COMMON LICENSES – COMPATIBILITY CHART

How to use this chart [1]

To see if a software can be combined, start at their respective licenses and follow to the license boxes that can be reached by the arrows. An arrow from box A to box B means that you can combine software with these licenses; the combined result effectively has the license of B, possibly with additions from A.

Please note that this is a simplified chart. If you have a specific question about licensing compatibility, please contact us.
