# TELEHEALTH: INCREASING ACCESS TO MENTAL HEALTH SERVICES FOR RURAL CHILDBEARING WOMEN

## METHODS AND PROCESS

- Three rural public health district collaborators
- Implemented universal electronic screening for PD
- Screening: electronic tablet at the public health clinic with data collection via REDCap
- On-the-spot interpretation of scores; education and resources
- Screen positive: invited to videoconference group facilitated by a mental health professional
- Individual one-on-one mental health services available as needed
- Women attend from location they chose
- All urgent mental health issues addressed locally
- Utah Telehealth Network – videoconference platform
