

California Health in All Policies Task Force: 2010 Healthy Communities Framework (HCF)

Background:

The California Health in All Policies (HiAP) Task Forceⁱ developed the Healthy Communities Framework through extensive input through public workshops and consultation with over 20 state departments and agencies. Since its development, the framework has served as a guide for HiAP Task Force activities.

In 2012, the California Strategic Growth Council (SGC) provided funding to the California Department of Public Health (CDPH) to develop the [Healthy Community Data and Indicators \(HCI\)](#), which operationalizes the Framework and provides a standardized set of statistical measures, data, and tools that a broad array of sectors can use for planning healthy communities and evaluating the impact of plans, projects, policy, and environmental changes on community health.
