress & Safety System

GNSS Global Navigation Satellite System
GPIRB EPIRB, with integral GPS position-fixing
ITU International Telecommunications Union

GPS Global Positioning System

Hatch The term hatch includes the entire hatch assembly and also the lid or cover as

part of that assembly (the part itself may be described as a hatch).

INMARSAT This is Inmarsat Global Limited, the private company that provides GMDSS

satellite distress and safety communications, plus general communications via

voice, fax and data

IMO International Maritime Organisation

IMSO The International Mobile Satellite Organisation, the independent,

intergovernmental organisation that oversees Inmarsat's performance of its

Public Service Obligations for the GMDSS and reports on these to IMO

ISAF International Sailing Federation.

ISO International Standard or International Organization for Standardization.

Lifeline Rope or wire line rigged as guardrail / guardline around the deck LOA Length overall not including pulpits, bowsprits, boomkins etc.

LWL (Length of) loaded waterline

Monohull Yacht in which the hull depth in any section does not decrease towards the

centre-line.

Moveable Lead or other material including water which has no practical function in the Ballast boat other than to increase weight and/or to influence stability and/or trim and

which may be moved transversely but not varied in weight while a boat is

racing.

ORC Offshore Racing Congress (formerly Offshore Racing Council)

OSR Offshore Special Regulation(s)

Permanently Means the item is effectively built-in by e.g. bolting, welding, glassing etc. and

Installed may not be removed for or during racing.

PLB Personal Locator Beacon
Proa Asymmetric Catamaran
RRS ISAF - Racing Rules of Sailing

SAR Search and Rescue

SART Search and Rescue Transponder

Series Date Month & Year of first launch of the first yacht of the production series

SOLAS Safety of Life at Sea Convention

Safety Line A tether used to connect a safety harness to a strong point

Securely Held strongly in place by a method (e.g. rope lashings, wing-nuts) which will safely retain the fastened object in severe conditions including a 180 degree

capsize and allows for the item to be removed and replaced during racing

Static Ballast Lead or other material including water which has no practical function in the

boat other than to increase weight and/or to influence stability and/or trim and

which may not be moved or varied in weight while a boat is racing.

Static Safety A safety line (usually shorter than a safety line carried with a harness) kept

Line clipped on at a work-station

Variable Water carried for the sole purpose of influencing stability and/or trim and

Ballast which may be varied in weight and/or moved while a boat is racing.

1.03.2 The words "shall" and "must" are mandatory, and "should" and "may" are ** permissive.

The word "yacht" shall be taken as fully interchangeable with the word "boat"

SECTION 2 - APPLICATION & GENERAL REQUIREMENTS

2.01 Categories of Events

In many types of race, ranging from trans-oceanic sailed under adverse conditions to short-course day races sailed in protected waters, seven categories are established, to provide for differences in the minimum standards of safety and accommodation required for such varying circumstances:

2.01.3 Category 2

1.03.3

Races of extended duration along or not far removed from shorelines or MoMu,2 in large unprotected bays or lakes, where a high degree of self-sufficiency is required of the yachts.

2.02 Inspection

A yacht may be inspected at any time. If she does not comply with these

Special Regulations her entry may be rejected, or she will be liable to
disqualification or such other penalty as may be prescribed by the
national authority or the race organizers.

2.03 General Requirements

2.03.1 All equipment required by Special Regulations shall:-

a) function properly **

b)	be regularly checked, cleaned and serviced	**
c)	when not in use be stowed in conditions in which deterioration is	**
C)	minimised	
d)	be readily accessible	**
e)	be of a type, size and capacity suitable and adequate for the intended use	**
-,	and size of the yacht.	
2.03.2	Heavy items:	
a)	ballast, ballast tanks and associated equipment shall be permanently	**
/	installed	
b)	heavy movable items including e.g. batteries, stoves, gas bottles, tanks,	**
,	toolboxes and anchors and chain shall be securely fastened	
c)	heavy items for which fixing is not specified in Special Regulations shall	**
,	be permanently installed or securely fastened, as appropriate	
2.03.3	When to show navigation lights	**
a)	navigation lights (OSR 3.27) shall be shown as required by the	**
-	International Regulations for Preventing Collision at Sea, (Part C and	
	Technical Annex 1). All yachts shall exhibit sidelights and a sternlight at	
	the required times.	
SECTIO	ON 3 - STRUCTURAL FEATURES, STABILITY, FIXED EQUIPMENT	
3.01	Strength of Build, Ballast and Rig	
	Yachts shall be strongly built, watertight and, particularly with regard to	**
	hulls, decks and cabin trunks capable of withstanding solid water and	
	knockdowns. They must be properly rigged and ballasted, be fully	
	seaworthy and must meet the standards set forth herein. Shrouds shall	
	never be disconnected.	
3.02	Watertight Integrity of a Hull	at a t
3.02.1	A hull, including, deck, coach roof, windows, hatches and all other parts,	**
	shall form an integral, essentially watertight unit and any openings in it	
2.02.2	shall be capable of being immediately secured to maintain this integrity.	**
3.02.2	Centreboard and daggerboard trunks and the like shall not open into the	<i>ተ</i>
	interior of a hull except via a watertight inspection/maintenance hatch of	
	which the opening shall be entirely above the waterline of the yacht	
3.02.3	floating level in normal trim.	**
3.02.3	A canting keel pivot shall be completely contained within a watertight enclosure which shall comply with OSR 3.02.2. Access points in the	100
	watertight enclosure for control and actuation systems or any other	
	purpose shall comply with OSR 3.02.1.	
3.02.4	Moveable ballast systems shall be fitted with a manual control and	**
3.02.1	actuation secondary system which shall be capable of controlling the full	
	sailing load of the keel in the event of failure of the primary system. Such	
	failures would include electrical and hydraulic failure and mechanical	
	failure of the components and the structure to which it mounts. The	
	system must be capable of being operational quickly and shall be	
	operable at any angle of heel. It would be desirable if this system was	
	capable of securing the keel on the centreline.	
3.03	Hull Construction Standards (Scantlings)	MoMu0,1,2
3.03.4	A multihull shall comply with appendix M to these OSR.	Extract Mo0,1,2
3.05	Stability and Flotation - Multihulls	Mu0,1,2,3,4
	Attention is drawn to ISO 12217-2.	Mu0,1,2,3,4
3.05.1	Adequate watertight bulkheads and compartments (which may include	Mu0,1,2,3,4
	permanently installed flotation material) in each hull shall be provided to	
	ensure that a multihull is effectively unsinkable and capable of floating in	
	a stable position with at least half the length of one hull flooded. (see	
	OSR 3.13.2).	
3.05.2	Multihulls built on or after Jan 1999 shall in every hull without	Mu0,1,2,3,4
	accommodation be divided at intervals of not more than 4m (13ft 3") by	
2 25 2	one or more transverse watertight bulkheads	M 0 4 0 0 1
3.05.3	A yacht shall be designed and built to resist capsize.	Mu0,1,2,3,4
3.07	Exits and Escape Hatches - Multihulls	Mu0,1,2,3,4

3.07.1	Exits	
a)	In a multihull of 8m (26.2ft) LOA and greater, each hull which contains accommodation shall have at least two exits.	Mu0,1,2,3,4
b)	In a multihull of less than 8m (26.2ft) LOA each hull which contains accommodation shall have at least two exits.	Mu0,1,2,3
3.07.2	Escape Hatches, Underside Clipping Points & Handholds	
a)	In a multihull of 12m (39.4ft) LOA and greater each hull which contains accommodation shall:-	Mu0,1,2,3,4
i	have an escape hatch for access to and from the hull in the event of an inversion;	Mu0,1,2,3,4
ii	when first launched on or after January 2003 have a minimum clearance diameter through each escape hatch of 450mm or when an escape hatch is not circular, sufficient clearance to allow a crew member to pass through fully clothed;	Mu0,1,2,3,4
iii	when first launched prior to January 2003, if possible have each escape hatch in compliance with the dimensions in OSR 3.07.2(a)(ii);	Mu0,1,2,3,4
iv	when the yacht is inverted have each escape hatch above the waterline;	Mu0,1,2,3,4
V	when first launched on or after January 2001 have each escape hatch at or near the midships station;	Mu0,1,2,3,4
vi	in a catamaran first launched on or after January 2003 have each escape hatch on the side nearest the vessel's central axis.	Mu0,1,2,3,4
b)	A trimaran of 12m (39.4ft) LOA and greater first launched on or after 1/03 shall have at least two escape hatches in compliance with the dimensions in OSR 3.07.2(a) (ii)	Mu0,1,2,3,4
c)	Each escape hatch must have been opened both from inside and outside within 6 months prior to an intended race	Mu0,1,2,3,4
d)	A multihull shall have on the underside appropriate handholds/clipping points sufficient for all crew (on a trimaran these shall be around the central hull).	Mu0,1,2,3,4
e)	A catamaran first launched on or after 1/03 with a central nacelle shall have on the underside around the central nacelle, handholds of sufficient capacity to enable all persons on board to hold on and/or clip on securely	Mu0,1,2,3,4
f)	In a catamaran with a central nacelle, it is recommended that each hull has an emergency refuge, accessible via a special hatch in the side of the hull nearest the vessel's central axis, which hatch may be opened and closed from the inside and outside	Mu0,1,2,3,4
3.07.3	A multihull of less than 12m (39.4ft) LOA shall either have escape hatches in compliance with OSR 3.07.2 (a)(b) and (c)or shall comply with OSR	Mu2,3,4
a)	3.07.3 (a) and (b): each hull which contains accommodation shall have, for the purpose of cutting an escape hatch, appropriate tools kept ready for instant use adjacent to the intended cutting site. Each tool shall be secured to the vessel by a line and a clip, and	Mu2,3,4
b)	in each hull at a station where an emergency hatch may be cut, the cutting line shall be clearly marked both inside and outside with an outline and the words ESCAPE CUT HERE	Mu2,3,4
3.08	Hatches & Companionways	
3.08.1	No hatch forward of the maximum beam station, other than a hatch in the side of a coachroof, shall open in such a way that the lid or cover moves into the open position towards the interior of the hull (excepting	**
3.08.2	ports having an area of less than 0.071m2 (110 sq in)). A hatch fitted forward of the maximum beam station, located on the side of the coachroof, opening into the interior of the boat ,and of area greater than 0.071m2 shall comply with ISO12216 design category A and be clearly labelled and used in accordance with the following instruction: "NOT TO BE OPENED AT SEA" Attention is drawn to SR 3.02.1	**
3.08.3	A hatch shall be:	
b)	permanently attached	**
UI	F	

3.08.4	180 degree capsize (inversion)	
a)	A companionway hatch shall: be fitted with a strong securing arrangement which shall be operable from the exterior and interior including when the yacht is inverted	**
b)	have any blocking devices:	**
i	capable of being retained in position with the hatch open or shut	**
ii	whether or not in position in the hatchway, secured to the yacht (e.g. by lanyard) for the duration of the race, to prevent their being lost overboard	**
iii	permit exit in the event of inversion	**
3.08.7	A companionway hatch extending below the local sheerline and shall comply with either (a) or (b):	Mu0,1,2,3,4
a)	be capable of being blocked off up to the level of the local sheerline, whilst giving access to the interior with the blocking devices (e.g. washboards) in place with a minimum sill height of 300 mm.	Mu0,1,2,3,4
b)		M 0 4 2 2
1 3.09	A companionway hatch shall be in compliance with ISO 11812 – Watertight cockpits and quick-draining cockpits to design category A Cockpits - Attention is Drawn to ISO 11812	Mu0,1,2,3
3.09.1	Cockpits shall be structurally strong, self-draining quickly by gravity at all angles of heel and permanently incorporated as an integral part of the hull.	**
3.09.2	Cockpits must be essentially watertight, that is, all openings to the hull must be capable of being strongly and rigidly secured	**
3.09.3	A bilge pump outlet pipe shall not be connected to a cockpit drain. See OSR 3.09.8 for cockpit drain minimum sizes	**
3.09.4	A cockpit sole shall be at least 2% LWL above LWL (or in IMS yachts first launched before 1/03, at least 2% L above LWL)	**
3.09.5	A bow, lateral, central or stern well shall be considered a cockpit for the purposes of OSR 3.09	**
3.09.6	In cockpits opening aft to the sea structural openings aft shall be not less in area than 50% maximum cockpit depth x maximum cockpit width.	**
3.09.7	Cockpit Volume	
i)	earliest of age or series date before April 1992	Extract MoMu2,3,4
	the total volume of all cockpits below lowest coamings shall not exceed 9% (LWL x maximum beam x freeboard abreast the cockpit).	EXITACL MOMUZ,3,4
ii)	earliest of age or series date April 1992 and after	
,	as above for the appropriate category except that "lowest coamings" shall not include any aft of the FA station and no extension of a cockpit aft of	Extract **
	the working deck shall be included in calculation of cockpit volume IMS-rated boats may instead of the terms LWL, maximum beam,	Extract **
3.09.8	freeboard abreast the cockpit, use the IMS terms L, B and FA. Cockpit Drains	
3.09.0	See OSR 3.09.1. Cockpit drain cross section area (after allowance for screens if fitted) shall be:-	
a)	in yachts with earliest of age or series date before 1/72 or in any yacht under 8.5m (28ft) LOA - at least that of 2 x 25mm diameter (one inch)	**
	unobstructed openings or equivalent	dede
b)	in yachts with earliest of age or series date 1/72 and later - at least that of 4 x 20mm diameter (3/4 inch) unobstructed openings or equivalent	**
3.10	Sea Cocks or Valves Sea cocks or valves shall be permanently installed on all through-hull openings below the waterline except integral deck scuppers, speed indicators, depth finders and the like, however a means of closing such openings shall be provided.	**
3.11	Sheet Winches Sheet winches shall be mounted in such a way that an operator is not	**
3.12	required to be substantially below deck. Mast Step	

	The heel of a keel stepped mast shall be securely fastened to the mast	**
	step or adjoining structure.	
3.13	Watertight Bulkheads	14.01221
3.13.1	multihulls also see OSR 3.05 A hull shall have either a watertight "crash" bulkhead within 15% of LOA	<i>Mu0,1,2,3,4</i> Mo0Mu0,1,2,3,4
3.13.1	from the bow and abaft the forward end of LWL, or permanently installed	1410014100,1,2,3,4
	closed-cell foam buoyancy effectively filling the forward 30% LOA of the	
	hull.	
3.13.2	Any required watertight bulkhead shall be strongly built to take a full	Mo0Mu0,1,2,3,4
	head of water pressure without allowing any leakage into the adjacent	
	compartment.	
3.14	Pulpits, Stanchions, Lifelines	
3.14.1	When due to the particular design of a multihull it is impractical to	Mu0,1,2,3,4,
	precisely follow Special Regulations regarding pulpits, stanchions, lifelines,	
	the regulations for monohulls shall be followed as closely as possible with	
3.14.2	the aim of minimising the risk of people falling overboard.	**
a)	Lifeline deflection shall not exceed the following: When a deflecting force of 4 kg/f (39.2 N) is applied to a lifeline midway	**
a)	between supports of an upper or single lifeline, the lifeline shall not	
	deflect more than 50mm. This measurement shall be taken at the widest	
	span between supports that are aft of the mast.	
b)	When a deflecting force of 4 kg/f (39.2 N) is applied midway between	**
•	supports of an intermediate lifeline of all spans that are aft of the mast,	
	deflection shall not exceed 120mm from a straight line between the	
	stanchions.	
3.14.3	The following shall be provided:	**
c)	lifelines (guardlines) supported on stanchions, which, with pulpits, shall	**
	form an effectively continuous barrier around a working deck for man- overboard prevention. Lifelines shall be permanently supported at	
	intervals of not more than 2.20m (86.6") and shall not pass outboard of	
	supporting stanchions	
d)	upper rails of pulpits at no less height above the working deck than the	**
,	upper lifelines as in Table 7.	
e)	Openable upper rails in bow pulpits shall be secured shut whilst racing	**
f)	Pulpits and stanchions shall be permanently installed. When there are	**
	sockets or studs, these shall be through-bolted, bonded or welded. The	
	pulpit(s) and/or stanchions fitted to these shall be mechanically retained	
	without the help of the life-lines. Without sockets or studs, pulpits and/or stanchions shall be through-bolted, bonded or welded.	
g)	The bases of pulpits and stanchions shall not be further inboard from the	**
9)	edge of the appropriate working deck than 5% of maximum beam or 150	
	mm (6 in), whichever is greater.	
h)	Stanchion or pulpit or pushpit bases shall not be situated outboard of a	**
•	working deck. For the purpose of this rule the base shall be taken to	
	include a sleeve or socket into which the tube is fitted but shall exclude a	
	baseplate which carries fixings into the deck or hull.	
i)	Provided the complete lifeline enclosure is supported by stanchions and	**
	pulpit bases effectively within the working deck, lifeline terminals and	
i۱	support struts may be fixed to a hull aft of the working deck Lifelines need not be fixed to a bow pulpit if they terminate at, or pass	**
j)	through, adequately braced stanchions set inside and overlapping the	
	bow pulpit, provided that the gap between the upper lifeline and the bow	
	pulpit does not exceed 150 mm (6 in).	
k)	Lifelines shall be continuous and fixed only at (or near) the bow and	**
	stern. However a bona fide gate shall be permitted in the lifelines on	
	each side of a yacht. Except at its end fittings, the movement of a lifeline	
	in a fore-and-aft direction shall not be constrained. Temporary sleeving in	
13	3.14.6 (c) shall not modify tension in the lifeline.	**
l)	Stanchions shall be straight and vertical except that:-	

İ	within the first 50 mm (2 in) from the deck, stanchions shall not be displaced horizontally from the point at which they emerge from the deck	**
ii	or stanchion base by more than 10 mm (3/8 in), and stanchions may be angled to not more than 10 degrees from vertical at any point above 50 mm (2 in) from the deck.	**
m)	It is strongly recommended that designs also comply to ISO 15085	**
3.14.4	5,	Mu0,1,2,3,4
	Multihulls	, , , ,
	The following shall be provided:-	
a)	on a trimaran - a bow pulpit on the main hull, with lifelines around the main hull supported on stanchions. The lifelines may be interrupted where there are nets or crossbeam wings outboard of the main hull	Mu0,1,2,3,4
b)	on a trimaran - where a net joins the base of a bow pulpit on the main hull, an additional lifeline from the top of the pulpit to the forward crossbeam at or outboard of the crossbeam mid-point.	Mu0,1,2,3,4
c)	on a trimaran - at a main or emergency steering position on an outrigger with or without a cockpit, lifelines protecting an arc of 3 meters diameter centred on the steering position. (When measuring between lifelines their taut, undeflected positions shall be taken for this purpose).	Mu0,1,2,3,4
d)	on a catamaran - lifelines from bow to stern on each hull and transverse lifelines to form an effectively continuous barrier around the working area for man-overboard prevention. The transverse lifelines shall be attached to bow and stern pulpits or superstructure. A webbing, strop or	Mu0,1,2,3,4

3.14.5 Lifeline Height, Vertical Openings, Number of Lifelines

transverse lifelines and the net.

rope (minimum diameter 6mm) shall be rove zig-zag between the

all	all	on yachts with intermediate lifelines the	**
		intermediate line shall be not less than 230	
		mm (9 in) above the working deck.	

3.14.6 Lifeline Minimum Diameters, Required Materials, Specifications

** Lifelines shall be of: a) ** - stranded stainless steel wire or - High Modulus Polyethylene (HMPE) (Dyneema®/Spectra® or Mo4,Mu** equivalent) rope (Braid on braid is recommended) The minimum diameter is specified in table 8 below. ** b) Stainless steel lifelines shall be uncoated and used without close-fitting ** c) sleeving, however, temporary sleeving may be fitted provided it is regularly removed for inspection.

d) When stainless wire is used, Grade 316 is recommended.

e) When HMPE (Dyneema®/Spectra®) is used, it shall be protected from Mo4,Mu**

Ī	•		ce with the manufacturer's		
f)	recommended procedures. A taut larvard of synthetic rope may be used to secure lifelines provided. **				
1)	A taut lanyard of synthetic rope may be used to secure lifelines provided ** the gap it closes does not exceed 100 mm (4 in). This lanyard shall be				
	replaced annually at	a minimum.	,

3.28	dependent on bulbs, appropriate spares. Engines, Generators, Fuel	
3.28.1	Propulsion Engines	**
a)	Engines and associated systems shall be installed in accordance with their manufacturers' guidelines and shall be of a type, strength, capacity, and installation suitable for the size and intended use of the yacht.	**
b)	An inboard propulsion engine when fitted shall: be provided with a permanently installed exhaust, coolant, and fuel supply systems and fuel tank(s); be securely covered; and have adequate protection from the effects of heavy weather.	**
c)	A propulsion engine required by Special Regulations shall provide a minimum speed in knots of (1.8 x square root of LWL in metres) or (square root of LWL in feet)	MoMu0,1,2,3
f) 	Boats of less than 12.0 m hull length may be provided with an inboard propulsion engine, or an outboard engine together with permanently installed fuel supply systems and fuel tank(s) may be used as an alternative.	Mu1,2,3
3.28.2	Generator A separate generator for electricity is optional. However, when a separate generator is carried it shall be permanently installed, securely covered, and shall have permanently installed exhaust, cooling and fuel supply	**
3.28.3	systems and fuel tank(s), and have adequate protection from the effects of heavy weather. Fuel Systems	
a)	Each fuel tank provided with a shutoff valve. Except for permanently	MoMu0,1,2,3
b)	installed linings or liners, a flexible tank is not permitted as a fuel tank. The propulsion engine shall have a minimum amount of fuel which may	MoMu0,1,2,3
	be specified in the Notice of Race but if not, shall be sufficient to be able to meet charging requirements for the duration of the race and to motor at the above minimum speed for at least 8 hours	
3.28.4 a)	Battery Systems When an electric starter is the only method for starting the engine, the yacht shall have a separate battery, the primary purpose of which is to start the engine	MoMu0,1,2,3
b)	All rechargeable batteries on board shall be of the sealed type from which liquid electrolyte cannot escape. Other types of battery installed on board	MoMu0,1,2,3
3.29	at 1/12 may continue in use for the remainder of their service lives. Communications Equipment, EPFS (Electronic Position-Fixing	**
	System), Radar, AIS Provision of GMDSS is unlikely to be mandatory for small craft during the	MoMu0,1,2,3
	term of the present Special Regulations.	
3.29.1	The following shall be provided:	**
a)	A marine radio transceiver (or if stated in the Notice of Race, an installed satcom terminal), and	MoMu0,1,2,3
i	an emergency antenna when the regular antenna depends upon the mast.	MoMu0,1,2,3
b)	When the marine radio transceiver is VHF:	MoMu0,1,2,2
i . .	it shall have a rated output power of 25W	MoMu0,1,2,3
ii <i>:::</i>	it shall have a masthead antenna, and co-axial feeder cable with not more than 40% power loss	MoMu0,1,2,3
iii	the following types and lengths of co-axial feeder cable will meet the requirements of OSR 3.29.1 (b)(ii): (a) up to 15m (50ft) - type RG8X ("mini 8"); (b) 15-28m (50-90ft) - type RG8U; (c) 28-43m (90-140ft) - type RG8U; (c) 2	MoMu0,1,2,3
	type 9913F (uses conventional connectors, available from US supplier Belden); (d) 43-70m) 140-230ft - type LMR600 (uses special connectors,	

	available from US supplier Times Microwave).	
İV	it should include channel 72 (an international ship-ship channel which, by	MoMu0,1,2,3
	common use, has become widely accepted as primary choice for ocean	
M	racing yachts anywhere in the world) VHF transceivers installed after 31 December 2015 shall be DSC capable	MoMu1,2,3
v vi	DSC capable VHF transceivers shall be programmed with an assigned	MoMu1,2,3
VI	MMSI (unique to the boat), be connected to a GPS receiver and be	1401401,2,3
	capable of making distress alert calls as well as sending and receiving a	
	DSC position report with another DSC equipped station	
e)	A hand-held marine VHF transceiver, watertight or with a waterproof	MoMu1,2,3,4
,	cover. When not in use to be stowed in a grab bag or emergency	
	container (see OSR 4.21) The handheld receiver should have Digital	
_	Selective Calling (DSC) and be equipped with GPS.	
f)	Independent of a main radio transceiver, a radio receiver capable of	**
.,	receiving weather bulletins	M-M-0 1 2 2
i)	An EPFS (Electronic Position-Fixing System) (e.g. GPS)	MoMu0,1,2,3
n)	An AIS Transponder The AIS Transponder shall share the masthead VHF antenna via a low	MoMu1,2 MoMu0,1,2
p)	loss AIS antenna splitter. An acceptable alternative is a dedicated AIS	1401400,1,2
	antenna that is a minimum of 381mm long, mounted with its base at	
	least 3 meters above the water, and fed with coax cable that has a	
	maximum 40% power loss.	
3.29.2	Yachts are reminded that no reflector, active or passive, is a guarantee of	**
	detection or tracking by a vessel using radar.	
a)	The attention of persons in charge is drawn to legislation in force or	**
	imminent affecting the territorial seas of some countries in which the	
	carriage of an AIS set is or will be mandatory for certain vessels including	
SECTIO	relatively small craft. N 4 - PORTABLE EQUIPMENT & SUPPLIES for the yacht	
	ter & fuel see OSR 3.21 and OSR 3.28)	
4.01	Sail Letters & Numbers	
4.01.1	Yachts which are not in an ISAF International Class or Recognized Class	**
	shall comply with RRS 77 and Appendix G as closely as possible, except	
	that sail numbers allotted by a State authority are acceptable.	
4.01.2	Sail numbers and letters of the size carried on the mainsail must be	**
4.00	displayed by alternative means when none of the numbered sails is set.	M-0.1 M-0.1.2.2.4
4.02 4.02.1	Hull marking (colour blaze) To assist in SAR location:-	Mo0,1,Mu0,1,2,3,4
4.02.1	Multihulls shall show on the underside, where they can be seen when	Mu0,1,2,3,4
7.02.2	inverted, an solid area of highly-visible colour (e.g. Day-Glo pink, orange,	Mu0,1,2,3,7
	or yellow) of at least 1m ²	
4.03	Soft Wood Plugs	
	Soft wood plugs, tapered and of the appropriate size, shall be attached or	**
	stowed adjacent to the appropriate fitting for every through-hull opening.	
4.04	Jackstays, Clipping Points and Static Safety Lines	
4.04.1	Jackstays shall be provided-	MoMu0,1,2,3
a)	attached to through-bolted or welded deck plates or other suitable and	MoMu0,1,2,3
	strong anchorage fitted on deck, port and starboard of the yacht's centre line to provide secure attachments for safety harness:-	
b)	comprising stainless steel 1 x 19 wire of minimum diameter 5 mm $(3/16)$	MoMu0,1,2,3
U)	in), high modulus polyethylene (such as Dyneema/Spectra) rope or	1101100,1,2,3
	webbing of equivalent strength;	
c)	which, when made from stainless steel wire shall be uncoated and used	MoMu0,1,2,3
•	without any sleeving;	
d)	20kN (2,040 kgf or 4,500 lbf) min breaking strain webbing is	MoMu0,1,2,3
_	recommended;	
<i>e)</i>	at least two of which should be fitted on the underside of a multihull in	Mu0,1,2,3
4042	case of inversion.	
4.04.2	Clipping Points:-	

	shall be provided-	
a)	attached to through-bolted or welded deck plates or other suitable and	MoMu0,1,2,3
	strong anchorage points adjacent to stations such as the helm, sheet	
b)	winches and masts, where crew members work for long periods:- which, together with jackstays and static safety lines shall enable a crew	MoMu0,1,2,3
D)	member-	1401410,1,2,3
i	to clip on before coming on deck and unclip after going below;	MoMu0,1,2,3
ii	whilst continuously clipped on, to move readily between the working	MoMu0,1,2,3
	areas on deck and the cockpit(s) with the minimum of clipping and	
	unclipping operations.	
c)	The provision of clipping points shall enable two-thirds of the crew to be	MoMu0,1,2,3
d١	simultaneously clipped on without depending on jackstays In a trimaran with a rudder on the outrigger, adequate clipping points	Mun 1 2 2
d)	shall be provided that are not part of the deck gear or the steering	Mu0,1,2,3
	mechanism, in order that the steering mechanism can be reached by a	
	crew member whilst clipped on.	
<i>e)</i>	Warning - U-bolts as clipping points - see OSR 5.02.1(a)	MoMu0,1,2,3
4.05	Fire Extinguishers	
4 NE 1	Shall be provided as follows:	**
4.05.1	Fire extinguishers, at least two, readily accessible in suitable and different parts of the yacht	71-71-
4.05.2	Fire Extinguishers, at least two, of minimum 2kgs each of dry powder or	MoMu0,1,2,3
	equivalent	
4.05.4	A fire blanket adjacent to every cooking device with an open flame	**
4.06	Anchor(s)	date
4.06.1	An anchor or anchors shall be carried according to the table below:	**
a) i	The following anchors shall be provided For yachts of 8.5 m LOA (28 ft) and over there shall be 2 anchors	MoMu1,2,3
•	together with a suitable combination of chain and rope, all ready for	1 101 101,2,5
	immediate use	
ii	For yachts under 8.5 m LOA (28 ft) there shall be 1 anchor together with	MoMu1,2,3
4.07	a suitable combination of chain and rope, all ready for immediate use	
4.07 4.07.1	Flashlight(s) and Searchlight(s) The following shall be provided:-	
a)	A watertight, high-powered searchlight, suitable for searching for a	**
/	person overboard at night and for collision avoidance with spare batteries	
	and bulbs, and	
b)	a watertight flashlight with spare batteries and bulb	**
4.08	First Aid Manual and First Aid Kit	** **
4.08.1	A suitable First Aid Manual shall be provided In the absence of a National Authority's requirement, the latest edition of	**
	one of the following is recommended:-	
<i>b)</i>	First Aid at Sea, by Douglas Justins and Colin Berry, published by Adlard	MoMu2,3,4
,	Coles Nautical, London	
c)	Le Guide de la medecine a distance, by Docteur J Y Chauve, published by	**
d)	Distance Assistance BP33 F-La Baule, cedex, France.	MaMu 2 2 4
d)	'PAN-PAN medico a bordo' in Italian edited by Umberto Verna. www.panpan.it	MoMu2,3,4
e)	Skipper's Medical Emergency Handbook by Dr Spike Briggs and Dr	**
٠,	Campbell Mackenzie www.msos.org.uk	
4.08.2	A First Aid Kit shall be provided	**
4.08.3	The contents and storage of the First Aid Kit should reflect the guidelines	**
	of the Manual carried, the likely conditions and duration of the passage,	
4.09	and the number of people aboard the yacht. Foghorn	
マ・レジ	A foghorn shall be provided	**
4.10		
	Radar Reflector	
4.10.1	A passive radar reflector shall be carried with:	**
4.10.1		**

	Octahederal rectangular plates of minimum diagonal dimension 405 mm	
	(16") or a non-Octahederal reflector with a documented Root Mean Square	
	minimum Radar Cross Section (RCS) area of 2 m2 from 0-360 degrees in	
	azimuth and +/- 20 degrees in heel.	
4.11	Navigation Equipment	
4.11.1	Charts	
	Navigational charts (not solely electronic), light list and chart plotting	**
	equipment shall be provided	
4.12	Safety Equipment Location Chart	**
	A safety equipment location chart in durable waterproof material shall be displayed in the main accommodation where it can best be seen, clearly	ጥጥ
	marked with the location of principal items of safety equipment.	
4.13	Echo Sounder or Lead Line	
4.13.1	An echo sounder or lead line shall be provided	MoMu1,2,3,4
4.14	Speedometer or Distance Measuring Instrument (log)	, ,-,
	A speedometer or distance measuring instrument (log) shall be provided	MoMu0,1,2,3
4.15	Emergency Steering	
4.15.1	Emergency steering shall be provided as follows:	
a)	except when the principal method of steering is by means of an	MoMu0,1,2,3
	unbreakable metal tiller, an emergency tiller capable of being fitted to the	
b)	rudder stock; crews must be aware of alternative methods of steering the yacht in any	MoMu0,1,2,3
U)	sea condition in the event of rudder loss. At least one method must have	1401410,1,2,3
	been proven to work on board the yacht. An inspector may require that	
	this method be demonstrated.	
4.16	Tools and Spare Parts	
	Tools and spare parts, including effective means to quickly disconnect or	**
	sever the standing rigging from the hull shall be provided.	
4.17	Yacht's name	**
	Yacht's name shall be on miscellaneous buoyant equipment, such as	
4.18	lifejackets, cushions, lifebuoys, lifeslings, grab bags etc. Marine grade retro-reflective material	
7.10	Marine grade retro-reflective material shall be fitted to lifebuoys,	**
	lifeslings, liferafts and lifejackets. See OSRs 5.04, 5.08.	
4.19	EPIRBs	
4.19.1	A 406 MHz EPIRB shall be provided	MoMu1,2
<i>b)</i>	It is recommended that a 406 MHz EPIRB should include an internal GPS,	MoMu0,1,2
,	and also a 121.5MHz transmitter for local homing.	
c)	Every EPIRB shall be registered with the appropriate authority associated	MoMu0,1,2
	with the country code in the hexadecimal identification (15 Hex ID) of the beacon. A beacon can be registered online with the Cospas-Sarsat IBRD	
	if the country does not provide a registration facility and the country has	
	allowed direct registration in the IBRD	
d)	Every ship's 406 MHz EPIRB shall be water and manually activated.	MoMu0,1,2
e)	A list of registration numbers of 406 EPIRBs should be notified to event	MoMu0,1,2
	organizers and kept available for immediate use.	
f)	Consideration should be given to the provision of a locator device (e.g. an	MoMu0,1,2
	"Argos" beacon) operating on non - SAR frequencies, to aid salvage if a	
4.20	yacht is abandoned. Liferafts	MaMuo 1 2
4.20 4.20.1	Liferaft Construction and Packed Equipment	MoMu0,1,2
a)	One or more inflatable liferafts shall be provided with a total capacity to	MoMu1,2
~/	accommodate at least the total number of people on board.	. 10. 10.1/2
b)	Each liferaft provided shall comply with either:-	
i	SOLAS LSA code 1997 Chapter IV or later version, or	MoMu1,2
ii	ISO 9650-1:2005, Part I, Type I, Group A or	MoMu1,2
iii	ISAF liferaft manufactured before 01/16 until replacement is due at end	MoMu1,2
	of serviceable life, or	

iv ORC liferaft manufactured before the end 01/03 until replacement is due MoMu1,2 at end of serviceable life.

4.20.2 Minimum Liferaft Equipment

a) A SOLAS liferaft shall contain as a minimum a SOLAS A pack; MuMo0,1,2

c) An ISO 9650 liferaft shall contain as a minimum Pack 2 (less than 24 hour MuMo2 pack);

The minimum contents of the ISO liferaft equipment packs are listed MoMu1,2 below. Not all items are necessarily packed within the liferaft. Some items are permitted to be carried within an accompanying waterproof grab bag which shall be in a readily accessible location:

TABLE 14

Equipment	Pack 1	Pack 2	In liferaft	In liferaft
	>	<		or in
	24h	24h		grab bag
Portable buoyant baler easily operable by hand	1	1	Χ

Food per person	10	0		Χ
	000			
	kJ			
* Drinking water in the grab bag (if any) may be				
replaced with a desalinator device				

4.20.3 Liferaft Packing and Stowage

a) Each liferaft shall be packed either in:-

MoMu0,1,2 MoMu0,1,2 MoMu0,1,2

a rigid container securely stowed on the working deck, in the cockpit or in

	an open space; or:-	
ii	a rigid container or valise securely stowed in a dedicated weather tight locker containing liferaft and abandon ship equipment only which is readily accessible and opens onto the cockpit or working deck, or	MoMu0,1,2
b)	transom In a yacht with age or series date before June 2001, a liferaft may be packed in a valise not exceeding 40kg securely stowed below deck	MoMu1,2
c)	adjacent to a companionway. Liferaft stowage on a multihull and a monohull with moveable ballast shall be such that each liferaft may be readily removed and launched whether	MoMu0,1,2
d)	or not the yacht is inverted. The end of each liferaft painter line should be permanently made fast to a strong point on board the yacht.	MoMu0,1,2
4.20.4	Liferaft Launching	MoMu0,1,2
a)	Each raft shall be capable of being got to the lifelines or launched within 15 seconds.	MoMu0,1,2
b)	Each liferaft of more than 40kg weight should be stowed in such a way that the liferaft can be dragged or slid into the sea without significant	MoMu0,1,2
	lifting	
4.20.5	Liferaft Servicing	MoMu0,1,2
a)	Liferafts based on type are to be serviced at a service station approved by the manufacturer at the following maximum intervals:	MoMu0,1,2
i	SOLAS liferafts annually.	
ii	ISO 9650 canister packed liferafts no less frequently than every 3 years.	
iii	ISO 9650 valise packed liferafts no less frequently than 3 years except	
	that hired valise liferafts shall be serviced annually.	
iv	ISAF liferafts annually	
V	ORC liferafts annually	
b)	Servicing certificates (original or a copy) shall be kept on board.	MoMu0,1,2
4.21.2	Grab Bags to Accompany Liferafts	14-14-0 1 2
a)	A yacht is recommended to have for each liferaft, a grab bag with the following minimum contents. A grab bag should have inherent flotation, at least 0.1 m^2 area of fluorescent orange colour on the outside, should be marked with the name of the yacht, and should have a lanyard and clip.	MoMu0,1,2
	•	
b)	Note: it is not intended to duplicate in a grab bag items required by other OSRs to be on board the yacht - these recommendations cover only the stowage of those items	MoMu0,1,2
<i>b)</i> 4.21.3	OSRs to be on board the yacht - these recommendations cover only the stowage of those items	MoMu0,1,2
	OSRs to be on board the yacht - these recommendations cover only the	MoMu0,1,2 MoMu1,2
4.21.3	OSRs to be on board the yacht - these recommendations cover only the stowage of those items Grab Bag Recommended Contents	
4.21.3 <i>a) b)</i>	OSRs to be on board the yacht - these recommendations cover only the stowage of those items Grab Bag Recommended Contents 2 red parachute and 2 red hand flares and cyalume-type chemical light sticks (red flares compliant with SOLAS) watertight hand-held EPFS (Electronic Position-Fixing System) (eg GPS) in at least one of the grab bags carried by a yacht	MoMu1,2 MoMu1,2

least 50% of the area of the sail (up to a maximum diameter of 3m) added on each side; and also that a rotating wing mast should have a highly-visible coloured patch on each side. A storm sail purchased after January 2014 shall have the material of the body of the sail a highlyvisible colour. it is strongly recommended that the storm trysail should either be made ** of or have a patch of highly visible colour. 4.26.3 **Materials** aromatic polyamides, carbon and similar fibres shall not be used in a ** trysail or storm jib but spectra/dyneema and similar materials are permitted. it is strongly recommended that a heavy-weather jib does not contain aromatic polyamides, carbon and similar fibres other than spectra/dyneema. The following shall be provided:-4.26.4 sheeting positions on deck for each storm and heavy-weather sail; ** ** for each storm or heavy-weather jib, a means to attach the luff to the stay, independent of any luff-groove device. A heavy weather jib shall have the means of attachment readily available. A storm jib shall have the means of attachment permanently attached; Storm and heavy weather jib areas shall be calculated as: $(0.255 \times 1)^*$ To apply to sails made in January 2012 and after. a storm trysail which shall be capable of being sheeted independently of MoMu 0,1,2 the boom with trysail area not greater than 17.5% mainsail hoist (P) x mainsail foot length (E). The storm trysail area shall be measured as (0.5 x leech length x shortest distance between tack point and leech). The storm trysail shall have neither headboard nor battens, however a storm trysail is not required in a yacht with a rotating wing mast which can adequately substitute for a trysail. The method of calculating area applies to sails made in January 2012 and after. the storm trysail as required by OSR 4.26.4 (c) shall have the yacht's sail Extract MoMu 0,1,2 number and letter(s) shall be placed on both sides of the trysail (or on a rotating wing mast as substitute for a trysail) in as large a size as practicable; a storm jib of area not greater than 5% height of the foretriangle MoMu0,1,2 squared, with luff maximum length 65% height of the foretriangle; a heavy-weather jib (or heavy-weather sail in a yacht with no forestay) of area not greater than 13.5% height of the foretriangle squared; in the case of a yacht with an in-mast furling mainsail, the storm trysail MoMu0,1,2 must be capable of being set while the mainsail is furled. A trysail track should allow for the trysail to be hoisted quickly when the MoMu0,1,2 mainsail is lowered whether or not the mainsail is stowed on the main boom. It is strongly recommended that a boat has either a dedicated trysail track permanently installed with the entry point accessible to a person

standing on the main deck or coachroof, or a permanently installed stay

MoMu0,1,2

It is strongly recommended that an inner forestay is provided either

permanently installed or readily set up, on which to set the storm jib.

on which to hank the trysail.

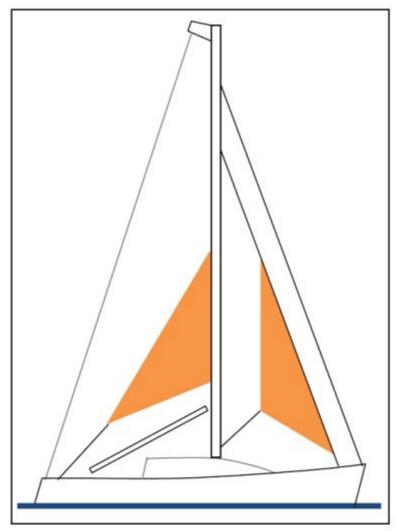

Figure 3 4.28 **Man Overboard Alarm** MoMu0 4.28.2 A yacht shall be equipped with an EPFS (e.g. GPS) capable of recording a MoMu1,2 man overboard position within 10 seconds and monitoring that position. **SECTION 5 - PERSONAL EQUIPMENT** 5.01 Lifejacket ** 5.01.1 Each crew member shall have a lifejacket as follows:-** a) In accordance with ISO 12402 – 3 (Level 150) or equivalent, including EN i 396 or UL 1180 ** Lifejackets manufactured after 1 January 2012 shall be in accordance ii with ISO 12402-3 (Level 150) and shall be fitted with:-• an emergency light in accordance with either ISO 12402-8 or SOLAS LSA code 2.2.3.

- a sprayhood in accordance with ISO 12402-8.
- a full deck safety harness in accordance with ISO 12401 (ISO 1095) including a crotch or thigh strap (holding down device) as specified in ISO 12401 (ISO 1095).
- If of an inflatable type either
- (a) automatic, manual and oral inflation or
- (b) manual and oral inflation

Notes: ISO 12402 requires Level 150 lifejackets to be fitted with a mandatory whistle and retro-reflective material. Also, when fitted with a safety harness, ISO 12402 requires that this shall be the full safety harness in accordance with ISO 12401. Any equivalent lifejacket shall have equal requirements.

Persons of larger than average build are generally more buoyant than those of average build and so do not require a lifejacket with greater levels of flotation. Wearing a Level 275 lifejacket may hamper entry into

	liferafts.	
b)	fitted with either a crotch strap(s) / thigh straps or a full safety harness in	**
	accordance with ISO 12401,	
	Note: The function of lifejacket crotch/thigh straps is to hold the	
	buoyancy element down. A crew member before a race should adjust a	
	lifejacket to fit then retain that lifejacket for the duration of the race.	
c)	Correct adjustment is fundamental to the lifejacket functioning correctly. fitted with a lifejacket light in accordance with SOLAS LSA code 2.2.3	**
c)	(white, >0.75 candelas, >8 hours),	
d)	if inflatable have a compressed gas inflation system,	**
e)	if inflatable, regularly checked for gas retention,	**
f)	compatible with the wearer's safety harness,	**
g)	clearly marked with the yacht's or wearer's name,	**
j)	It is strongly recommended that a lifejacket has a splashguard / sprayhood See ISO 12402 - 8,	MoMu1,2,3,4
5.01.4	The person in charge shall personally check each lifejacket at least once annually.	**
5.02	Safety Harness and Safety Lines (Tethers)	MoMu0,1,2,3
5.02.1	Each crew member shall have a harness and safety line that complies	MoMu0,1,2,3
	with ISO 12401 or equivalent with a safety line not more than 2m in length.	
	Harnesses and safety lines manufactured prior to Jan 2010 shall comply with either ISO 12401 or EN 1095.	
	Harnesses and safety lines manufactured prior to Jan 2001 are not permitted.	
a)	Warning it is possible for a plain snaphook to disengage from a U bolt if the hook is rotated under load at right-angles to the axis	MoMu0,1,2,3
	of the U-bolt. For this reason the use of snaphooks with positive	
E 02 2	locking devices is strongly recommended. At least 20% of the grow shall each in addition to the above he provided	MaMun 1 2 2
5.02.2	At least 30% of the crew shall each, in addition to the above be provided with either:-	MoMu0,1,2,3
a)	a safety line not more than 1m long, or	MoMu0,1,2,3
b)	a mid-point snaphook on a 2m safety line	MoMu0,1,2,3
5.02.3	A safety line purchased in January 2001 or later shall have a coloured flag	MoMu0,1,2,3
	embedded in the stitching, to indicate an overload. A line which has been overloaded shall be replaced as a matter of urgency.	
5.02.4	A crew member's lifejacket and harness shall be compatible	MoMu0,1,2,3
5.02.5	It is strongly recommended that:-	MoMu0,1,2,3
a)	static safety lines should be securely fastened at work stations;	MoMu0,1,2,3
<i>b)</i>	A harness should be fitted with a crotch strap or thigh straps.	MoMu0,1,2,3
<i>c)</i>	to draw attention to wear and damage, stitching on harness and safety lines should be of a colour contrasting strongly with the surrounding	MoMu0,1,2,3
-0	material;	14-14-0 1 2 2
d)	snaphooks should be of a type which will not self-release from a U-bolt (see OSR 5.02.1(a)) and which can be easily released under load (crew	MoMu0,1,2,3
	members are reminded that a personal knife may free them from a safety	
-1	line in emergency);	MaM0 1 2 2
<i>e)</i>	a crew member before a race should adjust a harness to fit then retain that harness for the duration of the race.	MoMu0,1,2,3
5.02.6	Warning - a safety line and safety harness are not designed to tow a	**
	person in the water and it is important that the shortest safety line length	
	possible be used with a harness to minimise or eliminate the risk of a	
	person's torso becoming immersed in water outside the boat, especially	
	when working on the foredeck. 1m safety lines or the midpoint snaphook	
	on a 2m line should be used for this purpose. The diligent use of a	
	properly adjusted safety harness and the shortest safety line practicable	
	is regarded as by far the most effective way of preventing man overboard incidents.	
	IIICIACITO.	

5.04	Foul Weather Suits	
<i>b)</i>	it is recommended that a foul weather suit should be fitted with marine-	**
-	grade retro-reflective material, and should have high-visibility colours on	
	its upper parts and sleeve cuffs. See OSR 4.18	
5.07	Survival Equipment	Mo0,1,2Mu0,1,2,3,4
d)	Attention is drawn to the value of keeping on the person a combined	MoMu0,1,2
•	406MHz/121.5MHz PLB when on deck: this may aid location in a man	
	overboard incident independent of the equipment carried by the parent	
	vessel	
e)	Where possible every PLB shall be registered with the appropriate	MoMu0,1,2
	authority associated with the country code in the hexadecimal	
	identification (15 Hex ID) of the beacon. A beacon can be registered	
	online with the Cospas-Sarsat IBRD if the country does not provide a	
	registration facility and the country has allowed direct registration in the	
	IBRD.	
5.07.2	It is strongly recommended that an immersion suit should be supplied to	Mu1,2,3,4
	each crew member in a multihull in conditions where there is a potential	
	for hypothermia	
SECTIO	N 6 - TRAINING	
6.01	At least 30% but not fewer than two members of a crew,	MoMu1,2
	including the skipper shall have undertaken training within the	
	five years before the start of the race in both 6.02 topics for	
	theoretical sessions, and 6.03 topics which include practical,	
	hands-on sessions.	
6.01.3	It is strongly recommended that all crew members should undertake	MoMu1,2
	training as in OSR 6.01 at least once every five years	
6.01.4	Except as otherwise provided in the Notice of Race, an in-date certificate	MoMu0,1,2
	gained at an ISAF Approved Offshore Personal Survival Training course	
	shall be accepted by a race organizing authority as evidence of	
	compliance with Special Regulation 6.01. See Appendix G - Model	
	Training Course, for further details.	
6.02	Training Topics for Theoretical Sessions	
6.02.1	care and maintenance of safety equipment	MoMu0,1,2
6.02.2	storm sails	MoMu0,1,2
6.02.3	damage control and repair	MoMu0,1,2
6.02.4	heavy weather - crew routines, boat handling, drogues	MoMu0,1,2
6.02.5	man overboard prevention and recovery	MoMu0,1,2
6.02.6	giving assistance to other craft	MoMu0,1,2
6.02.7	hypothermia	MoMu0,1,2
6.02.8	SAR organisation and methods	MoMu0,1,2
6.02.9	weather forecasting	MoMu0,1,2
6.03	Training Topics for Practical, Hands-On Sessions	MoMu0,1,2
6.03.1	liferafts and lifejackets	MoMu0,1,2
6.03.2	fire precautions and use of fire extinguishers	MoMu0,1,2
6.03.3	communications equipment (VHF, GMDSS, satcomms, etc.)	MoMu0,1,2
6.03.4	pyrotechnics and EPIRBs	MoMu0,1,2 **
6.04	Routine Training On-Board	**
6.04.1	It is recommended that crews should practice safety routines at	
	reasonable intervals including the drill for man-overboard recovery At least one member of the crew	MoMu2
	shall have a first aid certificate completed within the last five years	i ioriuz
	meeting any of the following requirements:	
i	A certificate listed on the ISAF website www.sailing.org/specialregs of	
1	MNA recognised courses	
ii	STCW 95 First Aid Training complying with A-VI/1-3 – Elementary First	
"	Aid or higher STCW level	
6.05.4	An example model first aid training course is included in Appendix N.	**
