ADD THEME SUPPORT

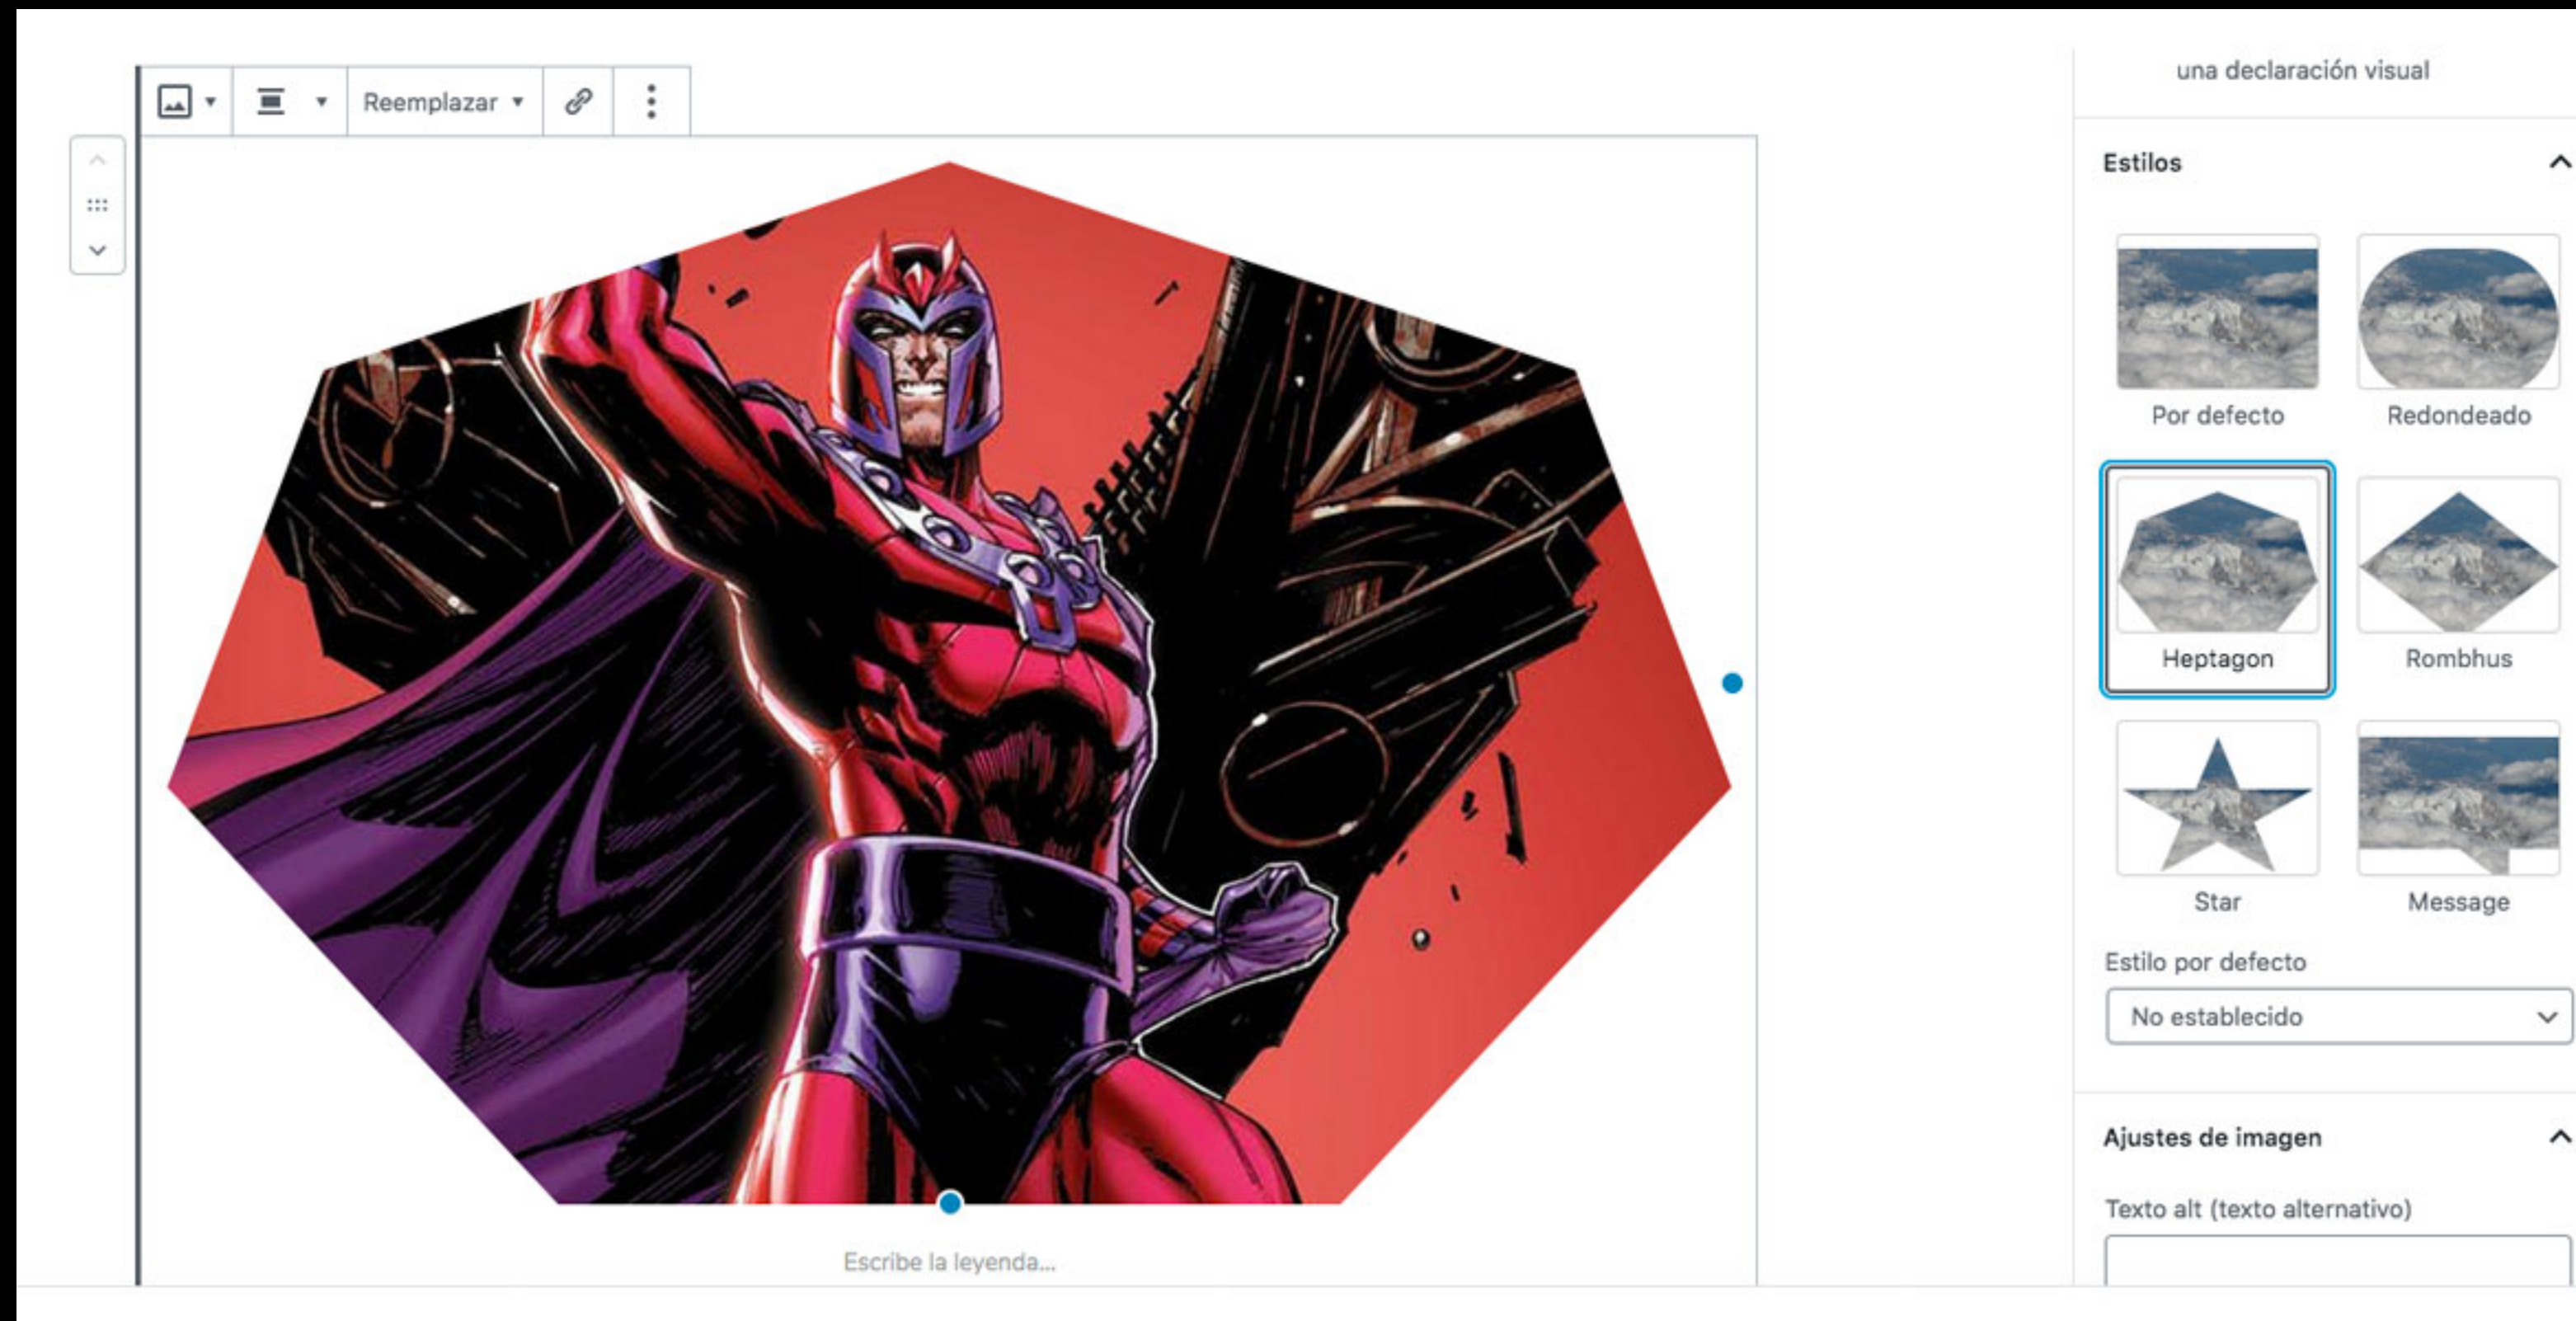

-  Estilos de los bloques por defecto del core de WordPress
-  Alineamiento amplio y completo de los bloques
-  Paleta de color personalizada
-  Tamaño de fuente personalizada
-  Deshabilitar color personalizado, tamaño de fuente
-  Estilo oscuro del editor
-  Encolar estilos en el editor
-  Cambiar el ancho del editor
-  Contenidos incrustados responsive

BLOCK GRADIENTS

 `add_theme_support('editor-gradient-presets');`

ESTILOS DE BLOQUE

The image shows a screenshot of a social media image editor. The main canvas displays a comic book illustration of Magneto, a character with a red and purple suit and a purple cape, set against a red background. The image is cropped into a heptagon shape. Above the image is a toolbar with icons for image manipulation and a dropdown menu labeled "Reemplazar". Below the image is a text input field with the placeholder "Escribe la leyenda...". To the right of the image is a sidebar with the following sections:

- una declaración visual**
- Estilos** (with an expand/collapse arrow):
 - Por defecto (Default)
 - Redondeado (Rounded)
 - Heptagon (Selected)
 - Rombhus (Rhombus)
 - Star
 - Message
- Estilo por defecto**: A dropdown menu currently set to "No establecido".
- Ajustes de imagen** (with an expand/collapse arrow):
 - Texto alt (texto alternativo): An empty text input field.

¿QUÉ DEBO APRENDER?

- 📦 **Block API - función `registerBlockType()`;**
- 📦 **Filter Reference - Hooks (Actions & Filters)**
- 📦 **SlotFills - Componentes del editor (Ajustes del bloque, Sidebar, etc)**
- 📦 **RichText - Estilo y formato de los bloques editables**

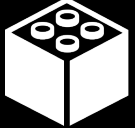

BLOCK EDITOR HANDBOOK

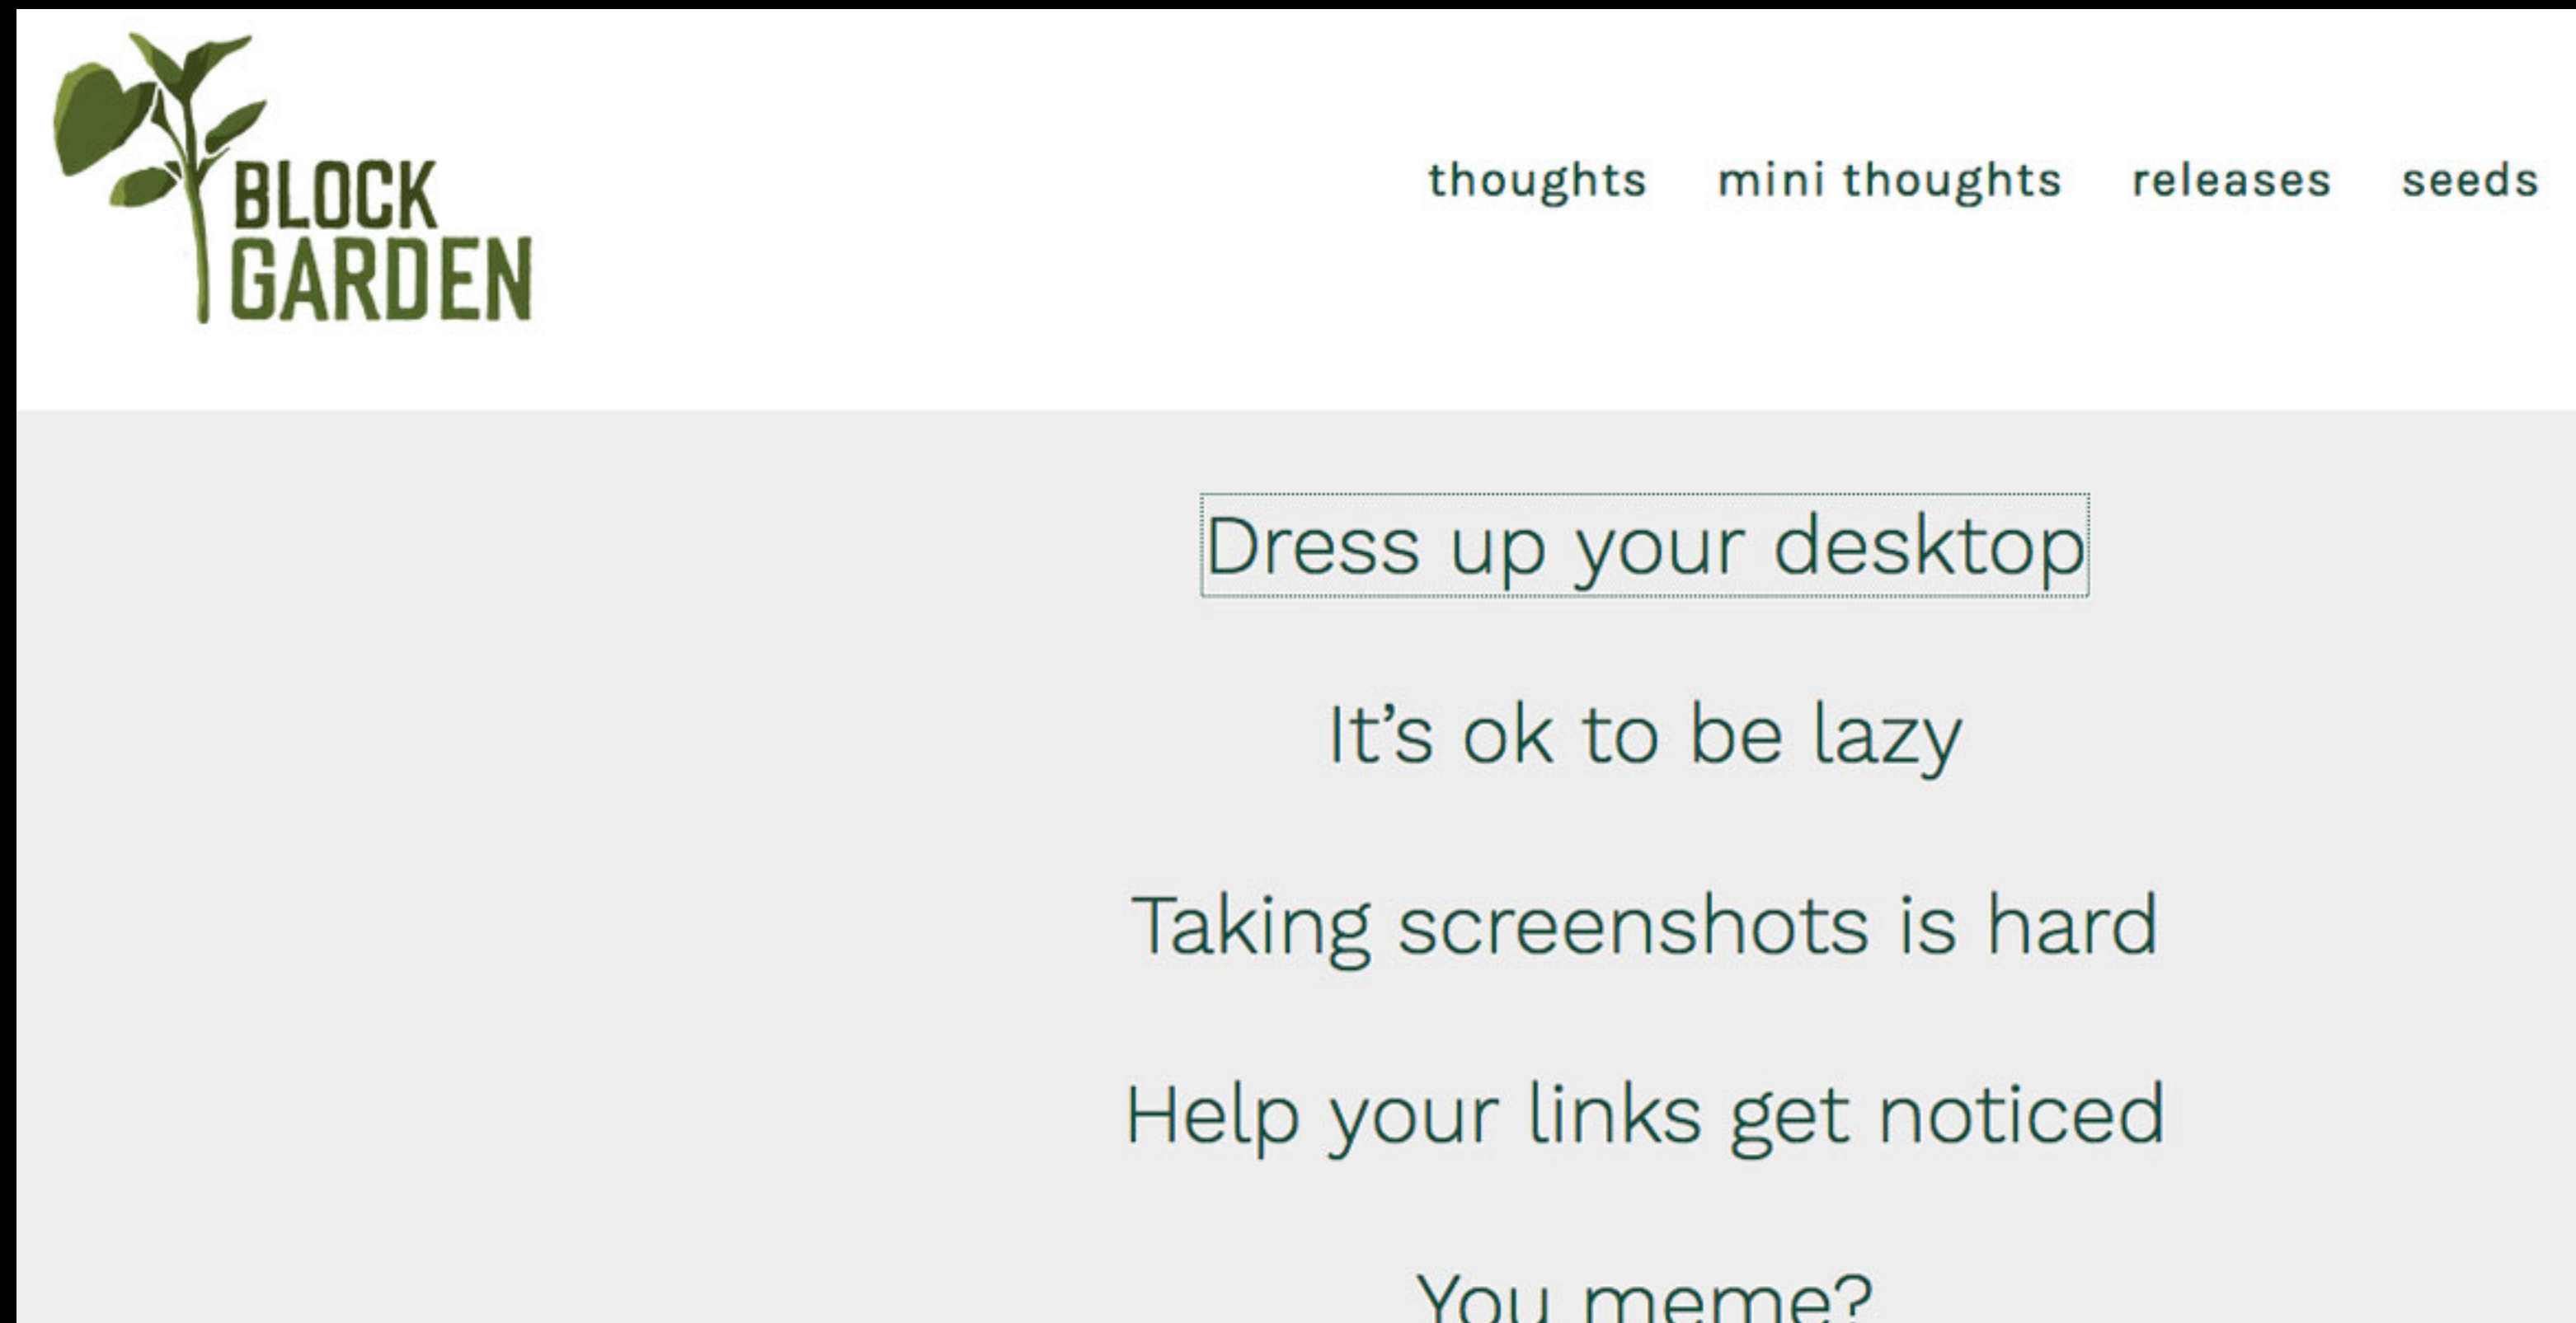

<https://developer.wordpress.org/block-editor/>

The screenshot shows the 'Block Editor Handbook' website. The main header is 'Block Editor Handbook'. Below it is a search bar and a navigation menu under 'CHAPTERS'. The 'Developer Documentation' section is expanded, showing sub-sections like 'Block API Reference', 'Filter Reference', 'SlotFills Reference', 'RichText Reference', 'Internationalization', 'Accessibility', and 'Feature Flags'. The main content area is titled 'Developer Documentation' with an 'Edit' button. The text describes the new editor's flexibility and introduces 'Creating Blocks #', explaining that the main extensibility API is the Block API, used for creating static blocks and dynamic blocks. It also mentions the 'Blocks Tutorial' as a resource for learning more about block creation. A 'Top ↑' link is provided. The 'Extending Blocks #' section is partially visible at the bottom.
