

IMPC

International Mouse Phenotyping Consortium

ARE YOU
INTERESTED IN
A PARTICULAR
GENE?

Creating a Comprehensive Catalogue of Mammalian Gene Functions

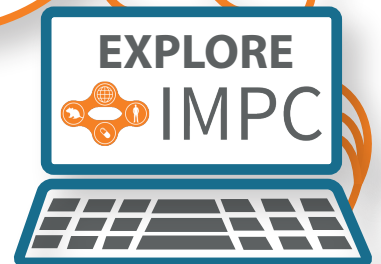

The IMPC is creating knockout mouse lines for every single protein coding gene in the mouse genome, and characterising them through standardised, quality-controlled phenotyping tests.

See the phenotypes for thousands of gene knockouts. Free database includes raw data, statistics, images, disease associations and interactive embryo viewer.

Search by **gene**, **disease**, or **phenotype** using **free access** to the **IMPC database**

Find **mouse models** of **human diseases**, including **rare diseases**

Order **mice** for **your research**
