

# Organization

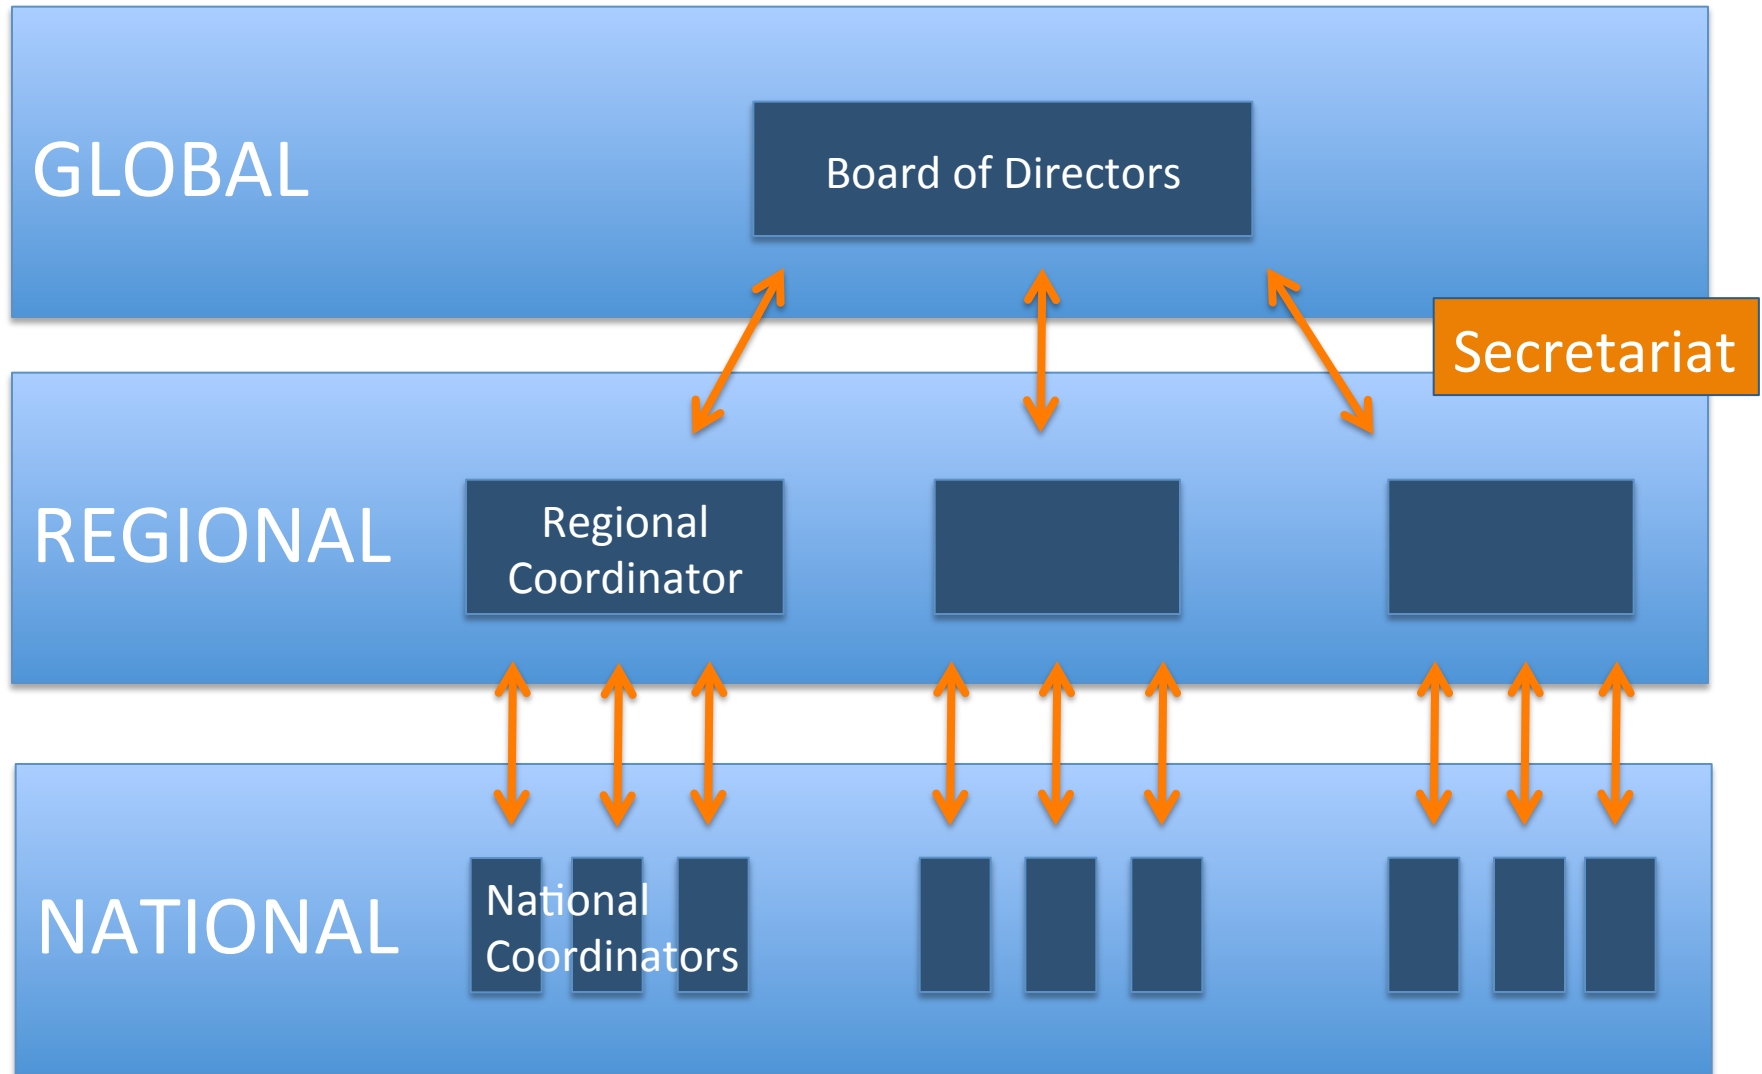

# Formation of the ICCIDD Global Network

- ICCIDD Inaugural Meeting 1986 in Kathmandu, Nepal. Working closely with national governments and partners, including UNICEF, WHO, MI and GAIN, ICCIDD helped spur the global effort to control IDD for 25 years
- The Network for Sustained Elimination of Iodine Deficiency launched in 2002 at the U.N. Special Session for Children. A global coalition of public, private, international, civic organizations that supported salt iodization.
- In 2012, the **ICCIDD Global Network** was formed from these two organizations. This powerful new alliance includes all global stakeholders and shares a common agenda: the goal of sustained elimination of IDD.
