

Anxiety & Depression  
Association of America  
Triumphing Through Science, Treatment, and Education

## From the ADAA Board of Directors

June 24, 2022

ADAA echoes the APA's disappointment in today's SCOTUS decision in *Dobbs v. Jackson Women's Health Organization* overturning *Roe v. Wade*.

Research shows women who are going through unwanted pregnancies may suffer from increased mental health issues and risks. We hope that states will provide increased money for counseling, housing, childcare, nutrition, and education for women, children, and their families.

No mother, father, or child should be left behind. We support the American Psychiatric Association's statement which can be read here: <http://ow.ly/e2ls50JGLFp>
