LEGEND LUX

These Made in France regulators are considered by the diving community as the best regulators on the market!

The Legend series of regulators are more compact and light. Hot water, cold water, for women you will find one that covers your needs. The comfort in mouth and the ease of breath remain unequalled.

FIRST STAGE:

- T-shape over balanced first stage for superior performance at depth.
- Environmental dry chamber creates a first stage completely sealed, keeping water and contaminants out of the 1st stage.
- New Common rail injection chamber, whatever the outlet used the gas travels the same distance, that improves the breathing comfort.
- The 2 high pressure ports and 4 intermediate pressure ports 2 are angled for optimum hose configuration. They allow the use of HP pressure transmitter for dive computers.
- Auto Closure Device (ACD). The ACD system is a self-sealing device. Once it is disconnected from

the valve, the first stage is protected from the environment. The ACD is the best protection against water entry. It is a safety feature as the water may damage the regulator itself and the accessories. The ACD does not reduce the breathing performance; it allows the first stage to maintain peak performance.

- New DIN and yoke screw, the ergonomic design allows an easy unscrewing even with wet hands.
- New integrated dust cap for DIN and yoke connection.

SECOND STAGE:

- Pneumatically balanced second stage makes this a superior breath at all depth and conditions.
- New MBS adjustment (Master Breathing System). This ergonomic adjustment knob allows on one full turn to adjust the injection and to optimize at the same time the cracking effort.
- New side openings to improve stability of the regulator during a rapid descent head first or swimming against current
- New exhaust tee to reduce the exhalation effort.

129650	Legend Lux ACD din 300 B	0,86 kg

LEGEND LUX SUPREME

The Legend LUX supreme is the cold water version of the Legend LUX.

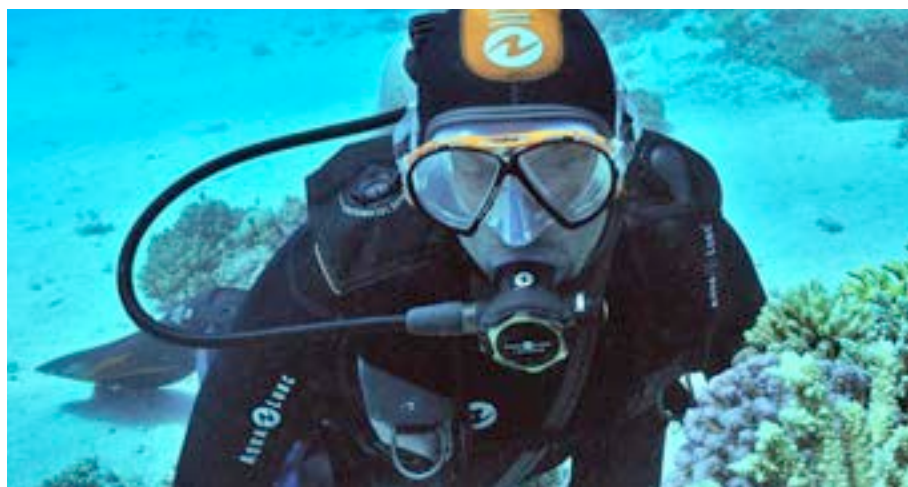

- This version Supreme version of the Legend LUX is recommended when water temperature dips below 10°C.
- The Legend LUX Supreme second stage is delivered with the same first stage as the Legend LUX

but features:

- A specific adjustment which allows passing the stringent CE standard for coldwater performance.
- A lip shield to keep lips warm
- An integrated heat exchanger

REF	DESIGNATION	WEIGHT

LEGEND

The Legend is the entry model of the range of this new 2012 series. As all the new models, it is more compact and light..

First stage:

- Same specifications as legend LX

Second stage:

- Pneumatically balanced second stage makes this a superior breath at all depth and conditions.
- New venture lever easy to use, prevents the start in free flowing.
- New side openings to improve stability of the regulator during a rapid descent head first or swimming against current
- New exhaust tee to reduce the exhalation effort.

REF	DESIGNATION	WEIGHT
129600	Legend ACD	1 kg
129610	Legend ACD din 300 B	0,87 kg

LEGEND SUPREME

The Legend supreme is the cold water version of the Legend.

- This Supreme version of the Legend is recommended when water temperature dips below 10°C.
- The Legend Supreme second stage is delivered with the same first stage as the Legend but features:

- A specific adjustment which allows passing the stringent CE standard for coldwater performance.
- A lip shield to keep lips warm
- An integrated heat exchanger

LEGEND SUPREME NITROX/O2

All the features of the Legend Supreme but with a Nitrox connection.

REF	DESIGNATION	WEIGHT
129765	Legend Supreme Nitrox/O2	1,2 kg

LEGEND GLACIA

This regulator is specially designed for very cold water and under ice diving. To resist freezing the Glacia offers three levels of heat exchange. The first stage, the hose and the second stage are equipped with heat exchangers that allow cold extraction. This patented system allows to push further the limits of icing. In extreme conditions the new Glacia resists almost two times longer than its predecessor.

The new geometry of the blades of the first stage provides a better flow of water that warms the body. Associated with other exchangers, the inspired air is 25% warmer than on the original model. The new geometry of the front cover on the second stage offers a 25% gain on the inspiration peak and helps providing a work of breath that does not exceed 0.9 J / L.

REF	DESIGNATION	WEIGHT
129860	Legend Glacia ACD	1,4 kg
129870	Legend Glacia ACD din 300 B	1,2 kg

MIKRON

Aqua Lung has once again raised the bar on regulator design with the release of Mikron – the smallest and lightest weight regulator on the market today. Weighing in at just 26 oz. (din) and 31 oz. (yoke), the traveling diver will benefit tremendously. Even more amazing is that performance is not sacrificed by the extreme compactness of the regulator. Its balanced 1st and 2nd stages produce exceptional breathing performance.

FEATURES OF MIKRON:

- Compact dimensions and low weight blend comfort with a unique diving experience
- A new, braided hose, weighing less than 5 oz., provides flexibility, comfort and excellent packability
- The Mikron is available in two colors including the

- new pink vanilla that matches the new Pearl i3 BC
- The pink vanilla version features a new, smaller Comfo-bite™ mouthpiece designed for smaller mouths. If you are one of those that doesn't care for the Comfo-bite's™ silicone bridge which fits across the upper palate, it can now be detached
- The first stage is a balanced diaphragm type that sports one HP port (7/16) and 4 MP ports (3/8)
- The second stage is pneumatically balanced to provide top performance
- The second stage has an adjustment knob that allows the diver to optimize the opening effort. In the "Mini" position, the opening effort is increased, which is ideal for avoiding free flows. In the "Maxi" position, the inhalation effort is reduced, reducing the work of breathing
- The reduced size and weight makes the Mikron the ideal choice for children and young adults

REF	DESIGNATION	WEIGHT
127940	Mikron Blue - yoke	0,89 kg
127950	Mikron Blue - din 300 B	0,74 kg
127920	Mikron Lady - yoke	0,89 kg
127930	Mikron Lady - din 300 B	0,74 kg

MISTRAL

This regulator, while at first offering a nostalgic appeal, incorporates all the developments and refinements of a modern regulator and allows today's diving in complete safety. With its multiple MP and HP ports the diver can connect the full range of peripheral elements: octopus, submersible pressure gauge, BC and dry suit inflators.

The Mistral first stage can be supplied with either a 232 bar yoke fitting, a DIN 300 bar fitting or with Nitrox/O2 M26x2 to allow the full range of configuration. The Mistral, based on a well-known tried and tested design, will be easy to maintain in complete safety. The Mistral first stage is based on the highly regarded Titan.

REF	DESIGNATION	WEIGHT
125 900	Mistral	1,9 kg
125 901	Mistral din 300 B	1,8 kg

TITAN CLASSIC & QUICK CONNECT

Titan is available with two versions of the second stage, with or without Quick Connect. Cosmetics has been completely redesigned to offer a regulator range with the same family spirit. The "Titan" series have more than 10 years of experience. They are compact and lightweight, they offer for that price level an excellent breathing performance.

- Polyurethane protector for impact protection

SECOND STAGE:

- Non balanced second stage with a Quick Connect of the hose and an online venturi vane
- Side openings, avoid free flowing issues
 - Easy disassembly without tools

QC SECOND STAGE:

- Non balanced second stage with a Quick Connect of the hose and an online venturi vane
- Side openings, avoid free flowing issues
 - Left/Right hand second stage
 - Reinforced ABS case with online venturi vane

FIRST STAGE:

- Type: Balanced diaphragm mechanism with T shape
- Material: stamped brass with multi-coating chrome
- Removable stainless steel crown
- Optimised MP & HP outlets: 4 MP outlets and 2 HP outlets

TITAN LX & TITAN LX SUPREME

FIRST STAGE:

- ACD System
- Type: Balanced Diaphragm
- Mechanism: T Shape
- Material: Forges brass and multi-coating chrome
- Removable crown: Yes – Stainless Steel
- Common parts: Legend+Kronos+Mikron
- Flow rate at 200 b: 1450 l/min (VS 1400 l/min)
- Connection: DIN 300 B or Yoke 232 B
- Optimized 4 MP & 2 HP ports layout: Yes

SECOND STAGE

- Type: Balanced demand valve
- Mechanism: Down stream poppet
- Material: silicone for mouthpiece, diaphragm and exhaust valve – ABS for box bottom – Polyurethane for purge cover
- Cold water: No (Yes for Supreme)
- Sensitivity adjustment: No
- Venturi adjustment: Yes
- Cracking effort: between 2,5 to 3,5 mbar
- Hose length: 730 mm
- Common parts: Yes

- SUPREME: all the features of the Titan LX in a cold version. Cracking effort: between 3,3 to 4,3 mbar.

TO ASSEMBLE AN OCTOPUS ON A SEPARATLY SOLD FIRST STAGE - RULES OF ASSEMBLY

regulators

Separated first stages are not intended for resale. They are available only to create a complete regulator by using an Aqua Lung Octopus. An other use is not recognized by Aqua Lung, if such was the case the responsibility of Aqua Lung could not be engaged. Please respect the following rules before assembling a first stage to an Aqua Lung Octopus:

- Do not create an assembly unit which does not comply with the EEC standards concerning Personal Protective Equipment. Please adhere to the following:
 - Do not mix first and second stages of different brands. The Aqua Lung first stage has to be connected to an Aqua Lung Octopus.
 - Follow the authorized assembly instructions as per

the attached table, in order to ensure both technical compatibility between the first and second stage, and that the assembly of first and second stages has complied with CE certification. The table also states the certification level of the created assembly unit: CE for the cold water regulators or CE ≥10°C for the warm water regulators.

- Before assembling the Octopus to the first stage, ensure that the Octopus has been fully serviced.
- The assembly has to be carried out by an officially trained technician and in accordance with the reassembly instructions and the final testing instructions given in our technical manuals for first and second stage. of particular importance are the following final checks of the created assembly unit:

the Medium pressure tolerance of the first stage, the cracking effort of the second stage, the flow rate of the second stage and the waterproofing of the complete regulator

- Respect the torque range values of the different elements in accordance with the technical manuals.
- Record the creation of the regulator by registering the date, the model assembled as well as the serial numbers of the first and the second stages.
- The Regulator User Manual on CD should be given to the end user in order to advise the usage limitations of the regulator (cold water, warm water).

AXIOM i3

The Axiom i3 is our most comfortable and easy-to-use BC yet. It is a feature-rich, ADV style, wraparound jacket that incorporates the innovative i3 inflation / deflation system (patented). The integrated Wrapture™ harness system (pat. pend.) allows you to stand up straight in total comfort while the cylinder remains perfectly vertical and pulled in close. Diving has never been this comfortable.

CHARACTERISTICS:

The PowerGrip™ tank band and buckle system makes its debut on the Axiom i3. This strong, secure system makes attachment to a cylinder easier than ever before. Gone are the days of complicated web weaving and you don't have to worry about pinching your fingers with the innovative finger saver feature (pat. pend.)

- The Wrapture™ harness system, using the shoulder swivel buckles (patented) and a customized back plate, provides comfort and stability while preventing "ride-up" at the surface
- The i3 Control System (patented) provides single touch control for inflation and deflation.
- The low profile flat e-valves (pat. pend.) all open simultaneously when the i3 lever is depressed.
- The GripLock™ tank band and buckle system provides security and easy change out of cylinders.
- SureLock II weight pouches (patented) provide a simple, single-pull release. Loading is as simple as insert and "click".
- Pull down oral inflator is easy to deploy, use and stow.

- A bladder retraction system is used to pull in the sides of the bladder during deflation
- An adjustable chest strap can be raised or lowered on a rail system.
- A scooped octo-pocket on the top, front of the right lobe makes it easy to stow and deploy an octopus. The octopus remains visible and accessible throughout the dive.
- Some divers may find it useful to run their instruments behind the left pocket and out the scooped opening on the top, front of the lobe.
- Pocket within a pocket: A small security pocket is found on the flap of a larger drop-down pocket
- Knife attachment points are found on the left lobe
- Features 5 stainless steel D-rings and 2 plastic D-rings for all of your accessories.
- Right shoulder pull dump
- Rolled neck collar for comfort

Type of BC: Weight-integrated, ADV style, wrap-around jacket with i3 Control System

Fabrics: Air cell is 500D Armor™ Cordura®, Armor X™ color panels, 1050D ballistic nylon, Titanium mesh

Ditchable weights:

XS • ML hold up to 20lbs / 9 kg,
LG • XXL hold up to 30 lbs / 13.5 kg

Non-Ditchable Trim Weight: All sizes hold up to 10 lbs / 4.5 kg of weight in two pockets on tank band

Lift Capacity (lbs/ltr): XS-31/130, S-31/130, M-36/160, ML-41/180, L-44/190, XL-47/200, XXL-54/240

PRO LT

This weight-integrated, jacket style BC is the latest addition to the highly successful family of "Pro" BCs. Those that dive with Pro LT will benefit from the quality and knowledge that Aqua Lung and SeaQuest have developed in BC design and construction over the last four decades. It packs features, style and durability into an affordable package.

CHARACTERISTICS:

- Weight integration features the SureLock™II (patented) mechanical lock and release mechanism. The weight pockets align themselves. Just insert the pocket until it "clicks". A simple, single-pull release is all that is needed to jettison the weights in an emergency.
- A new, proprietary backpack has a built in traction pad to reduce tank slippage as well as a built in carrying handle.
- Two large lobe pockets are secured with heavy-duty zippers complete with zipper pull tabs
- A scooped octo-pocket on the top front of the right lobe makes it easy to stow and deploy an octopus. The octopus remains visible and accessible throughout the dive
- Some divers may find it useful to run their instruments behind the left lobe pocket and out the scooped instrument pocket on the top front of the left lobe

- Features 4 stainless steel flat d-rings to attach accessories.
- Includes attachment grommets for knife
- The Pro LT has an adjustable waistband to accommodate varying waistlines
- Positioning strap allows you to set the Pro QD at the perfect height each time
- Right shoulder pull dump
- Lower right dump for head down orientation
- Chest strap for added security
- 2 non-ditchable weight pockets on tank band
- Optional accessories include the Airsource, Squeeze lock knife and reflector kit

Type of BC: ADV style, weight-integrated, wrap-around jacket

Type of Fabrics: Outer bladder is fade resistant 500D Armor™ Cordura®. Inner bladder is 420D urethane coated nylon assorted fade resistant polyesters and mesh

Ditchable Weight:

XS – ML hold up to 20 lbs. (9kg)

L & XL hold up to 32 lbs. (14.5 kg)

Non-ditchable Trim Weight: All sizes hold up to 10 lbs. / 4.5 kg of weight in two pockets on rear tank band

Lift Capacity (Lbs/N): XS-24/100, SM-27/120, MD-29/120, ML-33/140, LG-44/190, XL-55/240.

Sizes: XS, S, M, ML, L, XL.

DIMENSION I3

A back inflation unit with an integrated i3 system! The Dimension i3 is innovative, stylish, loaded with features, built with high quality materials and extremely comfortable. It is for the recreational diver who wants to be streamlined by placing the air cell behind them.

CHARACTERISTICS:

- i3 Control System
- Pull Down Oral Inflator
- Flat e-valves.
- Wrapture™ Support System. A sheet of LDPE plastic wraps around your body for comfort and

stability. Works in conjunction with the shoulder swivel buckles (patented). Functions like a tri-loader (Balance) but more comfortable. Supports the weight pockets. Keeps back pad pulled in against your back. Prevents ride-up.

- SureLock II
- Hose routing system
- 6 D-rings
- Pocket within a pocket: A large utility pocket is found on the right side. Lift the hook and loop flap to drop the pocket down and double its capacity. A smaller security pocket is located on the pocket flap of the larger pocket.
- Octo Pocket.

LOTUS I3

The 2013 version of Lotus changes colors. This back flotation BC with the i3 system is now available with neutral colors to perfectly match with all Aqua Lung products. The Lotus is innovative, stylish and very comfortable. Perfect for divers who wish to evolve in comfort.

CHARACTERISTICS:

- i3 Control System
- Pull Down Oral Inflator
- Flat e-valves.
- Wrapture™ Support System. A sheet of LDPE plastic wraps around your body for comfort and

stability. Works in conjunction with the shoulder swivel buckles (patented). Functions like a triloader (Balance) but more comfortable. Supports the weight pockets. Keeps back pad pulled in against your back. Prevents ride-up.

WAVE

The Wave and Wave Jr. BCs have been completely redesigned compared to 2007. While they still retain their rugged, fade resistant materials, they have been refreshed with exciting new cosmetics and additional features.

CHARACTERISTICS:

- Easy-to-use, integrated Octo-Pocket™ (patent pending).
- Right shoulder pull dump, lower right pull dump.

- The hook and loop waistband is adjustable and removable.
- Chest strap.
- 2 large, hook and loop pockets.
- 2 D-rings.
- 6 sizes - color-coded for easy identification in rental lockers and schools.

Colors: Black/Silver
Lift in l: XS: 11; S: 13; M: 16; ML: 16; L: 18; XL: 22

SOUL I3

The Soul i3 is a luxury BC dedicated for women. It incorporates Aqua Lung's most comfortable harness system to date, the **Wrapture Harness™**. It is equipped with the **i3 inflator and new tank band and buckle system GripLock™**. The Souli3 replaces Pearli3. The advanced Air Cell technology used to manufacture the jacket offers the best of ADV jacket style and back inflation unit, it gives women optimum buoyancy in all sizes. The exclusive system of inflation and deflation i3 takes graphics and colors of the women's line.

CARACTERISTICS:

- One Octo pocket
- One Octo D-ring
- One large deployable utility pocket a small zippered pocket on the flap.
- One zippered utility pocket on left with a ring to attach the keys
- On the eyelets for attaching a knife
- One pocket tool (console / gauge)
- 7 D-rings.

PEARL

2013 version embraces the color codes of the women's line. The sport bra are updated with neoprene for a better fit of the chest when the BC is used with just a swimsuit.

Aqua Lung is proud to support Breast Cancer Research to help find the cure. 

- An envelope running all around the back pack,
- Scalloped lower edges to rise above the hips,
- Hybrid air cell combining the best features of a jacket style and a back inflation unit
- flat E-Valves
- SureLock™II weight pockets
- Attachment grommets for knives.

CARACTERISTICS:

- Sleeker, low profile lobes,

ZUMA MIDNIGHT

After 3 years of use, Zuma changes its look. It will now be less typical and will match with many products in the Aqua Lung range.

- Only 4 sizes are all that's needed to cover from XXS to XXL
- Adjustable chest strap
- The two buckles ride on a rail system allowing the strap to be raised or lowered.
- Proprietary flat e-valves mean less bulk
- Fold-down, easy-access pocket
- Features 4 D-rings to attach accessories.
- Includes attachment grommets for knife
- Right shoulder pull dump
- Lower right pull dump
- Sculpted padded shoulders
- Padded spine and lumbar support
- Optional non-ditch weight pockets that mount on the tank band
- Other options include the Airsource, Squeeze lock knife and reflector kit.

CARACTERISTICS:

- Extremely lightweight
- Size ML/LG weighs less than 2 kg (4.4 lbs)
- Great packability – flat or rolled
- Weight integration features the SureLock™II (patented) mechanical lock and release mechanism. The weight pockets align themselves. Just insert the pocket until it “clicks”. A simple, single-pull release is all that is needed to jettison the weights in an emergency.
- Innovative tank support system eliminates the need for a hard pack
- Lower tank band aligns with waist band
- A valve strap pulls the top of the cylinder in towards your center of gravity. This relieves the shoulders and transfers the load to the hips

SEMI DRY 8MM SOLA FX

8mm ultrastrech neoprene jumpsuit with front zipper and hood. A new way to dive in cold water and keep warm. The torso is 8mm, arms and legs for ease of movement are 7mm. Autovent hood allows air to escape over the cold water enters.

The "Plasmaloc" zipper has tighter tolerances and a unique integrated tooth design that make the zipper more water resistant. Skin-in" gasket seals in the forearms and calves minimize water entry.

TRI-LIGHT & TRI-LIGHT PRO

TRI-LIGHT. This is an entry level dry suit with an excellent value money. It features a generous cut in order to use all types of undergarments including thick ones for very cold water.

TRI-LIGHT PRO. This is mid range dry suit is equipped with a front zipper that allows diver to be dressed by himself. It features a generous cut in order to use all types of undergarments including thick ones for very cold water.

- Tri-laminated dry suit in HB 172 nylon type, with different thicknesses - 200gm outside for good wearing resistance and 90gm2 outside for more flexibility. This unique blend combines flexibility, strength and lightness.
- The collar and wrist seals are made in latex.

- Very long metallic BDM dry zipper Fermeture.
- The TriLight has some internal suspenders.
- Automatic bending at the waist thanks to a bungee for a snug fit of the suit.
- Reflective panels are placed on the shoulders and the top of the hood for a perfect sign of the diver.
- Two self draining cargo pockets with a velcro® closure are located on the two legs.
- The Apeks rotating inflator is positioned perfectly, and whatever is the house routing.
- The slim Apeks purge valve can fully control the buoyancy of the suit
- Vulcanized boots and reinforced with non-slip soles.
- It is available in 7 sizes from S to double XL.

FUSION TECH WITH SLT

The "Heavy Duty" skin material offers extreme flexibility and perfectly maintains the "DryCORE" inside while providing excellent resistance to abrasion. Tech skin incorporates 1mm neoprene in high wear areas providing durability, while strategically placed lycra stretch panels provide incredible flexibility. The result is a dry suit which is unmatched in flexibility, incredibly lightweight.

Delivered without hood and bag.

SLT: This technology enables quick and simple locking sleeves and collars. This device consists of a retaining device consisting of a ring and compression seals. Simple, innovative and practical, the SLT provides a quick and easy change sleeves and collars worn or torn. SLT has the distinction of using silicone collars and wrist seals for comfort.

SHOT FX

A fin entirely designed for women. The foot pocket is thinner and shorter to perfectly fit the contours of the foot. The inner sole grip keeps the foot in place. The V booster controls power and nervousness and

perfectly match the strength. A spring strap allows simple don, fast and without adjustment.

X SHOT

The Xshot integrates the power zone and the V Booster technology. They are inspired by the famous Slingshot fins. This area is the connection between foot pocket and the blade, it transmits all the kicking energy. A special insert in the middle

of the blade creates a maximum spoon effect for optimum propulsion without sideslip. A spring strap allows simple implementation, fast and without adjustment.

SLINGSHOT

The Slingshot™ will make diving more comfortable, efficient and fun. Its innovations include Power Bands, Gear Shift and Mid-foot Flex Joint that all add up to provide a wonderful diving experience.

Power Bands:

- Pure silicone Power Bands are loaded with energy on the power stroke. They release their energy prior to the upstroke to provide an added boost of power.
- Instead of wasting your energy, you accumulate it and reclaim it!
- Power bands lessen fatigue and add thrust

Gear Shift:

- 3-speed Gear Shift customizes your speed to effort ratio to fit the specific conditions of your dive.

- Three different settings are available.
- Easy to shift during the dive, even with gloves.

Mid-foot Flex Joint:

- The blade is attached to the foot pocket using two Mid-foot Flex Joint.
- This takes the strain off the toes and the top of the ankle. The result is a dramatic improvement in comfort.
- You can now use the entire foot to power the fin rather than just the front half of the foot.
- Provides the blade a significantly larger range of motion, often up to 5 times that of a conventional fin.

CARAVELLE ADJ

Lightweight full foot pocket fin.

- Made of thermoplastic material, providing an extraordinary flexibility.
- Fin blade extends under the heel, making an integral unit with the foot pocket for greater strength.

- The thin but strong fin blade is completely edged with rubber to provide maximum active and passive propulsion.
- Sizes: 28 up to 47.
- Colors: Metallic Blue, Neon Yellow, and Silver.

NEW

STRATOS ADJ

A new look for this robust and powerful fin.... The new contour of the blade and the side ribs have been changed and made with a new material for more flexibility and performance.

Technical Features:

- Bi-material engineered side ribs and blade
- Bi-material full pocket
- Power transmission zone
- Bending zone: allows the blade to quickly reach

the optimal inclination for propulsion and water channelling

- Quick release buckles
- Ergonomic strap
- Anti-slip rubber pads on the foot pocket back
- Colors available: Blue, Yellow (Deep Color Technology), Orange (Deep Color Technology)
- Deep Color Technology: high visible colors underwater (yellow and orange)

HOTSHOT

Probably the most comfortable and compact fin ever designed.

- A unique Fin, Have a fun time with it! Comfortable, Compact and Powerful.
- Comfo-Strap (Buckles free) : The self adjusting Comfo- Strap guarantees a perfect fit in diving as well as snorkeling activities. Aqua Lung Comfo-Strap is made of a particularly kind of elastomer able to guarantee the best comfort possible.
- Foot Pocket : ceiling and lateral walls soft and cosy to the touch. Enriched with anti-slip grooves. It allows use with bare feet or, if need be, 3 mm. sockets.
- Anti-slip rubber plaques
- Comes in Palm Green/ Charcoal/ Grey color in coordination with Aqua Lung Travel Line and in three sizes: Small, Regular and Large
- Hot Shot is an extremely light fin ideal for scuba as well as snorkeling trips
- The most advanced techno-polymers have been used and optimized to realize this product.

- Kiss your baggage fees goodbye... It is impossible to fit a normal scuba fin into your hand luggage and avoid consequent check-in charges
- The Hot Shot is different! It measures only 53 centimetres/20,9 inch. It is flexible and can be packed into your hand bag. It weights only 1,49 Kg./ 3.28 lbs (one pair size Regular).
- Power : Blade, side ribs and foot pocket materials have been engineered to maximize performance. The blade is made of a semi rigid customized technopolymer compound. The target has been to obtain an excellent spring effect and flexibility to maximize thrust. The rubberized ribs are made of two different elastomeric compounds to grant the greatest elasticity.
- Hot Shot offers power, versatility and comfort : Hot Shot is geared with power bands. These pure silicon slings are loaded with energy during the power stroke. They release their energy prior to the upstroke.

fins

EXPRESS ADJ

“Adjustable fins have a new revolutionary icon”

Main features:

- Large blade, elastically linked to the shoe-tip (Slingshot effect).
- Elastic rubberized zone in the fullfoot tip, it allows the fin's blade to bend to the optimum angle to

- obtain a positive thrust from the complete surface of the blade. Once loaded with energy on the power stroke, it will release the energy prior to the upstroke to provide an added boost of power.
- A new way of making diving more comfortable, efficient and fun.

MICROMASK

The smallest and the lightest diving mask. Less than 100 cm³ and less than 150 g.

- 2 lenses mask : An extremely low volume and a low profile resulting in excellent horizontal and vertical angle of view.
- Tempered glasses – ANSI/DEMA standards. Perfect impact resistance.
- Hypoallergenic silicone skirt fits with double lips. Reduce the risks of irritation, ensure a perfect sealing.
- Cardanic joint buckles: the patented “double joint” buckles rotate both up-and-down and in-and-out.

They provide maximum adaptability and comfort to any head shape.

- New push buttons buckles system : to reduce the length: pull on the strap. To release the strap: push on the 2 buttons.
- Large head strap : greater stability. Perfect fit and great comfort of wearing

The Micromask is perfect for apnea and spare fishing. Thanks to its small size, it can be used as a back up mask. It will be able to be placed in a BC pocket.

LINEA

The Linea uses the Micromask technology. It is very close to the face, has a very low volume and is extremely lightweight. In addition with a single glass the Linea offers a maximum field of vision.

- The AFT skirt (Advanced Fit Technology) allows to offer on the same skirt different textures to

achieve an absolute seal.

- The wrapping around seal enhances comfort and reduces skin marks.
- CBS buckles can no longer get stuck the hair when adjusting the strap.

LOOK

Classic and elegant, put forward again the Look formula in a modern fashion with added technical features. The inclined-to-the-cheeks frame design produces a mask with an excellent view upwards and downwards. New colours matching with Techni-sub/Aqua Lung catalog.

Characteristics:

- Double lens, 3 mm tempered glass. New twin buttons seeger release system, it make glass locking rings removal quick, safe and easy.
- Pure silicon mask skirt. Look2 - this skirt has

the same shape and dimensions of the actual LOOK mask; and Look2 Midi - a skirt designed for smaller faces and for free diving, it fits like the Micromask skirt.

- Twin button seeger release system
- Cardanic joint buckles (double joint buckles) rotate both up-and-down and in-and-out
- Quick counterposed push button activation is easy to use even when wearing gloves
- Wide headpiece on silicone strap provides stability and comfort.
- Weight: 185 gr (classic) 180 gr (midi)
