EXECUTIVE SUMMARY

The goal of the present document is to facilitate the implementation of the Opengela Program in the Basque Country, exposing its operational characteristics, and main milestones and indicators to guide the Program's scalability.

The information provided is based on the subtasks developed within T2.4 'Specific Requirements Gathering', attached to this document, where the following subtasks analyze the main aspects:

- 'Legal and Administrative Regulation'
- 'Social Dimension'
- 'Technical Aspects'
- 'Legal Framework and investment strategy for the Financial Instrument'
- 'Results and Impact Monitoring'
- 'Regional Coordination Board'

According to the Opengela Program, the main goal is to promote urban regeneration in the Basque Country, through the implementation of validated actions to advance towards an eco-sustainable housing stock, highlighting the potential social, economic and environmental impact, aligned with the policies and priorities of the Basque Government.

With this approach, Opengela contributes to the urban regeneration sector, so that it becomes a driving force for economic recovery (with a particular focus on the creation of local job), being both environmentally and socially sustainable in CAPV.
