Innovations for Poverty Action

Consent form

My name is _____. I am working with Innovations for Poverty Action, a research NGO based in Busia and Kisumu. We are conducting a research study on the impact of cash transfers on young women. We plan to survey approximately 160 households in Siaya District and have selected you because you meet our criteria of being 18-19 years old and living in a grass-thatched hut.

We have obtained the approval from the chiefs and assistant chiefs in this area for conducting this study. If you agree to participate, we will enter your name into a lottery. Half of the names will be randomly selected to receive a cash transfer. Regardless of whether your name is selected, we will provide you with a Ksh 50 gift as a token of our appreciation for your time. There are no foreseeable risks to you or your family if you participate in this study. You may find some questions intrusive. However, you do not have to answer any question that makes you feel uncomfortable.

After the interview, I will keep everything you tell me completely confidential. I will also keep you and your family's names confidential, and I will not tell anyone that you have talked to me. Any report about this research will not contain any information such as your name that could be used to identify you.

Although the chiefs and assistant chiefs are supporting us in this study, the individual information we collect from you will not be shared with them. However, we will keep this information stored after the study is finished, since we may want to follow up with you in the future. Refusing to participate or discontinuing participation will involve no penalty. If you have any problems with this interview, you can stop talking with me at any time, and you can contact members of the field management team, whose contact information is included with this form.

Do you consent to participate in this study? If so, please sign your name below.
