

Chlamydia

 Chlamydia is very common.
1 in 4 Native girls will get chlamydia sometime in their teens.

 Most people who have chlamydia have NO signs or symptoms, but they can still pass it on.

 Why Worry? **Get TESTED!**
A simple urine test can tell if you have chlamydia,
and it is easily cured with antibiotics!

 Protect yourself and your partner.
If you are sexually active, you should be
screened for STDs at least once a year.
