

- GET TESTED FOR STDs/HIV. ESPECIALLY BEFORE STARTING A NEW RELATIONSHIP.
- USE A CONDOM EVERY TIME YOU HAVE SEX: FOR EVERY KIND OF SEX – ORAL. VAGINAL. ANAL. WHATEVER.
- AVOID DRUGS AND ALCOHOL. THEY MESS WITH YOUR JUDGEMENT AND CAN LEAD TO UNPROTECTED SEX.
- NEVER SHARE NEEDLES. NEVER.
- TALK TO YOUR PARTNER ABOUT CONDOMS AND STD/HIV TESTING. PLAN THE CONVERSATION. AND START IT BEFORE THINGS GET HOT AND HEAVY.
- EXPLAIN IT ISN'T ABOUT TRUST. YOU'VE BEEN READING UP. AND MANY PEOPLE WITH STDs OR HIV DON'T EVEN KNOW THEY HAVE IT.

WE R NATIVE. WE R PROUD.
WE ARE STD/HIV TESTED.

**GETTING TESTED FOR STDs/HIV
CAN PROTECT YOU AND THOSE
YOU LOVE.**

Find your nearest testing site at
Get Yourself Tested (www.GYTNOW.org).
