Experience

- 2020– Associate professor (with tenure), **ETH Zürich**, Switzerland

I bootstrapped the *Networked Systems Group* within the Information Technology and Electrical Engineering department (D-ITET).
- 2012–2014 Postdoctoral research associate, **Princeton University**, New Jersey, USA
I collaborated with Prof. Jennifer Rexford on developing new abstractions on top of Software Defined Networks (SDN) to enable better network management.
- My projects included:
- Applying SDN design principles to cellular networks and Internet routing (BGP),
 - Developing techniques and tools to upgrade SDN controllers in a disruption-free manner,
 - Developing transition mechanisms to deploy SDN within traditional IP networks,
 - Scaling Internet routing through filtering without requiring global coordination.
- 2012–2014 Research advisor, **Princeton University**, New Jersey, USA
I advised three graduate students working on cellular core networks and Internet Exchange Points, as well as one undergraduate student working on SDN.

- Oct–Nov 2011 Visiting researcher, **Roma Tre University**, Rome, Italy
I implemented a reconfiguration framework and performed large-scale network analysis.
- Feb–Mar 2011 Visiting researcher, **Internet Initiative Japan Innovation Institute**, Tokyo, Japan
I developed and validated seamless reconfiguration mechanisms for both IGP and BGP.
- Summer 2007 Intern, **Belgian national research network** (BELNET), Brussels, Belgium
I collaborated on the design and on the implementation of Quality of Service in the network.
At the end of my internship, the project was successfully deployed.
- 2007–2015 Project leader, **Alain & Evelyne Morel de Westgaver Art Auctions**, Brussels, Belgium
I designed and implemented a live auction management software. Between 2007 and 2015,
I have provided customer support and extended the software which is still used daily. I have
also actively collaborated in the organization and the operation of 3 to 4 art auctions per year.
